Blurred: Selves Made and Selves Making Jun 26 2020 Blurred: Selves Made and Selves Making draws on resources from philosophy of mind, consciousness studies, neuroscience, and psychological research to present a uniquely realist self-concept. Continental, Analytic, and applied philosophy all play a part in this groundbreaking undertaking.

Prescribing Our Future Jun 19 2022 Genetic counselors translate the findings of scientific investigation into meaningful accounts that enable individuals and families to make decisions about their lives. This collection of original papers explores the history, values, and norms of that process, with some focus on the value of nondirectiveness in counseling practice. The contributors; examination of genetic counseling issues serves as a foundation from which to address other ethical, legal, and policy considerations in the expanding universe of clinical genetics.

The World Café Feb 27 2023 The World Cafe is a flexible, easy-to-use process for fostering collaborative dialogue, sharing mutual knowledge, and discovering new opportunities for action. Based on living systems thinking, this innovative approach creates dynamic networks of conversation that can catalyze an organization or community's own collective intelligence around its most important questions. Filled with stories of actual Cafe dialogues in business, education, government, and community organizations across the globe, this uniquely crafted book demonstrates how the World Cafe can be adapted to any setting or culture. Examples from such varied organizations as Hewlett-Packard, American Society for Quality, the nation of Singapore, the University of Texas, and many others, demonstrate the process in action. Along with its seven core design principles, The World Cafe offers practical tips for hosting "conversations that matter" in groups of any size- strengthening both personal relationships and people's capacity to shape the future together.

Facing Our Futures Jan 14 2022 A fascinating insight into how professionals and businesses can develop their foresight and strategy to ensure that they are prepared for an unpredictable future. Businesses, organizations and society-at-large are all subject to unforeseeable events and incidents that often have a dramatic impact upon prosperity and profit. Due to their unpredictable nature, business leaders and executive teams are unable to prepare for these specific

events. But, through innovation, strategizing and an open-minded approach, they can restructure their organization and practices in order to mitigate (or even take advantage of) the impact of such events. In *Facing Our Futures*, Nikolas Badminton draws upon his decades of experience as a consultant and futurist to provide readers with the skillset and outlook they need to prepare their organization, team and themselves for whatever obstacles the future may hold. CEOs, executive teams, government leaders and policy makers need to gain a broader perspective and a firmer grasp on how their relevant industry, society or community is evolving and changing. Once they have acquired this foresight, they need to then discover how to fully harness it – by strengthening their foundations, forecasting and establishing a resilient and adaptable strategy. *Facing Our Futures* acts as a primer on the value of seeing how bad things can get and the power in imagining these futures. It also provides a proven strategic planning and foresight methodology - the Positive Dystopia Canvas (PDC) - that allows leaders to supercharge their teams to build evocative visions of futures that strengthen planning today.

The Change Handbook Apr 17 2022 This book is about effective change. It describes methods for changing 'whole systems,' that is, change based on two powerful foundation assumptions: high involvement and a systemic approach to improvement. High involvement means engaging the people in changing their own system. It is systemic because there is a conscious choice to include the people, functions, and ideas that can affect or be affected by the work. Whole system change methods help you initiate high-leverage, sustainable improvements in organizations or communities. 'High-leverage' is emphasized because in any improvement effort, we want the highest possible value for the effort invested. We believe that involving people in a systematic way is a key to high leverage and that the methods in this book can provide this leverage for you. You'll need to determine the one(s) best suited to moving your organization or community to the culture you want. We wrote this book to support your efforts. The book is intended to answer questions such as: What methods are available that have proven successful in addressing today's needs for organizational or community change? What are the key distinctions among these methods? How do I know if a method would be a good fit for my organization or community? How do I get started after I select one or more methods? To make a good choice, you'll need some basic information. Rather than provide details of how to do each method, we give you an overview of what's available and some tools to help focus your exploration.

