Through glittering galas, dazzling trickery, and thrilling heists, Cayo and Amaya will learn that the corruption in Moray goes far deeper than they know, and in the end the only people they can trust are each other.

[?]#5 in the Millennium SF Masterworks series, a library of the finest science fiction ever written. When it comes to pop culture, Alfred Bester (1913-1987) is something of an unsung hero. He wrote radio scripts, screenplays, and comic books (in which capacity he created the original Green Lantern Oath). But Bester is best known for his science-fiction novels, and *The Stars My Destination* may be his finest creation. With its sly potshotting at corporate skullduggery, *The Stars My Destination* seems utterly contemporary, and

has maintained its status as an underground classic for fifty years. (Bester fans should also note that iBooks has reprinted *ReDemolished*, which won the very first Hugo Award in 1953.) Nothing has ever worked out for the young Miss Mallory Obey since she was born. Plagued by horrible and mysterious events from childhood, she faced and battled her demons alone as life refused to give her a break but there is a reason why her mere existence is a mystery. She is like an Onion ball. The more you peel, the more layers you will find and they all make you cry. Life had other notorious plans for this diamond in the rough on that unlikely day when her car crashed into an enigmatic man called Wang Wei Li. Wang Wei Li is the sole heir of a powerful, wealthy and brutal conglomerate family. His top position in high society and his remarkably stunning physical features makes him one of the most eligible bachelors in the world and as such, so many eligible woman women are vying for the position of Mrs. Li but underneath the glamorous cover is a lost young man battling his own demons. He is wild, dominant, powerful, brutal, and mysterious. Nothing seems to tame the lion in him but every power does have its kryptonite. An accident, multiple smartphones and the speed of internet is all it will take to seal their unlikely fate. Will their love blossom like cherry blossoms in spring or wither away like a fleeting bloom on a stormy night? Follow the brilliant journey of Mallory Obey and Wang Wei Li as they navigate their turbulent relationship under the watchful eyes of society through the harsh reality of the internet generation. Do you think you know the truth? Think again and brace yourself because this story is about to make you question every single thing you think you know. This book series tackles the concept of perception and truth. It is innovative, gripping and thrilling. It is their story versus the story, and their truth versus your truth. This authoritative textbook - the second volume of a comprehensive three-volume course on theoretical astrophysics - deals with stellar physics. Designed to help graduate students and researchers develop an understanding of the key physical processes governing stars and stellar systems, it teaches the fundamentals, and then builds on them to give the reader an in-depth understanding of advanced topics. The book's modular design allows the chapters to be approached individually, yet seamless transitions create a coherent and connected whole. It can be used alone or in conjunction with Volume I, which covers a wide range of astrophysical processes, and the forthcoming Volume III, on galaxies and cosmology. After reviewing the key observational results and nomenclature used in

stellar astronomy, the book develops a solid understanding of central concepts including stellar structure and evolution, the physics of stellar remnants, pulsars, binary stars, the sun and planetary systems, interstellar medium and globular clusters. Throughout, the reader's comprehension is developed and tested with more than seventy-five exercises. This indispensable volume provides graduate students with a self-contained introduction to stellar physics, and will allow them to master the material sufficiently to read and engage in research with heightened understanding.

Humans and their genetically altered descendants struggle to find their place in a universe controlled by a benevolent artificial intelligence in this brilliant classic of future speculation *On a far-future Earth, a linked system of artificial intelligences called the cybercosm runs the planet and the universe far more efficiently than any flesh and blood ruler ever could, in essence rendering the human race obsolete. On the Earth's moon, genetically engineered Lunarians carrying the DNA of Dagny Beynac—a descendant of the legendary Anton Guthrie, founder of the powerful and visionary Fireball Enterprises—struggle to preserve their lives, their freedom, and their satellite's resources in the face of threats posed by encroaching humans and controlling machines. Over a span of five centuries, tensions have increased in the wake of the political and technological revolutions that reshaped their universe. And suddenly radical change is in the offing once more, as a secret kept hidden since the earliest days of Lunar colonization is about to be revealed—one that could effectively shut down the cybercosm and plunge the universe into chaos. Poul Anderson advances the worlds-shattering circumstances he so brilliantly introduced in Harvest of Stars, creating a vision of the future that is at once astonishing, provocative, and troubling. A true science fiction classic, The Stars Are Also Fire explores deep questions about the nature, complexity, and worth of humankind in an unforgettable novel considered by many to be Anderson's masterpiece. In this charming sequel to All Four Stars, eleven-year-old foodie Gladys Gatsby now has her first published review under her belt and is looking forward to a quiet summer of cooking and reviewing. But her plans quickly go awry when her friend Charissa Bentley delivers Gladys's birthday gift: a free summer at Camp Bentley. As Gladys feared, camp life is not easy: she struggles to pass her swim test and can't keep the other campers

