Road accidents are the major cause of death and injury among young people in the developing world, and the field of psychology can offer great insights into the many factors that are at play when we get behind the wheels of our cars. Based on data collected around the world on drivers of all age groups, Graham Hole provides an up to date picture of the realities of driving, including visual perception issues, cell phone distractions, fatigue, drugs, and the effects of aging. These insights can help explain why we crash, as well as how we achieve the amazing feat of not crashing more often than we do. In this jargon-free and very accessible book, Hole applies psychological methods and insights to this every-day experience with two audiences in

mind. First, he speaks to accident investigators, who frequently rely on well-developed understandings of engineering and forensics and less insight into the psychology of the driver. Second, of course, this book will be of value to anyone interested in the application of cognitive psychology to real-world behaviors, and to anyone who drives. "A much needed, sobering look at the seductive promises of new technologies. You couldn't ask for a better guide than Jack Stilgoe. His book is measured, fair and incisive." Hannah Fry, University College London, UK, and author of Hello World: How to be Human in the Age of the Machine "A cracking and insightful little book that thoughtfully examines the most important political and social question we face: how to define and meaningfully control the technologies that are starting to run our lives." Jamie Bartlett, author of The People vs Tech: How the Internet is Killing Democracy (and How We Save It) "Innovation has not only a rate but also a direction. Stilgoe's excellent new book tackles the directionality of AI with a strong call to action. The book critiques the idea that technology is a pre-determined force, and puts forward a concrete proposal on how to make sure we are making decisions along the way that ask who is benefitting and how can we open the possibilities of innovation while steering them to deliver social benefit." Mariana Mazzucato, University College London, UK, and author of The Value of Everything: Making and Taking in the Global Economy "Looking closely at the prospects and problems for 'autonomous vehicles,' Jack Stilgoe uncovers layer after layer of an even more fascinating story - the bizarre disconnect between technological means and basic human ends in our time. A tour de force of history and theory, the book is rich in substance, unsettling in its questions and great fun to read." Langdon Winner, Rensselaer Polytechnic Institute, USA Too often, we understand the effects of technological change only in hindsight. When technologies are new, it is not clear where they are taking us or who's driving. Innovators

tend to accentuate the benefits rather than risks or other injustices. Technologies like self-driving cars are not as inevitable as the hype would suggest. If we want to realise the opportunities, spread the benefits to people who normally lose out and manage the risks, Silicon Valley's disruptive innovation is a bad model. Steering innovation in the public interest means finding new ways for public and private sector organisations to collaborate. How the automobile fundamentally changed African American life—the true history beyond the Best Picture-winning movie. The ultimate symbol of independence and possibility, the automobile has shaped this country from the moment the first Model T rolled off Henry Ford's assembly line. Yet cars have always held distinct importance for African Americans, allowing black families to evade the many dangers presented by an entrenched racist society and to enjoy, in some measure, the freedom of the open road. Gretchen Sorin recovers a forgotten history of black motorists, and recounts their creation of a parallel, unseen world of travel guides, black only hotels, and informal communications networks that kept black drivers safe. At the heart of this story is Victor and Alma Green's famous Green Book, begun in 1936, which made possible that most basic American right, the family vacation, and encouraged a new method of resisting oppression. Enlivened by Sorin's personal history, *Driving While Black* opens an entirely new view onto the African American experience, and shows why travel was so central to the Civil Rights movement. It also shows you—from dreaming about a car to living with it—how to jump in and get the most from your machine. There's never been a better time to go for a drive. As a nation, we are chronically overstressed, overworked, and not sleeping enough. Worse yet, our digital devices are taking ever increasing chunks of what remaining free time we do have. Activities that force us to engage with ourselves and the environment around us are needed more than ever. Might I suggest a spin in a four-wheeled escape pod? The car—the act of driving, repairing, maintaining—drives out distraction and demands we be “present.” Making the car a pursuit invites not just the freedom of the road, but the potential to connect with thousands of like-minded individuals as well as the pleasure of simply caring for the machine. Further, there's the thrill of commanding an object that represents a high point of human ingenuity and design. Cars invite passion. The first step is embracing the itch and acting on it. Learn how to choose your perfect weekend car, hunt for it, and make the deal. Then, find peace in the wrenches with tips on taking the plunge into maintaining your ride, including how your car can be an opportunity to tear your kids away from their screens and strengthen your bond with them. Next, explore the joy of driving, from scenic byways to taking your car to its performance limit. You'll also tour the various highlights of the driving life, like how to become an automotive archaeologist, the possibilities for those short on cash but high for adventure, the car as a social gathering point, and what the future with autonomous cars means for those who love to drive. *Never Stop Driving* shines some light on why we find these machines so captivating, offering some inspiration and validation, and finally inviting those who are curious but haven't made the leap to get in the car. In 2001 he became the first English driver to win the World Rally Championship, an

