*Two men lie dead in the vestry of a London church, their throats cut with brutal precision. One is Sir Paul Berowne, rich, cultivated and elegant; the other is an alcoholic vagrant. Challenged with the investigation of a crime that appears to have endless motives, Adam Dalgliesh explores the sinister web spun around a half-burnt diary and a violet-eyed widow who is pregnant and full of malice--all the while hoping to fill the gap of logic that joined these two disparate men in death... Since time immemorial mankind has been plagued by the question "What do you do with a dead cat?" Here, at last, in 101 hilarious, outrageous, and (sometimes) downright sick cartoons, are some answers. 101 black-and-white illustrations. This newly-edited 2007 edition of *The Winter's Tale* comes with a detailed introduction and full commentary. Bestselling author and strategist Ian Bremmer argues that Washington's directionless foreign policy has become expensive and dangerous. Since the end of the Cold War, the U.S. has stumbled from crisis to crisis in Afghanistan, Iraq, Iran, Libya, Syria, and Ukraine with no clear strategy. Bremmer urges us to think more deeply about what sort of role America should play and how it should use its superpower status. He explores three competing options: • *Independent America*: America should no longer take responsibility for solving other people's problems, and instead should lead by example. • *Moneyball America*: Washington can't meet every international challenge, but we can and should focus on opportunities and defend U.S. interests where they're threatened. • *Indispensable America*: Only America can defend the values on which global stability increasingly depends. We will never live in a stable world while others are denied their most basic freedoms. There are sound arguments for and against each of these choices, but we must choose. Washington can no longer improvise a foreign policy without a lasting commitment to a coherent strategy. Teaching architecture through poetry? Despite being integral parts of all our identities, sexuality, sex and intimacy are what many would call the Last Taboo in dementia care, usually seen as 'problem behaviours' to be stopped and dealt with. Informed by a combination of accessible neuroscience and person-centred compassion, Danuta Lipinska's new book shows that the human need for intimacy, attachment and sexual expression is as important for supporting the wellbeing and personhood of people with dementia as communication and care. Considering the brain as the body's biggest sex organ, it examines the cognitive changes that occur in dementia and what these changes mean in the context of sexual behaviour and consent. Taking Carl Rogers' Core Conditions and Tom Kitwood's psychological needs of persons living with dementia as a starting point, Lipinska offers a unique model for person-centred conversations about sex and sexuality that we have not seen before.
