[SCM Core Text: Wisdom Literature](#) May 05 2021 This textbook is aimed at undergraduates on level two or three courses relating to Old Testament Wisdom literature. The book begins with a consideration of what the term 'wisdom literature' means in Hebrew usage, and also examines which biblical materials might properly be classified as belonging to the category of wisdom literature. The cultural and political context of ancient Israel is examined, together with an analysis of the key problem of whether or not there were any practical levels of literacy in the period in question. The middle section of the book looks in more depth at those books considered to contain 'wisdom literature': Proverbs, Ecclesiastes, Song of Songs, Wisdom of Solomon and Ecclesiasticus. The genre is characterised by praise of God, often in poetic form and by sayings of wisdom intended to teach about God and about virtue. Questions of authorship, editing, interpretation, the historical context of some of the writings, the book's major themes and sub-themes and the latest criticisms of each are laid out for discussion and analysis. The book is written with the undergraduate in mind, and is full of pedagogical features including tables and summaries of data, which allows for a more intensive agenda and for those with knowledge of classical Hebrew to pursue individual themes at greater depth

[SCM Core Text Christian Doctrine](#) Mar 15 2022 The SCM Core Text: Christian Doctrine offers an up-to-date, accessible introduction to one of the core subjects of theology. Written for second and third-year university students, it shows that Christian Doctrine is not a series of impossible claims to be clung to with blind faith. Mike Higton argues that it is, rather, a set of claims that emerge in the midst of Christian life, as Christian communities try to make enough sense of their lives and of their world to allow them to carry on. Christian communities have made sense of their own life, and the life of the wider world in which they are set, as life created by God to share in God's own life. They have seen themselves and their world as laid hold of God's life in Jesus of Nazareth, and as having the Spirit of God's own life actively at work within them. This book explores these and other central Christian doctrines, and in each case, shows how the doctrine makes sense, and how it is woven into Christian life. It will help readers to see what sense it might make to say the things that Christian doctrine says, and how that doctrine might affect the way that one looks at everything: the natural world, gossip, culture, speaking in tongues, politics, dieting, human freedom, love, High Noon, justice, computers, racism, the novels of Jane Austin, parenthood, death and fashion.

The Guiding Helper: Main Text and Explanatory Notes May 25 2020 The Guiding Helper is a practical guide to the Din that the Prophet Muhammad (May Allah bless him and give him peace) brought. The Guiding Helper is based on a famous metered verse song written by a scholar named Ahmad ibn 'Ali ibn 'Abd al-Wahid ibn 'Ashir born in Spain and raised in Fez, Morocco about seven hundred years ago. This scholar divided his song into three books: (1) one about Islamic beliefs, (2) one about Islamic law, and (3) one about Islamic spirituality. He based the first book on a famous text of beliefs called The Mother of Proofs for the Tenets of Belief written by Muhammad ibn Yusuf al-Sunusi al-Husayni. He based his second book on a renown text of Maliki law called The Concise Text written by Khalil Ibn Ishaq ibn Ya'qub. He based his third book on a popular text on spirituality called The Letter of Qushayri written by 'Abd al-Karim al-Qushayri. The Maliki Fiqh is used to describe the practices of Islam.

SCM Core Text: Religious Syncretism Jul 07 2021 Even a quick scan of today's headlines makes clear that the growth of fundamentalist versions of Islam is having a vast impact on our world. For Americans the rise of Christian fundamentalism, especially the Evangelical movement, is also socially and politically shaping the country, as debates about abortion, stem cell research and other important issues are often driven by fundamentalist notions. In profound ways, orthodox versions of Judaism have altered the fabric of Middle Eastern politics through the Israeli-Palestinian conflict, especially regarding settlements in Gaza and the West Bank, making peace there all the more difficult, and further destabilizing an already unstable region. The rise of fundamentalism in the three monotheistic faiths is fully examined in this textbook. It is not about fundamentalism however, it is about its opposite trend: religious syncretism. Syncretism describes the phenomenon of one religion borrowing elements from another, and it is part of religion that fundamentalists will seldom acknowledge. This textbook explores Judaism, Christianity and Islam, using compelling examples of how syncretism works and looks, to show how these three religions have adopted customs and conceptions of other religions, most often acquiring practices from pagan predecessors and neighbours. The book shows how these three faiths - despite how modern media would have us believe - have been willing, at various times and places, to borrow.

Health and Illness in the Community Jul 19 2022 This book is about the context within which illness is experienced, health is sought and medicine is practised. In response to this need, this book provides a single text for medical students to use throughout their community medical studies.

SCM Core Text The Book of Revelation Sep 21 2022 For most people, Revelation is a book that is either largely ignored, or it is the object of such fanatical study and fanciful interpretation that it passes from the realm of the interesting and helpful into the realm of fantasy and speculation. Much literature has been published in recent years on its interpretation some of which is scholarly and technical, and some of which is populist and accessible. The problem is that the technical and scholarly material frequently requires careful and detailed study, combined with an advanced level of knowledge, whereas much of the populist material tends toward the fanatical and fanciful. The aim of this book is to bridge this gap. It is written with second and third year university students in mind, and would also be helpful for pastors and those in local churches who want to take seriously their study of this often (needlessly) confusing biblical book.

The Economy Jul 27 2020 The only introductory economics text to equip students to address today's pressing problems by mastering the conceptual and quantitative tools of contemporary economics. OUP has partnered with the international collaborative project of CORE researchers and teachers to bring students a book and learning system that complements and enhances CORE's open-access online e-book. The Economy is a new approach that integrates recent developments in economics including contract theory, strategic interaction, behavioural economics and financial instability. It challenges students to address inequality, climate change, economic instability, wealth creation and innovation and other problems. It has been adopted as the standard principles course at University College London, Sciences Po Paris and the Toulouse School of Economics. A new economics for the principles course The Economy begins with social interactions using elementary game theory and institutions modelled as rules of the game. This provides the basis for a modern treatment of markets including price-making as well as price-taking, the exercise of power, and the importance of social norms and adjustment to disequilibria. Introducing labour and credit markets with incomplete contracts allows a consistent treatment of aggregate employment and fluctuations without the need for ad hoc sticky price and wage assumptions. Banks create money by extending credit and a central bank seeks to implement a target inflation rate. Growth and instability are illustrated from the Great Depression, through the post-war golden age of capitalism through to the financial crisis and ensuing uncertainties. Students acquire an understanding of the past and current evolution of the economy in its social and environmental context, equipping them to marshal evidence and articulate positions about contemporary policy issues.

SCM Core Text Christianity and Science Jan 13 2022 The SCM Core Text, "Christianity & Science" provides

an advanced introduction to the lively debate between the relative truth claims made by science and the absolute truth claims made by religions, and Christianity in particular. The author examines the interaction between science and the Christian faith and explores the place of faith in an age of science. John Weaver, himself a scientist, explores the responses of the Christian faith to scientific advances, particularly as they impinge upon an understanding of God and human nature. Contemporary issues such as cloning, stem cell research, GM crops, global climate change and ecological destruction, new research on the origins of life and the issue of suffering brought about by 'natural evil' such as the Boxing Day tsunami, are covered in this accessible and student-friendly textbook. It is designed to communicate information clearly and accessibly, using chapter summaries, diagrams and questions for further reading as well as suggestions for further reading at the close of chapters.