The Anthropocene Cookbook Jan 02 2021 More than sixty speculative art and design projects explore how art, food, and creative thinking can prepare us for future catastrophes. In the Age of the Anthropocene—a era characterized by human-caused climate disaster—catastrophes and dystopias loom. *The Anthropocene Cookbook* takes our planetary state of emergency as an opportunity to seize the moment to imagine constructive change and new ideas. How can we survive in an age of constant environmental crises? How can we thrive? *The Anthropocene Cookbook* answers these questions by presenting a series of investigative art and design projects that explore how art, food, and creative thinking can prepare us for future catastrophes. This cookbook of ideas rethinks our eating habits and traditions, challenges our food taboos, and proposes new recipes for humanity's survival. These more than sixty projects propose new ways to think and make food, offering tools for creative action rather than traditional recipes. They imagine modifying the human body to digest cellulose, turning plastic into food, tasting smog, extracting spices and medicines from sewage, and growing meat in the lab. They investigate provocative possibilities: What if we made cheese using human bacteria, enabled human photosynthesis through symbiosis with algae, and brought back extinct species in order to eat them? The projects are diverse in their creative approaches and their agendas—multilayered, multifaceted, hybrid, and cross-pollinated. *The Anthropocene Cookbook* offers a survival guide for a future gone rogue, a road map

to our edible futures.

The Emergent Method Part 2 Oct 31 2020 This book introduces readers to the philosophical theory of Emergentism. It explores Emergentism's many ramifications in areas of science, phenomenology, philosophy of mind, ethics and morality. The book suggests to readers how Emergentism may be incorporated into daily life in very practical ways. The book's list of far-reaching ideas is extensive, but somehow none of the ideas presented is completely unfamiliar. The notions are simple and naturalistic. Here are two examples: •We can solve the hard problem of consciousness if we look at it from the perspective of nonlocal waves rather than local particles. •Free-will arises in a sentient being through an interoperability with its environment. Free-will is not an illusion, but independence from our environment is an illusion. The book is directed towards all those who question life, science, philosophy, and themselves.

Positive Psychology Mar 24 2020 The fully updated Third Edition of *Positive Psychology: The Scientific and Practical Explorations of Human Strengths* covers the science and application of positive psychology and presents new frameworks for understanding positive emotions and strengths through a culturally competent lens. Authors Shane J. Lopez, Jennifer Teramoto Pedrotti, and C.R. Snyder bring positive psychology to life by addressing important issues such as how positive psychology can improve schooling and the workplace, as well as how it can promote flourishing in day-to-day life. Throughout the book, well-crafted exercises allow readers to apply major principles to their own lives. The book also explores various positive conditions within multiple cultural contexts, such as happiness and well-being, and processes related to mindfulness, wisdom, courage, and spirituality. "The emphasis is not exclusively clinical; it includes applications and implications across a number of environments and draws from a number of perspectives, including neurobiology. This range makes it an excellent choice for anchoring major concepts so students can explore the application of positive psychology to their specific areas of interest." –Dr. Pamela Rutledge, Massachusetts School of Professional Psychology

Keywords for Radicals Jul 08 2021 "An extraordinary volume that provides nothing less than a detailed cognitive mapping of the terrain for everyone who wants to engage in radical politics."—Slavoj Žižek, author of *Living in the End Times*
"Keywords for Radicals recognizes that language is both a weapon and terrain of struggle, and that all of us committed to changing our social and material reality, to making a world justice-rich and oppression-free, cannot drop words such as 'democracy,' 'occupation,' 'colonialism,' 'race,' 'sovereignty,' or 'love' without a fight. —Robin D. G. Kelley, author of *Freedom Dreams: The Black Radical Imagination*
"From its thought-provoking Introduction though its energizing accounts of the tensions underlying our most prized concepts, *Keywords for Radicals* will be indispensable to any scholar or activist who is serious about critique and change."—Stephen Duncombe, editor of *Cultural Resistance Reader* "A primer for a new era of political protest." —Jack Halberstam, author of *Female Masculinity* "This keywords upgrade puts powerful weapons into revolutionaries' hands. Unexpected entries expand into new terrain.... Indispensable." —Jodi Dean, author of *The Communist Horizon*
In *Keywords* (1976), Raymond Williams devised a "vocabulary" that reflected the vast social transformations of the post-war period. He revealed how these transformations could be grasped by investigating changes in word usage and meaning. *Keywords for Radicals*—part homage, part development—asks: What vocabulary might illuminate the social transformations marking our own contested present? How do these words define the imaginary of today's radical left? With insights from dozens of scholars and troublemakers, *Keywords for Radicals* explores the words that shape our political landscape. Each entry highlights a term's contested variations, traces its evolving usage, and speculates about what its historical mutations can tell us. More than a glossary, this is a crucial study of the power of language and

the social contradictions hidden within it. Contributors include Patrick Bond, Silvia Federici, John Bellamy Foster, Joy James, Ilan Pappé, Justin Podur, Nina Power, Mab Segrest, and over forty others. Kelly Fritsch is a Banting Postdoctoral Fellow in Women's and Gender Studies at the University of Toronto. Clare O'Connor is a doctoral student in Communication at the University of Southern California. A.K. Thompson teaches social theory at Fordham University in New York.

