Lenin Rediscovered Apr 20 2022 This commentary to Lenin's landmark "What is to be Done?" (1902) provides hitherto unavailable contextual information about Lenin's outlook and aims that undermines previous interpretations. It challenges established views about Marxism, 'revolutionary Social Democracy' and Bolshevism.

The Dinosaurs Rediscovered Feb 06 2021 Giant sauropod dinosaur skeletons from Patagonia; dinosaurs with feathers from China; a tiny dinosaur tail in Burmese amber complete down to every detail of its filament-like feathers, skin, bones and mummified muscles. Dinosaurs continue to regularly cause a media sensation. Remarkable new fossil finds are the lifeblood of modern palaeobiology, but it is the advances in technologies and methods that have allowed the revolution in the scope and confidence of the field. Over the past twenty years, the study of dinosaurs has become a true scientific discipline. New technologies have revealed secrets locked in the prehistoric bones in ways that nobody predicted we can now work out the colour of dinosaurs, their bite forces, top speeds and even how they cared for their young. The Dinosaurs Rediscovered gathers together all the latest palaeontological evidence and takes us behind the scenes on expeditions and in museum laboratories, tracing the transformation of dinosaur study from its roots in antiquated natural history to a highly technical, computational and indisputably scientific field today. Michael J. Benton explores what we know of the world of the dinosaurs, how dinosaur remains are found and excavated, and how palaeontologists read the details of the lives of dinosaurs from fossils their colours, their growth, feeding and locomotion, how they grew from egg to adult, how they sensed the world, and even whether we will ever be able to bring them back to life. Dinosaurs are still very much a part of our world.

Back to the Prairie Oct 02 2020 The New York Times bestselling author, star of "Little House on the Prairie," and two-term SAG president recounts her return to rustic life with her new husband in a cottage in the Catskill Mountains during the COVID-19 pandemic.

John Okada Oct 22 2019 No-No Boy, John Okada's only published novel, centers on a Japanese American who refuses to fight for the country that incarcerated him and his people in World War II and, upon release from federal prison after the war, is cast out by his divided community. In 1957, the novel faced a similar rejection until it was rediscovered and reissued in 1976 to become a celebrated classic of American literature. As a result of Okada's untimely death at age forty-seven, the author's life and other works have remained obscure. This compelling collection offers the first full-length examination of Okada's development as an artist, placing recently discovered writing by Okada alongside essays that reassess his lasting legacy. Meticulously researched biographical details, insight from friends and relatives, and a trove of intimate photographs illuminate Okada's early life in Seattle, military service, and careers as a public librarian and a technical writer in the aerospace industry. This volume is an essential companion to No-No Boy.

India Rediscovered Dec 28 2022 India Rediscovered in not just another title. India always needed to be rediscovered for the future making of the nation. It needed to be rediscovered in the context of interplay of its inherent spirit and changing material conditions although the past. It needed to be rediscovered in the cycles of rise and fall, revival and rejuvenation of all its civilizational and cultural ethos. It needed to be rediscovered for a better understanding of the causes of a number of misgivings and misconceptions with a view to find a more positive and rational path of its rebuilding and finally it needed to be rediscovered to listen to the call of the age. Salient Features: • The book falls in the line of some exceptional writings on India's past to its present in a surveying manner and style. • Analyses the direction of Indian history on the basis of the inter-relationship of spirit and matter with regard to general will of the people. • Evaluates the progress of civilization and culture, state and society in India in terms of maximum and total efficiency during different eras of Indian history which is altogether a new vision of looking at India's past. • Very well studied with references and an exhaustive theme-index at the end for the benefit of readers and researchers with a view to open new vistas of research in the field and hence a big contribution to the knowledge.

Alexandria Rediscovered Dec 04 2020 In this text, the author recounts the methods he has used to unearth his finds and assesses the information they reveal about life in the ancient city of Alexandria."

