Moby Dick is best known work. The story illustrates about the whale world. The detailed and realistic narrations of whale hunting and of extracting whale oil. The whole story is in the ship and the voyage. How come it all happens? Whether Ahab's obsession got fulfilled? What happened to their ship who was Pollard? All these queries seem interesting as relate to the whole story. Pollard tells the full story to fellow Captains after his rescue from the Essex ordeal and to George Bevnet. The voyage is 92 days in a leaking boat with no food. The voyage is actually a whaling voyage. The 87-foot long ship is hit by a squall that destroys some part of the ship. Cochrane Handbook for Systematic Reviews of Interventions Nov 23 2019
Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library (www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and

methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.
