Henry More, 1614-1687 Nov 17 2019 This is the first modern biography to place Henry More's (1614-1687) religious and philosophical preoccupations centre-stage, and to provide a coherent interpretation of his work from a consideration of his own writings, their contexts and aims. It is also the first study of More to exploit the full range of his prolific writings and a number of unknown manuscripts relating to his life. It contains an annotated handlist of his extant correspondence.

Ultra-High Temperature Materials IV Mar 22 2020 This book, as the fourth volume, continues on ultra-high temperature materials with melting (sublimation or decomposition) points around or over 2500 °C. In this quality the book has over-branched cross-links with the sections and tables of the previous Volumes I-III. Similarly to Volumes I-III, the book includes a thorough treatment of the physical and chemical properties of ultra-high temperature materials, namely such as W semi- and monocarbides, and continues the description of refractory

carbides, which was begun from Volume II of the series. The book will be of interest to researchers, engineers, postgraduate, graduate and undergraduate students alike. The readers are provided with the full qualitative and quantitative assessment, which is based on the latest updates in the field of fundamental physics and chemistry, nanotechnology, materials science, design and engineering.

Encyclopedia Of Freemasonry And Its Kindred Sciences, Volume 4: S-Z Aug 07 2021 Dr. Albert G. Mackey appears as author of this "

Encyclopedia of Freemasonry and its Kindred Sciences," which, being a library in itself, superseded most of the Masonic works which have been tolerated by the craft — chiefly because none better could be obtained. Here is a work which fulfils the hope which sustained the author through ten years' literary labor, that, under one cover he "would furnish every Mason who might consult its pages the means of acquiring a knowledge of all matters connected with the science, the philosophy, and the history of his order." Up to the present time the modern literature of Freemasonry has been diffuse, lumbering, unreliable, and, out of all reasonable proportions. There is, in Mackey's "Encyclopaedia of Masonry," well digested, well arranged, and confined within reasonable limits, all that a Mason can desire to find in a book exclusively devoted to the history, the arts, science, and literature of Masonry. This is volume four out of four and covering the letters S to Z.

New Trends in Intelligent Information and Database Systems Dec 31 2020 Intelligent information and database systems are two closely related subfields of modern computer science which have been known for over thirty years. They focus on the integration of artificial intelligence and classic database technologies to create the class of next generation information systems. The book focuses on new trends in intelligent information and database systems and discusses topics addressed to the foundations and principles of data, information, and knowledge models, methodologies for intelligent information and database systems analysis, design, and implementation, their validation, maintenance and evolution. They cover a broad spectrum of research topics discussed both from the practical and theoretical points of view such as: intelligent information retrieval, natural language processing, semantic web, social networks, machine learning, knowledge discovery, data mining, uncertainty management and reasoning under uncertainty, intelligent optimization techniques in information systems, security in databases systems, and multimedia data analysis. Intelligent information systems and their applications in business, medicine and industry, database systems applications, and intelligent internet systems are also presented and discussed in the book. The book consists of 38 chapters based on original works presented during the 7th Asian Conference on Intelligent Information and Database Systems (ACIIDS 2015) held on 23-25 March 2015 in Bali, Indonesia. The book is divided into six parts related to Advanced Machine Learning and Data Mining, Intelligent Computational Methods in Information Systems, Semantic Web, Social Networks and Recommendation Systems, Cloud Computing and Intelligent Internet Systems, Knowledge and Language Processing, and Intelligent Information and Database Systems: Applications.

The Rhetorical Construction of Vegetarianism Aug 19 2022 This book explores themes in the rhetoric of vegetarian discourse. A vegan practice may help mitigate crises such as climate change, global health challenges, and sharpening socioeconomic disparities, by ensuring both fairness in the treatment of animals and food justice for marginalized populations. How the message is spread is crucial for these aims. Vegan practices thus uncover tensions between individual dietary choices and social justice activism, between ego and eco, between human and animal, between capitalism and environmentalism, and within the larger universe of theoretical and practical ethics. The chapters apply rhetorical methodologies to understand vegan/vegetarian discourse, emphasizing, for example, vegan/vegetarian rhetoric through the lens of polyphony, the role of intersectional rhetoric in becoming vegan, as well as ecofeminist, semiotic, and discourse theory approaches to veganism. The book aims to show that a rhetorical understanding of vegetarian and vegan discourse is crucial for the goals of movements promoting veganism. The book is intended for a wide interdisciplinary audience of scholars, researchers, and individuals interested in veganism, food and media studies, rhetorical studies, human-animal studies, cultural studies and related disciplines. It urges readers to examine vegan discourses seriously, not just as a matter of personal choice or taste but as one vital for intersectional justice and our planetary survival.

