"Nineteen Eighty-Four: A Novel", often published as "1984", is a dystopian social science fiction novel by English novelist George Orwell. It was published on 8 June 1949 by Secker & Warburg as Orwell's ninth and final book completed in his lifetime. Thematically, "Nineteen Eighty-Four" centres on the consequences of totalitarianism, mass surveillance, and repressive regimentation of persons and behaviours within society. Orwell, himself a democratic socialist, modelled the authoritarian government in the novel after Stalinist Russia. More broadly, the novel examines the role of truth and facts within politics and the ways in which they are manipulated. The story takes place in an imagined future, the year 1984, when much of the world has fallen victim to perpetual war, omnipresent government surveillance, historical negationism, and propaganda. Great Britain, known as Airstrip One, has become a province of a totalitarian superstate named Oceania that is ruled by the Party who employ the Thought Police to persecute individuality

and independent thinking. Big Brother, the leader of the Party, enjoys an intense cult of personality despite the fact that he may not even exist. The protagonist, Winston Smith, is a diligent and skillful rank-and-file worker and Outer Party member who secretly hates the Party and dreams of rebellion. He enters into a forbidden relationship with a colleague, Julia, and starts to remember what life was like before the Party came to power. This popular book demystifies literature reviewing and answers the questions students have about how to tackle the process. This thought-provoking, semi-autobiographical book tells the story of Aisha, a young Moroccan woman, and her struggle to find an identity in the Morocco of the second half of the twentieth century. Charting Aisha's path through adolescence and young adulthood up to the present, her story is told through a series of flashbacks, anecdotes, and glimpses of the past, all bound up with a strong, often strident, always compelling worldview that takes in Morocco, its politics, people, and traditions, Islam, and marriage. Male-female relationships feature strongly in the narrative, and by exposing us to Aisha's troubled romantic encounters, Abouzeid uncovers the shifting male/female roles within the Morocco of her lifetime. Many aspects of Moroccan society are also explored through the other clashes of the modern and the traditional in Aisha's life. The workplace and corruption, the struggle for women's rights, the clash between Islamic and Western values as well as with the older practices of sorcery and witchcraft, and the conflict between colonial and native language use are all intertwined in a narrative that is both forceful and often poetic. Through a series of tales of emotional disasters, the reader becomes aware not only of Aisha's frustrations but also of her deep commitment to her country and her struggle to defeat suffering, uphold justice, and retain a fierce independence as a woman and a clarity of conviction in her life. Leila Abouzeid is a pioneer among her Moroccan contemporaries in that she writes in Arabic rather than in French and is the first Moroccan woman writer of literature to be translated into English. This stimulating and revealing book adds a new perspective to Maghrebi women's writing, and is an important addition to the growing body of Arab women's writing in translation. This new edition of the best-selling book offers graduate students in education and the social sciences a road map to developing and writing an effective literature review for a research project, thesis, or dissertation. Organized around a proven six-step model and incorporating technology into all of the steps, the book provides

