U-FO: One Way Ticket to Oblivion By: Bob Doti Welcome to Project Blue Book: the Air Force's Top Secret study of UFOs. This combination historical novel and science fiction story written by a scientist makes the unbelievable believable. The explanation of the cover-up encompasses the years from the inception of Project Blue Book in 1953 to its termination in 1969 with the Condon Report. One man lives with the guilt that his friend was "disappeared" by the government to continue the cover-up. This novel is for both the skeptic how something like a cover-up is possible. For the true believer, it is a confirmation that they hold the true version of history. This book should encourage a discussion: Are we alone? Does the government have the proof? Does the cover-up continue to this day? Un pratico manuale che prende in esame i concetti fondamentali di Microsoft Access versione 2016. Un indispensabile punto di riferimento per tutti gli utenti che devono lavorare con un database senza tuttavia avere la necessità di diventare dei professionisti. Con spiegazioni chiare e consigli da esperto, l'autore accompagna alla scoperta delle basi di dati, per poi passare alla strutturazione di campi, record e tabelle fino a concetti più avanzati quali la creazione di query e l'impostazione dei report. The Fourth International Conference on Reliable Software Technologies, Ada- Europe'99, took place in Santander, Spain, from June 7 to 11, 1999. It was sponsored by Ada Europe, the European federation of national Ada societies, in cooperation with ACM SIGAda and Ada Spain, and it was organized by members of the University of Cantabria and the Technical University of Madrid, in Spain. This was the 19th consecutive year of Ada Europe conferences, which have always been the main Ada events in Europe, with their counterparts being the ACM SIGAda conferences in the USA (formerly Tri Ada). The conference is not just devoted to the Ada language, but rather to the more general area of reliable software technologies. In this sense, there are papers on formal methods, testing, software architectures and design, software engineering tools, etc. We believe that the role of reliable software technologies is becoming increasingly important, as computer applications control more and more of our everyday systems. The goal of our conference is to contribute to advancing the state of the art of all the technologies that help us in achieving better and more reliable software at a lower overall cost. Un pratico ebook, indispensabile punto di riferimento per tutti gli utenti che devono lavorare con Microsoft Access senza tuttavia diventare professionisti. Con spiegazioni chiare e consigli da esperto, l'autore accompagna il lettore alla scoperta delle potenzialità di questa applicazione per lo sviluppo e la gestione di database. L'ebook prende in esame i concetti elementari di Access, a partire dalle novità della versione 2010. Si parte dalle nozioni fondamentali dei database per poi passare alla strutturazione di campi, record e tabelle fino ad analizzare la creazione di query e l'impostazione dei report. Non mancano ovviamente le soluzioni ai problemi più comuni. This book constitutes the refereed proceedings of the 19th International Conference on Database and Expert Systems Applications, DEXA 2008, held in Turin, Italy, in September 2008. The 74 revised full papers presented together with 1 invited paper were carefully reviewed and selected from 208 submissions. The papers are organized in topical sections on data privacy; temporal, spatial and high dimensional databases; semantic Web and ontologies; query processing; Web and information retrieval; mobile data and information; data and information streams; data mining algorithms; multimedia databases; data mining systems, data warehousing, OLAP; data and information semantics; XML databases; applications of database, information, and decision support systems; and schema, process and knowledge modelling and evolution. Offering details of all the sights of Sicily, from the mosaics of Monreale and the temples of Agrigento to bustling markets in Palermo, this guide also includes reviews of hotels and restaurants for every budget and region of the island. It also includes information on mountain hikes. This book constitutes the refereed proceedings of the 4th International Conference on Electronic Government, EGOV 2005, held in Copenhagen, Denmark in August 2005. The 30 revised papers presented were carefully reviewed and selected from numerous submissions and assess the state of the art in e-government/e-governance and provide guidance for research, development and application of this emerging field. The papers are arranged in topical sections on challenges, performance, strategy, knowledge, and technology. A team of over 150 leading contributors provides state-of-the-art coverage of minimally invasive surgery using videoscopic guidance. Delivers up-to-date discussions of pleural and lung diseases, mediastinum, esophageal disease, pediatric surgery, coronary artery bypass and valvular surgery. Features over 890 clear illustrations; many in full color! More than 170 international authorities discuss every aspect of this field from general issues through pleural diseases, parenchymal lung disease, the mediastinum, thoracoscopic procedures, endoscopy and imaging, coronary artery bypass grafting, heart valve surgery, and more. Every chapter describes a particular technique in detail. And, to ensure that readers receive the most well-rounded perspective possible, most chapters are followed by commentaries from other specialists providing alternate viewpoints that confirm or challenge the assertions made by the chapters authors. More than 700 illustrations 161 in full color clarify complex principles of minimally invasive surgery and make important nuances of technique simple to understand and apply. After the collapse of the interstellar Federation, human civilization descended into a new Dark Age as planets, cut off from Earth and each other reverted to a lower tech level. After centuries of struggling to pull themselves back up by their bootstraps, they face a new and terrible threat. Raiders with faster-than-light ships and contra-gravity tanks steal anything they want and kill anyone that gets in their way. This military SF novel is the story of three generations of a family as they fight to protect their planet and loved ones from the forces of chaos. Excerpt: He quickly checked the distance to the mine site and compared that with the missile's own effective range and the X-12's speed. There was a slim chance of getting within firing range before the enemy ships got too high. The throttles were already pushed as far forward as they could go, but there was one more thing Strider could try in order to get more speed. He initiated the afterburners, which poured fuel directly into the hot engine exhaust, causing secondary combustion and additional thrust. The sudden surge in speed felt like someone had just kicked him in the back. The enemy ships were starting to gain altitude faster now. The distance between them and the X-12 was dropping faster too, but there was no way to know for sure if it was dropping fast enough. With seconds to go until the enemy ships got within missile range, Strider armed the warhead, opened the weapons bay and lowered the missile's launch platform. The fuel exhaustion warning light lit up, and he heard the accompanying warning alarm that he was almost out of fuel. Landing without fuel was going to be a bitch, but he couldn't worry about that now. He had to focus on getting within firing range. Without radar, there was no way to know for sure, but his estimated position relative to the mine site told him that the enemy ships were now within missile range. He activated the Mark 3 warhead's guidance system, which would begin radar scanning as soon as the missile launched and pressed his thumb down on the red firing button. UFOs remain essentially a military and intelligence problem - and one demanding unprecedented security and deception, with access to information on a strictly 'need to know' basis. As early as 1960 former CIA director Admiral Hillenkoetter confirmed that, 'Behind the scenes, high-ranking air force officers are soberly concerned about the UFOs. But through official secrecy and ridicule, many citizens are led to believe the unknown flying objects are nonsense.' The same could be said today. Based on many years of research by one of the world's most respected authorities on alien phenomena, Need to Know draws on top-secret documents, reports of encounters with large craft of unknown origin from pilots and personnel aboard aircraft carriers and destroyers and interviews with high-ranking military insiders. It is full of revelations, including the alarming escalation of aircraft accidents and the disappearance of hundreds of military aircraft during

