Political Islam, Iran, and the Enlightenment Oct 01 2020 Ali Mirsepassi's book presents a powerful challenge to the dominant media and scholarly construction of radical Islamist politics, and their anti-Western ideology, as a purely Islamic phenomenon derived from insular, traditional and monolithic religious 'foundations'. It argues that the discourse of political Islam has strong connections to important and disturbing currents in Western philosophy and modern Western intellectual trends. The work demonstrates this by establishing links between important contemporary Iranian intellectuals and the central influence of Martin Heidegger's philosophy. We are also introduced to new democratic narratives of modernity linked to diverse intellectual trends in the West and in non-Western societies, notably in India, where the ideas of John Dewey have influenced important democratic social movements. As the first book to make such connections, it promises to be an important contribution to the field and will do much to overturn some pervasive assumptions about the dichotomy between East and West.

Interpersonal Understanding in Historical Context Dec 27 2022 Understanding students' historical understanding is a complex and challenging endeavour, for history teachers as well as for researchers from diverse fields. Since historical

situations contain interpersonal and social issues that happened in the past, not only history educators are interested in how students understand them.

**History and Context in Comparative Public Policy
Sep 24 2022 Douglas E. Ashford joins a growing number of scholars who have questioned the behavioralist assumptions of much policy science. The essays in this volume show why policy analysis cannot be confined to prevailing methods of social science. Policy-making behavior involves historical, contextual, and philosophical factors that also raise critical questions about the concepts and theory of the discipline. Ashford asks difficult questions about the contextual, conjunctural, and unintentional circumstances that affect actual decision-making. His bridging essays summarize opposing viewpoints and conflicting interpretations to help form a new agenda for comparative policy analysis.**

Tradition, Interpretation, and Science Nov 14 2021 This book reassesses the academic field of political theory and brings into sharp relief its problems and opportunities. Here for the first time, diverse theorists coordinate their arguments through a common focus. This focus is the writing of John G. Gunnell. Gunnell attacks a set of myths said to

plague almost every recent theory about politics: the myth of the given, the myth of science, myths of theory, the myth of tradition, and the myth of the political. He argues that these all alienate political theory from substantive inquiry and actual practice. Contributors include Richard E. Flathman, Russell L. Hanson, George Kateb, Paul F. Kress, J. Donald Moon, John S. Nelson, J.G.A. Pocock, Herbert G. Reid, Ira L. Strauber, Nathan Tarcov, and Sheldon S. Wolin. They respond on behalf of projects in the new history of political theory, epic theory, phenomenology, traditional theory, and political deconstruction. These discussions also address the theories of Hans-Georg Gadamer, Jürgen Habermas, Karl Marx, Leo Strauss, Alain Touraine, and Ludwig Wittgenstein. At the conclusion of the volume, Gunnell reconsiders his arguments in light of the respondent's remarks. His challenges thus provide a series of confrontations — both exciting and provocative — among major theorists. The result is a lively debate about what political theory is, how it relates to political history and practice, and how it involves epistemology. The authors probe a broad range of questions about practices of politics and traditions of discourse, and they identify priorities for the future of the field.

Hermeneutics and Method Feb 23 2020 Using the Thomist notion of wisdom as a key for interpretation, Coelho traces the flowering of the universal viewpoint into a mature theological method? one that holds out the hope of an effective transcultural mediation of meanings and values.

Critical Race Theory Nov 21 2019 In the past few years, a new generation of progressive intellectuals

has dramatically transformed how law, race, and racial power are understood and discussed in America. Questioning the old assumptions of both liberals and conservatives with respect to the goals and the means of traditional civil rights reform, critical race theorists have presented new paradigms for understanding racial injustice and new ways of seeing the links between race, gender, sexual orientation, and class. This reader, edited by the principal founders and leading theoreticians of the critical race theory movement, gathers together for the first time the movement's most important essays.

To Cast the First Stone May 28 2020 The story of the woman taken in adultery features a dramatic confrontation between Jesus and the Pharisees over whether the adulteress should be stoned as the law commands. In response, Jesus famously states, "Let him who is without sin be the first to throw a stone at her." To Cast the First Stone traces the history of this provocative story from its first appearance to its enduring presence today. Likely added to the Gospel of John in the third century, the passage is often held up by modern critics as an example of textual corruption by early Christian scribes and editors, yet a judgment of corruption obscures the warm embrace the story actually received. Jennifer Knust and Tommy Wasserman trace the story's incorporation into Gospel books, liturgical practices, storytelling, and art, overturning the mistaken perception that it was either peripheral or suppressed, even in the Greek East. The authors also explore the story's many different meanings. Taken as an illustration of the expansiveness of Christ's mercy, the purported superiority of Christians over

Jews, the necessity of penance, and more, this vivid episode has invited any number of creative receptions. This history reveals as much about the changing priorities of audiences, scribes, editors, and scholars as it does about an “original” text of John. To Cast the First Stone calls attention to significant shifts in Christian book cultures and the enduring impact of oral tradition on the preservation—and destabilization—of scripture.