examples, strategies, and exercises that take students step by step through the entire process: Selecting a topic Searching the literature Developing arguments Surveying the literature Critiquing the literature Writing the literature review The second edition includes key vocabulary words, technology advice, and additional tips on when and how to write during the early stages--including the use of journals and memoranda--to make the literature review process a success. This timely, engaging book provides an overview of the nature, logic, diversity and process of undertaking systematic reviews as part of evidence informed decision making. A focused, accessible and technically up-to-date book, it covers the full breadth of approaches to reviews from statistical meta analysis to meta ethnography. It is ideal for anyone undertaking their own systematic review - providing all the necessary conceptual and technical background needed to make a good start on the process. The content is divided into five clear sections: • Approaches to reviewing • Getting started • Gathering and describing research • Appraising and synthesising data • Making use of reviews/models of research use. Easy to read and logically structured, this book is essential reading for anyone doing systematic reviews. David Gough is Professor of Evidence Informed Policy and Practice and Director of SSRU and its EPPI-Centre and Co-Editor of the journal Evidence & Policy. Sandy Oliver is Professor of Public Policy and Deputy Director of SSRU and its EPPI-Centre. James Thomas is Reader in Social Policy, Assistant Director of SSRU and Associate Director of the EPPI-Centre. As covered by YOU Magazine, Daily Mail, Daily Telegraph, The Times, Metro, The Weekender, The Stylist, Irish Sun, Irish News, The Scotsman, Irish News and others. An astonishing and unique novel inspired by the author's own story. Designated a Doody's Core Title! "Writing for publication is essential for disseminating nursing knowledge, and this book will surely prepare budding authors and serve as a resource for experienced authors. It is a great reference for authors at all levels." Score: 100, Five Stars --Doody's Medical Reviews This in-depth resource on writing for nurses—clinicians, graduate students, researchers, and faculty—guides users through the entire process of writing evidence-based research papers and journal articles, disseminating clinical project findings and innovations, and preparing manuscripts for publication. The completely updated fourth edition expands the content on conducting and writing systematic, integrative, and literature reviews; disseminating evidence and writing papers on clinical topics; and reporting quality-

improvement studies. It provides new examples of excellent writing from a varied selection of nursing journals. Woven throughout is an explanation of current writing guidelines for research such as CONSORT and PRISMA. Also included are electronic versions of useful forms and updated web resources relevant to each chapter. Chapters feature helpful tables, figures, and illustrations; learner exercises to guide development of competencies; and discussion topics designed to address the variety of challenges posed when writing for publication. The print version of the book includes searchable digital access to entire contents. New to the Fourth Edition: Updated chapters and new examples from a wide variety of nursing journals Expanded content on conducting and writing systematic, integrative, and literature reviews Guidelines for reporting different types of research Criteria for evaluating the quality of a nursing journal and avoiding predatory journals Examination of open-access journal markets Strategies for interprofessional collaboration Updated content on quality-improvement reporting Tips to avoid plagiarism Guidance on writing case studies, case reports, policy papers, and articles Expanded discussion and examples of searchable databases Electronic versions of useful forms Updated web resources in each chapter and in an appendix Key Features: Takes the reader step by step through the entire process of writing for publication Covers conducting and writing a literature review and writing research, review, quality-improvement, evidencebased practice, and clinical practice articles Delivers strategies for writing all types of journal articles, chapters, books, and other forms of writing Includes tips for turning dissertations, DNP projects, and course assignments into manuscripts Details the submission, editorial review, and publication processes Includes a module for online courses in each chapter Includes Instructor's Manual, PowerPoints, and sample syllabus This book provides a clear and thorough introduction to meta-analysis, the process of synthesizing data from a series of separate studies. Meta-analysis has become a critically important tool in fields as diverse as medicine, pharmacology, epidemiology, education, psychology, business, and ecology. Introduction to Meta-Analysis: Outlines the role of meta-analysis in the research process Shows how to compute effects sizes and treatment effects Explains the fixed-effect and random-effects models for synthesizing data Demonstrates how to assess and interpret variation in effect size across studies Clarifies concepts using text and figures, followed by formulas and examples Explains how to avoid common mistakes in