International Law and Domestic Legal Systems Sep 20 2022 By providing a systematic analysis of how international law is incorporated and implemented in over two dozen states, this book analyzes how the international order and national legal systems interact with each other. It highlights the mutual influence of international and domestic legal systems and how changes in each are modifying the other.

Flooding the Courtrooms Dec 11 2021 This legal biography of the California cattle company Miller & Lux illuminates the relationship between law, economic change, and the distribution of wealth and power. It examines law in an environment undergoing rapid development, where the rules governing resources, especially water, were in contention. From the 1870s through the 1930s, Miller & Lux looked to the law to mediate its place amid change. This entailed the hiring of corporate counsel, a new concept for late-nineteenth-century America, and the creative development and use of new legal doctrines. The actions of its lawyers and managers and those of the opponents and judges it faced reveal the complex, dialectical interplay between legal and economic power. Impressively researched from a labyrinth of primary source, *Flooding the Courtrooms* is an absorbing history of Miller & Lux and its influence in the shaping of the West.

Reconstructing Macroeconomics May 24 2020 In this book, the authors reconceptualize existing macroeconomics by treating equilibria as statistical distributions, not as fixed points.

The Notebooks of Samuel Taylor Coleridge, Volume 4 Feb 13 2022 theological, philosophical, scientific, social, and psychological matters, plans for and fragments of works, and many other items of great interest. This fourth double volume of the Notebooks covers the years

1819 through 1826. The range of Coleridge's reading, his endless questioning, and his recondite sources continue to fascinate the readers. Included here are drafts and full versions of the later poems. Many passages reflect the technological interests that led to Coleridge's writing of *Aids of Reflection*, later to become an important source for the Transcendentalists. Another development in this volume is the startling expansion of Coleridge's interest in "the theory of life" and in chemistry--the laboratory chemistry of the Royal Institution of Great Britain and the theoretical chemistry of German transcendentalists such as Oken, Steffens, and Oersted. Also contained in this volume is an important section on the meaning of marriage. Kathleen Coburn is Professor Emerita at Victoria College of the University of Toronto. Merton Christensen was Professor of English at the University of Delaware. Bollingen Series L:4. Originally published in 1990. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

The Penn Commentary on Piers Plowman, Volume 4 Jul 18 2022 The detailed and wide-ranging Penn Commentary on "Piers Plowman" places the allegorical dream-vision of the poem within the literary, historical, social, and intellectual contexts of late medieval England, and within the long history of critical interpretation of the work, assessing past scholarship while offering original materials and insights throughout. The authors' line-by-line, section by section, and passus by passus commentary on all three versions of the poem and on the stages of its multiple revisions reveals new aspects of the poem's meaning while assessing and summarizing a complex and often divisive scholarly tradition. The volumes offer an up-to-date, original, and open-ended guide to a poem whose engagement with its social world is unrivaled in English literature, and whose literary, religious, and intellectual accomplishments are uniquely powerful. The Penn Commentary is designed to be equally useful to readers of the A, B, or C texts of the poem. It is geared to readers eager to have detailed experience of *Piers Plowman* and other medieval literature, possessing some basic knowledge of Middle English language and literature, and interested in pondering further the particularly difficult relationships to both that this poem possesses. Others, with interest in poetry of all periods, will find the extended and detailed commentary useful precisely because it does not seek to avoid the poem's challenges but seeks instead to provoke thought about its intricacy and poetic achievements. Covering passus C.15-19 and B.13-17, Volume 4 of the Penn Commentary on "Piers Plowman" creates a complete vade mecum for readers, identifying and translating all Latin quotations, uncovering allusions, providing full cross-reference to other parts of the poem, drawing in relevant scholarship, and unraveling difficult

passages. Like the other commentaries in the series, this volume contains an extensive overview and analysis of each passus, and the subdivisions within, large and small, and discusses all differences between the two versions. It pays careful attention to the poem at the literal level as well as to Latin texts that are analogues or even possible sources of Langland's thought and it emphasizes the comedy of the poem, of which these passus offer a number of examples.

