Competing for Global Talent Feb 23 2020 Global talent has never been more mobile or sought after. A complex phenomenon that takes many forms, the movement of people with skills includes migrants crossing borders for temporary stays abroad as well as settlement, students moving for degrees and temporary and permanent stays, and even tourists and refugees who decide to stay abroad and use their skills. Countries attracting global talent increase their stock of human and technological skills, and in the past decade many have welcomed foreign professionals and students to redress domestic skill shortages and to quicken economic growth. This book includes general and theoretical papers on skilled migration and also papers on the country experiences of Australia, India, Japan, Singapore, the United Kingdom, and the United States. It addresses the socio-economic and cultural challenges created by increased mobility in a world where globalizing and localizing forces are at work simultaneously

From Poverty to Power Jul 22 2022 Offers a look at the causes and effects of poverty and inequality, as well as the possible solutions. This title features research, human stories, statistics, and compelling arguments. It discusses about the world we live in and how we can make it a better place.

Good Growth and Governance in Africa Jun 21 2022 This volume reflects the highlights of their deliberations.

The End of Poverty Feb 17 2022 Hailed by The New York Times as probably the most important economist in the world, Jeffrey Sachs is internationally renowned for his work around the globe advising economies in crisis. Now he draws on all he has learned from twenty-five years of work to offer a uniquely informed vision of the keys to economic success in the world today and the steps that are necessary to achieve prosperity for all. Marrying vivid, passionate storytelling with profound, rigorous analysis, Jeffrey Sachs explains why, over the past two hundred years, wealth has diverged across the planet and why the poorest nations have so far been unable to improve their lot. He explains how to arrive at an in-depth diagnosis of a country's economic challenges and the options it faces. He leads readers along the same learning path he himself followed, telling the stories of his own work in Bolivia, Poland, Russia, India, China and Africa to bring us to a deep understanding of the challenges faced by developing nations in different parts of the world. Finally, he offers an integrated set of solutions to the interwoven economic, political, environmental and social problems that most challenge the world's poorest countries and, indeed, the world. Ultimately, The End of Poverty leaves readers with an understanding, not just of how grave the problem of poverty is, but how solvable it is and why making the necessary effort is a matter of both moral obligation and strategic self-interest of the rich countries. A work of astounding intellectual vision that grows out of unprecedented real-world experience, The End of Poverty is a road map to a safer, more prosperous world for us all.

Advanced Research on Computer Education, Simulation and Modeling Jan 24 2020 This two-volume set (CCIS 175 and CCIS 176) constitutes the refereed proceedings of the International Conference on Computer Education, Simulation and Modeling, CSEM 2011, held in Wuhan, China, in June 2011. The 148 revised full papers presented in both volumes were carefully reviewed and selected from a large number of submissions. The papers cover issues such as multimedia and its application, robotization and automation, mechatronics, computer education, modern education research, control systems, data mining, knowledge management, image processing, communication software, database technology, artificial intelligence, computational intelligence, simulation and modeling, agent based simulation, biomedical visualization, device simulation & modeling, object-oriented simulation, Web and security visualization, vision and visualization, coupling dynamic modeling theory, discretization method, and modeling method research.

Acronyms Abbreviations & Terms - A Capability Assurance Job Aid Nov 21 2019 The FAAT List is not designed to be an authoritative source, merely a handy reference. Inclusion recognizes terminology existence, not legitimacy. Entries known to be obsolete are included because they may still appear in extant publications and correspondence.

Childhood Cancer and Functional Impacts Across the Care Continuum Jan 28 2023 Since the late 1960s, the survival rate in children and adolescents diagnosed with cancer has steadily improved, with a corresponding decline in the cancer-specific death rate. Although the improvements in survival are encouraging, they have come at the cost of acute, chronic, and late adverse effects precipitated by the toxicities associated with the individual or combined use of different types of treatment (e.g., surgery, radiation, chemotherapy). In some cases, the impairments resulting from cancer and its treatment are severe enough to qualify a child for U.S. Social Security Administration disability benefits. At the request of Social Security Administration, Childhood Cancer and Functional Impacts Across the Care Continuum provides current information and findings and conclusions regarding the diagnosis, treatment, and prognosis of selected childhood cancers, including different types of malignant solid tumors, and the effect of those cancers on children's health and functional capacity, including the relative levels of functional limitation typically associated with the cancers and their treatment. This report also provides a summary of selected treatments currently being studied in clinical trials and identifies any limitations on the availability of these treatments, such as whether treatments are available only in certain geographic areas.