Rescuing the Enlightenment from Itself Nov 19 2019 *Rescuing the Enlightenment from Itself: Critical and Systemic Implications for Democracy* presents papers that make the case that good governance is about thinking and practice that can lead to a better balance of social, cultural, political, economic and environmental concerns to ensure a sustainable future for ourselves and for future generations. The work is inspired by the thinking of C. West Churchman and forms the first volume in a new series: *C. West Churchman's Legacy and Related Works*. The book features contributions from a range of invited authors including Russell L. Ackoff, Ken Bausch, John van Gigch and Norma Romm. The volume is aimed at academics, post-graduate students and members of professional associations working in the fields of systems sciences, public policy and management, politics, and international relations.

Water and the Future of Humanity Oct 19 2019 This unique, engaging, and highly authoritative volume enlightens readers on changes needed in the way society accesses, provides, and uses water. It further shines a light on changes needed in the way we use food, energy, and other goods and services in relation to water, and offers projections and recommendations, up to 2050, that apply to water access challenges facing the poor and the common misuse of water in industry, agriculture, and municipalities. Written by an unparalleled slate of experts convened by the Calouste Gulbenkian Foundation, the book takes on one of the most critical issues on the planet today. In a frank yet optimistic assessment of major developmental challenges, but also opportunities, facing future generations, the author elucidates linkages between water and a range of other drivers from various disciplinary and stakeholder perspectives. Ultimately portraying the belief that Humanity can harness its visionary abilities, technologies, and economic resources for increased wellbeing and sound stewardship of resources, the book presents an optimistic statement stressing actions scientists, policy makers, and consumers can and must take to meet the water management challenges of a warming planet anticipating nine billion inhabitants by 2050. *Gulbenkian Think Tank on Water and the Future of Humanity*: Benedito Braga, Pres. World Water Council & Prof. of Civil Engineering, Univ. of São Paulo, Brazil; Colin Chatres, Director General of the International Water Management Institute, Sri Lanka; William J. Cosgrove, Pres. of Ecoconsult Inc. & Senior Adviser for the UN World Water Development Report, Canada; Luis Veiga da Cunha, Prof. Environmental Science and Engineering, Universidade Nova de Lisboa, Portugal; Peter Gleick, Pres. of the Pacific Institute, USA; Pavel Kabat, Director, International Institute for Applied Systems Analysis, Austria; and Prof. & Chair, Earth Systems Science, Wageningen University, The Netherlands; Mohamed Ait Kadi, President of the General Council of Agricultural Development, Morocco; Daniel P. Loucks, Prof. of Civil Engineering, Cornell Univ. USA; Jan Lundqvist, Senior Scientific Advisor, Stockholm International Water Institute, Sweden; Sunita Narain, Director, Center for Science & Environment, New Delhi, India; Jun Xia, Pres., International Water Resources Association, Chair Prof. & Dean, The Research Institute for Water Security (RIWS), Wuhan University, China.

Young People and Thinking Technologies for the Anthropocene Nov 12 2021 This book brings a multi-disciplinary focus to discussions about children and young people's well-being, resilience, and enterprise to develop new ways of troubling these keywords at a time when planetary systems are in crisis.

Future-proof Your Child Feb 03 2021 This world has changed. The future has changed. Childhood is changing. Raising children has never been more challenging -

or potentially rewarding. It is becoming increasingly obvious that the world into which our young children will enter as adults, somewhere between 2020 and 2030, will be nothing like the world their parents grew up in, or even the world we currently inhabit. We need a better understanding of the world of the future in order to prepare our children and to 'future-proof' them. *Future-proof Your Child* is a very different kind of parenting book. It contains many useful, practical hints and tips but also focuses on the context for parenting and child development today. It convinces 21st-century parents of the need to change their approach to parenting future generations and is relevant, accessible, practical and inspirational. *Future-proof Your Child* highlights the critical importance of making choices, having conversations and consciously connecting with tomorrow's children today.

