Gender, Discourse and Ideology in Italian Oct 29 2020
This book analyses gendered language in Italian, shedding light on how the Italian language constructs and reproduces the social imbalance between women and men, and presenting indirect and direct instances of asymmetrical constructions of gender in public and private roles. The author examines linguistic treatments of women in politics and the media, as well as the gendered crime of femminicidio, i.e. the killing of women by their (former)

partners. Through the combination of corpus linguistics, surveys, and discourse analysis, she establishes a new approach to the study of gendered Italian, a framework which can be applied to other languages and epistemological sites. This book will be of particular interest to students and scholars of sociolinguistics, language and gender, discourse analysis, Italian and other Romance languages.

The Maronites Mar 02 2021 The Maronite Church is one of twenty-two Eastern Catholic Churches in communion with the Pope of Rome. Her patriarch is in Lebanon. Forty-three bishops and approximately five million faithful make up her presence throughout the world. The story of Maron, a fifth-century hermit-priest, and the community gathered around him, later called the Maronites, tells another fascinating story of the monastic and missionary movements of the Church. Maron's story takes place in

the context of Syrian monasticism, which was a combination of both solitary and communal life, and is a narrative of Christians of the Middle East as they navigated the rough seas of political divisions and ecclesiastical controversies from the fourth to the ninth centuries. Abbot Paul Naaman, a Maronite scholar and former Superior General of the Order of Lebanese Maronite Monks, wisely places the study of the origins of the Maronite Church squarely in the midst of the history of the Church. His book, *The Maronites: The Origins of an Antiochene Church*, published during the sixteenth centenary of Maron's death, offers plausible insights into her formation and early development, grounding the Maronite Church in her Catholic, Antiochian, Syriac, and monastic roots. Abbot Paul Naaman is a Maronite scholar and former Superior General of the Order of Lebanese Maronite Monks.

Italian Women and the City Jun 24 2020 Studies of the city, and of women's experiences of the city, have focused primarily on modern times, especially as modernism was defined in large part by urban life. Italy, however, has a long history of urban-centered culture, and women have been a vocal part of that culture since the Renaissance. This volume, therefore, looks at the art and literature of both earlier and more modern periods to investigate the meanings of the city for Italian women, the intensely gendered meanings (for both sexes) of those city spaces that excluded women, and the conditions that permitted a limited permeability of gendered boundaries. Two aspects to the combination of "women" and "city" are salient to these investigations. One involves their metaphorical relationship. *Urbs*, *città*, *ville* -- the words for city tend to be grammatically feminine, and a long tradition of representation associates the city with a woman. Women, especially writers, could exploit, modify, or resist the prevailing uses of such metaphors. The second aspect of connection involves social realities. What was or is the relation of the (female) city with the real women who inhabit it? What kind of site has it provided for women seeking a satisfying life for themselves? How has art and literature, by men and by women, represented the relationship of female persons or characters to urban spaces?

The Nervous System of the Human Body Mar 14 2022
"The more important endowments of life are bestowed upon the Nervous System, which embraces the Brain, the organs of the Senses, and the instruments of Volition. Through it are also communicated the sensibilities which

control the instinctive or automatic movements. Thus it governs the actions of volition, as well as those movements which are appropriated to the vital organization. The Nervous System is therefore that part of Anatomy in which are to be discovered not only the different properties of the living fibre, but also the relations of the organs to each other, and the dependence of the muscular system upon those organs. The present volume contains many proofs that, by the advancement of anatomical science, we are enabled to make important practical distinctions; and these give value to that which can never be without interest to a student of nature. All the proofs of design, of relation, of prospective contrivance, which are deduced from the mechanical parts of the animal frame, are as nothing to the instances which the contemplation of the Nervous System affords. The relations to external nature, the sources of enjoyment, the provisions against injuries, the order and symmetry adapted to bestow motion and action, visible in the Nervous System, supply accumulated proofs of benevolence, as well as of divine intelligence, in the construction of our bodies"--Preface. Come essere, se non sesso con marito. Cosa succede se mio marito non fa sesso?
Oct 09 2021
Molte donne pensano erroneamente che sposarsi ed è il fine ultimo della relazione tra un uomo e una donna. Tuttavia, non è un segreto che la cosa più interessante cominci dopo: le relazioni nel matrimonio non devono essere solo preservate, ma è anche auspicabile rafforzarle. È qui che diventa chiaro che anche dopo il matrimonio, non dovresti rilassarti particolarmente.

Alignment and Alignment Change in the Indo-European Family Nov 29 2020 This volume brings together work from leading specialists in Indo-European languages to explore the macro- and micro-dynamic factors that

contribute to variation and change in alignment and argument realization. Alignment is taken to include both basic alignment patterns associated with major construction types, as well as various valency-decreasing constructions such as passives, anticausatives, and impersonals. The chapters explore synchronic and diachronic aspects of alignment morphosyntax based on data from Anatolian, Indo-Iranian, Greek, Italic, Armenian, and Slavic. All have a strong empirical focus, drawing on both qualitative and quantitative methods, and range from broad comparative studies to detailed investigations of specific constructions in individual languages. The book is one of very few studies to examine variation and change in alignment typology across languages in a single family. It contributes to a greater understanding of the roles played by analogy/extension, reanalysis, and areal factors in alignment change, and demonstrates the extent of variation found in the morphosyntax of argument realization in genetically-related languages.