Gender and the Economic Crisis May 08 2021 This book maps the emerging impact of the economic crisis on people in different contexts, and suggest policy and practice changes. Authors include researchers as well as policymakers and development practitioners, who analyse the initial impacts of the economic crisis in South and East Asia, Africa, Latin America, and the Middle East.

Lessons Learned from the Fukushima Nuclear Accident for Improving Safety of U.S. Nuclear Plants Mar 06 2021 The March 11, 2011, Great East Japan Earthquake and tsunami sparked a humanitarian disaster in northeastern Japan. They were responsible for more than 15,900 deaths and 2,600 missing persons as well as physical infrastructure damages exceeding \$200 billion. The earthquake and tsunami also initiated a severe nuclear accident at the Fukushima Daiichi Nuclear Power Station. Three of the six reactors at the plant sustained severe core damage and released hydrogen and radioactive materials. Explosion of the released hydrogen damaged three reactor buildings and impeded onsite emergency response efforts. The accident prompted widespread evacuations of local populations, large economic losses, and the eventual shutdown of all nuclear power plants in Japan. "Lessons Learned from the Fukushima Nuclear Accident for Improving Safety and Security of U.S. Nuclear Plants" is a study of the Fukushima Daiichi accident. This report examines the causes of the crisis, the performance of safety systems at the plant, and the responses of its operators following the earthquake and tsunami. The report then considers the lessons that can be learned and their implications for U.S. safety and storage of spent nuclear fuel and high-level waste, commercial nuclear reactor safety and security regulations, and design improvements. "Lessons Learned" makes recommendations to improve plant systems, resources, and operator training to enable effective ad hoc responses to severe accidents. This report's recommendations to incorporate modern risk concepts into safety regulations and improve the nuclear safety culture will help the industry prepare for events that could challenge the design of plant structures and lead to a loss of critical safety functions. In providing a broad-scope, high-level examination of the accident, "Lessons Learned" is meant to complement earlier evaluations by industry and regulators. This in-depth review will be an essential resource for the nuclear power industry, policy makers, and anyone interested in the state of U.S. preparedness and response in the face of crisis situations.

Handbook of Marketing and Society Dec 15 2021 Marketing scholars have a long history of conducting research on how marketing affects the welfare of society. A significant body of knowledge has developed to look beyond marketing's impact on the corporate bottom line towards the affects of marketing on consumer sovereignty, public health, economic growth, and other aspect of societal welfare. The large and growing amount of research has become fragmented and diverse. There is a need for a volume to pull all of this research together to facilitate the assessment of what we have learned and what we need to study further. This volume fills that need! *Handbook of Marketing and Society* presents the first comprehensive, in-depth examination of scholarly research on how marketing affects societal welfare. Drawing on the talents of a distinguished group of contributors, the editors have assembled key reviews, analyses, and perspectives on a broad range of research topics including deceptive advertising, warning labels, trademark infringement, antitrust enforcement, environmental labels, privacy protection, social marketing, and corporate societal marketing. An unifying model is presented in the introduction that illustrates the linkage of marketing knowledge, marketing decisions, and societal welfare. Each chapter covers, in a purposeful way, a different link or path through which marketing can affect societal welfare. Future research needs are identified in each chapter in order to help focus marketing thinking and marketing practice serve society more effectively. Academics, graduate students, and others interested in marketing's role in society will find this a valuable resource and an excellent guidebook for future research.

Globalization and Growth May 28 2020 The volume provides a comprehensive overview of the financial and economic crises of 2008-2009 and the economic and financial policy implications for growth in developing countries.