UFO encounters and recent near-misses with UFOs. The evidence is clear, balanced - and irrefutable. This engaging and groundbreaking archaeological treatise mixed with cultural commentary argues that our future on Mars depends on our understanding of its remarkable past. Much to the surprise of scientists and researchers, the latest cosmic discoveries offer strong evidence that points to an extinct civilization on Mars. What happened to it? And what does this mean for us on Earth? With in-depth research and accessible prose, *After the Martian Apocalypse* explains how our own survival may depend on confronting the strange and ancient truths to be found on the Red Planet. Challenging orthodox notions of humanity's role in space, this unputdownable book effortlessly proves that to truly understand our own world, we must first understand our unsettling and enigmatic planetary neighbor.

Access 2010 permette di gestire basi di dati di qualunque grado di complessità, in modo semplice e intuitivo. L'interfaccia è stata migliorata e strutturata per dare all'utente un'area di lavoro ancora più usabile. Alla semplicità di utilizzo si affianca la potenza del software, rendendolo ideale per ogni esigenza: professionale, didattica o privata. Questo libro permette di avvicinarsi all'utilizzo di Access attraverso un percorso sequenziale, che guida il lettore a partire dalle nozioni fondamentali sui database per proseguire nell'approfondimento di tutte le funzionalità del software. Dalle procedure più semplici di inserimento, gestione e visualizzazione dei dati fino a quelle più complesse, come la programmazione con SQL e VBA, il libro permetterà sia ai neofiti sia agli utenti più esperti di utilizzare l'applicazione per raggiungere gli scopi prefissi.

Manual of Business Italian is the most comprehensive, single-volume reference handbook for students and professionals using Italian. Designed for all users, no matter what level of language skill, this manual comprises five parts: * A 6000-word, two-way Glossary of the most useful business terms * A 100-page Written Communications section giving models of 50 letters, faxes and documents * An 80-page Spoken Situations section covering face-to-face and telephone situations * A short Reference Grammar outlining the major grammar features of Italian * A short Business Facts section covering essential information of the country or countries where Italian is used

Written by an experienced native and non-native speaker team, this unique volume is an essential, one-stop reference for all students and professionals studying or working in business and management where Italian is used

