Examining Images of Urban Life Jun 22 2020 There are novels that portray cities as magical places, others as stifling, imposing environments, and others still as a gritty but beautiful, living landscape. Cities can be the center of culture, business, the arts, and are the meeting places for diversities of all kinds. Examining Images of Urban Life gathers contributions from scholars, educators, and young adult authors, like Benjamin Alire Saenz and e.E. Charlton-Trujillo, who consider how living in a city affects character identity and growth, and the ways authors world-build the urban setting. The collection discusses what the urban landscape means, and dispels the media-driven, anecdotaly propagated preconceptions about city living. Urban life is varied and rich, just as its literature is. The collection revolves around a reconsideration of what the city represents, to its readers and to its inhabitants, and serves as a resource in urban settings, wherein teachers can select books that mirror and advocate for the students sitting in their classes. Perfect for courses such as: Young Adult Literature | Children's Literature | Elementary Literacy | Reading and Literacy | Methods of Teaching | Public Purposes of Education | Educational or Historical Foundations of Education | Urban Studies | Media and Library Sciences

Bourdieu and Literature Sep 18 2022 Bourdieu and Literature is a wide-ranging, rigorous and accessible introduction to the relationship between Pierre Bourdieu's work and literary studies. It provides a comprehensive overview and critical assessment of his contributions to literary theory and his thinking about authors and literary works. One of the foremost French intellectuals of the post-war era, Bourdieu has become a standard point of reference in the fields of anthropology, linguistics, art history, cultural studies, politics, and sociology, but his longstanding interest in literature has often been overlooked. This is the first full-length study of Bourdieu's work on literature in English, and it provides an invaluable resource for students and scholars of literary studies, cultural theory and sociology.

Human Resource Management in Early Internationalised SMEs Jan 30 2021 Small- and medium-sized enterprises (SMEs) are increasingly viewed as valuable contributors to the global economy, which translates into their importance in business literature and academic research.

Recent studies suggest that there exists a substantial variety of international activities pursued by SMEs expanding abroad, with a prominent presence of early internationalised enterprises, including born global. Despite the acknowledgement of the importance of human capital for SME internationalisation, there is a persistent knowledge gap concerning HR practices in this context. Until now, researchers investigating the accelerated internationalisation of SMEs have focused either on the human capital of decision-makers or selected attributes of employees, although these have only been at the pre-entry or entry stages. Thus, activities performed after entering foreign markets remain. This book attempts to reduce this gap and contribute to the body of knowledge concerning HR practices in early internationalised SMEs with an emphasis on the post-entry phase. By taking such an approach, this volume integrates two streams of research: HRM in the SMEs and international business. It provides managers of SMEs with useful information on dealing with internationalisation-related challenges by means of various practices including work structuring, recruitment and selection, training and development, employee appraisal and remuneration, and performance management. The discussion of these issues is based upon data from a survey conducted in 200 SMEs and case studies exemplifying HR practices in early internationalised small and medium enterprises. It offers academic researchers, postgraduate students, and reflective practitioners a state-of-the-art overview of managing human resources in small and medium enterprises expanding internationally, including both accelerated and incremental paths.

[Diamond Warriors in Colonial Namibia](#) Jun 03 2021 Diamond Warriors in Colonial Namibia enters into uncharted scholarly territory of illegal diamond smuggling at the largest diamond mining company in colonial Namibia—De Beers' Consolidated Diamond Mines of South West Africa (CDM). It details the underground activities of the natives (migrant workers) employed by the CDM and how these illicit activities accounted for rapid development in Owamboland. Beyond this account, the book takes on the deterministic 'natural resource curse' theory that equates natural resource endowments to a curse resulting in underdevelopment and sometimes conflict. It is argued and proven herein, from a decolonial standpoint, that such an approach is an oversimplification of the political economy of natural resources in Africa in general and Namibia in particular. The text also provides a contextual account of the contract labour system and details the symbiotic relationship between CDM and the colonial state before highlighting the remaining unanswered questions and areas of further research