In a Page Pediatrics, Epz Mar 01 2023

Global Unions Feb 05 2021 To meet the challenges of globalization, unions must improve their understanding of the changing nature of corporate ownership structures and practices, and they must develop alliances and strategies appropriate to the new environment. *Global Unions* includes original research from scholars around the world on the range of innovative strategies that unions use to adapt to different circumstances, industries, countries, and corporations in taking on the challenge of mounting cross-border campaigns against global firms. This collection emerges from a landmark conference where unionists, academics, and representatives of nongovernmental organizations from the Global South and the Global North met to devise strategies for labor to use when confronting the most powerful corporations such as Wal-Mart and Exxon Mobil. The workplaces discussed here include agriculture (bananas), maritime labor (dock workers), manufacturing (apparel, automobiles, medical supplies), food processing, and services (school bus drivers). Kate Bronfenbrenner's introduction sets the stage, followed by contributions describing specific examples from Asia, Latin America, and Europe. Bronfenbrenner's conclusion focuses on the key lessons for strengthening union power in relation to global capital.

Chiropractic Technique Apr 07 2021 The first-ever book to describe the rationale behind adjustment techniques for the spine, pelvis, and extremities, this NEW 2nd edition offers thoroughly revised chapters, new illustrations, a reorganized layout, and extensive updates. The basic anatomical, biomechanical, and pathophysiological principles necessary for applying specific adjustive procedures are discussed in detail. It also offers a fundamental understanding of joint and body mechanics, as well as key evaluative tests and procedures, to help the reader evaluate, select, and utilize the most effective adjustive techniques. Coverage of chiropractic history provides a broad understanding of general concepts and practice. Theory and practice combine to make **CHIROPRACTIC TECHNIQUE, 2ND EDITION** a must-have for anyone seeking a solid foundation in joint examination and chiropractic adjustment. The text is organized by joint system, focusing on practical anatomy, kinematics, evaluation, and technique for each system so each chapter can stand on its own as an independent discussion. Specific evaluative procedures demonstrate how to identify the characteristics of manipulable lesions. Background on the history of chiropractic provides an excellent foundation for joint examination and adjustive techniques. Extensive photos and line drawings vividly illustrate each technique. References throughout the book direct the reader to sources for more detailed information on chapter content. Mechanical principles are addressed, which help the reader understand differences between adjustive procedures and how each should be performed. A convenient list of joints and a joint index are included on the end sheets for quick, easy reference. Authors are well known and well-respected in the chiropractic field. All chapters have been revised and updated to include the latest information available. Joint anatomy and basic biomechanics coverage offers a more clinical focus in this Edition. A New Chapter on mobilization, traction, and soft tissue techniques presents these similar techniques in one chapter, organized according to development and slight variation, for a clear, objective look at each one. A new user-friendly layout arranges content and illustrations so information is accessible and the text is easy-to-read.

Epigenetic Mechanisms in Cancer Mar 18 2022 *Epigenetic Mechanisms in Cancer* provides a comprehensive analysis of epigenetic signatures that govern disease development, progression and metastasis. Epigenetic signatures dictating tumor etiologies present an opportunity for biomarker identification which has broad potential for improving diagnosis, prognosis, prediction, and risk assessment. This volumes offers a unique evaluation of signature differences in childhood, sex-specific and race-specific cancers, and in doing so broadly illuminates the scope of epigenetic biomarkers in clinical environments. Chapters detail the major epigenetic process in humans consisting of DNA methylation, histone modifications and microRNAs (miRNAs) involved in the initiation, progression and metastasis of tumors. Also delineated are recent technologies such as next generation sequencing that are used to identify epigenetic profiles (primarily methylation analysis) in samples (normal, benign and cancerous) and which are highly important to the analysis of epigenetic outcomes. Offers broad coverage that is applicable to audiences in various area of cancer research - population studies, diagnostics, prognosis, prediction, therapy, risk, etc. Provides critical review analysis of the topics that will clarify and delineate the potential roles of epigenetic signatures in cancer management. Covers basic, as well as, clinical areas of epigenetic mechanisms in tumorigenesis.

Features contributions by leading experts in the field Provides comprehensive coverage of current epigenetic signatures involved in the etiology of various cancers and miRNAs

The State of Food Security and Nutrition in the World 2019 Jan 04 2021 The State of Food Security and Nutrition in the World gives updates on the prevalence of undernourishment globally and the absolute number of undernourished, as well as the latest estimates for a number of global nutrition targets. This latest edition looks at the role of economic slowdowns and downturns in the rise of hunger and makes policy recommendations to safeguard food security and nutrition worldwide.