Understanding the Founding Jan 04 2021 Over the course of the last century, scholars have furiously debated four questions concerning the Founders and their act of creation. Were the Framers motivated by their economic interests? How democratic was the Framers' Constitution? Should we interpret the Founding using philosophical or strictly historical approaches? What traditions of political thought were most important to the Framers? In *Understanding the Founding: The Crucial Questions*, Alan Gibson examines the preconceptions that scholars bring to these questions, explores the deepest sources of scholars' disagreements over them, and suggests new and thoughtful lines of interpretation and inquiry.

Building on his previous work, *Interpreting the Founding*, which offers a synoptic overview of the competing perspectives that have informed modern scholarship on the Founders...

Thomas Seebohm on the Foundations of the Sciences May 08 2021 This book explores the work of Thomas Seebohm (1934-2014), a leading phenomenologist and hermeneuticist. It features papers that offer a critical and constructive dialogue about Seebohm's analyses and their implications for the sciences. The net result is an in-depth study and a helpful overview of Seebohm's general approach and his specific views on various areas of modern science. The contributors focus especially upon his final text, History as a Science and the System of the Sciences. They view this as the culmination and summary of his historical and phenomenological

investigations into the foundations, nature, and limits of modern sciences. This includes not just history but the Geisteswissenschaften more generally, along with the social and natural sciences as well. The essays in this volume reflect that range. This volume presents insightful discussions about the nature and legitimacy of the human sciences as sciences and the unique character of the social sciences. It will be of interest not just as a matter of historical scholarship, but also and above all as an important contribution to phenomenology and to the philosophy of science and the sciences as such. It deserves attention by scholars from any philosophical tradition interested in thinking about the foundations of their disciplines and a philosophy of science that includes, but is not limited to, the natural sciences.

*Hermeneutics, Citizenship, and the Public Sphere
Apr 07 2021 This book sheds new light on the question of democratic politics by proposing a hermeneutic conception of citizenship and the public sphere. At the same time, it presents a critique of the postmodern arguments advanced by Richard Rorty, Jean-Francois Lyotard, and Jean Baudrillard. Questioning a dominant interpretation that sees Gadamer's hermeneutics as the expression of a conservative project, Alejandro argues that it includes an important element of critique that could challenge dominant structures and practices.*

What is History? Jan 28 2023 A philosophical interpretation of history, examining the significance of historical study as a science and a reflection of social values.

Canon 17 CIC 1983 and the Hermeneutical Principles of Bernard Lonergan Apr 26 2020 Canon 17 Cic 1983 suggests an hermeneutical approach to the interpretation of ecclesiastical laws. The author presents a concise summary of traditional canonical interpretative doctrine, new theories of interpretation elaborated during what he calls the intercodal period (between announcement in 1959 that the 1917 Codex Iuris Canonici would be completely revised and the promulgation of CIC 1983), and commentaries on interpretative doctrine and c. 17 since promulgation of the new Code, as background for a consideration of the hermeneutical principles of Bernard Lonergan and their potential usefulness in the interpretation of canon 17 itself.

Scientific Sources and Teaching Contexts Throughout History: Problems and Perspectives Jul 22 2022 This book examines the textual, social, cultural, practical and institutional environments to which the expression "teaching and learning contexts" refers. It reflects on the extent to which studying such environments helps us to better understand ancient or modern sources, and how notions of "teaching" and "learning" are to be understood. Tackling two problems: the first, is that of certain sources of scientific knowledge being studied without taking into account the various "contexts" of transmission that gave this knowledge a long-lasting meaning. The second is that other sources are related to teaching and learning activities, but without being too precise and demonstrative about the existence and nature of this "teaching context". In other words, this book makes clear what is meant by "context" and highlights the complexity of the

practice hidden by the words “teaching” and “learning”. Divided into three parts, the book makes accessible teaching and learning situations, presents comparatist approaches, and emphasizes the notion of teaching as projects embedded in coherent treatises or productions.

