Creating Integrated IBM WebSphere Solutions using Application Lifecycle Management Oct 17 2019 This IBM® Redbooks® publication demonstrates, through a practical solution and step-by-step implementation instructions, how customers can use the IBM Rational® Application Lifecycle Management (ALM) portfolio to build and manage an integrated IBM WebSphere® Application. Building a business application (mobile and desktop) that uses WebSphere Application Server, IBM MQ, IBM Integration Bus (IIB), Business Process Management (BPM), Operational Decision Management (ODM), and Mobile. IBM Redpaper™ publication, Rapid deployment of integrated WebSphere solutions in your cloud, REDP-5132, is an extension to this IBM Redbooks publication. Using the same practical solution covered in this Redbooks publication, REDP-5132 demonstrates how the IBM PureApplication® System is a "logical extension" versus a "whole new world", covering PureApplication Patterns and the new PureApplication as a service on Softlayer. The intended audience for this book is architects, developers, administrators, and DevOps personnel.

Child Development: A Thematic Approach Feb 01 2021 Bukatko/Daehler's

CHILD DEVELOPMENT: A THEMATIC APPROACH provides a comprehensive, topically organized, up-to-date picture of development from conception to adolescence. Most important, it draws students' attention to the themes that replay themselves throughout the course of development, fundamental issues that resurface continually and that provide coherence to sometimes seemingly disparate research. The themes can serve as frameworks to help students further understand and remember the multitude of facts about child development. Bukatko/Daehler's sixth edition text draws on five themes, Nature and Nurture, Sociocultural Influence, Continuity/Discontinuity, Interaction among Domains, and Risk/Resilience. By drawing on these themes, the authors hope to stimulate readers to think about the process of development, or why it proceeds as it does. Through new For Your Review and Reflection sections, the authors also hope students will engage with the text and become more adept critical thinkers who are more likely to appreciate the ramifications of theory and research.

for applied issues such as parenting practices, education, and social policy for children, which are ultimately concerns for us all. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Management Accounting 3, Second Edition- Custom Reader for University of West of Scotland Sep 27 2020 Management Accounting 3, Second Edition - a custom book specially prepared by Abeer Hassan for students at University of West of Scotland. The team at McGraw-Hill Education Custom and Digital Solutions have worked together with your lecturer to produce this custom textbook. It has all the features you expect from your textbook: A logical structure; Clearly written text; Learning goals and practice material; Current and topical examples. What's more, its contents are tailored to the course you will be following. As such, when you buy it, you will be getting the material which your lecturer feels will best support you in this course and help you succeed.

Intelligent Computational Optimization in Engineering Dec 31 2020 We often come across computational optimization virtually in all branches of engineering and industry. Many engineering problems involve heuristic search and optimization, and, once discretized, may become combinatorial in nature, which gives rise to certain difficulties in terms of solution procedure. Some of these problems have enormous search spaces, are NP-hard and hence require heuristic solution techniques. Another difficulty is the lack of ability of classical solution techniques to determine appropriate optima of non-convex problems. Under these conditions, recent advances in computational optimization techniques have been shown to be advantageous and successful compared to classical approaches. This Volume presents some of the latest developments with a focus on the design of algorithms for computational optimization and their applications in practice. Through the chapters of this book, researchers and practitioners share their experience and newest methodologies with regard to intelligent optimization and provide various case studies of the application of intelligent optimization techniques in real-world applications. This book can serve as an excellent reference for researchers and graduate students in computer science, various engineering disciplines and the industry.