Public Rights, Private Relations Oct 13 2021 The abuse of workers in export processing zones in developing countries, the undignified treatment of elderly people in care homes, and the dangers for internet users' privacy arising from private companies' control of their data are prominent examples of how our most fundamental interests are increasingly jeopardized by powerful private actors. Jean Thomas argues that, while these interests are protected by human and constitutional rights in relation to the state, no similar protections exist in relations among private actors. To address this problem, she develops a theoretical framework for the application of human and constitutional rights among private actors. The author proposes a theory of private liability for public rights violations that allows us to answer the question: who should bear the duties associated with human and constitutional rights in the private sphere? And what do private actors owe one another in respect of the interests protected by these rights? In advancing a model of rights that makes the application of public rights among private actors morally plausible and institutionally feasible, the book also illuminates the broader conceptual question of what rights are.

Update in Pediatric Neuro-Oncology May 20 2022 This Special Issue of Bioengineering explores topics in Pediatric Neuro-Oncology ranging from preclinical modeling to translational research and neurocognitive outcomes. The topics are as below. Radiotherapy advances in pediatric brain tumors; Neurofibromatosis 1 and brain tumors in children; Molecular biology of pediatric gliomas and therapeutic insights; Embryonal tumors of the central nervous system in children-era of targeted therapeutics; Preclinical models in pediatric brain tumors-clinical relevance; Molecular neuroimaging of brain tumors; Palliative care for children with central nervous system malignancies; Neurocognitive and psychosocial outcomes following pediatric brain tumors.

Sustainable healthy diets Jul 10 2021 Considering the detrimental environmental impact of current food systems, and the concerns raised about their sustainability, there is an urgent need to promote diets that are healthy and have low environmental impacts. These diets also need to be socio-culturally acceptable and economically accessible for all. Acknowledging the existence of diverging views on the concepts of sustainable diets and healthy diets, countries have requested guidance from the Food and Agriculture Organization of the United Nations (FAO) and the World Health Organization (WHO) on what constitutes sustainable healthy diets. These guiding principles take a holistic approach to diets; they consider international nutrition recommendations; the environmental cost of food production and consumption; and the adaptability to local social, cultural and economic contexts. This publication aims to support the efforts of countries as they work to transform food systems to deliver on sustainable healthy diets, contributing to the achievement of the SDGs at country level, especially Goals 1 (No Poverty), 2 (Zero Hunger), 3 (Good Health and Well-Being), 4 (Quality Education), 5 (Gender Equality) and 12 (Responsible Consumption and Production) and 13 (Climate Action).

Cold War Germany, the Third World, and the Global Humanitarian Regime Apr 19 2022 This book examines global humanitarian efforts involving the two German states and Third World liberation movements during the Cold War.

Gender and Development in the Middle East and North Africa Nov 02 2020

Distribution and Administration of Potassium Iodide in the Event of a Nuclear Incident Aug 31 2020 Radioactive iodines are produced during the operation of nuclear power plants and during the detonation of nuclear weapons. In the event of a radiation incident, radioiodine is one of the contaminants that could be released into the environment. Exposure to radioiodine can lead to radiation injury to the thyroid, including thyroid cancer. Radiation to the thyroid from radioiodine can be limited by taking a nonradioactive iodine (stable iodine) such as potassium iodide. This book assesses strategies for the distribution and administration of potassium iodide (KI) in the event of a nuclear incident. The report says that potassium iodide pills should be available to everyone age 40 or younger—especially children and pregnant and lactating women—living near a nuclear power plant. States and municipalities should decide how to stockpile, distribute, and administer potassium iodide tablets, and federal agencies should keep a backup supply of tablets and be prepared to distribute them to affected areas.

Closing the Gap in a Generation Aug 23 2022 Social justice is a matter of life and death. It affects the way people live, their consequent chance of illness, and their risk of premature death. We watch in wonder as life expectancy and good health continue to increase in parts of the world and in alarm as they fail to improve in others.

