The Scientific Study of the Old Testament Dec 10 2021 From the Preface: These lectures are easily understood and do not require a knowledge of the Hebrew language. Originally they were not intended for publication, but merely to be delivered to about seventy teachers, successful as religious instructors in elementary schools ... Whilst delivering them, at the local University College, towards the close of September 1909, my audience expressed a wish - which was repeated at the end of the course - to have the lectures published, and thus enable them to study them further, and at the same time give an opportunity to those teachers who were either unable to be present or had not been summoned, who nevertheless had evinced a keen interest in them, to read the lectures.... May these lectures be found a useful contribution to the solution of the great and important problems which confront our state schools - and with them the German and Christian schools generally.

Katie's Cabbage Sep 19 2022 Katie ' s Cabbage is the inspirational true story of how Katie Stagliano, a third grader from Summerville, South Carolina, grew a forty-pound

cabbage in her backyard and donated it to help feed 275 people at a local soup kitchen. In her own words, Katie shares the story of the little cabbage seedling and the big ideas of generosity and service that motivated her to turn this experience into Katie ' s Krops, a national youth movement aimed at ending hunger one vegetable garden at a time. Katie ' s Cabbage reminds us of how small things can grow and thrive when nurtured with tender loving and care and of how one person, with the support of family, friends, and community, can help make a powerful difference in the lives of so many. Katie ' s Cabbage was illustrated by Karen Heid, associate professor of art education at the University of South Carolina School of Visual Art and Design. Editorial assistance was provided by Michelle H. Martin, a dedicated gardener and the Augusta Baker Chair in Childhood Literacy at the University of South Carolina School of Library and Information Science. Patricia Moore-Pastides, First Lady of the University of South Carolina and author of *Greek Revival from the Garden: Growing and Cooking for Life*, offers a foreword about her friendship with Katie and her admiration of Katie ' s dream to end hunger one garden at a time.

Special Relativity for Beginners Feb 24 2023 This book, first appearing in German in 2004 under the title *Spezielle Relativitätstheorie für Studienanfänger*, offers access to the special theory of relativity for readers with a background in mathematics and physics comparable to a high school honors degree. All mathematical and physical competence required beyond that level is gradually developed through the book, as more advanced topics are introduced. The full tensor formalism, however, is dispensed with as it would only be a burden for the problems to be dealt with. Eventually, a

substantial and comprehensive treatise on special relativity emerges which, with its gray-shaded formulary, is an invaluable reference manual for students and scientists alike. Some crucial results are derived more than once with different approaches: the Lorentz transformation in one spatial direction three times, the Doppler formula four times, the Lorentz transformation in two directions twice; also twice the unification of electric and magnetic forces, the velocity addition formula, as well as the aberration formula. Beginners will be grateful to find several routes to the goal; moreover, for a theory like relativity, it is of fundamental importance to demonstrate that it is self-contained and without contradictions. The Superstition of Divorce Mar 13 2022 "The Superstition of Divorce" stroke a timely note in treating of this difficult subject with logic and a clear exposition of the historical background of the institution of marriage! Manual of Adult and Paediatric Medical Oncology Sep 26 2020 It is a very special honour for me to be able to present this handbook of medical oncology, which under diverse headings and origins covers such a vast spectrum of experience. I believe the reader will be struck in particular by the impressive volume of information available, especially with regard to childhood tumours, which represent, today, an immense "laboratory of hope". It is in this very field that we oncologists have been able to obtain the most consoling results in recent years. I feel sure that all those who read these chapters will find that their oncological competence is enriched and also in a certain sense that their wish to contribute to progress in cancer research and treatment has been renewed. In conclusion, my most heartfelt congratulations go to the authors for the excellent job they have done, as well as my admiration for having been able to concentrate so much precious and innovative information into so little space. Umberto