meta-analysis Discusses controversies in meta-analysis Features a web site with additional material and exercises A superb combination of lucid prose and informative graphics, written by four of the world's leading experts on all aspects of meta-analysis. Borenstein, Hedges, Higgins, and Rothstein provide a refreshing departure from cookbook approaches with their clear explanations of the what and why of meta-analysis. The book is ideal as a course textbook or for self-study. My students, who used pre-publication versions of some of the chapters, raved about the clarity of the explanations and examples. David Rindskopf, Distinguished Professor of Educational Psychology, City University of New York, Graduate School and University Center, & Editor of the Journal of Educational and Behavioral Statistics. The approach taken by Introduction to Meta-analysis is intended to be primarily conceptual, and it is amazingly successful at achieving that goal. The reader can comfortably skip the formulas and still understand their application and underlying motivation. For the more statistically sophisticated reader, the relevant formulas and worked examples provide a superb practical guide to performing a meta-analysis. The book provides an eclectic mix of examples from education, social science, biomedical studies, and even ecology. For anyone considering leading a course in meta-analysis, or pursuing self-directed study, Introduction to Meta-analysis would be a clear first choice. Jesse A. Berlin, ScD Introduction to Meta-Analysis is an excellent resource for novices and experts alike. The book provides a clear and comprehensive presentation of all basic and most advanced approaches to meta-analysis. This book will be referenced for decades. Michael A. McDaniel, Professor of Human Resources and Organizational Behavior, Virginia Commonwealth University Healthcare decision makers in search of reliable information that compares health interventions increasingly turn to systematic reviews for the best summary of the evidence. Systematic reviews identify, select, assess, and synthesize the findings of similar but separate studies, and can help clarify what is known and not known about the potential benefits and harms of drugs, devices, and other healthcare services. Systematic reviews can be helpful for clinicians who want to integrate research findings into their daily practices, for patients to make well-informed choices about their own care, for professional medical societies and other organizations that develop clinical practice guidelines. Too often systematic reviews are of uncertain or poor quality. There are no universally accepted standards for developing systematic reviews leading to variability

in how conflicts of interest and biases are handled, how evidence is appraised, and the overall scientific rigor of the process. In Finding What Works in Health Care the Institute of Medicine (IOM) recommends 21 standards for developing high-quality systematic reviews of comparative effectiveness research. The standards address the entire systematic review process from the initial steps of formulating the topic and building the review team to producing a detailed final report that synthesizes what the evidence shows and where knowledge gaps remain. Finding What Works in Health Care also proposes a framework for improving the quality of the science underpinning systematic reviews. This book will serve as a vital resource for both sponsors and producers of systematic reviews of comparative effectiveness research. WINNER OF THE NATIONAL BOOK CRITICS CIRCLE AWARD WINNER OF THE WOMEN'S PRIZE FOR FICTION NEW YORK TIMES BESTSELLER "[An] exceptional winner.... It expresses something profound about the human experience that seems both extraordinarily current and at the same time, enduring." --Martha Lane Fox, Chair of The Women's Prize for Fiction judges TWO EXTRAORDINARY PEOPLE. A LOVE THAT DRAWS THEM TOGETHER. A PLAGUE THAT THREATENS TO TEAR THEM APART. England, 1580. A young Latin tutor--penniless, bullied by a violent father--falls in love with an eccentric young woman: a wild creature who walks her family's estate with a falcon on her shoulder and is known throughout the countryside for her unusual gifts as a healer. Agnes understands plants and potions better than she does people, but once she settles on the Henley Street in Stratford she becomes a fiercely protective mother and a steadfast, centrifugal force in the life of her young husband. His gifts as a writer are just beginning to awaken when their beloved twins, Hamnet and Judith, are afflicted with the bubonic plague, and, devastatingly, one of them succumbs to the illness. A luminous portrait of a marriage, a shattering evocation of a family ravaged by grief and loss, and a hypnotic recreation of the story that inspired one of the greatest literary masterpieces of all time, Hamnet & Judith is mesmerizing and seductive, an impossible-to-put-down novel from one of our most gifted writers. Published as Hamnet in the US and the UK. One of the most fundamental questions for social scientists involves diffusion events; simply put, how do ideas spread and why do people embrace them? In Diffusion of Good Government: Social Sector Reforms in Brazil, Natasha Borges Sugiyama examines why innovations spread across political territories and what motivates politicians to adopt them. Sugiyama does so from the vantage point