Investing in Our Nation's Future Through Agricultural Research Jan 26 2023

Future Search May 06 2021 NEW EDITION, REVISED AND UPDATED *Future Search* is among the best-established and most effective methods for enabling people to make and implement ambitious plans. It has been used to redesign IKEA's product pipeline in Sweden, develop an integrated economic development plan in Northern Ireland, and demobilize child soldiers in Southern Sudan. Written by the originators, this book is the most up-to-date account of this powerful change method. This third edition is completely revised, reorganized, and updated with nine new chapters. It contains new cases and examples, advice on combining *Future Search* with other methods, and a summary of formal research studies. The chapters on facilitating diversity provide a theory, philosophy, and method for working with any task group. Marvin Weisbord and Sandra Janoff offer specific guidance for *Future Search* sponsors, steering committees, participants, and facilitators and new ideas for sustaining action after the *Future Search* ends. They've added striking evidence of *Future Search*'s efficacy over time, examples of its economic benefits, guidelines for making *Future Searches* green, and much more. They include a wealth of resources—handouts, sample client workbooks, follow-up methods, and other practical tools. If you want to do strategic planning, product innovation, quality improvement, organizational restructuring, mergers, or any other major change requiring stakeholder engagement, this book is your guide.

Routledge Handbook for Creative Futures Sep 10 2021 As the uncertainty of global and local contexts continues to amplify, the *Routledge Handbook for Creative Futures* responds to the increasing urgency for reimagining futures beyond dystopias and utopias. It features essays that explore the challenges of how to think about compelling futures, what these better futures might be like, and what personal and collective practices are emerging that support the creation of more desirable futures. The handbook aims to find a sweet spot somewhere between despair and naïve optimism, neither shying away from the massive socio-environmental planetary challenges currently facing humanity nor offering simplistic feel-good solutions. Instead, it offers ways forward—whether entirely new perspectives or Indigenous and Traditional Knowledge perspectives that have been marginalized within modernity—and shares potential transformative practices. The volume contains contributions from established and emerging scholars, practitioners, and scholar-practitioners with diverse backgrounds and experiences: a mix of Indigenous, Black, Asian, and White/Caucasian contributors, including women, men, and trans people from around the world, in places such as Kenya, India, US, Canada, and Switzerland, among many others. Chapters explore critical concepts alongside personal and collective practices for creating desirable futures at the individual, community, organizational, and societal levels. This scholarly and accessible book will be a valuable resource for researchers and students of leadership studies, social innovation, community and organizational development, policy studies, futures studies, cultural studies, sociology, and management studies. It will also appeal to educators, practitioners, professionals, and policymakers oriented toward

activating creative potential for life-affirming futures for all.

Reimagining our futures together Nov 24 2022 The interwoven futures of humanity and our planet are under threat. Urgent action, taken together, is needed to change course and reimagine our futures.

Phosphorus, Food, and Our Future Mar 16 2022 A complete and multidisciplinary study of phosphorus sustainability, stemming from the Frontiers Life Sciences: Sustainable Phosphorus Summit.

Exploring and Shaping International Futures Dec 13 2021 "People who run cities like to play Simcity to find out how impossible their jobs are. Hughes gives everyone a chance to play a kind of Simplanet, with outcomes far more complex and uncertain. In the process, the book and the computer program provide a coherent path to understanding an anarchic world." --Ronald A. Francisco, University of Kansas "What will be the future of human demographic, economic, environmental, and political-social systems throughout the 21st century? Where do current changes appear to be taking us? What kind of future would we prefer? How much leverage do we have to bring about the future we prefer? Do YOU share these interests of the book? If yes, you should study the book and learn how to cope with the future with the International Futures approach (IFs) developed by the authors. This large-scale integrated global simulation modeling system is a user-friendly, professional tool for long-term policy analysis and an educational tool in universities. I had a pleasure to learn it personally by cooperating with Barry Hughes." --Pentti Malaska, Professor of MS, DrTech, futurist Honorary member of the Club of Rome What will be the long-term impact of AIDS in Africa or concentration of global oil production in the Middle East? Exploring and Shaping International Futures helps readers understand such global trends in demographic, economic, energy, food, environmental, and socio-political systems. It allows businesspeople, government officials, and others to think concretely about global futures in each of these areas. It is the only book on the market that allows readers to use a computer simulation to track global trends and to develop alternative scenarios around those trends. It is one of relatively few books that really brings computer technology into the classroom, boardroom, or policy planning commission. The International Futures (IFs) computer simulation, around which the book is built, is now widely used in policy analysis as well as education. It has been instrumental in projects undertaken by such groups as the European Commission, the U.S. National Intelligence Council, and the United Nations. After three decades of development and refinement, the computer model is now easy to access and use. Readers can access the website with the IFs computer model at www.ifs.du.edu