American Women in Gilded Age London Jun 10 2021 During the late Victorian and Edwardian periods, American women expatriates helped populate Britain's literary, theatrical, and arts scenes. Varied in their motivation and talents, they were educated, nearly all moneyed, and distinctive for being American, which made them outsiders free from many of the social constraints that checked English women. Drawing on correspondence, reviews, and articles of the day, records from women's clubs, and other documentary sources, Gabin pieces together the lives and careers of one such group of American women, living in London between 1870 and the end of WWI. It is a colony of fascinating characters well known in their day but more recently obscured, whose individual efforts and achievements nevertheless created more opportunities for future, less-privileged women. The group ranges from socialite Jennie Jerome Churchill (mother of Winston), to novelists Pearl Craigie and Gertrude Atherton, actresses Mary Anderson, Genevieve Ward, and Elizabeth Robins, and journalists Elizabeth Banks and Elizabeth Robins Pennell. Supporting figures include Boston poet Louise Chandler Moulton--who hosted a literary salon in her London home, actress and singer Edna May, artist Julie Heyneman, and Antoinette Sterling--a singer favored by Queen Victoria. Gabin sets the historical background of late 19th-century London, places the women within it, and then follows each one as she pursues her talents. In every case, the women make essential sacrifices in pursuit of their aims. Gabin enlivens each in straightforward narrative with ample selections from 19th-century sources. While nearly all the works written by these women are out of print, Gabin provides an extensive bibliography of primary and secondary materials documenting this fascinating group of

expatriates and their place in and influence upon turn-of-the-century London.

Aristotle's Children Apr 27 2020 A true account of a turning point in medieval history that shaped the modern world, from "a superb storyteller" and the author of *When Jesus Became God* (Los Angeles Times). Europe was in the long slumber of the Middle Ages, the Roman Empire was in tatters, and the Greek language was all but forgotten—until a group of twelfth-century scholars rediscovered and translated the works of Aristotle. The philosopher's ideas spread like wildfire across Europe, offering the scientific view that the natural world, including the soul of man, was a proper subject of study. The rediscovery of these ancient ideas would spark riots and heresy trials, cause major upheavals in the Catholic Church—and also set the stage for today's rift between reason and religion. Aristotle's *Children* transports us back to this pivotal moment in world history, rendering the controversies of the Middle Ages lively and accessible, and allowing us to understand the philosophical ideas that are fundamental to modern thought. "A superb storyteller who breathes new life into such fascinating figures as Peter Abelard, Albertus Magnus, St. Thomas Aquinas, Roger Bacon, William of Ockham and Aristotle himself." —Los Angeles Times "Rubenstein's lively prose, his lucid insights and his crystal-clear historical analyses make this a first-rate study in the history of ideas." —Publishers Weekly

The Silk Road Rediscovered Mar 19 2022 A roadmap for understanding the business challenges and opportunities in China By 2025, China and India will be two of the world's four largest economies. By then, economic ties between them should also rank among the ten most important bilateral ties worldwide. Their leaders are well aware of these emerging realities. In May 2013, just two months after taking charge, Premier Li Keqiang left for India on his first official trip outside China, a clear signal of China's foreign policy priorities. The *Silk Road Rediscovered* is the first book ever to analyze the growing corporate linkages between India and China. Did you know that: India's Mahindra is the fifth largest tractor manufacturer in China? Tata Motors' Jaguar Land Rover unit is the fastest growing luxury auto seller in China? India's NIIT is the most influential IT training brand in China? China's Huawei has its second largest R&D center in Bangalore and employs over 5000 people in India? Shanghai Electric earns its largest revenues outside China from India? As these developments illustrate, pioneering Indian and Chinese companies are rediscovering the fabled Silk Road which joined their nations in ancient times. Winning in each other's markets is also making them stronger and whetting their appetite for further global expansion. This book examines how Indian companies such as Tata Consultancy Services, Mahindra Tractors, NIIT, Tata Motors/Jaguar Land Rover and Sundaram Fasteners have figured out how to win in China. Their experiences may inspire and offer lessons to other Indian companies. The book also examines how Chinese pioneers such as Lenovo, Huawei, TBEA, Haier and Xinxing have made a strong commitment to India and are beginning to realize the fruits of this commitment. The key lessons that emerge from these analyses are: the odds of success go up dramatically when executives adopt a global rather than local-for-local perspective and are skillful at learning on the ground.