Modern Legal Interpretation Dec 03 2020 Legalism or legal formalism usually depicts judges as resolving cases by allegedly merely applying pre-existing legal rules. They do not seem to legislate, exercise discretion, balance or pursue policies, and they definitely do not look outside of conventional legal texts for guidance in deciding new cases. For them, the law is an autonomous domain of knowledge and technique. What they follow are the maxims of clarity, determinacy, and coherence of law. This perception of law and adjudication is sometimes designated as “an orthodox lawyering”. However, at least in certain cases, it is very difficult to say that legalism is not an inappropriate theory or a method of legal interpretation. Different theories have attested that legal interpretation is much more than just legalism, which appears to be far too naïve. In the framework of modern legal interpretation, the following questions can be raised. Is it possible to integrate legalism in a coherent theory of legal interpretation? Is legalism as a distinctive theory of legal interpretation still a feasible theory of interpretation? How can such a formalist approach withstand a critique from Dworkinian moral interpretivism or accusations of being a myth, masking political preferences from legal realists? These and many other issues about legal interpretation are discussed in this book by

prominent legal philosophers and legal theorists.

Reading Primary Sources May 20 2022 How does the historian approach primary sources? How do interpretations differ? How can they be used to write history? Reading Primary Sources goes a long way to providing answers for these questions. In the first part of this unique volume, the chapters give an overview of both traditional and new methodological approaches to the use of sources, analyzing the way that these have changed over time. The second part gives an overview of twelve different types of written sources, including letters, opinion polls, surveillance reports, diaries, novels, newspapers, and dreams, taking into account the huge expansion in the range of written primary sources used by historians over the last thirty years. This book is an up-to-date introduction into the historical context of these different genres, the ways they should be read, the possible insights and results these sources offer and the pitfalls of their interpretation. All of the chapters push the reader beyond a conventional understanding of source texts as mere "reflections" of a given reality, instead fostering an understanding of how each of the various genres has to be seen as a medium in its own right. Taking examples of sources from around the globe, and also including a student-friendly further reading section, this is the perfect companion for every student of history who wants to engage with sources.

How to Read a Folktale Jan 16 2022 How to Read a Folktale offers the first English translation of Ibonia, a spellbinding tale of old Madagascar. Ibonia is a folktale on epic scale. Much of its plot sounds familiar: a powerful royal hero attempts to rescue his betrothed from an evil adversary and, after a series of tests and duels, he and his lover are joyfully united with a marriage that affirms the royal lineage. These fairytale elements link Ibonia with European folktales, but the tale is still very much a product of Madagascar. It contains African-style praise poetry for the hero; it presents Indonesian-style riddles and poems; and it inflates the form of folktale into epic proportions. Recorded when the Malagasy people were experiencing European contact for the first time, Ibonia proclaims the power of the ancestors against the foreigner. Through Ibonia, Lee Haring expertly helps readers to

understand the very nature of folktales. His definitive translation, originally published in 1994, has now been fully revised to emphasize its poetic qualities, while his new introduction and detailed notes give insight into the fascinating imagination and symbols of the Malagasy. Haring's research connects this exotic narrative with fundamental questions not only of anthropology but also of literary criticism.

Interpreting Islam Mar 18 2022 In this book, Sonn provides the first English translation of *The History of Intellectual Movements in Islam* (1928), a seminal text of Arab modernism written by the Palestinian intellectual Bandali al-Jawzi

(1871-1942). In that book, Jawzi offered the first Marxist interpretation of the history and development of Islamic thought. The continuing importance of his work lies in Jawzi's critical method of reevaluating both European "orientalist" and classical Muslim accounts of Islamic history. Fifty years before Edward Said's landmark *Orientalism*, Jawzi identified the vested imperial interests as the weakness in both methodologies. Sonn's translation brings to life this skillful and entertaining critique of Islamic history. Her introduction places Jawzi's thought in context with both postmodern intellectuals and Muslim reformers who continue the struggle to apply Islamic principles to contemporary life.

Controversial History Education in Asian Contexts

The different perspectives provided by the book's authors offer numerous insights, examples, and approaches for understanding historical controversy to provide a practical gold mine for scholars and practitioners. It also offers a range of approaches for teaching historical controversy in classrooms. These include Structured Academic Controversy, the use of Japanese manga, teaching controversy through case studies, student facilitated discussion processes, and

discipline-based approaches that can be used in history classrooms. The book's chapters will help educational researchers and curricularists consider new approaches for curriculum design, curriculum study, and classroom research.