How to Future Feb 15 2022 Adapt, embrace uncertainties and create more resilient business strategies by mastering the futuring mindset.

Making Our Future Aug 21 2022 Drawing from her work as state folklorist, Emily Hilliard explores contemporary folklife in West Virginia and challenges the common perception of both folklore and Appalachian culture as static, antiquated forms, offering instead the concept of "visionary folklore" as a future-focused, materialist, and collaborative approach to cultural work. With chapters on the expressive culture of the West Virginia teachers' strike, the cultural significance of the West Virginia hot dog, the tradition of independent pro wrestling in Appalachia, the practice of nonprofessional women songwriters, the collective counternarrative of a multiracial coal camp community, the invisible landscape of writer Breece D'J Pancake's hometown, the foodways of an Appalachian Swiss community, the postapocalyptic vision presented in the video game Fallout 76, and more, the book centers the collective nature of folklife and examines the role of the public folklorist in collaborative engagements with communities and culture. Hilliard argues that folklore is a unifying concept that puts diverse cultural forms in conversation, as well as a framework that helps us reckon with the past, understand the present, and collectively shape the future.

The World Café Jul 20 2022 The World Cafe is a flexible, easy-to-use process for fostering collaborative dialogue, sharing mutual knowledge, and discovering new opportunities for action. Based on living systems thinking, this innovative approach creates dynamic networks of conversation that can catalyze an organization or community's own collective intelligence around its most important questions. Filled with stories of actual Cafe dialogues in business, education, government, and community organizations across the globe, this uniquely crafted book demonstrates how the World Cafe can be adapted to any setting or culture. Examples from such varied organizations as Hewlett-Packard, American Society for Quality, the nation of Singapore, the University of Texas, and many others, demonstrate the process in action. Along with its seven core design principles, The World Cafe offers practical tips for hosting "conversations that matter" in groups of any size- strengthening both personal relationships and people's capacity to shape the future together.

Reimagining Our Futures Together Oct 23 2022 The interwoven futures of humanity and our planet are under threat. Urgent action, taken together, is needed to change course and reimagine our futures. Education, long acknowledged as a powerful force for positive change, has new, urgent and important work to do. This report, two years in the making, invites governments, institutions, organizations, and citizens around the world to forge a new social contract for education that will help us build peaceful, just, and sustainable futures.

The BHS Factor Apr 05 2021 The current generation of elderly persons are also the longest lived population to date. The Baby Boomers are expected to live even longer. But at what cost? Information gathered from studying this current population reveals that Seniors have not aged well. This group has experienced the greatest loss of physical and mental function as compared to previous generations. While, all along, living longer with such disabilities. The BHS Factor represents an opportunity, to learn from this Elder Generation, not only how we might live longer, but more importantly, live better.

Materials Experience Sep 29 2020 There currently exists an abundance of materials selection advice for designers suited to solving technical product requirements. In contrast, a stark gap can be found in current literature that articulates the very real personal, social, cultural and economic connections between materials and the design of the material world. In *Materials Experience: fundamentals of materials and design*, thirty-four of the leading academicians and experts, alongside 8 professional designers, have come together for the first time to offer their expertise and insights on a number of topics common to materials and product design. The result is a very readable and varied panorama on the world of materials and product design as it currently stands. Contributions by many of the most prominent materials experts and designers in the field today, with a foreword by Mike Ashby The book is organized into 4 main themes: sustainability, user interaction, technology and selection Between chapters, you will find the results of interviews conducted with internationally known designers. These 'designer perspectives' will provide a 'time out' from the academic articles, with emphasis placed on fascinating insights, product examples and visuals