outstanding achievement for a man who is only 30 years old. Driving is the most dangerous thing that most people do. This book explains how drivers can dramatically reduce the risk by revealing what really causes danger on the road, how to control the danger, how to make life-saving decisions and how expert drivers think. The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race. Even after taking Driver's Ed and passing that dreaded road test, there are so many things new drivers need to learn about the practical aspects of driving that will only come from experience. Handing over the keys is a traumatic rite of passage for parents, and they will sleep better knowing that The Driving Book is in their teens' glove compartments. Covering virtually every scenario a new driver may face, from changing a tire to negotiating privileges with parents to handling a car in bad weather, Karen Gravelle helps teen drivers navigate through tricky new territory-on the road and at home. Rod Campbell, the creator of the preschool lift-the-flap classic Dear Zoo, has been a trusted name in early learning for over thirty-five years, and Oh Dear! has been a firm favourite with toddlers and parents alike since it was first published in 1983. Buster's staying with Grandma on the farm. But where will he find the eggs for breakfast? Not in the stable - oh dear! Young children will love lifting the flaps as they turn the pages and follow Buster around the farm. With bright, bold artwork, simple, catchy text and a whole host of favourite farm animals, Oh Dear! is a classic story to come back to again and again, and the thick board pages, chunky

cased cover and sturdy flaps make it great for small hands. This book takes a look at fully automated, autonomous vehicles and discusses many open questions: How can autonomous vehicles be integrated into the current transportation system with diverse users and human drivers? Where do automated vehicles fall under current legal frameworks? What risks are associated with automation and how will society respond to these risks? How will the marketplace react to automated vehicles and what changes may be necessary for companies? Experts from Germany and the United States define key societal, engineering, and mobility issues related to the automation of vehicles. They discuss the decisions programmers of automated vehicles must make to enable vehicles to perceive their environment, interact with other road users, and choose actions that may have ethical consequences. The authors further identify expectations and concerns that will form the basis for individual and societal acceptance of autonomous driving. While the safety benefits of such vehicles are tremendous, the authors demonstrate that these benefits will only be achieved if vehicles have an appropriate safety concept at the heart of their design. Realizing the potential of automated vehicles to reorganize traffic and transform mobility of people and goods requires similar care in the design of vehicles and networks. By covering all of these topics, the book aims to provide a current, comprehensive, and scientifically sound treatment of the emerging field of "autonomous driving". It has long been accepted that the social and cultural meanings of the car far exceed the practical need for mobility. This book marks the first attempt to contribute to road safety, considering, in depth, these meanings and the cultures of driving that are shaped by them. *In the Company of Cars* examines the perspectives that young people have on cars, and explores the broader social and cultural meanings of the car, the potential it is supposed to fulfil, and the anticipated benefits it offers to young drivers. From focus-group research conducted in Australia, the book takes up the views of young people on a range of topics, from media to car use to gender performance. The author looks at the ways in which driving has been defined by articulations of the car that

emphasize valued features of the car-driver, such as gender, youthfulness, status, age, power, raciness, sexiness, ruggedness and competitiveness. The book takes a global perspective on mobility, considering the impact of cars and road safety policy on quality of life, and the value and significance of other modes of travel, in a range of countries. Zen Driving can make each driving experience enjoyable, whether it's a daily hour-long drive to work, or a ten-minute run to the local Safeway. You may well ask, what is Zen driving? The Japanese word zen literally means meditation, and meditation means being fully aware, fully in touch with your surroundings. When you are in a meditative state, you are in your natural self, your Buddha self—and you can do it while driving. But why Zen driving? The purpose of Zen Driving, the book, is to introduce you to your natural self, which is what remains when you still your mind and ignore your chattering ego. When you do this, you gain confidence in your ability, and finally you are that ability. The frustrations of other drivers cutting you off or causing you to sit through two red lights because they're too timid to make a left turn on yellow will no longer make your blood pressure explode. Zen Driving will teach you to look, simply observe without qualification, and then make your move. Zen driving is effortless, spontaneous, nondeliberate. It is being one with the road. And in turn, driving becomes a pathway to consciousness, an activity that clears the mind and soothes the soul, something to take with you all those other times when you're not behind the wheel. The late three-time World Champion Senna's winning insights for success on the track. Invites young readers to guess which animal is driving each of seven different vehicles by taking clues from how they are dressed. Lose on the track and you go home. Lose with a load of whiskey and you go to jail.” —Junior Johnson, NASCAR legend and one-time whiskey runner Today’s NASCAR is a family sport with 75 million loyal fans, which is growing