Our capacity to understand the biology of historical populations is experiencing remarkable developments on both theoretical and analytical fronts. Human Biology and History weaves together the fields of biology, archaeology, and anthropology in an exchange of methods and theoretical perspectives that exemplify the interaction between human biology and history. The book presents methods developed for the analysis of biological material that can be applied to historical specimens to reveal the lifestyles and environments of individuals who lived thousands of years ago. Historical data sources are used to reveal the biology and population structure of past civilizations, while biological methods are used to interpret historical patterns and processes. This multi-disciplinary volume presents a unique interlacing of human biology and history to illustrate how individuals and societies have evolved over time. It is an insightful reference for human biologists, historians, and students interested in the intriguing connections that can be made when scientific techniques are applied within a historical context.

Approaching Historical Sources in their Contexts

Oct 13 2021 In *Approaching Historical Sources in Their Contexts*, 12 academics examine how space, time and performance interact to co-create context for source analysis. The chapters cover 2000 years and stretch across the Americas and Europe. They are grouped into three themes, with the first four exploring aspects of movement within and around an environment: buildings, the tension between habitat and tourist landscape, cemeteries and war memorials. Three chapters look at different aspects of performance: masque and opera in which performance is (re)constructed from several media, radio and television. The final group of chapters consider objects and material culture in which both spatial

placement and performance influence how they might be read as historical sources: archaeological finds and their digital management, the display of objects in heritage locations, clothing, photograph albums and scrapbooks. Supported by a range of case studies, the contributors embed lessons and methodological approaches within their chapters that can be adapted and adopted by those working with similar sources, offering students both a theoretical and practical demonstration of how to analyse sources within their contexts. Drawing out common threads to help those wishing to illuminate their own historical investigation, this book encourages a broad and inclusive approach to the physical and social contexts of historical evidence for those undertaking source analysis.

The Cay Oct 21 2019 A tense and compulsive survival story of a young boy and an old man adrift on the ocean, then marooned on a tiny, deserted island. It is also a fascinating study of the relationship between Phillip, white, American, and influenced by his mother's prejudices, and the black man upon whom Phillip's life depends.

The Truth of History Jun 09 2021 Modern relativism and postmodern thought in culture and language challenge the 'truth' of history. This book considers how all historians, confined by the concepts and forms of argument of their own cultures, can still discover truths about the past. *The Truth of History* presents a study of various historical explanations and interpretations and evaluates their success as accounts of the past. C. Behan McCullagh contests that the variety of historical interpretations and subjectivity does not

exclude the possibility of their truth. Through an examination of the constraints of history, the author argues that although historical descriptions do not mirror the past they can correlate with it in a regular and definable way. Far from debating in the abstract and philosophical only, the author beds his argument in numerous illuminating concrete historical examples. *The Truth of History* explores a new position between the two extremes of believing that history perfectly represents the past and that history can tell us nothing true of the past.

Meaning and Context Mar 01 2023 Quentin Skinner is one of the leading thinkers in the social sciences and humanities today. Since the publication of his first important articles some two decades ago, debate has continued to develop over his distinctive contributions to contemporary political philosophy, the history of political theory, the philosophy of social science, and the discussion of interpretation and hermeneutics across the humanities and social sciences. Nevertheless, his most valuable essays and the best critical articles concerning his work have been scattered in various journals and difficult to obtain. *Meaning and Context* includes five of the most widely discussed articles by Skinner, which present his approach to the study of political thought and the interpretation of texts. Following these are seven articles by his critics, five of these drawn from earlier publications and two, by John Keane and Charles Taylor, written especially for this volume. Finally, there appears a fifty-seven page reply by Skinner--a major new statement in which he defends and reformulates his method and lays out new lines of research. The editorial

introduction provides a systematic overview of the evolution of Skinner's work and of the main reactions to it. Besides James Tully, John Keane, and Charles Taylor, the contributors include Joseph V. Femia, Keith Graham, Martin Hollis, Kenneth Minogue, and Nathan Tarcov.

Theological Interpretation of Scripture as Spiritual Formation Feb 05 2021 *Theological Interpretation of Scripture often begins and ends in the academy even though it is intended to find its bearing in the heart of the church. This volume seeks to bridge that gap by showing how the exegetical methods of TIS are themselves spiritually formative and naturally intersect into the life of the church.*
