In *The Pianist's Craft 2*, pianist and scholar Anderson gathers together a new collection of essays by renowned performing artists and teachers and discusses the preparation, pedagogy, and performance of selected works by an entirely different set of composers whose works are standard in the piano literature. *Mastering the Revels* traces the measures taken by the governments of Elizabeth I, James I, and Charles I to regulate the new

phenomenon of fixed playhouses and resident playing companies in London, and to censor their plays. It focuses on the Masters of the Revels, whose primary function was to seek out theatrical entertainment for the court but whose role expanded to include oversight of the players and their playhouses. The book proceeds chronologically, tracking each of the Masters in the period—Edmund Tilney (served 1579-1610), Sir George Buc (1610-22), Sir John Astley (1622-3), and Sir Henry Herbert (1623-1642). Tilney was the first to receive a Special Commission giving him wide-ranging

powers over the players. When Buc first became involved is examined here in detail, as is the parallel history of the Children of the Queen's Revels who between 1604 and 1608 staged some of the most scandalous plays of the era. Astley succeeded Buc, but soon sold the office to Herbert, who then served to the closing of the theatres. Manuscripts of plays censored by Tilney, Buc, and Herbert have survived and are examined in detail to assess their concerns. Large parts of Herbert's office-book have also survived, giving detailed insights into his professional life,

including interactions with both the court and the players. It reveals the difficulties he faced negotiating recurrent popular pressure for war against Spain, resistance to Archbishop Laud's reforms of the church, and Henrietta Maria's problematic presence as a Catholic queen to Charles I. Lang Lang Piano Academy: Mastering the piano, Level 2 (approximately equivalent to Grade 2/Elementary) includes sections on hand coordination, phrasing and developing dexterity. "We live in fragile and somewhat febrile times, so many people feel disenfranchised and powerless as the world spins faster and increasingly unpredictably. This wonderful book is filled with inspirational stories of real people doing real things to make a profound difference. If there was ever a book to inspire a new age of optimism and to catalyse a renaissance for our precious planet then this is it." Dr

Richard Gerver, Educator, Author, Speaker The greatest book in the world is the Bible, and particularly the New Testament. No other volume unveils so many eternal truths as this title. Anyone who aspires to know the truth about himself, his world or God must closely examine this writing. Any individual can claim to know this or that, but until a person has sit and lingered long and hard before the New Testament, he knows nothing. This book alone can bring focus and clarity to all of the questions that plague humanity. Only this volume can untangle the mysteries of life. Read it to know

the truth. Study it to become wise. Apply it to be the person you were meant to become. Noted technical analyst John Person outlines a comprehensive method to pinpointing today's best trading opportunities. The economy and stock market are heavily influenced by seasonal factors. For example, a strong holiday buying season tends to be bullish for retail stocks or rising energy costs hurt airline profitability. Awareness of seasonal trends in both the economy and stock market can put you in a better position to profit from sectors and stocks that are likely to outperform

the overall market. And technical tools can then be used to confirm emerging trends and time entries into these stocks and sectors. Mastering the Stock Market provides authoritative insights into a method for trading stocks based on seasonal trends, sector analysis, and market timing. Taking a top-down approach, the book explains how seasonal supply/demand forces impact commodities and different sectors of the stock market. After learning how to identify stock market sectors and commodity ETFs that are ripe for a big move, you'll quickly discover how to use

technical analysis to gauge the strength of the sector or commodity and then identify the strongest stocks and ETFs to trade. Along the way, you'll also learn how to use the author's own indicators, Persons Pivots, to identify support/resistance areas and pinpoint optimal entry and exit points. Outlines a proven technical approach for trading stocks based on seasonal trends, sector analysis, and market timing. Breaks new ground in comparative relative strength, trading volume, breadth indicators, and utilizing pivot analysis in conjunction with options expiration

days to identify trading opportunities. Written by noted technical analyst John L. Person, To successfully trade today's markets you need to use a proven approach and have the discipline to effectively implement it. Mastering the Stock Market has what you need to achieve these goals and capture consistent profits along the way. Anyone can cook in the French manner anywhere, wrote Mesdames Beck, Bertholle, and Child, with the right instruction. And here is the book that, for forty years, has been teaching Americans how. Mastering the Art of French

Cooking is for both seasoned cooks and beginners who love good food and long to reproduce at home the savory delights of the classic cuisine, from the historic Gallic masterpieces to the seemingly artless perfection of a dish of spring-green peas. This beautiful book, with more than one hundred instructive illustrations, is revolutionary in its approach because: It leads the cook infallibly from the buying and handling of raw ingredients, through each essential step of a recipe, to the final creation of a delicate confection. It breaks down the classic cuisine into a logical sequence of themes and

variations rather than presenting an endless and diffuse catalogue of recipes; the focus is on key recipes that form the backbone of French cookery and lend themselves to an infinite number of elaborations bound to increase anyone's culinary repertoire.
