**Hello Hi-lo** Oct 20 2019 Incorporating leveled reading within each script, readers theatre plays offer teachers the flexibility to include readers of every ability in the same read-aloud play. Hello Hi-Lo: Readers Theatre Math offers a proven way for teachers to build reading fluency in their classrooms, even if students do not all read at the same level. The book offers 15 readers theatre plays, each of which includes various levels of readability within one script. The plays thus provide lower-level readers the opportunity to follow along with accelerated reading parts, building confidence by reading aloud at their own levels. Each play includes speakers for three different grade levels of readability: 4th grade and lower, 5th-6th grade, and 7th-8th grade. Concepts are presented so that they are fluid among these grade levels. Taking a cross-curricular approach, the scripts reinforce key math concepts and standards-based math skills taught in the middle grades, such as order of operations, fractions, inequalities, positive and negative numbers, and graphing on a coordinate plane. Each play includes extended activities that will help the teacher incorporate the math concept into the classroom. 15 plays with staging illustrations and activities for three different grade levels of readability: 4th grade and lower, 5th-6th grade, and 7th-8th grade A readability-level chart broken down by character, based on vocabulary and the Flesh-Kincaid scale, as well as by word lists for graded readability

Divining Your Life: Candle Readings with the Flame of Vesta Dec 02 2020 Divining Your Life: Candle Readings with the Flame of Vesta If reading Debra May Macleod's historical fiction novels on the Vestals of ancient Rome made you feel like lighting a candle, this unique and spirited nonfiction offering might appeal to you. In Divining Your Life, the author blends elements of ancient divination practices with modern sensibilities to create a simple yet illuminating and intelligent method of "candle reading," one inspired by her research and performed by the sacred flame of the goddess Vesta. By learning to read the flame, vapor and wax formations of a candle—and by tapping in to your own intuition as you do—you can gain insight into your own past and present, as well as what may lie ahead for you. After all, since the dawn of civilization, humankind

has turned to divination practices—from ancient oracles to modern astrologers—to know the unknowable, and to discover the answers to life's most pressing questions, from romance to finances. So whether you are seeking to discover meaningful answers to life's big questions, or you just want to have some fun with friends as you peer into your respective futures, this fiery little book may be for you.

**In Synchrony with the Heavens, Volume 2 Instruments of Mass Calculation (2 Vols.)** Jun 27 2020 This is the first investigation of one of the main interests of astronomy in Islamic civilization, namely, timekeeping by the sun and stars and the regulation of the astronomically-defined times of Muslim prayer. The study is based on over 500 medieval astronomical manuscripts first identified by the author, now preserved in libraries all over the world and originally from the entire Islamic world from the Maghrib to Central Asia and the Yemen. The materials presented provide new insights into the early development of the prayer ritual in Islam. They also call into question the popular notion that religion could not inspire serious scientific activity. Only one of the hundreds of astronomical tables discussed here was known in medieval Europe, which is one reason why the entire corpus has remained unknown until the present. A second volume, also to be published by Brill, deals with astronomical instruments for timekeeping and other computing devices.