The Bible in Arabic Jan 20 2020 From the first centuries of Islam to well into the Middle Ages, Jews and Christians produced hundreds of manuscripts containing portions of the Bible in Arabic. Until recently, however, these translations remained largely neglected by Biblical scholars and historians. In telling the story of the Bible in Arabic, this book casts light on a crucial transition in the cultural and religious life of Jews and Christians in Arabic-speaking lands. In pre-Islamic times, Jewish and Christian scriptures circulated orally in the Arabic-speaking milieu. After the rise of Islam--and the Qur'an's appearance as a scripture in its own right--Jews and Christians translated the Hebrew Bible and the Greek New Testament into Arabic for their own use and as a response to the Qur'an's retelling of Biblical narratives. From the ninth century onward, a steady stream of Jewish and Christian translations of the Hebrew Bible and New Testament crossed communal borders to influence the Islamic world. The Bible in Arabic offers a new frame of reference for the pivotal place of Arabic Bible

translations in the religious and cultural interactions between Jews, Christians, and Muslims.

Neuroglia Dec 19 2019 Neuroglia is the only comprehensive reference book on the basic biology and function of glial cells. This long-awaited second edition has been completely reorganized and rewritten to include the dramatic advances in this field since the first edition was published ten years ago. The impact of the second edition will be greater than that of the first because the majority of neuroscientists now acknowledge that neuroglia are elemental to most, if not all, brain functions. The second edition covers the entire field of glial research from the basic molecular and cellular principles of these cells to their involvement in neurological diseases including stroke, Alzheimer's disease, and multiple sclerosis. It includes new chapters on transmitter release from exocytosis from glia, glia derived stem cells, glia and synaptic transmission, glia and axon guidance, an entirely new section on mechanisms of glial injury, and several new chapters on the roles of glia in different diseases. The new edition was written with both students and experts in mind. It provides a basic introduction to the entire range of glial topics and detailed information with critical assessment of the research literature. Neuroscience textbooks focus on the properties of neurons, whereas this book fills the information void about the brain's other cells. Neuroglia, Second Edition, is an essential reference source for newcomers, including graduate students, to neuroanatomy, neurochemistry, neurophysiology, and molecular neurobiology. It is also a vital companion for established researchers in these fields as well as clinicians in neurology, neurosurgery, psychiatry, neuropathology, and neuro-oncology.

Smart Homes and Beyond Jul 26 2020 The thought behind this publication is to continue to develop an active research community dedicated to explore how Smart Homes and Health Telematics can foster independent living and offer an enhanced quality of life for

ageing and disabled people. As we begin to witness the effects of changing demographics on today's society we begin to appreciate that the increase in the number of elderly and in the prevalence of those suffering from chronic disease and disabilities are likely to further increase in the next two to three decades. To react to the needs of this cohort to provide an environment within which the people can reside for as long as possible, whilst maintaining their quality of life and independence, is a widespread concern for all. As such, there is real benefit to further investigate the role of technologies to address these changes and subsequently offer practical solutions to support independent living. The editors feel that within the realms of Smart Homes and Health Telematics real, affordable and useful services can be developed which will have the necessary underlying technological and service delivery infrastructures to allow seamless integration into existing care delivery paradigms. The introduction of technology can provide a positive impact. However, it is necessary to avoid any detrimental effects if reliance upon technology within the home environment becomes so great that people will not leave their own home in fear of losing the support once outside of the home, or its close proximity. This publication focuses on promoting personal autonomy and extending the quality of life by considering including smart services inside and outside of the home.

The Cambridge History of Literary Criticism: Volume 4, The Eighteenth Century Feb 01 2021 This is a comprehensive 1997 account of the history of literary criticism in Britain and Europe between 1660 and 1800. Unlike previous histories, it is not just a chronological survey of critical writing, but a multidisciplinary investigation of how the understanding of literature and its various genres was transformed, at the start of the modern era, by developments in philosophy, psychology, the natural sciences, linguistics, and other disciplines, as well as in society at large. In the process, modern literary theory - at first often implicit in literary texts themselves - emancipated itself from classical poetics and rhetoric, and literary criticism emerged as a full-time professional activity catering for an expanding literate public. The volume is international both in coverage and in authorship. Extensive bibliographies provide guidance for further specialised study.

Church Dogmatics The Doctrine of Reconciliation, Volume 4, Part 3.1 Feb 19 2020 Described by Pope Pius XII as the most important

theologian since Thomas Aquinas, the Swiss pastor and theologian, Karl Barth, continues to be a major influence on students, scholars and preachers today. Barth's theology found its expression mainly through his closely reasoned fourteen-part magnum opus, Die Kirchliche Dogmatik. Having taken over 30 years to write, the Church Dogmatics is regarded as one of the most important theological works of all time, and represents the pinnacle of Barth's achievement as a theologian. T&T Clark International is now proud to be publishing the only complete English translation of the Church Dogmatics in paperback.
