Buku ini adalah terawangan nakal namun mencerahkan mengenai aneka kekurangan manusia. Ekonomi tradisional menganggap kekuatan rasional mengatur segalanya. Ekonomi perilaku tahu cerita sebenarnya. Richard Thaler telah menghabiskan kariernya mempelajari gagasan bahwa manusia adalah pusat ekonomi. Dan bahwa kita tempatnya kesalahan. Ekonomi perilaku kini amat berpengaruh, bukan hanya mengubah cara kita berpikir mengenai uang, melainkan juga diri kita sendiri, dunia kita, dan segala jenis keputusan sehari-hari. Entah itu ketika membeli jam tangan, menjual tiket, atau mengajukan KPR, kita semua mengalami bias dan membuat keputusan yang menyimpang dari standar rasionalitas yang dipakai ahli ekonomi. Dengan kata lain, kita berperilaku keliru. Meski awalnya diremehkan oleh para ahli ekonomi, studi kekeliruan manusia dan pengaruhnya kepada pasar kini mendorong upaya membuat keputusan lebih baik dalam kehidupan, bisnis, dan pemerintahan. Dengan memadukan penemuan terbaru psikologi manusia dan pemahaman praktis mengenai insentif dan perilaku pasar, Thaler memberi pencerahan mengenai bagaimana membuat keputusan lebih cerdas dalam dunia yang makin membingungkan. Dia mengungkap bagaimana analisis ekonomi perilaku membuka cara-cara baru memandang segalanya, dari keuangan rumah tangga sampai pembagian kantor di gedung baru, acara kuis TV, musim transfer olahraga, dan bisnis seperti Uber. Ketika ekonomi bertemu psikologi, dampaknya bagi individu, manajer, dan pembuat kebijakan sungguh mendalam sekaligus menarik. Hukum Pasar Modal memberi gambaran mengenai regulasi pasar modal dan berbagai aspek pasar modal yang dinamis. This book focuses on the environmental components of sustainability, including aspects of resourcing and the environmental impacts of human societies. Marine and tropical forest ecosystems, food security and other natural resources, as well as technologies for the environmental control of societal impacts are examined. This volume is multi-disciplinary, but with a consistent focus on the natural environment. This 2-volume set discusses a wide range of topics concerning sustainability and human security in Asia, particularly South East Asia. The individual chapters have been contributed by authors from various fields, and due to the breadth of the material are separated into two thematic volumes. The set offers a valuable resource for professionals and researchers in the urban planning industry, postgraduates, policymakers, government officials and natural resources managers. In addition, it can be used in courses on Environmental Engineering, Agriculture and Forestry, Public Policy and Earth Science. The Handbook of Information Security is a definitive 3-volume handbook that offers coverage of both established and cutting-edge theories and developments on information and computer security. The text contains 180 articles from over 200 leading experts, providing the benchmark resource for information security, network security, information privacy, and information warfare. In developing countries across Asia, food marketing parastatals have played an important role in agricultural policy, especially with regard to government efforts to stabilize food prices. Three broad market failures constitute the primary arguments for this form of government intervention: a lack of market integration stemming from inadequate

infrastructure, the absence or inadequacy of risk-mitigating institutions and markets, and the need to protect the world's poorest communities from a volatile global market. Opponents of such public intervention schemes claim that the old rationales are no longer convincing, that the programs are not cost-effective and do not allocate resources optimally, and that private institutions are strong enough to take over many of the functions traditionally performed by parastatals. In *From Parastatals to Private Trade*, the editors—clearly from the latter camp—pose three general questions: Why must parastatal-centered policies in Asia change, when should policy changes occur, and how should such change happen: gradually or abruptly? Experts in agricultural policy use case studies from South Asia (Bangladesh, India, and Pakistan) and East Asia (Indonesia, the Philippines, and Vietnam) to answer these questions; and a concluding chapter synthesizes these countries' experiences with price stabilization programs. In light of the evidence—which indicates that parastatals played important roles in the past but have become overly expensive, and that reduced intervention can promote competition, help develop alternative institutions, and release funds for development and antipoverty programs without jeopardizing price stability—the editors highlight the challenges ahead and propose suggestions for reforming the existing paradigm for price-related policies. This volume provides valuable analyses for anyone concerned with balancing government intervention with market-friendly policies. This book examines the public stockholding policies of selected developing countries from the perspective of WTO rules and assesses whether the provisions of the Agreement on Agriculture (AoA) could hamper these countries' efforts to address the challenges of food security. Further, it highlights the need to amend the provisions of the AoA to make WTO rules just and fair for the millions of people suffering from hunger and malnutrition in developing countries. This book highlights that 12 countries namely China, Egypt, India, Indonesia, Jordan, Kenya, Morocco, Pakistan, Tunisia, Turkey, Zambia and Zimbabwe are facing or will face problems in implementing the food security policies due to the provisions under AoA. These provisions need to be amended for permitting developing countries to address hunger and undernourishment. Progress in WTO negotiations on public stockholding for food security purposes are also discussed and analysed. The findings of this study greatly benefit trade negotiators, policymakers, civil society, farmers groups, researchers, students and academics interested in issues related to the WTO, agriculture and food security.

