The first edition of the new Catechism went out across the world in many language versions. This gave the local Churches the chance to study it in depth. Through their bishops and teachers they responded with comments on texts that needed refinement. The present edition was developed in the light of these comments and published in Latin as the definitive Editio Typica. This book is the English translation of the Editio Typica. A study of the deity of the world's three dominant monotheistic religions: Judaism, Christianity, and Islam. In a dynamic interplay between religion and society's ever-changing beliefs, values, and traditions, human beings' ideas about God have been transformed. Ideas about God have been molded to apply to the spiritual needs of the people who worship him in a particular place and time. The author explores and analyzes the development and progression of the various perceptions of God from the days of Abraham to present times--Adapted from book jacket. Contains 13 essays which encompass just over four-and-a-half centuries of the thousands of years of Jerusalem's past--from the Muslim conquest in 638 until the eve of the Crusader onslaught in 1099. Topics include the physical infrastructure, the authorities and the local population, art and architecture in the early Islamic period, the temple and the city in liturgical Hebrew, Christian attitudes towards Jerusalem in the early middle ages, the Muslim view of Jerusalem and the Yeshiva of Eretz Israel. Annotation copyright by Book News, Inc., Portland, OR F. E. Peters, a scholar without peer in the comparative study of Judaism, Christianity, and Islam, revisits his pioneering work. Peters has rethought and thoroughly rewritten his classic *The Children of Abraham* for a new generation of readers-at a time when the understanding of these three religious traditions has taken on a new and critical urgency. He began writing about all three faiths in the 1970s, long before it was

fashionable to treat Islam in the context of Judaism and Christianity, or to align all three for a family portrait. In this updated edition, he lays out the similarities and differences of the three religious siblings with great clarity and succinctness and with that same remarkable objectivity that is the hallmark of all the author's work. Peters traces the three faiths from the sixth century B.C., when the Jews returned to Palestine from exile in Babylonia, to the time in the Middle Ages when they approached their present form. He points out that all three faith groups, whom the Muslims themselves refer to as "People of the Book," share much common ground. Most notably, each embraces the practice of worshipping a God who intervenes in history on behalf of His people. The book's text is direct and accessible with thorough and nuanced discussions of each of the three religions. Footnotes provide the reader with expert guidance into the highly complex issues that lie between every line of this stunning edition of *The Children of Abraham*. Complete with a new preface by the author, this Princeton Classics edition presents this landmark study to a new generation of readers. Issues of gender and sexuality are intrinsic to people's experience: their sense of identity, their lives and the loving relationships that shape and sustain them. The life and mission of the Church of England – and of the worldwide Anglican Communion – are affected by the deep, and sometimes painful, disagreements about these matters, divisions brought into sharper focus because of society's changing perspectives and practices, especially in relation to LGBTBI+ people. *Living in Love and Faith* sets out to inspire people to think more deeply both about what it means to be human, and to live in love and faith with one another. It tackles the tough questions and the divisions among Christians about what it means to be holy in a society in which understandings and practices of gender, sexuality and marriage continue to change. Commissioned and led by the Bishops of the Church of England, the *Living in Love and Faith* project has involved many people across the Church and beyond, bringing together a great diversity and depth of expertise, conviction and experience to explore these matters by studying what the Bible, theology, history and the social and biological sciences have to say. After a Foreword from the Archbishops of Canterbury and York, the book opens with an invitation from the Bishops of the Church of England to embark on a learning journey in five parts: Part One sets current questions about human identity, sexuality, relationships and marriage in the context of God's gift of life. Part Two takes a careful and dispassionate look at what is happening in the world with regard to identity, sexuality, relationships and marriage. Part Three explores current Christian thinking and discussions about human identity, sexuality, and marriage. In the light of the good news of Jesus Christ, how do Christians understand and respond to the trends observed in Part Two? Part Four considers what it means for us as individuals and as a church to be Christ-like when it comes to matters of identity, sexuality, relationships and marriage. Part Five invites the reader into a conversation between some of the people who have been involved in writing this book who, having engaged with and written Parts One to Four, nevertheless come to different conclusions. Amid the biblical, theological, historical and scientific exploration, each part includes Encounters with real, contemporary disciples of Christ whose stories raise questions which ask us to discern where God is active in human lives. The book

ends with an appeal from the Bishops to join them in a period of discernment and decision-making following the publication of *Living in Love and Faith*. The *Living in Love and Faith* book is accompanied by a range of free digital resources including films, podcasts and an online library, together with *Living in Love and Faith: The Course*, a 5-session course which is designed to help local groups engage with the resources, also published by Church House Publishing. With 8 pages of color photographs and 82 illustrations in text.