Posted Work in the European Union Sep 24 2022 Focusing on posting of workers, where workers employed in one country are sent to work in another country, this edited volume is at the nexus of industrial relations and European Union studies. The central aim is to understand how the regulatory regime of worker "posting" is driving institutional changes to national industrial relations systems. In the introduction, the editors develop a framework for understanding the relationship of supra-national EU regulation, transnational actors and national industrial relations systems, which we then apply in the empirical chapters. This unique volume brings together scholars from diverse academic fields, all of whom are experts on the topic of "worker posting." The book examines different aspects of the posting debate, including the interactions of actors such as labour inspectorates, trade unions, European legal/political regulators, manpower firms, transnational subcontractors and posted workers. The main objective of this book is to explore the dynamics of institutional change, by showing how trans- and supra-national dynamics affect European industrial relations systems. This volume will represent the "state of the art" in research on worker posting. It will also contribute to debates on European integration, social dumping, labour market dualization and precariousness and will be of value to those with an interest employment relations, law and regulation.

Successful Drug Discovery, Volume 2 Jan 16 2022 Retaining the successful approach found in the previous volume in this series, the inventors and primary developers of drugs that successfully made it to market tell the story of the drug's discovery and development and relate the often twisted route from the first candidate molecule to the final marketed drug. 11 selected case studies describe recently introduced drugs that have not been previously covered in textbooks or general references. These range across six different therapeutic fields and provide a representative cross-section of the current drug development efforts. Backed by copious data and chemical information, the insight and experience of the contributors makes this one of the most useful training manuals that a junior medicinal chemist can hope to find and has won the support and

endorsement of IUPAC.

Unmaking the Global Sweatshop Oct 25 2022 Unmaking the Global Sweatshop gathers the work of leading anthropologists and ethnographers studying the global garment industry's impact on workers' well-being and examines the relationship between the politics of labor and initiatives to protect workers' health and safety.

Diagnostic Immunohistochemistry Dec 23 2019

Gender and Immigration Mar 26 2020 An exploration of the varied and complex ways in which women experience international migration: the chapters are concerned primarily with the question of whether international migration provides women with opportunities for liberating themselves from subordinate gender roles in their countries of origin.

The Belt and Road Initiative Apr 26 2020 China's Belt and Road Initiative (BRI) is expected to be the largest infrastructure development scheme of the twenty-first century. There is escalating concern over BRI's potential environmental impacts in Southeast Asia, a global biodiversity hotspot and a focus area of BRI development. Case studies of Indonesia, Myanmar, Lao PDR and Malaysia show that the success of BRI in bringing about sustainable growth and opportunities depends on the Chinese government and financiers, as well as the agencies and governments involved when BRI investments take place. The adoption of best environmental practices is critical in ensuring that growth is sustainable and that bad environmental practices are not locked in for decades to come.

Multinational Enterprises and the Global Economy Jun 28 2020 For many years to come this volume. . . is surely going to be the ultimate reference work on international business. . . thanks to Dunning and Lundan, have at their disposal, a wealth of relevant data, as well as theoretical and empirical analyses, which will enable them to assess the capabilities, contributions and challenges posed by the multinational enterprises to the global economy. Seev Hirsch, *International Business Review* Multinational Enterprises and the Global Economy has become a classic in international business. . . Yet , the book s second edition is even better than the first, in part because of Professor Dunning s wise decision to choose Dr Lundan as his co-author and to draw upon her deep knowledge of various strands of research on business government relations and the societal effects of firm behaviour. . . In addition to being a remarkably useful reference book, *Multinational Enterprises and the Global Economy* is the first book any IB doctoral student should read to understand the significance and richness of IB scholarship as it has developed over the past 50 years. Alain Verbeke, *Journal of International Business Studies* The second edition of *Multinational Enterprises and the Global Economy* provides unparalleled coverage not only of the literature relevant to IB research but also of the evolution of IB in the world economy. Dunning and Lundan offer powerful insights into the societal effects of MNEs and the role of business government relations in the IB context. *Journal of International Business Studies* This wonderful book offers the definitive synthesis of the modern literature on the economic aspects of international business. It is encyclopedic yet full of incisive insights. It is a creative masterpiece which unbundles the DNA of the multinational enterprise and shows how it is the cornerstone of the field of international business. Alan M. Rugman, University of Reading, UK The rise of the multinational enterprise, and the consequent globalisation of the world economy, was arguably the single most important phenomenon of the second half of the twentieth century. This magisterial book, written by two leading authorities, examines this phenomenon in depth. It explains how foreign investment by multinationals diffused advanced technologies and novel management methods, driving productivity growth in Europe, Asia and North America; however, economic inequalities were reinforced as rich countries attracted more foreign investment than poor ones. This new edition of a classic work is not only an authoritative guide to contemporary multinational business, but a major historical resource for the future. Mark Casson, University of Reading, UK This thoroughly updated and revised edition of a widely acclaimed, classic text will be required reading for academics, policymakers and advanced students of international business worldwide. Employing a distinctive and unified framework, this book draws together research across a range of academic fields to offer a synthesis of the determinants of MNE activity, and its effects on the economic and social well-being of developed and developing countries. Unique to the new edition is its focus on the institutional underpinnings of the resources and capabilities of MNEs, and the role of MNE activity in transmitting and facilitating institutional change. Since the initial publication of this book more than a decade ago, the economic, managerial and social implications of globalisation and technological advancement have become even more varied and prominent. Accompanying these developments, there has been a rise in scholarly interest in interdisciplinary research addressing the important challenges of an ever-changing physical and human environment. Drawing on articles and books from international business and economics, as well as economic geography, political economy and strategic management, a systematic overview of the developments in scholarly thinking is prese