Bio#Futures Aug 09 2021 This volume presents a timely recognition, warning and mapping of the fast approaching wave, or "bio-tsunami", of global socio-technical transformation, built by a much wider spectrum of converging powers, including biotechnology, new agriculture, novel foods, health, quality of life, environment, energy, sustainability, education, knowledge management, and design of smart applications. The book contains eight sections corresponding to different clusters of bioeconomic and socio-technical change, as identified by the editors' "Scanning the Horizon" foresight research; it also offers an integrated view of the future bioeconomy landscape though the convergence of several technologies that affect everyday life. The clusters offer methodologies for forecasting the future

bioeconomy, and how these predictions can affect target-setting and the orientation of policies and actions to manage cultural and societal change, and achieve sustainable development in less developed areas. The book will be of interest to researchers, producers, logistics experts, policy makers, regulators, business and financial institutions, and biotechnologists (e.g. geneticists, food experts, etc.).

Local Is Our Future Jul 28 2020 "Globalization has no future. Political stability is a thing of the past; climate chaos is intensifying; anxiety disorders are of epidemic proportions; extremism and fundamentalism are becoming the norm. And yet we cling to the wreckage. Politicians of every hue continue to be in thrall to the global market. To challenge 'free trade,' which is the very essence of globalization, is all but unthinkable. But challenge it we must. And replace it. The future will be local. And the good news is that it is already happening. Under the radar of the mainstream media, a worldwide localization movement is emerging. On every continent, people are coming together to claw back control over their own economies, and in doing so are rebuilding connections to one another, while repairing fractured communities and damaged environments."--Publisher's description

Transforming Early Years Policy in the U.S. Jan 22 2020 This timely collection provides an accessible discussion and analysis of some of the most urgent policy issues facing early childhood care and education in the United States: fragmented policy systems; broad disregard for early years professionals exemplified by low pay; standards that fail to increase equity; and overlooking the role community contexts plays in producing or ameliorating social inequalities among children. Contributors draw upon their deep personal experiences with these issues as educators, scholars, and advocates to advance practice-based recommendations for how the nation's inequitable systems can be transformed. Their call to collective action is supported by an accessible and powerful advocacy toolkit that will grow with readers over time and with practice. The text centers the perspectives of Black, Indigenous, and other People of Color, with a clear focus on the effects of systemic racism, ageism, sexism, classism, and associated oppressions on early years policies and programs in the U.S. **Book Features:** Concise essays that acknowledge the demands on contemporary readers' time. Authors that represent a cross section of educators, advocates, researchers, and leaders who are in dialogue with each other. Personal stories that illustrate how policies and systems affect people, making an urgent case for transforming early care and education policies. A call for action that includes tools for linking personal reflection to collective action. Contributors include Lea Austin, Stephanie Curenton, Kerry Ann Escayg, Lucinda Heimer, Iheoma Iruka, Jacqueline Jones, Anna Lees, and Crishana Lloyd.

Energy Futures May 18 2022 Everyday life as we knew it is increasingly challenged in a world of climate, social, health and political crisis. Emerging technologies, data analytics and automation open up new possibilities which have implications for energy generation, storage and energy demand. To support these changes we urgently need to rethink how energy will be sourced, shared and used. Yet existing approaches to this problem, driven by engineering, data analytics and capital, are dangerously conservative and entrenched. **Energy Futures** critically evaluates this context, and the energy infrastructures, stakeholders, and politics that participate in it, to propose plausible, responsible and ethical modes of encountering possible energy futures. Imagining anthropocene challenges, emerging technologies and everyday life otherwise through empirically grounded studies, opens up possible energy futures. **Energy Futures** proposes and demonstrates a new critical and interventional futures-oriented energy anthropology. Combining the theories and methods of futures anthropology with the critical expertise and perspectives of energy anthropology creates a powerful mode of engagement, which this book argues is needed to disrupt the dominant narratives about our energy futures. Its contributors collectively reveal and evidence through innovative

ethnographic practice how new knowledge about imagined and possible energy futures can be mobilised in engagements with emerging technologies, anthropocene challenges and everyday realities. In doing so it brings together authors, analytical expertise and ethnographic evidence from the global south, north and places in between, generated through innovative methodologies including remote video and comic strip methods and documentary video practice as well as long term fieldwork.

How Global Youth Values Will Change Our Future Jun 07 2021 How Global Youth Values Will Change Our Future reveals the values and religious beliefs of Generations Y and Z, representing over 4,000 young people from 88 countries. This book is based on their own voices, rather than adult projections from multiple-choice surveys. It also includes futurists' projections of significant trends to predict where society is headed. As the largest, best-educated, and most connected generation ever, today's youth are creating a more democratic world.