Permasalahan yang dikaji dalam buku ini terinspirasi oleh hasil penelitian sebelumnya yang dilakukan oleh penulis dengan teman sejawat peneliti yang lain yang memfokuskan kajiannya pada permasalahan yang dihadapi masyarakat adat dalam pengelolaan sumberdaya alam sejak tahun 1996 sampai 2008. Penelitian Pertama, dengan judul “Dampak Undang-Undang Pemerintahan Desa Terhadap Hak-hak Masyarakat Adat di Indonesia (Studi Kasus Pada Masyarakat Adat di Irian Jaya, Kalimantan, Pulau Tual, Pulau Haruku, dan Nusa Tenggara Timur)”, yang didanai oleh Lembaga Studi dan Hak Asasi Manusia (ELSAM) dan USAID, (1996). Kedua, penelitian dengan judul “Penguatan Kelembagaan dan Hukum Masyarakat Adat Tengger Dalam Pengelolaan Sumber Daya Alam Berkelanjutan” didanai oleh LIPI dan MENRISTEK melalui program penelitian Riset Unggulan Terpadu, (1999-2001). Ketiga, penelitian berjudul *Perlindungan Hukum Sistem Kearifan Lokal Dalam Pengelolaan Sumber Daya Alam Guna Mencapai Kedaulatan Pangan (Studi Kasus Pada Masyarakat Adat Tengger Desa Ngadas Kecamatan Poncokusumo Kabupaten Malang)* yang didanai oleh Program Research Grant I-MHERE Universitas Brawijaya (2008). Hasil Penelitian tersebut menunjukkan bahwa keberadaan sistem hukum nasional yang sentralistik, hegemonik, ambivalen, dan sangat represif terhadap masyarakat adat telah menempatkan mereka pada posisi yang kalah, tersisih bahkan teralienasi dalam pergulatan memperebutkan kuasa hak atas pengelolaan sumberdaya alam. Melalui rangkaian penelitian yang panjang tersebut (1999-2009), peneliti kemudian ingin mengeksplorasi dan menganalisis lebih lanjut keberadaan politik hukum ketahanan pangan nasional, keberadaan sistem kearifan lokal masyarakat adat, khususnya masyarakat Adat Tengger Ngadas dalam pengelolaan sumber daya alam serta hambatan dan tantangan yang dihadapinya, khususnya dalam mewujudkan keadaulatan pangan dalam sebuah disertasi. Akumulasi hasil penelitian tersebut, digunakan sebagai dasar pijakan untuk merekonstruksi politik hukum ketahanan pangan nasional agar memiliki basis yang kuat pada sistem kearifan lokal masyarakat adat. Buku ini terdiri dari beberapa bahasan yang cukup lengkap, mulai dari bahasan tentang Konsep Dasar Manajemen Keuangan, Laporan Keuangan dan Arus Kas, hingga bahasan tentang Manajemen Keuangan Internasional. Dengan bahasan yang sangat lengkap tersebut, kehadiran buku ini diharapkan bisa menjadi salah satu rujukan dan referensi bagi pihak-pihak yang memerlukannya.