bigger and more mainstream by the day. Part Disney, part Vegas, part Barnum & Bailey, NASCAR is also a multibillion-dollar business and a cultural phenomenon that transcends geography, class, and gender. But dark secrets lurk in NASCAR’s past. Driving with the Devil uncovers for the first time the true story behind NASCAR’s distant, moonshine-fueled origins and paints a rich portrait of the colorful men who created it. Long before the sport of stock-car racing even existed, young men in the rural, Depression-wracked South had figured out that cars and speed were tickets to a better life. With few options beyond the farm or factory, the best chance of escape was running moonshine. Bootlegging offered speed, adventure, and wads of cash—if the drivers survived. Driving with the Devil is the story of bootleggers whose empires grew during Prohibition and continued to thrive well after Repeal, and of drivers who thundered down dusty back roads with moonshine deliveries, deftly outrunning federal agents. The car of choice was the Ford V-8, the hottest car of the 1930s, and ace mechanics tinkered with them until they could fly across mountain roads at 100 miles an hour. After fighting in World War II, moonshiners transferred their skills to the rough, red-dirt racetracks of Dixie, and a national sport was born. In this dynamic era (1930s and ’40s), three men with a passion for Ford V-8s—convicted criminal Ray Parks, foul-mouthed mechanic Red Vogt, and crippled war veteran Red Byron, NASCAR’s first champion—emerged as the first stock car “team.” Theirs is the violent, poignant story of how moonshine and fast cars merged to create a new sport for the South to call its own. Driving with the Devil is a fascinating look at the well-hidden historical connection between whiskey running and stock-car racing. NASCAR histories will tell you who led every lap of every race since the first official race in 1948. Driving with the Devil goes deeper to bring you the excitement, passion, crime, and death-defying feats of the wild, early days that NASCAR has carefully hidden from public view. In the tradition of Laura Hillenbrand’s *Seabiscuit*, this tale not only reveals a bygone era of a beloved sport, but also the character of the country at a moment in time. Jesus has invited your kids to know Him and trust Him with their whole lives, and this

We all know what it's like when emotions, desires, or thoughts take over and start affecting our actions. For kids, these big feelings can be scary or overwhelming. You can In "Who is Driving Your Car," kids learn through fun rhymes and illustrations how to let Jesus rule over their emotions, thoughts, and desires. Complex theological concepts are broken down to their simplest form, and kids are invited into a thrilling life of knowing, loving, and trusting Jesus. "Jesus can do more than drive your car and steer its tires; He also guides your feelings, and your brain, and your desires. He changes your emotions and can give you great ideas. He fills your life with goodness so that you can be like He is..." The Christian life is truly "the ride of a lifetime." Set your kids up for ongoing success and victory. And whenever they seem to be overwhelmed with their emotions, thoughts, or desires, simply ask them what I now ask my own kids: "Who is driving your car?" Why We Drive is a rebellious and daring celebration of the human spirit and the competence of ordinary people by the bestselling author of *The Case for Working with Your Hands*. Once we were drivers on the open road. Today we are more often in the back seat of an Uber. As we hurtle toward a 'self-driving' future, are we destined to become passengers in our own lives too? In *Why We Drive*, the philosopher and mechanic Matthew Crawford celebrates the risk, skill and freedom of driving. He reveals what we are losing to technology and government control in the modern world, and speaks up for play, dissent and occasionally being scared witless. 'Fascinating... A pleasure to read' *Sunday Times* 'Persuasive and thought-provoking... A vivid and heartfelt manifesto' *Observer* A comprehensive industry-standard guide for trainee driving instructors studying for the ADI part 1, 2 and 3 exams; qualified driving instructors looking for a reference guide; and those studying for their standards check. A champion racer and

professional stunt driver reveals the secrets of peak performance in any endeavor. *Optimum Drive* is the complete step-by-step guide to maximizing human performance. As a professional racing driver and a driving coach for over twenty years, Paul F. Gerrard gives you his unique perspective on what causes people to stagnate with the idea of being merely good, when each of us has the potential to be great. Gerrard believes that peak performance is within our grasp. Gerrard helps you understand the mental toughness that it takes to reach that greatness. He starts off by taking you onto the track as he explores what driving at 200 mph can teach us about who we are. Using his experiences from behind the wheel at death-defying speeds, Gerrard breaks down the psychology of driving, what it takes, and how we can use it to achieve greatness in life. The key, he says, is the nirvana-like sensation of flow psychology, or being in the zone—a mental state in which one who is performing an activity is fully immersed in a feeling of energized focus, full involvement, and joy. It is through flow psychology that Gerrard introduces a blend of holistic mindset combined with a competitive edge, which is essential to successful professional driving. This mix of guts, tenacity, and endurance is the foundation of Gerrard's philosophy for attaining greatness—and can be put to work for you too, on or off the track.