of Brazilian politics, a home to innovative social sector reforms intended to provide the poor with access to state resources. Since the late 1980s, the country has undergone major policy transformations as local governments have gained political, fiscal, and administrative autonomy. For the poor and other vulnerable groups, local politics holds special importance: municipal authorities provide essential basic services necessary for their survival, including social assistance, education, and health care. Brazil, with over 5,000 municipalities with a wide variety of political cultures and degrees of poverty, thus provides ample opportunities to examine the spread of innovative programs to assist such groups. Sugiyama delves into the politics of social sector reforms by examining the motivations for emulating well-regarded programs. To uncover the mechanisms of diffusion, her analysis contrasts three paradigmatic models for how individuals choose to allocate resources: by advancing political self-interest to gain electoral victories; by pursuing their ideological commitments for social justice; or by seeking to demonstrate adherence to the professional norms of their fields. Drawing on a mixed-method approach that includes extensive field research and statistical analysis on the spread of model programs in education (especially Bolsa Escola, a school grant program) and health (Programa Saúde da Família, a family health program), she concludes that ideological convictions and professional norms were the main reasons why mayors adopted these programs, with electoral incentives playing a negligible role. **OVER 3 MILLION COPIES SOLD - THE NO.1 BESTSELLER AND TIKTOK SENSATION, FROM THE AUTHOR OF IT ENDS WITH US** Are you ready to stay up all night? Rebecca meets *Gone Girl* in this shocking, unpredictable thriller with a twist that will leave you reeling . . . Lowen Ashleigh is a struggling writer on the brink of financial ruin when she accepts the job offer of a lifetime. Jeremy Crawford, husband of bestselling author Verity Crawford, has hired Lowen to complete the remaining books in a successful series his injured wife is unable to finish. Lowen arrives at the Crawford home, ready to sort through years of Verity's notes and outlines, hoping to find enough material to get her started. What Lowen doesn't expect to uncover in the chaotic office is an unfinished autobiography Verity never intended for anyone to read. Page after page of bone-chilling admissions, including Verity's recollection of the night their family was forever altered. Lowen decides to keep the manuscript hidden from Jeremy, knowing its contents would devastate the already-grieving father. But as

Lowen's feelings for Jeremy begin to intensify, she recognizes all the ways she could benefit if he were to read his wife's words. After all, no matter how devoted Jeremy is to his injured wife, a truth this horrifying would make it impossible for him to continue loving her . . . Doing a Literature Search provides a practical and comprehensive guide to searching the literature on any topic within the social sciences. The book will enable the reader to search the literature effectively, identifying useful books, articles, statistics and many other sources of information. The text will be an invaluable research tool for postgraduates and researchers across the social sciences. Such diverse thinkers as Lao-Tze, Confucius, and U.S. Defense Secretary Donald Rumsfeld have all pointed out that we need to be able to tell the difference between real and assumed knowledge. The systematic review is a scientific tool that can help with this difficult task. It can help, for example, with appraising, summarising, and communicating the results and implications of otherwise unmanageable quantities of data. This book, written by two highly-respected social scientists, provides an overview of systematic literature review methods: Outlining the rationale and methods of systematic reviews; Giving worked examples from social science and other fields; Applying the practice to all social science disciplines; It requires no previous knowledge, but takes the reader through the process stage by stage; Drawing on examples from such diverse fields as psychology, criminology, education, transport, social welfare, public health, and housing and urban policy, among others. Including detailed sections on assessing the quality of both quantitative, and qualitative research; searching for evidence in the social sciences; meta-analytic and other methods of evidence synthesis; publication bias; heterogeneity; and approaches to dissemination. From daunting to doable in six steps Graduate students who turn in exceptional literature reviews are recognized as excellent critical thinkers, as well as masters of academic argumentation, research writing and

writing academic papers. But literature searches and composing the review itself can be intimidating and frustrating. The six-step process pioneered by this book has made the task flowing and seamless for masters and doctoral candidates in Education and related fields. This updated third edition features a wealth of all-new content including: A flowchart that graphically illustrates Machi and McEvoy's process. Reflective Oversight boxes in each chapter that prompt readers to direct metacognitive activities. Links to online guides and resources. Expanded examples illustrating theoretical concepts. When you apply this system to your next literature review the work will be intuitive and enjoyable for you, and the results will impress your teachers and fellow researchers. Editable, chapter-specific PowerPoint® slides offer complete flexibility for creating a multimedia presentation for the course: Slides - Introduction to The Lit Rev Slides - Step 1 - Select a Topic Slides - Step 2 - Develop Tools of Argumentation Slides - Step 3 - Search the Literature Slides - Step 4 - Survey the Literature Slides - Step 5 - Critique the Literature Slides - Step 6 - Write the Thesis