happy while planning lunches. The worst part is she can't seem to get away from the annoying new "celebrity" camper and sneak away for her latest assignment—finding the best hot dog in New York City. But when it turns out her hot dog assignment was a dirty trick by a jealous reviewer, Gladys's reviewing career may be over forever. We're sorry. Exemplar, the Savior of the Universe, can't speak to you right now. He's... um... not feeling well? But if you and the KNIGHTS EXEMPLAR armada currently surrounding our ship don't mind waiting, our crew will have him fixed up in no time! Astronomy and Astrophysics Abstracts, which has appeared in semi-annual volumes since 1969, is devoted to the recording, summarizing and indexing of astronomical publications throughout the world. It is prepared under the auspices of the International Astronomical Union (according to a resolution adopted at the 14th General Assembly in 1970). Astronomy and Astrophysics Abstracts aims to present a comprehensive documentation of literature in all fields of astronomy and astrophysics. Every effort will be made to ensure that the average time interval between the date of receipt of the original literature and publication of the abstracts will not exceed eight months. This time interval is near to that achieved by monthly abstracting journals, compared to which our system of accumulating abstracts for about six months offers the advantage of greater convenience for the user. Volume 18 contains literature published in 1976 and received before March 1, 1977; some older literature which was received late and which is not recorded in earlier volumes is also included. Vols. 1-4 consist of miscellaneous researches. The epic sequel to the bestselling TikTok sensation *We Hunt the Flame!* This is YA fantasy at its best. Lush, hopeful and devastating, *We Free the Stars* is Hafsah Faizal's spellbinding conclusion to the *Sands of Arawiya* duology. Perfect for fans of Leigh Bardugo's *Shadow and Bone* series. Darkness surged in his veins. Power bled from her bones. The battle is over, but the war is just beginning. Low on resources and allies alike, Zafira and Nasir are determined to finish their mission; to restore magic to their kingdom. But the land teems with the return of an ancient evil, and as Nasir fights to command the magic in his blood, Zafira battles a very different darkness. And yet, in spite of everything, they find themselves falling into a love they can't stand to lose. Time is running out and if order is to be restored, sacrifices will have to be made . . . What role does viscosity play in accretion discs? How do you calculate the 'glitch function' of a pulsar? And can strong shocks account for the energy spectrum of electrons in our

