Popular Science Jun 17 2022 Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Up the Winds and Over the Tetons May 16 2022 In the late 1850s many of the most striking places in Wyoming, Idaho, and Montana had not yet been surveyed by any government expedition. This book brings to life the expedition that first explored these regions. As the last major government survey of the American West before the Civil War, the Reynolds Expedition began in 1859. This highly readable daily journal of Captain William F. Reynolds, previously unpublished, covers the most challenging period of that expedition, from May 7 to July 4, 1860. It describes what the Reynolds party did and saw while traveling from its winter quarters near today's Glenrock, Wyoming, up to the head of the Wind River, through Jackson Hole, and on to the Three Forks of the Missouri in southwestern Montana. The party included legendary mountain man Jim Bridger, geologist Ferdinand Hayden, and artists Anton Schönborn and James Hutton, among the first to depict the Teton Range. Historians, travelers, and outdoor enthusiasts will welcome this important addition to the literature of western exploration.

Lemon-Aid New and Used Cars and Trucks 2007-2018 Aug 19 2022 Steers buyers through the the confusion and anxiety of new and used vehicle purchases like no other car-and-truck book on the market. "Dr. Phil," along with George Iny and the Editors of the Automobile Protection Association, pull no punches.

The Greatest Show in the Arctic Jan 24 2023 In Gilded Age America, Arctic explorers were fabulous celebrities—assured of riches and near-immortality so long as they reached the North Pole first. Of the many attempts to meet that goal, three American expeditions, launched from the Russian archipelago of Franz Josef Land, ended in abject failure, their exploits consigned to near-oblivion. Even so, these ventures—the Wellman expedition (1898-99), the Baldwin-Ziegler (1901-2), and the Fiala-Ziegler (1903-5)—have much to tell us about the personalities, politics, and economics of exploration in their day. In *The Greatest Show in the Arctic*, the first book to chronicle all three expeditions, P. J. Capelotti explores what went right and what, in the end, went tragically wrong. The cast of colorful characters from the Franz Josef Land forays included Walter Wellman, a Chicago journalist and bon vivant running from debts, his mistress, and an illegitimate daughter; Evelyn Briggs Baldwin, a deranged meteorologist with a fetish for balloons and a passion for Swedish preserves; and Anthony Fiala, a pious photographer in search of God in the Arctic. Featuring an international cast of supporting characters worthy of a three-ring circus, *The Greatest Show in the Arctic* follows each of the three expeditions in turn, from spectacular feats of financing to their bitter ends. Along the way, the explorers accumulated considerable geographic knowledge and left a legacy of place-names. Through close study of the expeditions' journals, Capelotti reveals that the Franz Josef Land endeavors foundered chiefly because of poor leadership and internal friction, not for lack of funding, as historians have previously suspected. Presenting tales of noble intentions, novel inventions, and epic miscalculations, *The Greatest Show in the Arctic* brings fresh life to a unique and underappreciated story of American exploration.

The Last Camel Charge Sep 20 2022 "A fascinating story, telling aspects of the American West that most of us know little about."—True West Magazine In the mid-nineteenth century, the U.S. Army was on the verge of employing a weapon that had never before been seen on its native soil: a cavalry mount that would fare better than both mules and horses in the American Southwest... Against the Mojave in the Arizona Territory, against the Mormons in Utah Territory, during the early stages of the Civil War, the camel would become part of military history and a nearly forgotten chapter of Americana. This is the true story of that experiment and the extraordinary group of people who it brought together. *The Last Camel Charge* gives them their due as a vital piece of American history. INCLUDES PHOTOS

GRR30 Jul 06 2021 In 1992, the infamous environmental installation artists Christo and Jeanne-Claude took their first trip west in search of a site for a new temporary artwork—in this case, a stream of successive translucent fabric panels that would be suspended for two summer weeks across the banks of a Rocky Mountain river, high enough above the water to allow kayakers, rafters or pedestrians to drift along below it, and close enough to a road that the piece could be approached and enjoyed by car or bus. On subsequent trips they investigated the headwaters of 89 rivers in six states, logging 14,000 miles onto their odometer, until they finally settled on a site along the Arkansas River in the state of Colorado. Then they began the arduous process of getting permission from all of the necessary local bureaucracies and activist groups. This book documents the process from 1992 until 2005, at which point the artists were still only half-way there. (The project will not come to fruition until the year 2010 at the earliest.) As with all previous projects, "Over the River" is financed entirely by Christo and Jeanne-Claude through the sale of preparatory work. These drawings, lithographs, collages and scale models are presented here, together with comprehensive documentary photographs.

Intelligent Positioning Oct 29 2020 GIS and GPS integration is happening in research and commercial activities worldwide, however this is the first GIS-GPS integration book to look at applications that combine GIS and GPS to provide one solution. It begins by providing readers with technical overviews of GPS and GIS and their integration, and then focuses on a selection of R&D activities in applications ranging from intelligent transport systems to real time location based tourist information systems. Provides overview chapters on GIS, GPS and GIS-GPS integration for readers who are less familiar with either system Based on the authors' own research and development activities in both the UK and the US Includes case studies in each chapter to illustrate the end-product/commercial activities that research can lead to