Lo scopo di questo libro è mettere in luce la rilevanza del movimento internazionale Open Access (OA) che si prefigge l'obiettivo di sostenere e promuovere le strategie per la diffusione dei prodotti della ricerca scientifica con l'appoggio di tecnologie di rete e politiche OA. I Repository Istituzionali (IR) OA saranno presentati entro la cornice di: alcune linee di indirizzo, meccanismi di valutazione della ricerca, questioni di proprietà intellettuale, conservazione a lungo termine, Data and Process Management Plan e Trusted Digital Repositories. Il lavoro presenterà anche un'indagine su un campione di 23 Repository digitali (nazionali e internazionali) a sostegno della comunicazione e del libero accesso ai contenuti di ricerca in rete. Sulla base di questa indagine verrà presentato un ToolKit che potrebbe essere utile per programmare e monitorare diverse funzionalità di un IR. Successivamente, al lettore sarà presentato uno schema di metadati per la descrizione dei prodotti della ricerca scientifica in IR, prendendo in considerazione le Linee guida per la creazione e la gestione di metadati nei Repository Istituzionali (CRUI, 2012) e Linked Open Data-enabled Bibliographical Data Recommendations (Subirats, Zeng, 2015). I metadati abilitati come dati LOD avranno il ruolo chiave nella qualificazione del profilo semantico delle proprietà dei metadati in questione e, di conseguenza, delle risorse informative che rappresentano, così come nel potenziamento dell'interoperabilità semantica e nel favorimento di dinamiche collaborative dei contenuti di ricerca scientifica a livello nazionale e internazionale in rete, rafforzando l'efficacia e l'efficienza della ricerca stessa.

The Villa dei Papiri at Herculaneum-buried during the eruption of Mt. Vesuvius in A.D. 79, then rediscovered in 1750-contained a large collection of bronze and marble statuary and busts. Before they were published or exhibited, the sculptures were restored so as to appear whole: it is thus that they helped to shape early modern tastes in classical sculpture. The book describes the nature of the ancient sculptures and their impact on the modern public. Their chance discovery affected the interpretation of the statues-their styles and subjects-over the course of the next 250 years. The ancient sculptures were copied extensively in reproductions of various sizes and patinas. The author traces the popularity of these copies in Europe and America. Also presented in the book is a technical study of the production techniques and materials of the sculptures, as well as of their modern restoration history. Scientific analyses and detailed photographs reveal both how the pieces were cast and pieced together in antiquity and how they were restored in the eighteenth century. Even though this collection has been known for two and a half centuries, this book covers for the first time the eclectic nature of the sculptures, their actual condition, and their quality, pointing in some cases to mass production. "You are to be commended on such a great publication and I am humbled that you would even consider adding a few lines from one of my books," --Paul Hellyer Former Canadian Minister of National Defense ". . . this brilliantly produced book not only serves as a superb introduction to the subject but covers some fascinating and important new material for the aficionados." --Timothy Good, Leading Authority on UFOs and Best-selling Author "I offer my gratitude to you, not only for the "heavy" copy of your book, but also the "light" that the content provides. You and your colleagues can be congratulated for your excellent summary of the history, and probable significance, of the ET presence on Earth. Love & light," --R. Leo Sprinkle, Ph.D., Famed Hypnotherapist and Consultant to Linda Moulton Howe "Also of interest is a chapter that discusses the "Skunk Works" (the advanced aircraft manufacturing division of Lockheed), and the shocking statements made by its former president, Ben Rich. These statements, which were confirmed by the author who was present at Rich's March 23, 1993 UCLA presentation . . . Readers of this book would do well to consider the staggering implications of Rich's comments, and their potential transportation and clean energy applications for this world." --Michael Schrott, Military Aerospace Historian, Artist and Reviewer, Open Minds magazine

ARE UFOs REAL? FINALLY, A GUIDE FOR THOSE WITH OPEN MINDS This is the revised and expanded 2nd edition (2015) of the original book written for the novice and for the more knowledgeable as well. 60+ new, color illustrations. New sections document the Hudson Valley triangular craft, Area 51/S4 hangar details, articles by the former Canadian Minister of Defense, the Hon. Paul Hellyer, and disclosures by US Air Force generals, American and Canadian scientists. Join the author, T. L. Keller, on a voyage to otherworldly places and understand the reality of UFOs, alien beings and how they get from wherever they are to planet Earth. This book is part of The Total Novice's Guide series of books intended for those who know little or nothing about a particular subject, have open minds and want to know more. * In this fascinating and informative read, you will be escorted through the Roswell and other incidents involving crashed alien spaceships. Read about Project Galileo, and testimony from government officials, as well as 10 former, military whistle-blowers who have had first-hand experiences with the unknown. * Get the latest inside information on the above-top secret, US government anti-gravity and flying disc program that has been fifty years in the making. * Learn about super secret, Area 51/S4; understand "Missing Time", and the true nature of human abductions. You will learn how alien vehicles travel here; and, more importantly, why they are here. Read how you will be impacted when the reality of UFOs and alien beings becomes known to the world. And it may be just around the corner...