Globalizing the Caribbean Jun 09 2021 The beautiful Caribbean basin is fertile ground for a study of capitalism past and present. Transnational corporations move money and labor around the region, as national regulations are reworked to promote conditions benefiting private capital. *Globalizing the Caribbean* offers a probing account of the region's experience of economic globalization while considering gendered and racialized social relations and the frequent exploitation of workers. Jeb Sprague focuses on the social and material nature of this new era in the history of world capitalism. He combines an historical overview of capitalism in the region with theoretical analysis backed by case studies. Sprague elaborates upon the role of class formation and the restructuring of local states. He considers both U.S. hegemony, and how various upsurges from below and crises occur. He examines the globalization of the cruise ship and mining businesses, looks at the growth of migrant labor and reverse flow of remittances, and describes the evolving role of export processing and supranational associations. In doing so, Sprague shows how transnationally oriented elites have come to rule the Caribbean, and how capitalist globalization in the region occurs alongside shifting political, institutional, and organizational dynamics.

Corporate Social Responsibility and International Development Sep 12 2021 Presenting ideas for how business can lead the way in deriving the good from globalisation, this book makes the case that governments and their international agencies, grouped under the umbrella of the United Nations, have failed in their attempts to rid the planet of underdevelopment and poverty.

Made In Egypt Dec 27 2022 This ground-breaking ethnography of an export-orientated garment assembly factory in Egypt examines the dynamic relationships between its managers – emergent Mubarak-bizniz (business) elites who are caught in an intensely competitive globalized supply chain – and the local daily-life realities of their young, educated, and mixed-gender labour force. Constructions of power and resistance, as well as individual aspirations and identities, are explored through articulations of class, gender and religion in both management discourses and shop floor practices. Leila Chakravarti's compelling study also moves beyond the confines of the factory, examining the interplay with the wider world around it.

The Accumulation of Freedom Oct 01 2020 The only crisis of capitalism is capitalism itself. Let's toss credit default swaps, bailouts, environmental externalities and, while we're at it, private ownership of production in the dustbin of history. *The Accumulation of Freedom* brings together economists, historians, theorists, and activists for a first-of-its-kind study of anarchist economics. The editors aren't trying to subvert the notion of economics—they accept the standard definition, but reject the notion that capitalism or central planning are acceptable ways to organize economic life. Contributors include Robin Hahnel, Iain McKay, Marie Trigona, Chris Spannos, Ernesto Aguilar, Uri Gordon, and more.

Color of Violence Oct 21 2019 The editors and contributors to *Color of Violence* ask: What would it take to end violence against women of color? Presenting the fierce and vital writing of organizers, lawyers, scholars, poets, and policy makers, *Color of Violence* radically repositions the antiviolenence movement by putting women of color at its center. The contributors shift the focus from domestic violence and sexual assault and map innovative strategies of movement building and resistance used by women of color around the world. The volume's thirty pieces—which include poems, short essays, position papers, letters, and personal reflections—cover violence against women of color in its myriad forms, manifestations, and settings, while identifying the links between gender, militarism, reproductive and economic violence, prisons and policing, colonialism, and war. At a time of heightened state surveillance and repression of people of color, *Color of Violence* is an essential intervention. Contributors.