This Could Be Our Future Oct 11 2021 Break free from a wealth-obsessed world Western society is trapped by three assumptions: 1) the point of life is to maximize your self-interest and wealth, 2) we're individuals trapped in an adversarial world, and 3) that this path is inevitable. These ideas separate us, keep us powerless, and limit our imagination for the future. We see them as the truth, but they are just a point of view that previous generations accepted as inevitable. It's time we replace them with something new. In this bold, powerful book, Yancey Strickler – co-founder of Kickstarter – lays out an inspiring vision for a new world we have the power to create and how we can change course. While the pursuit of wealth has produced innovation and prosperity, it's also produced dire consequences: environmental collapse, corruption, exploitation, and unhappiness around the world. We don't have to get rid of money entirely, though: we can co-opt the tools we have used toward better measurement of what matters, technology, and specificity of goals--and refocus them to build a more generous, fair, and future-prepared society. By re-calibrating our definition of value, a world of scarcity can blossom into a world of abundance. Hopeful but firmly grounded, full of concrete examples and bursting with creativity, This Could Be Our Future brilliantly dissects the world we live in and shows us a road map to the world we are capable of making.

Wealth Feb 21 2020 As a financial executive and life coach in Dallas, Bicknell combines a laymans scriptural perspective with the experiences of more than three decades of working with highly successful and deeply fulfilled clients who have learned to apply true wealth toward maximizing personal prosperity. (Practical Life)

Creative Universities Mar 04 2021 In this wide-ranging book, Anke Schwittay argues that, in order to inspire and equip students to generate better responses to global challenges, we need a new high education pedagogy that develops their imagination, creativity, emotional sensibilities and practical capabilities.

Our Hopes, Our Future Dec 25 2022 How can we overcome crises and shape our common future? Since the beginning of the Corona pandemic, we have all been put to an immense test. This shows how humanity can successfully and constructively deal with such situations and make the best of them. And we learn that the future is not something that happens to us, but that we can actively and constructively shape it. The basic prerequisite for this is an attitude of openness, mutual helpfulness and hope. This non-fiction book vividly reports on the currently prevailing images of the future and the common longings as well as on people's capacity for hope and action. It reveals the power of desirable images of the future and of a collective hope as the opposite of general helplessness or of blind and naïve optimism. The central statements of this book are based on the experiences of thousands of people in more than ten countries who participated in the scientific study of the Hope Barometer in 2019 and 2020. In a unique way, this combines lived practice with the latest findings of social science futurology, positive psychology and pragmatic

philosophy. Target groups: This book is for anyone who wants to look to the future with hope. It offers concrete answers to key questions and shows how crises can be overcome while shaping a better future for individuals and society as a whole. About the author: Dr. Andreas M. Krafft teaches at the University of St. Gallen and at the Free University of Berlin. As co-president of swissfuture, the Swiss Association for Futures Research, and as a board member of the Swiss Society for Positive Psychology, he leads the international research network of the Hope Barometer.

Anticipation, Agency and Complexity Aug 29 2020 This volume presents a selection of the Proceedings of the Workshop on Anticipation, Agency and Complexity held in Trento (Italy) on April 2017. The contributions contained in the book brilliantly revolve around three core concepts: agency, complexity and anticipation, giving precious insights to further define the discipline of anticipation. In a world that moves increasingly fast, constantly on the verge of disruptive events, more and more scholars and practitioners in any field feel in need of new approaches to make sense of the complexity and uncertainty that the future seems to bear. The theory of anticipation tries to describe how possible futures are intrinsically intertwined with the present.

National Children's Day May 26 2020

Knowing our future Sep 22 2022 The received conventional wisdom within the global futurist community is that the future is unknowable. Knowing our future outlines a full theory of how knowable the future really is. Using case studies of prescient predictions of the social future from the time of the French Revolution through to the present Michael Lee argues that there are sound theoretical grounds for establishing a science of the future and accurately predicting it time after time. Drawing on mathematics, social theory, physics, economics, social biology and philosophy and referencing great thinkers from the Marquis de Condorcet, Herbert Spencer, Newton, Einstein, George Bernard Shaw, Stephen Hawking, Bertrand Russell and Roger Penrose, amongst others, Lee brilliantly presents the argument that the future, far from being mysterious and unknowable, can be understood and predicted.

