Many psychology students dislike writing a research paper, their aversion driven by anxiety over various aspects of the process. This primer for undergraduates explains how to write a clear, compelling, well-organized research paper. From picking a promising topic, to finding and digesting the pertinent literature, to developing a thesis, to outlining and presenting ideas, to editing for clarity and concision---each step is broken down and

illustrated with examples. In addition, a bonus chapter discusses how to combat procrastination. Students learn that the best writing is done in chunks over long periods of time, and that writing is a skill that improves with practice. By following the advice in this book, any student can not only get through their dreaded writing assignment, but become a more proficient writer. Even students capable of writing excellent essays still find their first major political science research paper an intimidating experience. Crafting the right research question, finding good sources, properly summarizing them, operationalizing concepts and designing good tests for their hypotheses, presenting and analyzing quantitative as well as qualitative data are all tough-going without a great deal of guidance and encouragement. *Writing a Research Paper in Political Science* breaks down the research paper into its constituent parts and shows students what they need to do at each stage to successfully complete each component until the paper is finished. Practical summaries, recipes for success, worksheets, exercises, and a series of handy checklists make this a must-have supplement for any writing-intensive political science course. New to the Fourth Edition: A non-causal research paper woven throughout the text offers explicit advice to guide students through the research and writing process. Updated and more detailed discussions of plagiarism, paraphrases,

"drop-ins," and "transcripts" help to prevent students from misusing sources in a constantly changing digital age. A more detailed discussion of "fake news" and disinformation shows students how to evaluate and choose high quality sources, as well as how to protect oneself from being fooled by bad sources. Additional guidance for writing abstracts and creating presentations helps students to understand the logic behind abstracts and prepares students for presentations in the classroom, at a conference, and beyond. A greater emphasis on the value of qualitative research provides students with additional instruction on how to do it. Covering both theoretical and practical approaches, *Writing the Research Paper* guides students studying in English as a second or additional language through the skills necessary for success in university-level writing and research. The book begins with theoretical considerations, such as research, argumentation and critical thinking.
