**The Ecology and Evolution of Inducible Defenses** Nov 10 2021 Inducible defenses--those often dramatic phenotypic shifts in prey activated by biological agents ranging from predators to pathogens--are widespread in the natural world. Yet research on the inducible defenses used by vertebrates, invertebrates, and plants in terrestrial, marine, and freshwater habitats has largely developed along independent lines. Tollrian and Harvell bring together leading researchers from all fields to review common themes and explore emerging ideas. Contributors examine organisms as different as unicellular algae and higher vertebrates, and consider defenses ranging from immune systems to protective changes in morphology, behavior, chemistry, and life history.

**Prehistoric Cannibalism at Mancos 5MTUMR-2346** Jul 06 2021 Cannibalism is one of the oldest and most emotionally charged topics in anthropological literature. Tim White's analysis of human bones from an Anasazi pueblo in southwestern Colorado, site 5MTUMR-2346, reveals that nearly thirty men, women, and children were butchered and cooked there around A.D. 1100. Their bones were fractured for marrow, and the remains discarded in several rooms of the pueblo. By comparing the human skeletal remains with those of animals used for food at other sites, the author analyzes evidence for skinning, dismembering, cooking, and fracturing to infer that cannibalism took place at Mancos. As White evaluates claims for cannibalism in ethnographic and archaeological contexts worldwide, he describes how cultural biases can often distort the interpretation of scientific data. This book applies and introduces anatomical, taphonomic, zooarchaeological, and forensic methods in the investigation of prehistoric human behavior. It is an important example of how we can exchange opinion for knowledge. "Cannibalism is a controversial topic because many people do

not want to believe that their prehistoric ancestors engaged in such activity, but they will be hard put to reject this meticulous study."--Kent V. Flannery, University of Michigan "This is the best piece of detailed research yet to appear that seeks to put in place a body of justified knowledge and a procedure for its use in making inferences about the past. No student of bones can ignore this work."--Lewis R. Binford, University of New Mexico "This could be one of the most important books in archaeology written in the last decade."--James F. O'Connell, University of Utah "Paleontologists and zooarchaeologists, archaeologists and physical anthropologists, taphonomists, and forensic scientists should all read this work. Quite frankly, I think this will become one of the most important books of the 1990s..."--R. Lee Lyman, University of Missouri-Columbia Originally published in 1992. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

France, Official Standard Names Approved by the United States Board on Geographic Names Nov 17 2019 Nearly the whole of America's partisan politics centers on a single question: Can markets solve our social problems? And for years this question has played out ferociously in the debates about how we should educate our children. From the growth of vouchers and charter schools to the implementation of No Child Left Behind, policy makers have increasingly turned to market-based models to help improve our schools, believing that private institutions--because they are competitively driven--are better than public ones. With *The Public School Advantage*, Christopher A. and Sarah Theule Lubienski offer powerful evidence to undercut this belief, showing that public schools in fact out-perform private ones.