Entangled Life Dec 21 2019 NEW YORK TIMES BESTSELLER • A “brilliant [and] entrancing” (The Guardian) journey into the hidden lives of fungi—the great connectors of the living world—and their astonishing and intimate roles in human life, with the power to heal our bodies, expand our minds, and help us address our most urgent environmental problems. “Grand and dizzying in how thoroughly it recalibrates our understanding of the natural world.”—Ed Yong, author of I Contain Multitudes ONE OF THE BEST BOOKS OF THE YEAR—Time, BBC Science Focus, The Daily Mail, Geographical, The Times, The Telegraph, New Statesman, London Evening Standard, Science Friday When we think of fungi, we likely think of mushrooms. But mushrooms are only fruiting bodies, analogous to apples on a tree. Most fungi live out of sight, yet make up a massively diverse kingdom of organisms that supports and sustains nearly all living systems. Fungi provide a key to understanding the planet on which we live, and the ways we think, feel, and behave. In Entangled Life, the brilliant young biologist Merlin Sheldrake shows us the world from a fungal point of view, providing an exhilarating change of perspective. Sheldrake’s vivid exploration takes us from yeast to psychedelics, to the fungi that range for miles underground and are the largest organisms on the planet, to those that link plants together in complex networks known as the “Wood Wide Web,” to those that infiltrate and manipulate insect bodies with devastating precision. Fungi throw our concepts of individuality and even intelligence into question. They are metabolic masters, earth makers, and key players in most of life’s processes. They can change our minds, heal our bodies, and even help us remediate environmental disaster. By examining fungi on their own terms, Sheldrake reveals how these extraordinary organisms—and our relationships with them—are changing our understanding of how life works. Winner of the Wainwright Prize, the Royal Society Science Book Prize,

and the Guild of Food Writers Award • Shortlisted for the British Book Award • Longlisted for the Rathbones Folio Prize

***The Future of Knowledge* Dec 01 2020 Verna Allee, whose groundbreaking book 'The Knowledge Evolution' helped usher in the exploding field of knowledge management, has brought her experience-tested insights into an exciting new synthesis, penetrating to the very heart of value creation. 'The Future of Knowledge' strips away traditional business thinking to reveal the new patterns of management thought and practice essential for success in a more complex world. With a gift for making the complex simple and practical, Allee weaves together diverse threads such as business webs, communities of practice, knowledge technologies, intangibles, network analysis, and biology to show why organizations must be supported as living systems before their natural networked pattern of organization can emerge. Embodying Allee's visionary approach, 'The Future of Knowledge' brings forward a practical view of new theories, frameworks, tools, and methods offering businesses a guide to managing the increasing levels of complexity within their organizations and in society at large. 'The Future of Knowledge' works on many levels: * At the strategic level, the new tools are intangible scorecards and understanding value networks * At the tactical level, the knowledge management tools for exchanging and applying knowledge are knowledge networks and communities of practice * At the operational level, a wealth of new technologies is supporting the codification, storage and delivery of the knowledge people need to complete their routine tasks.**

***Identity Interconnections* Apr 24 2020 Co-published with This book advocates an approach the authors call Identity Interconnections as a way of moving considerations of identity differences and commonalities from theory to socially just action in student affairs practice. Through pursuing complex commonalities expansive enough to hold both similarities and differences, student affairs educators can ethically consider identity interconnections in such a way that does not diminish difference, but instead recognizes points of difference as opportunities for social justice action. By pursuing radical interconnectivity, student affairs educators can advance an interdependent understanding of inherited systems of power; recognizing the ways in which all systems (and thus all oppression, and all liberation) are interconnected. This interconnected insight can enable student affairs educators to extend beyond binary and oppositional thinking, and in turn, give rise to the formation of new coalitions. Finally, by listening with raw openness (allowing themselves, and encouraging their students, to be changed by others' experiences), student affairs educators can facilitate identity development and social justice action as interrelated endeavors. The editors have heard comments like, "This is all great in theory, but how can student affairs practitioners actually apply this?" This book answers that question by providing a theoretical framework and multiple practical examples for employing identity interconnections as expansive approaches to identity development and social justice action in student affairs.**