From one of the world's leading writers on religion and the highly acclaimed author of the bestselling *A History of God*, *The Battle for God* and *The Spiral Staircase*, comes a major new work: a chronicle of one of the most important intellectual revolutions in world history and its relevance to our own time. In one astonishing, short period – the ninth century BCE – the peoples of four distinct regions of the civilized world created the religious and philosophical traditions that have continued to nourish humanity into the present day: Confucianism and Daoism in China; Hinduism and Buddhism in India; monotheism in Israel; and philosophical rationalism in Greece. Historians call this the Axial Age because of its central importance to humanity's spiritual development. Now, Karen Armstrong traces the rise and development of this transformative moment in history, examining the brilliant contributions to these traditions made by such figures as the Buddha, Socrates, Confucius and Ezekiel. Armstrong makes clear that despite some differences of emphasis, there was remarkable consensus among these religions and philosophies: each insisted on the primacy of compassion over hatred and violence. She illuminates what this "family" resemblance reveals about the religious impulse and quest of humankind. And she goes beyond spiritual archaeology, delving into the ways in which these Axial Age beliefs can present an instructive and thought-provoking challenge to the ways we think about and practice religion today. A revelation of humankind's early shared imperatives, yearnings and inspired solutions – as salutary as it is fascinating. Excerpt from *The Great Transformation*: In our global world, we can no longer afford a parochial or exclusive vision. We must learn to live and behave as though people in remote parts of the globe were as important as ourselves. The sages of the Axial Age did not create their compassionate ethic in idyllic circumstances. Each tradition developed in societies like our own that were torn apart by violence and warfare as never before; indeed, the first catalyst of religious change was usually a visceral rejection of the aggression that the sages witnessed all around them. . . . All the great traditions that were created at this time are in agreement about the supreme importance of charity and benevolence, and this tells us something important about our humanity.

The Nameless City—held by the rogue Dao prince Erzi—is under siege by a coalition of Dao and Yisun forces who are determined to end the war for the Nameless City once and for all. And the people of the city—the "Named"—are caught in between. Meanwhile, Rat and Kai must infiltrate Erzi's palace and steal back the ancient and deadly formula for *napatha*, the ancient weapon of mass destruction Erzi has unearthed—before he can use it to destroy everything Rat and Kai hold dear! In her third and final installment in the Nameless City trilogy, Faith Erin Hicks delivers a heart-thumping conclusion. With deft world-building, frantic battle scenes, and a gentle and moving friendship at its heart, the Nameless City has earned its place as one

of the great fantasy series of our time. “A welcome expansion of the fragile territory known as common ground.” —The New York Times When Reza Aslan’s bestseller *Zealot* came out in 2013, there was criticism that he hadn’t addressed his Muslim faith while writing the origin story of Christianity. In fact, Ross Douthat of The New York Times wrote that “if Aslan had actually written in defense of the Islamic view of Jesus, that would have been something provocative and new.” Mustafa Akyol’s *The Islamic Jesus* is that book. *The Islamic Jesus* reveals startling new truths about Islam in the context of the first Muslims and the early origins of Christianity. Muslims and the first Christians—the Jewish followers of Jesus—saw Jesus as not divine but rather as a prophet and human Messiah and that salvation comes from faith and good works, not merely as faith, as Christians would later emphasize. What Akyol seeks to reveal are how these core beliefs of Jewish Christianity, which got lost in history as a heresy, emerged in a new religion born in 7th Arabia: Islam. Akyol exposes this extraordinary historical connection between Judaism, Jewish Christianity and Islam—a major mystery unexplored by academia. From Jesus’ Jewish followers to the Nazarenes and Ebionites to the Qu’ran’s stories of Mary and Jesus, *The Islamic Jesus* will reveal links between religions that seem so contrary today. It will also call on Muslims to discover their own Jesus, at a time when they are troubled by their own Pharisees and Zealots. *Ecologies of Faith in New York City* examines patterns of interreligious cooperation and conflict in New York City. It explores how representative congregations in this religiously diverse city interact with their surroundings by competing for members, seeking out niches, or cooperating via coalitions and neighborhood organizations. Based on in-depth research in New York’s ethnically mixed and rapidly changing neighborhoods, the essays in the volume describe how religious institutions shape and are shaped by their environments, what new roles they have assumed, and how they relate to other religious groups in the community. *The Crusades and their impact on today’s world*. Traces how three American women of different faiths worked together to understand one another while identifying the connections between Judaism, Christianity, and Islam, during which they openly discussed the issues that divided them. This book explores the interface between geography, ethics and morality. It considers questions that have haunted the past, are subjects of controversy in the present, and which affect the future. Does distance diminish responsibility? Should we interfere with the lives of those we do not know? Is there a distinction between private and public space? Which values and morals, if any, are absolute, and which cultural, communal or personal? And are universal rights consistent with respect for difference? David Smith shows how these questions play themselves out in politics, planning, development, social and personal relations, the exploitation of resources, and competition for territory. After introducing the essential elements of moral philosophy from Plato to postmodernism, he examines the moral significance of concepts of landscape, location and place, proximity, distance and community, space and territory, justice, and nature. He is concerned above all with the morality people practice, to see how this varies according to geographical context, and to assess the inevitability of its outcomes. His argument is seamlessly interwoven with everyday observation and vividly described case studies: the latter include genocide and

