The cheap and thoughtful gift for any occasion such as birthdays, anniversaries, Christmas, Easter e.t.c Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control - from the author of The Laws of Human Nature. In the book that People magazine proclaimed "beguiling" and "fascinating," Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence ("Law 1: Never Outshine the Master"),

others teach the value of confidence ("Law 28: Enter Action with Boldness"), and many recommend absolute self-preservation ("Law 15: Crush Your Enemy Totally"). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, The 48 Laws of Power is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game. Your future self might thank you for writing down your life events. They were driven by the desire to prove themselves. To lead interesting, passionate, meaningful lives. Their stories say one thing loud and clear. You don't need a fancy degree or a rich daddy to dream big and make it happen.

It's all in your head, your heart, your hands. "Leading Digital makes the provocative argument that the next imminent phase of digital technology adoption - driven by the convergence of mobility, analytics, social media, cloud computing, and embedded devices - will make everything that's happened so far look like a prelude. The authors, a trio of highly regarded thought leaders on corporate digital transformation, say changes in the digital realm so far have focused on high tech and media companies - but there's still a whopping 94% of the business economy that needs to change. This book will show them how. George Westerman of MIT, Didier Bonnet of Capgemini Consulting, and Andrew McAfee, also at MIT, say there is opportunity for these businesses to learn from those that have already mastered the digital landscape. Based on a study of more than 400 large, mainstream firms in every industry around the globe, the authors usefully break down how these organizations have used their own digital transformation to gain strategic, competitive advantage. Readers will learn how these digital leaders have transformed their businesses through smart and rigorous digital investments, and through smart and effective leadership of the change. Leading Digital offers practical, real-life tested frameworks that can be instantly applied. Case studies include Nike, Caesars, Burberry, Asian Paints, Pages Jaunes, Codelco, and more"-- Over seven years, 45 of the

world's top investors were given between \$25 and \$150m to invest by fund manager Lee Freeman-Shor. His instructions were simple. There was only one rule. They could only invest in their ten best ideas to make money. It seemed like a foolproof plan to make a lot of money. What could possibly go wrong? These were some of the greatest minds at work in the markets today - from top European hedge fund managers to Wall Street legends. But most of the investors' great ideas actually lost money. Shockingly, a toss of a coin would have been a better method of choosing whether or not to invest in a stock. Nevertheless, despite being wrong most of the time, many of these investors still ended up making a lot of money. How could they be wrong most of the time and still be profitable? The answer lay in their hidden habits of execution, which until now have only been guessed at from the outside world. This book lays bare those secret habits for the first time, explaining them with real-life data, case studies and stories taken from Freeman-Shor's unique position of managing these investors on a day-to-day basis. A riveting read for investors of every level, this book shows you exactly what to do and what not to do when your big idea is losing or winning - and demonstrates conclusively why the most important thing about investing is always the art of execution. Give it your all. Dare to be all you can be. Graduation day is a pivotal moment. After a lifetime of

Told by one of our greatest chroniclers of technology and society, the definitive biography of iconic serial visionary Stewart Brand, from the Merry Pranksters and the generation-defining Whole Earth Catalog to the marriage of environmental consciousness and hacker capitalism and the rise of a new planetary culture—the story behind so many other stories Stewart Brand has long been famous if you know who he is, but for many people outside the counterculture, early computing, or the environmental movement, he is perhaps best known for his famous mantra “Stay Hungry. Stay Foolish.” Steve Jobs’s endorsement of these words as his code to live by is fitting; Brand has played many roles, but one of the most important is as a model for how to live. The contradictions are striking: A blond-haired WASP with a modest family inheritance, Brand went to Exeter and Stanford and was an army veteran, but in California in the 1960s he became an artist and a photographer in the thick of the LSD revolution. While tripping on acid on the roof of his building, he envisioned how valuable it would be for humans to see a photograph of the planet they shared from space, an image that in the end landed on the cover of his Whole Earth Catalog, the defining publication of the counterculture. He married a

Native American woman and was committed to protecting indigenous culture, which connected to a broader environmentalist mission that has been a through line of his life. At the same time, he has outraged purists because of his pragmatic embrace of useful technologies, including nuclear power, in the fight against climate change. The famous tagline promise of his catalog was "Access to Tools"; with rare exceptions he rejected politics for a focus on direct power. It was no wonder, then, that he was early to the promise of the computer revolution and helped define it for the wider world. Brand's life can be hard to fit onto one screen. John Markoff, also a great chronicler of tech culture, has done something extraordinary in unfolding the rich, twisting story of Brand's life against its proper landscape. As Markoff makes marvelously clear, the streams of individualism, respect for science, environmentalism, and Eastern and indigenous thought that flow through Brand's entire life form a powerful gestalt, a California state of mind that has a hegemonic power to this day. His way of thinking embraces a true planetary consciousness that may be the best hope we humans collectively have. "From modest beginnings in Mumbai's Grant Road, surrounded by the energy and unbridled potential of a country always on the verge of greatness, Ronnie Screwvala is a first-generation entrepreneur. His early days, in front of the camera and on

stage, inspired him to pioneer cable TV in India, and build one of the largest toothbrush manufacturing operations before starting UTV, a media and entertainment conglomerate spanning television, digital content, mobile, broadcasting, games and motion pictures, which he divested to The Walt Disney Company in 2012. Newsweek termed him the Jack Warner of India, Esquire rated him as one of the 75 Most Influential People of the 21st Century and Fortune as Asia's 25 Most Powerful. On to his second innings, Ronnie is driven by his interest in championing entrepreneurship in India, and is focused on building his next set of ground-up businesses in high growth and impact sectors. His more recent commitment to being a first mover in sports has made him lend his support to kabaddi and football. He is passionate about social welfare and, with his wife Zarina and through their Swades Foundation, has given single-minded focus to empowering one million lives in rural India every 5-6 years through a unique 360-degree model. He lives in Mumbai with Zarina and daughter Trishya." Stay Hungry. Stay Foolish. This is a synopsis of a quote by Steward Brand, An American writer best known as the editor of Whole Earth Catalog, popularized and live by technology icon - Steve Jobs. The uncovers two conscious statements by Steve that defined him, his moments, and his place in the history book. It also presented sample opinion with analysis of about 3 dozen

people from different parts of the world on how they'd interpret the now historic quote: "Stay Hungry. Stay Foolish". It is expected that this book serve as a source of inspiration to people around who want to make a difference, and a tribute to the man whose company, Apple, redefined the 'forbidden fruit'.
