This coursebook is divided into 14 units with a language review at the end of each unit. Authentic texts, motivating topics and fun communication activities engage students of different ages and an extensive writing reference section includes model answers and develops writing skills. Easing the transition from GCSE to AS level, this textbook meets the 2004 Edexcel specifications and provides numerous worked examples and solutions to aid understanding of key concepts. This book is the leading title in a series targeted at the average A level Mathematics student which aims to tackle the basic ideas and misconceptions associated with this subject. The inclusion of Stretch and Challenge material caters for the most able students, and lots of regular exercises and exam questions provide plenty of practice. These books have an innovative 'flexispread' structure devised to motivate students and include real life links to inspire students. A background knowledge chapter at the beginning of each book helps to bridge the gap between GCSE and A level study tackling the retention issue of AS students. This Core book contains a free students' CD-ROM. Cambridge English Advanced 3 contains four tests for the Advanced exam, also known as Certificate in Advanced English (CAE). These examination papers for the Cambridge English: Advanced (CAE) exam provide the most authentic exam preparation available, allowing candidates to familiarise themselves with the content and format of the exam and to practise useful exam techniques. The Student's Book is also available in a 'without answers' edition. Audio CDs (2) containing the exam Listening material and a Student's Book with answers and downloadable Audio are available separately. Meet the man who makes the mission of learning any language possible! The all-you-need guide to learning a language. English has six levels within the CEFRL are A1, A2, B1, B2, C1 and C2. CEFRL (Common European Framework of Reference for Languages.) Beginner Level: A1 A2 Intermediate Level: B1 B2 Advance Level: C1 C2. With these levels, you can easily work out your ability and assess your progress. The vocabulary in the book is arranged in alphabetical order. The Graduate Management Admission Test (GMAT) is a computer adaptive test intended to assess certain analytical, writing, quantitative, verbal, and reading skills in written English for use in admission to a graduate management program, such as an MBA program. Wikipedia By referring to latest GMAT and GRE syllabus and CEFR, we cover 2500 vocabulary. Many students call it "LIFE SAVING" for their exam. Our 26 years' expertise are shared with you here! Grab it! Thanks for your support for us creating better contents for you! This book is intended to help candidates prepare for entrance examinations in mathematics and scientific subjects, including STEP (Sixth Term Examination Paper). STEP is an examination used by Cambridge colleges as the basis for conditional offers. They are also used by Warwick University, and many other mathematics departments recommend that their applicants practice on the past papers even if they do not take the examination. Advanced Problems in Mathematics is recommended as preparation for any undergraduate mathematics course, even for students who do not plan to take the Sixth Term Examination Paper. The questions analysed in this book are all based on recent STEP questions selected to address the syllabus for Papers I and II, which is the A-level core (i.e. C1 to C4) with a few additions. Each question is followed by a comment and a full solution. The comments direct the reader's attention to key points and put the question in its true mathematical context. The solutions point students to the methodology required to address advanced mathematical problems critically and independently. This book is a must read for any student wishing to apply to scientific subjects at university level and for anybody interested in advanced mathematics. A focused, 50-60 hour course for the revised Cambridge English: Advanced (CAE) exam from 2015. The Student's Book without answers provides C1-level students with thorough preparation and practice needed for exam success. All four of the revised exam papers are covered. 'Quick steps' and Writing and Speaking guides explain what to expect in the exam, and provide strategies on approaching each paper, model answers, useful expressions and further practice. The accompanying CD-ROM provides interactive language and skills practice. There are two complete practice tests for teachers to access online. Audio required for the Student's Book listening exercises is available on Class Audio CDs or in the Student's Book Pack, both available separately. Randomization and probabilistic techniques play an important role in modern computer science, with applications ranging from combinatorial optimization and machine learning to communication networks and secure protocols. This 2005 textbook is designed to accompany a one- or two-semester course for advanced undergraduates or beginning graduate students in computer science and applied mathematics. It gives an excellent introduction to the probabilistic techniques and paradigms used in the development of probabilistic algorithms and analyses. It assumes only an elementary background in discrete mathematics and gives a rigorous yet accessible treatment of the material, with numerous examples and applications. The first half of the book covers core material, including random sampling, expectations, Markov's inequality, Chebyshev's inequality, Chernoff bounds, the probabilistic method and Markov chains. The second half covers more advanced topics such as continuous probability, applications of limited independence, entropy, Markov chain Monte Carlo methods and balanced allocations. With its comprehensive selection of topics, along with many examples and exercises, this book is an indispensable teaching tool. The Architecture of Happiness is Alain de Botton's exploration of the hidden links between buildings and our well being. Bestselling author Alain de Botton has written about love, travel, status and how philosophy can console us. Now he turns his attention to one of our most intense but often hidden love affairs: with our houses and their furnishings. He asks: What makes a house truly beautiful? Why are many new houses so ugly? Why do we argue so bitterly about sofas and pictures - and can differences of taste ever be satisfactorily resolved? Will minimalism make us happier than ornaments? To answer these questions and many more, de Botton looks at buildings across the world, from medieval wooden huts to modern skyscrapers; he examines sofas and cathedrals, tea sets and office complexes, and teases out a host of often surprising philosophical insights. The Architecture of Happiness will take you on a beguiling tour through the history and psychology of architecture and interior design, and will forever alter your relationship with buildings. It will change the way you look at your current home - and help you make the right decisions about your next one. 'Engaging and intelligent . . . full of splendid ideas, happily and beautifully expressed'

Independent Alain de Botton was born in 1969 and is the author of non-fiction essays on themes ranging from love and travel to architecture and philosophy. His bestselling books include Essays in Love; The Romantic Movement; Kiss and Tell; Status Anxiety; How Proust Can Change Your Life; The Pleasures and Sorrows of Work; The Art of Travel; The Architecture of Happiness and Religion for Atheists. He lives in London and founded The School of Life (www.theschooloflife.com) and Living Architecture (www.living-architecture.co.uk). For more information, consult www.alaindebotton.com.