rescue during the Holocaust, the conflicts over space between Israel and Palestine and within Israel itself, and the social tensions and aspirations in post-apartheid South Africa. The meaning, possibility and limits of social justice lie at the heart of the book. That geographical context is vital to the understanding of moral practice and ethical theory is its central proposition. The book is clearly and engagingly written. The author has a student readership in mind, but his book will appeal widely to geographers and others involved in planning, development, politics, social theory, and the analysis of the contemporary world. In this timely, provocative, and uplifting journey, the bestselling author of *Walking the Bible* searches for the man at the heart of the world's three monotheistic religions—and today's deadliest conflicts. At a moment when the world is asking "can the religions get along?" one figure stands out as the shared ancestor of Jews, Muslims, and Christians. One man holds the key to our deepest fears—and our possible reconciliation. Abraham is that man. Bruce Feiler set out on a personal quest to better understand our common patriarch. Traveling in war zones, climbing through caves and ancient shrines, and sitting down with the world's leading religious minds, Feiler uncovers fascinating, little known details of the man who defines faith for half the world. Both immediate and timeless, Abraham is a powerful, universal story, the first-ever interfaith portrait of the man God chose to be his partner. Thoughtful and inspiring, it offers a rare vision of hope that will redefine what we think about our neighbors, our future, and ourselves. Four years after Lord Scarman's report on the Brixton disorders, and at a time of continuing urban unrest, what future is there for our inner cities and housing estates? How should the Church of England, and other bodies, including government, respond? This was the brief given by the Archbishop of Canterbury to a distinguished 18-member Commission drawn from a wide range of backgrounds. After two years of taking evidence and visiting the major cities where economic, physical and social conditions are at their most acute and depressing, the Commission's report paints a disturbing picture. The report makes recommendations to the Church about its place and responsibilities in the urban priority areas. Important recommendations are also made about public policy issues: unemployment, housing, social and community work, education, policing, and urban policy. In its call for action on a broad front, the Commission argues that Church and State must have faith in the city. There needs to be a clear commitment - and a positive response - by the nation as a whole. From the beginning, the Abrahamic faiths—Judaism, Christianity, and Islam—have stressed the importance of transmitting religious identity from one generation to the next. Today, that sustaining mission has never been more challenged. Will young people have a faith to guide them? How can faith traditions anchor religious attachments in this secular, skeptical culture? The fruit of a historic gathering of scholars and religious leaders across three faiths and many disciplines, this important book reports on the religious lives of young people in today's world. It's also a unique inventory of creative and thoughtful responses from churches, synagogues, and mosques working to keep religion a significant force in those lives. The essays are grouped thematically. Opening the book, Melchor Sanchez de Toca and Nancy Ammerman explore fundamental issues that have an impact on religion—from the cultural effects of global consumerism and personal technology to pluralism and individualism. In Part Two, leading investigators present three leading studies of religiosity among young people and college students in the United States, illuminating the gap between personal values and organized religion—and the emergence of new, different forms of spirituality and faith. How religious institutions deal with these challenges forms the heart of the book—in portraits of “best practices” developed to revitalize traditional institutions, from a synagogue in New York City and a Muslim youth camp in California to the famed French Catholic community of the late Brother John of Taizé. Finally, Jack Miles and Diane Winston weave the findings into a broader perspective of the future of religious belief, practice, and feeling in a changing world. Filled with real-world wisdom, *Passing the Faith* will be an essential resource for anyone seeking to understand what religions must, and can, do to inspire a vigorous faith in the next generation.