"Human security" is an approach that rejects the traditional prioritization of state security, and instead identifies the individual as the primary referent of security. It offers a way of broadening our perspective, and recognizing that the most pressing threats to individuals do not come from interstate war, but from the emergencies that affect people every day, such as famine, disease, displacement, civil conflict and environmental degradation. Human security is about people living their lives with dignity, being free from "fear" and "want". To date, there has been a strong tendency to focus on insecurity caused by civil conflict, with less attention on issues to do with environmental security. This volume addresses the threat posed by natural disasters, which represent an increasingly major human security threat to people everywhere. In looking at natural disasters, this book also refines the human security approach. It does so through developing its previously unexplored interdisciplinary potential. This volume explicitly seeks to bring the human security approach into conversation with contributions from a range of disciplines: development, disaster sociology, gender studies, international law, international relations, philosophy, and public health. Collectively these scholars unpack the "human" element of "natural" disasters. In doing so, an emphasis is placed on how pre-existing vulnerabilities can be gravely worsened, as well as the interconnected nature of human security threats. The book presents a variety of case studies that include the Indian Ocean tsunami, Hurricane Katrina, the 2010 Haiti earthquake, and the 2011 "triple disasters" in Japan. Following recent price spikes, food policy will continue to be of crucial concern to developing countries for the foreseeable future. Governments are trying to manage their food issues, but would need critical economic policy analysis to do so appropriately. The aim of this invaluable book is to present economy-wide but detailed information that will facilitate state-of-the-art economic agricultural policy analysis in the light of future threats, and stimulate the formation of better policies for Indonesia's, Vietnam's as well as other countries' longer-term visions of food security, productivity and social welfare. The scope of the book is comprehensive, analysing a range of key food security issues (self-sufficiency, stocks and industry development), policies and futures, with unified presentation of several key and captivating commodity case-studies (rice, livestock and dairy). This is achieved through state-of-the-art evidence-based economic policy analysis, drawing at times on a mix of Asian countries' relevant experiences and hence having broader relevance. Contents: Crucial Food Security Analysis in Brief (Ray Trewin) Growth in Emerging Economies and Food Security by 2030 (Kym Anderson and Anna Strutt) Regional Rice Stocks, Prices, Trade and Food Security: Implications for ASEAN (Nur Rakhman Setyoko, Ray Trewin and David Vanzetti) Indonesian Livestock Policy: Lessons for Self-Sufficiency (Risti Permani, Nur Rakhman Setyoko, Ray Trewin and David Vanzetti) Drink More Milk: Policies Supporting the Indonesian Dairy Industry (David Vanzetti, Rina Oktaviani and Nur Rakhman Setyoko) Rice Production and Food Security in ASEAN: Time for a Change (David Vanzetti and Dung Pham) Safe Food Trade, and the Roles of Governments and Markets: The Case of Vietnam Pork Trade (Ray Trewin, David Vanzetti and Tran Cong Thang) Agricultural Labour Productivity and Poverty: An Indonesian Case-Study (Joe Dewbre) Policy Design and Industry Development Plans: Dairy Industry Experiences in Asia and Australia (David Harris) Readership: Students, researchers and the general public who are interested to understand the economic agricultural policy in Asian countries. Key Features: The book differs from many competing titles in that it considers the broad definition of food security in contrast to most Asian countries' narrow self-sufficiency ones and applies state-of-the-art quantitative methods in the policy analysis. The book undertakes a distinctive treatment of certain topics through application of evidence-based policy analysis that has not been comprehensively applied to Asian agricultural policies, or in other countries as well. The book contains much novel material developed in various institutions during the life of the underlying research project A union list of serials commencing publication after Dec. 31, 1949. As East and Southeast Asia continue to modernize and urbanize, their demand for energy will soar. Besides seeking to import fossil fuels from the Middle East, Africa, the Caspian Region, Russia, Latin America, Australia, etc., it is imperative for these Asian countries to cooperate in substantially raising the efficiency with which energy is consumed. This book offers a comprehensive examination of East and Southeast Asia's energy conservation policies. It begins with a summary of the current and projected energy supply and demand patterns in the region, and a discussion about the need and basis for cooperation in energy conservation. This is followed by an examination of the energy conservation policies and progress to date in seven ASEAN countries and in China, Japan and Korea. Indonesia Customs, Export-Import Regulations, Incentives and Procedures Handbook - Strategic, Practical Information, Regulations Collected articles on financial topics. This book constitutes revised selected papers from the 16th and 17th International Conferences on Web Information Systems and Technologies, WEBIST 2020 and WEBIST 2021, which took place virtually in November 2020 and October 2021, respectively. The 10 full papers from WEBIST 2021 and 1 full paper from WEBIST 2020 presented in this volume were carefully reviewed and selected from originally 48 paper submissions in 2020 and 107 submissions in 2021. The selected papers contribute to the understanding of relevant current research trends in Web information systems and technologies, including deep learning, knowledge representation and reasoning, recommender systems, internet of things, Web intelligence and big data. "The studies contained in this working paper provide an analysis of the current status and suggest future policy directions for poverty reduction strategies in the context of decentralization in Indonesia. In addition to an aggregate analysis at the national level, the studies focus on three provinces: East Java, West Kalimantan

and West Nusa Tenggara. They examine important characteristics and indicators of poverty and food security, and review fifteen ongoing government programmes in these regions"--P. xv.