"The Literature Review clearly walks educators through the steps to completing a literature review with helpful checklists and graphic representations of the process. It makes a very daunting task much more manageable and systematic." Andrea M. Capizzi Vanderbilt University, Nashville, TN "This text is the best guide yet for our dissertation students. The format provides the learner with the framework to think about each step of the literature review process. This thorough and practical guide will provide candidates with the scholarly application that they require to think about their research." Barbara J. Poling, Interim Dean College of Education and Organizational Leadership, University of La Verne

How can ethnographic studies be generalized, in contrast to concentrating on the individual case? Noblit and Hare propose a new method for synthesizing from qualitative studies: meta-ethnography. After citing the criteria to be used in comparing qualitative research projects, the authors define the ways these can then be aggregated to create more cogent syntheses of research. Using examples from numerous studies ranging from ethnographic work in educational settings to the Mead-Freeman controversy over Samoan youth, Meta-Ethnography offers useful procedural advice from both comparative and cumulative analyses of qualitative data. This provocative volume will be read with interest by researchers and students in qualitative research methods, ethnography, education, sociology, and anthropology. "After defining metaphor and

synthesis, these authors provide a step-by-step program that will allow the researcher to show similarity (reciprocal translation), difference (refutation), or similarity at a higher level (lines or argument synthesis) among sample studies....Contain(s) valuable strategies at a seldom-used level of analysis." --Contemporary Sociology "The authors made an important contribution by reframing how we think of ethnography comparison in a way that is compatible with the new developments in interpretive ethnography. Meta-Ethnography is well worth consulting for the problem definition it offers." --The Journal of Nervous and Mental Disease "This book had to be written and I am pleased it was. Someone needed to break the ice and offer a strategy for summarizing multiple ethnographic studies. Noblit and Hare have done a commendable job of giving the research community one approach for doing so. Further, no one else can now venture into this area of synthesizing qualitative studies without making references to and positioning themselves vis-a-vis this volume." -Educational Studies Pearl Petal and Ben Silverstein can't wait for their first official day as apprentices to Dr Woo, veterinarian for imaginary creatures. That is, until they are tasked with clipping the bigfoot's big toenails. Gross! Then Pearl spots a lake monster in the water behind the hospital. Even though they've been told not to leave the building for any reason, Pearl and Ben set off for a closer look. But when Ben is captured by the creature and held hostage in the middle of the lake, it's up to Pearl to hatch a rescue mission. Will she save the day, or cement her reputation as town troublemaker? Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library (www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves. "This book is not only of practical value. It's also a lot of fun to read." Michael Jackson, The Open University.

Do you need to know how to create good requirements? Discovering Requirements offers a set of simple, robust, and effective cognitive tools for building requirements. Using worked examples throughout the text, it shows you how to develop an understanding of any problem, leading to questions such as: What are you trying to achieve? Who is involved, and how? What do those people want? Do they agree? How do you envisage this working? What could go wrong? Why are you making these decisions? What are you assuming? The established author team of Ian Alexander and Ljerka Beus-Dukic answer these and related questions, using a set of complementary techniques, including stakeholder analysis, goal modelling, context modelling, storytelling and scenario modelling, identifying risks and threats, describing rationales, defining terms in a project dictionary, and prioritizing. This easy to read guide is full of carefully-checked tips and tricks. Illustrated