C. S. Lewis' *Little Book of Wisdom* offers more than 300 bite-size nuggets of inspiration and wisdom from the much-loved author, philosopher, and Christian theologian. Every nation that invades the City gives it a new name. But before long, new invaders arrive and the City changes hands once again. The natives don't let themselves get caught up in the unending wars. To them, their home is the Nameless City, and those who try to name it are forever outsiders. Kaidu is one such outsider. He's a Dao born and bred--a member of the latest occupying nation. Rat is a native of the Nameless City. At first, she hates Kai for

everything he stands for, but his love of his new home may be the one thing that can bring these two unlikely friends together. Let's hope so, because the fate of the Nameless City rests in their hands. "The most honored discussion of American religion in mid-twentieth century times is Will Herberg's Protestant-Catholic-Jew. . . . [It] spoke precisely to the mid-century condition and speaks in still applicable ways to the American condition and, at its best, the human condition." —Martin E. Marty, from the Introduction "In Protestant-Catholic-Jew Will Herberg has written the most fascinating essay on the religious sociology of America that has appeared in decades. He has digested all the relevant historical, sociological and other analytical studies, but the product is no mere summary of previous findings. He has made these findings the basis of a new and creative approach to the American scene. It throws as much light on American society as a whole as it does on the peculiarly religious aspects of American life. Mr. Herberg . . . illumines many facets of the American reality, and each chapter presents surprising, and yet very compelling, theses about the religious life of this country. Of all these perhaps the most telling is his thesis that America is not so much a melting pot as three fairly separate melting pots." —Reinhold Niebuhr, New York Times Book Review

As the foundation stone of the Jewish and Christian scriptures, the Book of Genesis unfolds some of the most arresting stories of world literature. In this book, Karen Armstrong brilliantly illuminates the mysteries and profundities of this mystifying work. "Read and cherished by thousands all over the world since it was first published in 1981, *Through the Narrow Gate* takes the reader on a spiritual journey that began one September day in 1962 when Karen Armstrong said good-bye to her family at London's King's Cross station and journeyed on to the convent in Tripton to become a nun. *Through the Narrow Gate* is by turns a book of spiritual revelation and an intimate look at life inside the cloistered walls of the convent."--BOOK JACKET. *The Stone Heart* is the second book in the Nameless City trilogy from Faith Erin Hicks. Kaidu and Rat have only just recovered from the assassination attempt on the General of All Blades when more chaos breaks loose in the Nameless City: deep conflicts within the Dao nation are making it impossible to find a political solution for the disputed territory of the City itself. To complicate things further, Kaidu is fairly certain he's stumbled on a formula for the lost weapon of the mysterious founders of the City. . . . But sharing it with the Dao military would be a complete betrayal of his friendship with Rat. Can Kai find the right solution before the Dao find themselves at war? One of the most potent forces bedeviling the modern world is religious fundamentalism. Armstrong explains how and why fundamentalists' understanding of religion and society differs so starkly from that of their contemporaries. "In many ways