Madras Miscellany Jan 17 2022 This book marks a decade of a column that appears every Monday in *The Hindu's Metro Plus*, Madras edition. Madras Miscellany has, over that decade, created an awareness and a greater appreciation of the significant past of Madras and of the events and the people who over the years made Madras "the first city of modern India", a description of the City the writer of the column, S.Muthiah, never tires of reiterating. Over a 1500 or so items that appeared in the 514 columns published during Madras Miscellany's first decade appear in the book in three sections: 'People', 'Places' and 'Potpourri', the last named being everything else that doesn't fit into the other two sections. And in them there develops a rather comprehensive story of Madras over its nearly 375 years of history. In sum, this is a book for anyone interested in the development of Madras and its considerable contribution to modern India.

Transactions and Proceedings of the Botanical Society of Edinburgh Jul 23 2022 Vol. 25: The distribution of Hepaticæ in Scotland, by S.M. Macvicar.

Best Actress Jul 11 2021 Showcasing a dazzling collection of 200 photographs, many of which have never before been seen, this lavishly illustrated book offers a captivating historical, social, and political examination of the first 75 women—from Janet Gaynor to Emma Stone—to have won the coveted and legendary Academy Award for Best Actress.

Web Dynamics Nov 03 2020 The World Wide Web has become a ubiquitous global tool, used for finding information, communicating ideas, carrying out distributed computation and conducting business, learning and science. The Web is highly dynamic in both the content and quantity of the information that it encompasses. In order to fully exploit its enormous potential as a global repository of information, we need to understand how its size, topology and content are evolving. This then allows the development of new techniques for locating and retrieving information that are better able to adapt and scale to its change and growth. The Web's users are highly diverse and can access the Web from a variety of devices and interfaces, at different places and times, and for varying purposes. We thus also need techniques for personalising the presentation and content of Web based information depending on how it is being accessed and on the specific user's requirements. As well as being accessed by human users, the Web is also accessed by applications. New applications in areas such as e-business, sensor networks, and mobile and ubiquitous computing need to be able to detect and react quickly to events and changes in Web-based information. Traditional approaches using query-based 'pull' of information to find out if events or changes of interest have occurred may not be able to scale to the quantity and frequency of events and changes being generated, and new 'push'-based techniques are needed.

Greenbrier Pipeline Project Oct 26 2022

Transactions of the Botanical Society Jun 22 2022

Ramanujan's Theta Functions Mar 07 2021 Theta functions were studied extensively by Ramanujan. This book provides a systematic development of Ramanujan's results and extends them to a general theory. The author's treatment of the subject is comprehensive, providing a detailed study of theta functions and modular forms for levels up to 12. Aimed at advanced undergraduates, graduate students, and researchers, the organization, user-friendly presentation, and rich source of examples, lends this book to serve as a useful reference, a pedagogical tool, and a stimulus for further research. Topics, especially those discussed in the second half of the book, have been the subject of much recent research; many of which are appearing in book form for the first time. Further results are summarized in the numerous exercises at the end of each chapter.

Chile Rediscovered Sep 01 2020 A geologist, a microbiologist and a town planner take a journey into the strange regions of Chile's secret heart. They are exposed to astonishing landscapes and species, and encounter a variety of Chile's indigenous inhabitants. They are, respectively, a Chilean ex-fugitive from the Pinochet regime, a Frenchman, and an Englishman, who represents Cronin and reproduces the author's Chilean journey in a semi-fictionalized form. The beliefs and inner convictions of each, and their professional backgrounds, bear upon them as they interpret what they encounter in the scarcely habitable Patagonian islands and mainland of the south and the remote northern altiplano of the Aymaric heartland, thousands of feet above sea level, shrouded in millennia-old secrets. The three are friends, yet differ deeply in what they read into their rediscovery of one of the world's strangest countries.

