"Classical composers seeking to create an American sound enjoyed unprecedented success during the 1930s and 1940s. Aaron Copland, Roy Harris, Howard Hanson, and others brought national and international attention to American composers for the first time in history. In the years after World War II, however, something changed. The prestige of musical Americanism waned rapidly as anti-Communists made accusations against leading Americanist composers. Meanwhile, a method of harmonic organization that some considered more Cold War-appropriate—serialism—began to rise in status. For many composers and historians, the Cold War had effectively “killed off” musical Americanism. In this book, the author offers a fuller, more nuanced picture of the effect of the Cold War on Americanist composers. She shows that the ideological conflict brought both challenges and opportunities. Some leftist Americanist composers struggled greatly in this new artistic and political environment, especially as American nationalism increasingly meant American exceptionalism. But composers of all political stripes would find in the federal government a new and unique channel through which to ensure the survival of musical Americanism, as the White House sought to use American music as a

Cold War propaganda tool and American composers as cultural diplomats. The Americanists' efforts to safeguard the reputation of their style would have significant consequences. Ultimately, they effected a rebranding of musical Americanism, with consequences that remain with us today."--Rabat de la jaquette. Love books? Then indulge your passion in this journal! The thrilling fourth book in the New York Times bestselling series The 100. Now a hit TV show on E4. The hundred, once branded juvenile delinquents, are now leaders among their people. But a new threat has emerged: a fanatical cult determined to eliminate everyone else on the war-ravaged planet of Earth. After scores of their friends are captured, CLARKE sets off to retrieve them, certain that she can come to an understanding with these strangers. BELLAMY has a different plan; he won't let anything - or anyone - get in the way of saving the people he loves. Meanwhile, in captivity and scared for their lives, GLASS falls under the spell of the cult's magnetic message, and WELLS has to learn how to lead again. Unless the rescue party arrives soon, the captives will face a fate more terrifying than anything they could imagine. If the hundred ever want to call this dangerous planet home, they'll need to put aside their differences...and fight to protect themselves and their world. 'Dark and riveting...A mash-up of The Lord of the Flies, Across the Universe, and The Hunger Games.' Booklist Palestine + 100 poses a question to twelve Palestinian writers: what might your country look like in the year 2048 - a century after the tragedies and trauma of what has come to be called the Nakba? How might this event - which, in 1948, saw the expulsion of over 700,000 Palestinian Arabs from their homes - reach across a century of occupation, oppression, and political isolation, to shape the country and its people? Will a lasting peace finally have been reached, or will future technology only amplify the suffering and mistreatment of Palestinians? Covering a range of approaches - from SF noir, to nightmarish dystopia, to high-tech farce - these stories use the blank canvas of the future to reimagine the Palestinian experience today. Along the way, we encounter drone swarms, digital uprisings, time-bending VR, peace treaties that span parallel universes, and even a Palestinian superhero, in probably the first anthology of science fiction from Palestine ever. Translated from the Arabic by Raph Cormack, Mohamed Ghalaieny, Andrew Leber, Thoraya El-Rayyes, Yasmine Seale and Jonathan Wright. WINNER of a PEN Translates Award 2018 'It's necessary, of course. But above all it's bold, brilliant and inspiring: a sign of boundless imagination and fierce creation even in circumstances of oppression, denial, silencing and constriction. The voices of these writers demand to be heard - and their stories are defiantly entertaining.' - Bidisha There are times in life when all you need to find solace is a small gesture of consolation. 100 Hugs, a collection of everyday comforts, offers such solace. There is Jicky (1889), unisex coeval of the Eiffel Tower and 'a towering masterpiece'; Chanel's No. 5 (1921), perhaps the world's most famous perfume, 'stretching deliciously like a sleepy panther'; Knize Ten which 'everyone should own because there is only one like it' and White Linen (1978), 'a canonical expression of the American ideal of sex appeal'. We would like to be able to know their reactions and control them, but repeatedly we have been surprised by their unexpected reactions to our somewhat hasty actions. We unfortunately have to admit that our present knowledge about ecosystems and their true nature is rather limited. Many excellent contributions to a more profound understanding of ecosystems have been launched during the last two decades, but if you do not know the field, it looks as if all the presented ecosystem theories are in complete discord with each other. However, ecosystems are extremely complex and only a pluralistic view will be able to reveal their basic properties. The different approaches therefore have much in common, when you go deeper into the core material, than the first superficial more glance will be able to tell and there is therefore a natural need for a unification of the various approaches to ecosystem theories. It has for many years been my desire to attempt to make a unification of the many excellent thoughts, ideas and observations about ecosystems, that scientists have contributed. These thoughts, ideas and hypotheses have not been made in vain.