"South Central" still functions as a deeply problematic shorthand for "Black Los Angeles." While some of these stereotypes hit on troubling realities--it is home to many of LA's poorest, most violent neighborhoods--the reality is far more complicated. In the context of demographic shifts and struggles with widespread poverty, Pamela J. Prickett zeroes in on an African American Muslim community and examines what believers do to help each other combat poverty, joblessness, violence, and racial injustice"-- Hats of Faith is a simple and striking introduction to the shared custom of religious head coverings. With bright images and a carefully researched interfaith text, this thoughtful book inspires understanding and celebrates our culturally diverse modern world. How do religious women talk about and practise citizenship? How is religion linked to gender and nationality? What are their views on gender equality, women's movements and feminism? Via interviews with Christian and Muslim women in Norway, Spain and the UK, this book explores intersections between religion, citizenship, gender and feminism. A quick reference guide of helpful hints and how-tos, covering all aspects of counseling, from common problems to procedure. Richard Swinburne analyses the purposes of practising a religion, and argues that religious faith requires belief that a particular creed provides the rationale for supposing that these purposes will be achieved. Many facets of social life are now intrinsically linked to the Internet through increasing dependence of user-centric platforms like blogs, social-networking websites, online forums, and open source websites. The Malaysian Church is not exempt from having to negotiate with an increasingly tech-savvy and networked community of believers. Based primarily on Internet ethnography and interviews with Christian bloggers and church pastors, this book looks at how the Internet is a component of "everyday religion" in the lives of Malaysian Christians at individual, institutional, and national levels. It examines the ways in which online Christian expressions are increasingly integrated into the everyday religious routines of Christians for the development of their personal identities and inter-religious interactions. This book also shows how the spiritual authority of church pastors can be both challenged and reinforced through the creative use of online tools. It addresses some of the creative ways in which Christians utilise the Internet to engage with national socio-political issues within the context of restrictive and controlled mainstream media, as well as the ongoing discourse with Islam in the country. Through a selection of case studies, this book shows that while the Internet may be "free", the users of the Internet are not necessarily so. While the Internet has provided Malaysian Christians with new tools to experience their faith in new ways, several aspects of "old" offline socio-cultural habits persist online. These, in turn, lead to a robust and growing environment of Internet Christianity in Malaysia. This timely book will be of interest to scholars in religious studies, media and communications, and cultural studies in Southeast Asia. American cities are in the midst of fundamental changes. De-industrialization of large, aging cities has been enormously disruptive for urban communities, which are being increasingly fragmented. Though often overlooked, religious organizations are important actors, both culturally and politically in the restructuring metropolis. *Public Religion and Urban Transformation* provides a sweeping view of urban religion in response to these transformations. Drawing

on a massive study of over seventy-five congregations in urban neighborhoods, this volume provides the most comprehensive picture available of urban places of worship—from mosques and gurdwaras to churches and synagogues—within one city. Revisiting the primary site of research for the early members of the Chicago School of urban sociology, the volume focuses on Chicago, which provides an exceptionally clear lens on the ways in which religious organizations both reflect and contribute to changes in American pluralism. From the churches of a Mexican American neighborhood and of the Black middle class to communities shared by Jews, Christians, Hindus, and Muslims and the rise of "megachurches," *Public Religion and Urban Transformation* illuminates the complex interactions among religion, urban structure, and social change at this extraordinary episode in the history of urban America.

In *god Is Not Great* Hitchens turned his formidable eloquence and rhetorical energy to the most controversial issue in the world: God and religion. The result is a devastating critique of religious faith. *God Is Not Great* is the ultimate case against religion. In a series of acute readings of the major religious texts, Christopher Hitchens demonstrates the ways in which religion is man-made, dangerously sexually repressive and distorts the very origins of the cosmos. Above all, Hitchens argues that the concept of an omniscient God has profoundly damaged humanity, and proposes that the world might be a great deal better off without 'him'.

In 1482, Abu Abdallah Muhammad XI became the twenty-third Muslim King of Granada. He would be the last. This is the first history of the ruler, known as Boabdil, whose disastrous reign and bitter defeat brought seven centuries of Moorish Spain to an end. It is an action-packed story of intrigue, treachery, cruelty, cunning, courtliness, bravery and tragedy. Basing her vivid account on original documents and sources, Elizabeth Drayson traces the origins and development of Islamic Spain. She describes the thirteenth-century founding of the Nasrid dynasty, the cultured and stable society it created, and the feuding which threatened it and had all but destroyed it by 1482, when Boabdil seized the throne. The new Sultan faced betrayals by his family, factions in the Alhambra palace, and ever more powerful onslaughts from the forces of Ferdinand and Isabella, monarchs of the newly united kingdoms of Castile and Aragon. By stratagem, diplomacy, courage and strength of will Boabdil prolonged his reign for ten years, but he never had much chance of survival. In 1492 Ferdinand and Isabella, magnificently attired in Moorish costume, entered Granada and took possession of the city. Boabdil went into exile. The Christian reconquest of Spain, that has reverberated so powerfully down the centuries, was complete.

A stirring account of the life of Paul, who brought Christianity to the Jews, by the most popular writer on religion in the English-speaking world, Karen Armstrong, author of *The History of God*, which has been translated into thirty languages. A raw, intensely personal memoir of spiritual exploration from one of the world's great commentators on religion.