Why Us? Jan 25 2020 The imperative to 'know thyself' is both fundamental and profoundly elusive – for how can we ever truly comprehend the drama and complexity of the human experience? In 'Why Us?' James Le Fanu offers a fascinating exploration of the power and limits of science to penetrate the deep mysteries of our existence, challenging the certainty that has persisted since Charles Darwin's 'Origin of Species' that we are no more than the fortuitous consequence of a materialist evolutionary process.

Traditional Wisdom Rediscovered Apr 08 2021 This versatile guide offers hundreds of helpful hints, practical tips and remedies from days gone by to benefit your health, looks, home and garden. All of them have been researched and tested for their practical application in today's world.

Thomas Eakins Rediscovered Jan 05 2021 A student of Eakins', Bregler collected this "treasury of studio material--including oil sketches, sculptures, drawings, photographs, and manuscripts" which appears here as "both a catalogue of the Bregler collection and a reassessment of Eakins' career."--Jacket.

The Lost Library Oct 14 2021 Twenty-eight modern gay authors reminisce about their favorite out of print gay novels, bringing the texts to light and telling intimate stories of their own.

S. Seymour Thomas, 1868-1956 Nov 27 2022 In-depth study of the life and work Texas artist S. Seymour Thomas who was born in San Augustine, Texas.

Showcases numerous paintings on permanent display at the Ezekiel Cullen House in San Augustine.

CBSE Most Likely Question Bank Chapterwise Class 10 (2022 Examination) - English Language & Literature with New Objective Questions, Reduced Syllabus Aug 24 2022 Benefit from Chapter Wise & Section wise Question Bank Series for Class 10 CBSE Board Examinations (2022) with our Most Likely CBSE Question Bank for English (Language & Literature). Subject Wise books designed to prepare and practice effectively each subject at a time. Our Most Probable Question Bank highlights the knowledge based and skill based questions consisting of - having Section A - Reading , Section B - Writing & Grammar, and Section C - First Flight Prose, First Flight Poetry, and Footprints without Feet. Our handbook will help you study and practice well at home. How can you benefit from Gurukul Most Likely CBSE English Question Bank for 10th Class? Our handbook is strictly based on the latest syllabus prescribed by the council and is categorized chapterwise topicwise to provide in depth knowledge of different concept questions and their weightage to prepare you for Class 10th CBSE Board Examinations 2022. 1. Focussed on New Objective Paper Pattern Questions 2. Includes Solved Board Exam Paper 2020 for both Delhi and outside Delhi (Set 1-3) and Toppers Answers 2019 3. Previous Years Board Question Papers Incorporated 4. Visual Interpretation as per latest CBSE Syllabus 5. Exam Oriented Effective Study Material provided for Self Study 6. Chapter Summary for Easy & Quick Revision 7. Having frequently asked questions from Compartment Paper, Foreign Paper, and latest Board Paper 8. Follows the Standard Marking Scheme of CBSE Board Our question bank also consists of numerous tips and tools to improve study techniques for any exam paper. Students can create vision boards to establish study schedules, and maintain study logs to measure their progress. With the help of our handbook, students can also identify patterns in question types and structures, allowing them to cultivate more efficient answering methods. Our book can also help in providing a comprehensive overview of important topics in each subject, making it easier for students to solve for the exams. Why should you trust Gurukul Books? Gurukul Books, a unit of Oswal Publishers, has been in operation since 1985. Over the past 30 years, our publication has developed reliable content that aids students and teachers in achieving excellence. We create reference material that is extensively researched, meticulously articulated, and comprehensively edited ? catering to the various National and Regional Academic Boards in India.

Bilharziasis Aug 12 2021 The Novartis Foundation Series is a popular collection of the proceedings from Novartis Foundation Symposia, in which groups of leading scientists from a range of topics across biology, chemistry and medicine assembled to present papers and discuss results. The Novartis Foundation, originally known as the Ciba Foundation, is well known to scientists and clinicians around the world.

Fabergé Rediscovered May 29 2020 Presents 90 outstanding pieces made by celebrated jeweller Fabergé, including two of the famous imperial Easter eggs.