with worked examples, checklists, summaries, keywords and exercises, this book will encourage you to move closer to the real problems you're trying to solve. Guest boxes from other experts give you additional hints for your projects. Invaluable for anyone specifying requirements including IT practitioners, engineers, developers, business analysts, test engineers, configuration managers, quality engineers and project managers. A practical sourcebook for lecturers as well as students studying software engineering who want to learn about requirements work in industry. Once you've read this book you will be ready to create good requirements! Based on the findings of a commission chaired by James Mirrlees, this volume presents a coherent picture of tax reform whose aim is to identify the characteristics of a good tax system for any open developed economy, assess the extent to which the UK tax system conforms to these ideals, and recommend how it might be reformed in that direction. A plane crashes on a desert island and the only survivors, a group of schoolboys, assemble on the beach and wait to be rescued. By day they inhabit a land of bright fantastic birds and dark blue seas, but at night their dreams are haunted by the image of a terrifying beast. As the boys' delicate sense of order fades, so their childish dreams are transformed into something more primitive, and their behaviour starts to take on a murderous, savage significance. First published in 1954, *Lord of the Flies* is one of the most celebrated and widely read of modern classics. Now fully revised and updated, this educational edition includes chapter summaries, comprehension questions, discussion points, classroom activities, a biographical profile of Golding, historical context relevant to the novel and an essay on *Lord of the Flies* by William Golding entitled 'Fable'. Aimed at Key Stage 3 and 4 students, it also includes a section on literary theory for advanced or A-level students. The educational edition encourages original and independent thinking while guiding the student through the text - ideal for use in the classroom and at home. To order please visit

The second edition of the Impact Evaluation in Practice handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners. First published in 2011, it has been used widely across the development and academic communities. The book incorporates real-world examples to present practical guidelines for designing and implementing impact evaluations. Readers will gain an understanding of impact evaluations and the best ways to use them to design evidence-based policies and programs. The updated version covers the newest techniques for

evaluating programs and includes state-of-the-art implementation advice, as well as an expanded set of examples and case studies that draw on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact evaluation. The handbook is divided into four sections: Part One discusses what to evaluate and why; Part Two presents the main impact evaluation methods; Part Three addresses how to manage impact evaluations; Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the international development community, universities, and policy makers looking to build better evidence around what works in development. Addressing one of the key challenges facing doctoral students, *Completing Your Qualitative Dissertation* by Linda Dale Bloomberg and Marie Volpe fills a gap in qualitative literature by offering comprehensive guidance and practical tools for navigating each step in the qualitative dissertation journey, including the planning, research, and writing phases. Blending the conceptual, theoretical, and practical, the book becomes a dissertation in action—a logical and cohesive explanation and illustration of content and process. The Third Edition maintains key features that distinguish its unique approach and has been thoroughly updated and expanded throughout to reflect and address recent developments in the field. Showing you how to take a structured and organized approach to a wide range of literature review types, this book helps you to choose which approach is right for your research. Packed with constructive tools, examples, case studies and hands-on exercises, the book covers the full range of literature review techniques. **New to This Edition:** Full re-organization takes you step-by-step through the process from beginning to end New chapter showing you how to choose the right method for your project Practical guidance on integrating qualitative and quantitative data New coverage of rapid reviews Comprehensive inclusion of literature review tools, including concept analysis, scoping and mapping With an emphasis on the practical skills, this guide is essential for any student or researcher needing to get from first steps to a successful literature review. This book offers a user-friendly guide to preparing a perfect dissertation. Rather than focusing only on how to draft the report itself, the authors provide readers with material on generating a

