***This edited collection contains six refreshing critical assessments of the leisure-sport relationship from societies that have staged the Olympic and Paralympic Games and contains valuable information for those who live in societies that aspire to host the Games. The collection begins and ends with discussions of the Olympic Games as a platform for protest. The first and last chapters consider the changing political relationships from 1968 in Mexico City, when one of the most politically-charged gestures ever made by athletes took place, and the campaigns surrounding the ethical responsibilities of those hosting the Olympics in London in 2012. Other chapters consider the sociocultural legacy of the Seoul Olympics, assess the likely regeneration legacies of the London 2012 Games, examine the relationship between hosting societies and indigenous cultures and analyse the effectiveness and appeal of Olympic mascots. This***

***Mathematics Classroom is unique as it addresses a focused theme on mathematics education. The objective is to encourage teachers and researchers to include assessment of non-cognitive attributes and to use techniques in addition to paper-and-pencil tests that focus on typical problems. Several renowned international researchers in the field have published their work in the book. The thirteen chapters of the book illustrate evidence-based practices that school teachers and researchers can experiment in their lessons to bring about meaningful learning outcomes. A recurring theme in most chapters is the widely circulated notions of formative assessment and assessment for learning. The book makes a significant contribution towards assessment in mathematics. It is a good resource for research students and a must-read mathematics educators.***

***short life span. He never behaved as if his life was going to end soon; crippled body but resolve of steel! The complexity of disability could not touch him even from a distance.” This is a tale about an extraordinary individual, Sumit, who fought bravely till his last breath. It is often rare to come across resilient souls, persevering in doing their best at whatever reality throws at them. One could ask that how a boy, suffering from a rare disease, even dream of reaching institutes of eminence and compete with the best students in the country? How could he have maintained his cool knowing that his end was near? He might have ultimately left us but his refreshing attitude towards life lives on. He was indeed, a true Karmayogi!***