Emerging Infections 10 Dec 24 2019 Essential resource for the fight against emerging infectious diseases Incidences such as the 2014 Ebola epidemic in West Africa and the 2015 appearance of Zika in Brazil provide dramatic evidence of the continued ability of microbes to emerge, spread, adapt, and threaten global health. The challenge facing infectious disease specialists and public health professionals is to improve and find new diagnostic, therapeutic, and prevention strategies. The editors of the 10th installment of the Emerging Infections series have compiled the perspectives of leading infectious disease experts into 22 chapters that provide important updates on a broad range of emerging and reemerging bacterial, viral, parasitic, and fungal infectious diseases in the United States and globally. In addition to focusing on MERS, Ebola virus disease, chikungunya, and Zika virus disease, Emerging Infections 10 explores the global threat of antimicrobial resistance in reviews on carbapenem-resistant Enterobacteriaceae, multiply-resistant gonococcal infections, non-typhoidal Salmonella infections, and artemisinin-resistant Plasmodium falciparum malaria. Topics include both recently- and long-recognized diseases that pose challenges for the clinical, laboratory, research, public health, and animal health communities. Emerging Infections 10 presents new and emerging strategies to prevent, control, and eradicate infectious diseases and guides readers to the primary literature where they can explore individual topics in greater depth. This book is a valuable reference for professionals in microbiology, epidemiology, public health, and clinical and veterinary medicine.

Primates of the World Mar 27 2020 First Published in 1983. Routledge is an imprint of Taylor & Francis, an informa company.

Computerworld Feb 18 2022 For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

Bobby Fischer Rediscovered Jul 31 2020 An updated, expanded edition of the 2003 classic, with all 100 games reanalyzed, along with six additional games This book covers the entire career of an American chess grandmaster and eleventh World Chess Champion, going well beyond his My 60 Memorable Games, and includes rarely seen "lost" Fischer games With new insights into what made the enigmatic Fischer play – and act – the way he did “Bobby Fischer...The precision and energy that he played with is unmatched in the history of chess.” Magnus Carlsen, World Chess Champion Nearly 30 years since his last chess game, Bobby Fischer’s fame continues to grow. Appearing in Hollywood movies, documentaries and best-selling books, his life and career are as fascinating as they ever were and his games continue to generate discussion. Indeed, with each new generation of computer, stunning discoveries are made about moves that have been debated by grandmasters for decades. International Grandmaster Andrew Soltis played Fischer and also reported, as a journalist, on the American’s legendary career. He is the author of many books, including Pawn Structure Chess, 365 Chess Master Lessons and What it Takes to Become a Chess Master.

Hit Refresh Feb 24 2020 “At the core, Hit Refresh, is about us humans and the unique quality we call empathy, which will become ever more valuable in a world where the torrent of technology will disrupt the status quo like never before.” – Satya Nadella from Hit Refresh “Satya has charted a course for making the most of the opportunities created by technology while also facing up to the hard questions.” – Bill Gates from the Foreword of Hit Refresh The New York Times bestseller Hit Refresh is about individual change, about the transformation happening inside of Microsoft and the technology that will soon impact all of our lives—the arrival of the most exciting and disruptive wave of technology humankind has experienced: artificial intelligence, mixed reality, and quantum computing. It’s about how people, organizations, and societies can and must transform and “hit refresh” in their persistent quest for new energy, new ideas, and continued relevance and renewal. Microsoft’s CEO tells the inside story of the company’s continuing transformation, tracing his own personal journey from a childhood in India to leading some of the most significant technological changes in the digital era. Satya Nadella explores a fascinating childhood before immigrating to the U.S. and how he learned to lead along the way. He then shares his meditations as a sitting CEO—one who is mostly unknown following the brainy Bill Gates and energetic Steve Ballmer. He tells the inside story of how a company rediscovered its soul—transforming everything from culture to their fiercely competitive landscape and industry partnerships. As much a humanist as engineer and executive, Nadella concludes with his vision for the coming wave of technology and by exploring the potential impact to society and delivering call to action for world leaders. “Ideas excite me,” Nadella explains. “Empathy grounds and centers me.” Hit Refresh is a set of reflections, meditations, and recommendations presented as algorithms from a principled, deliberative leader searching for improvement—for himself, for a storied company, and for society.