researchable question, as well as methods for assessing blind spots and learning styles that may get in the way of completing a dissertation. Using examples from a wide variety of disciplines, the authors demonstrate how to write up results, develop appropriate writing skills, and ways to construct tables and figures. In addition, the book includes information on writing up qualitative research, using computer technology effectively to assist in the dissertation process and following ethical guidelines in conducting research. This highly accessible book guides students through the production of either a traditional or a systematic literature review, clearly explaining the difference between the two types of review, the advantages and disadvantages of both, and the skills needed. It gives practical advice on reading and organizing relevant literature and critically assessing the reviewed field. Contents include using libraries and the internet, note making, presentation, critical analysis, and referencing, plagiarism, and copyright. One doctor's passionate and profound memoir of his experience grappling with race, bias, and the unique health problems of black Americans When Damon Tweedy begins medical school, he envisions a bright future where his segregated, working-class background will become largely irrelevant. Instead, he finds that he has joined a new world where race is front and center. The recipient of a scholarship designed to increase black student enrollment, Tweedy soon meets a professor who bluntly questions whether he belongs in medical school, a moment that crystallizes the challenges he will face throughout his career. Making matters worse, in lecture after lecture the common refrain for numerous diseases resounds, "More common in blacks than in whites." *Black Man in a White Coat* examines the complex ways in which both black doctors and patients must navigate the difficult and often contradictory terrain of race and medicine. As Tweedy transforms from student to practicing physician, he discovers how often race influences his encounters with patients. Through their stories, he illustrates the complex social, cultural, and economic factors at the root of many health problems in the black community. These issues take on greater meaning when Tweedy is himself diagnosed with a chronic disease far more common among black people. In this powerful, moving, and deeply empathic book, Tweedy explores the challenges confronting black doctors, and the disproportionate health burdens

faced by black patients, ultimately seeking a way forward to better treatment and more compassionate care. **Telling a Research Story: Writing a Literature Review** is concerned with the writing of a literature review and is not designed to address any of the preliminary processes leading up to the actual writing of the literature review. This volume represents a revision and expansion of the material on writing literature reviews that appeared in *English in Today's Research World*. This volume progresses from general to specific issues in the writing of literature reviews. It opens with some orientations that raise awareness of the issues that surround the telling of a research story. Issues of structure and matters of language, style, and rhetoric are then discussed. Sections on metadiscourse, citation, and paraphrasing and summarizing are included. This is not just another book about crisis in Haiti. This book is about what it feels like to live and die with a crisis that never seems to end. It is about the experience of living amid the ruins of ecological devastation, economic collapse, political upheaval, violence, and humanitarian disaster. It is about how catastrophic events and political and economic forces shape the most intimate aspects of everyday life. In this gripping account, anthropologist Greg Beckett offers a stunning ethnographic portrait of ordinary people struggling to survive in Port-au-Prince in the twenty-first century. Drawing on over a decade of research, *There Is No More Haiti* builds on stories of death and rebirth to powerfully reframe the narrative of a country in crisis. It is essential reading for anyone interested in Haiti today. Here is a complete guide for librarians seeking to launch or refine their systematic review services. Conducting searches for systematic reviews goes beyond expert searching and requires an understanding of the entire process of the systematic review. Just as expert searching is not fully mastered by the end of a library degree, mastering the systematic review process takes a great deal of time and practice. Attending workshops and webinars can introduce the topic, but application of the knowledge through practice is required. Running a systematic review service is complicated and requires constant updating and evaluation with new standards, more efficient methods, and improved reporting guidelines. After a brief introduction to systematic reviews, the book guides librarians in defining and marketing their services, covering topics such as when it is appropriate to ask for co-authorship and how to reach out to stakeholders. Next, it addresses developing documentation and conducting the reference interview. Standards specific to

systematic reviews, including PRISMA, Institute of Medicine, and Cochrane Collaboration, are discussed. Search strategy techniques, including choosing databases, harvesting search terms, selecting filters, and searching for grey literature are detailed. Data management and critical appraisal are covered in detail. Finally, the best practices for reporting the findings of systematic reviews are highlighted. Experts with experience in both systematic reviews and librarianship, including the editors of the book, contributed to the chapters. Each step (or piece) of the review process (Planning the review, Identifying the studies, Evaluating studies, Collecting and combining data, Explaining the results, and Summarizing the review into a report), are covered with emphasis on information roles. The book is for any librarian interested in conducting reviews or assisting others with reviews. It has several applications: for training librarians new to systematic reviews, for those developing a new systematic review service, for those wanting to establish protocols for a current service, and as a reference for those conducting reviews or running a service. Participating in systematic reviews is a new frontier of librarianship, in which librarians can truly become research partners with our patrons, instead of merely providing access to resources and services.