Galaxy? These are just some of the exciting questions that Professor Longair uses to develop the physics needed by the astronomer and high energy astrophysicist. The highly acclaimed first edition of High Energy Astrophysics instantly established itself as a classic in the teaching of contemporary astronomy. Reflecting the immense interest and developments in the subject, Professor Longair has developed the second edition into three texts; in this second volume he provides a comprehensive discussion of the high energy astrophysics of stars, the Galaxy and the interstellar medium. He develops an understanding for the essential physics with an elegance and infectious enthusiasm for which his teaching is internationally renowned, illustrating the issues throughout with results from forefront research. This book takes the student with a knowledge of physics and mathematics at the undergraduate level - but not necessarily with training in astronomy - to the point where current astronomical research can be understood. The book tells the real story of my life, about how I was wrongfully convicted in Russia for many years, on false charges of killing a person. The book is about keeping faith, love, and respect for yourself and the world around you in any circumstances. Life is unpredictable, but if you connect with your inner world, then life can change for the better. The possibilities of man are limitless. And, everything impossible becomes possible. The ambitious sultan of Alpha Centauri can only claim the illustrious title of Caliph if he makes a ritual pilgrimage to the holy city of Mecca. This journey completed, he will rule the entire population of the greater Islamic universe. But human knowledge has not yet been able to overcome the significant challenges presented by interplanetary travel. However, the sultan resourcefully enlists the help of Abdul Hamid-Jones, a clever fugitive with a price on his head and the law at his heels. Thrown into the bewildering world of the sultan's schemes, Abdul receives a hasty introduction to complex physics and the even-more-complex political intrigues of the sultan's court. Responsible for the successful execution of the sultan's plan, Abdul slowly realizes with horror that the fate of the entire solar system could be resting on his shoulders. The war between the spacefaring civilization of the Abh Empire and the united forces of surface-dwelling "Landers" has commenced in earnest — and it promises to decide the destinies of all of humankind across the cosmos. Flung into the fray of a war they never wanted, Jint and Princess Lafier must find a way to aid the Empire's war efforts, but they are hindered by a less than savory fellow Abh and by United Humankind forces

alike, all while stranded and bereft of supplies. What allies can they find on an unfamiliar world blanketed by anti-Abh propaganda? How can they even evade capture while the planet's police are hot on the lookout for them? The pair's mettle — and their bond with each other — shall be tested and then some in the exhilarating second chapter of their personal saga! Be there to watch an epic space opera romp unfold! With all the magic of Narnia and the humour of Mary Poppins, this is a future middle grade fantasy classic – and the beginning of an unforgettable journey... 'SINGULARITY' A secret alien science experiment spins out of control, sucking Yuri and Laika up into a singularity of chaos the likes of which no human, or human-dog-person-thing, has ever seen. The greatest FEEL GOOD, BAD SCIENCE book in the long history of man returns in THE MANHATTAN PROJECTS: THE SUN BEYOND THE STARS. In Nazi-occupied Denmark, ten-year-old Annemarie Johansen is called upon for a selfless act of bravery to help save her best friend from a terrible fate. And we have been told that they may come tonight." It is 1943 and life in Copenhagen is becoming complicated for Annemarie. There are food shortages and curfews, and soldiers on every corner. But it is even worse for her Jewish best friend, Ellen, as the Nazis continue their brutal campaign. With Ellen's life in danger, Annemarie must summon all her courage to help stage a daring escape. Inspired by true events of the Second World War, this gripping novel brings the past vividly to life for today's readers. Orient Stars 2: A Carpet Collection' is a limited-edition companion to 'Orient Stars: A Carpet Collection' (Stuttgart and London 1993). This new volume presents for the first time the early Turkish and Central Asian carpets added to the iconic 'Orient Stars' Collection by Heinrich and Waltraut Kirchheim after 1993. Focusing on some of the earliest and rarest examples ever seen, notably carpets and fragments made before the 16th century, the collection combines radio-carbon dating with new scholarly research by leading carpet scholar Michael Franes to write a new history of rug weaving and design development. Orient Stars 2 outlines the legacy of the Kirchheims in building the outstanding antique carpet collection of its generation and is an important addition to any library with a focus on Islamic art, carpets or the history of design development and transfer. Published to accompany the auction of part of the collection at Rippon Boswell, Wiesbaden, Germany in June 2021. The thrilling sequel to the best-selling middle-grade debut of Autumn 2020 In a delightful follow-up to Written in the Stars, Alexandria

Getting involved would be a terrible idea—her stay is temporary and he wants forever—but when Brendon learns Annie has given up on dating, he's determined to prove that romance is real. Taking cues from his favorite rom-coms, Brendon plans to woo her with elaborate dates straight out of Nora Ephron's playbook. The clock is ticking on Annie's time in Seattle, and Brendon's starting to realize romance isn't just flowers and chocolate. But maybe real love doesn't need to be as perfect as the movies... as long as you think your partner hung the moon. When Zafira embarks on a quest to uncover a lost artifact that can restore magic to her suffering world and stop the Arz, Nasir is sent by the sultan on a similar mission: retrieve the artifact and kill the Hunter.
