Yet, by 2003, dependence on external donors (the IMF, World Bank) took precedence over interdependence with Russia. As a result, Kazakhstan unilaterally proceeded with adoption of IFRS, while Russia backed up from this initiative. This study reports that Kazakhstan's inflow of foreign direct investments was the greatest among the CIS nations following the adoption of IFRS. In addition, in 2005–11, Kazakhstani public firms' reporting quality was higher than that of the Russian public firms operating in a similar environment but exempt from the IFRS reporting requirement. ***companies. This is worth knowing about given the widely held view that Britain (i) pioneered modern financial reporting, and (ii) played a primary role in the development of both capital markets and professional accountancy. The book makes use of a principal and agent framework to study accounting's past, but one where the failure of managers always to supply the information that users' desire is given full recognition. It is shown that corporate financial reporting did not develop into its current state in a straightforward and orderly fashion. Each era produces different environmental conditions and imposes new demands on accounting. A proper understanding of accounting developments therefore requires a careful examination of the interrelationship between accountants and accounting techniques on the one hand and, on the other, the social and economic context within which changes took place. The book's corporate coverage starts with the legendary East India Company, created in 1600, and continues through the heyday of the statutory trading companies founded to build Britain's canals (commencing in the 1770s) and railways (commencing c.1829) to focus, principally, on the limited liability***
