**Role Play** Sep 16 2022 Role play, or simulation, techniques are used as important tools in many contexts and disciplines, including research, psychotherapy, organizational change and education. Role play is generally characterized as a method to approximate real life' experiences in certain settings, yet the results can be disappointing due to lack of knowledge and understanding of the techniques involved. Amply illustrated through helpful and practical vignettes, this wide-ranging volume provides an explanation of role play theory and practice. Readers are shown how role play differs from other experimental or therapeutic techniques, and are introduced to the key requirements of good technique. The author does not offer a recipe book of solutions, but surveys the literature to offer a solid theoretical grasp of the subject.

**Models of Teaching** Jan 20 2023 Models of Teaching by Bruce Joyce, Marsha Weil and Emily Calhoun With the current emphasis on standards-based education, teachers everywhere are searching for programs and practices that have the strongest positive effect on student achievement. Since its initial publication in 1972, "Models of Teaching," now in its eighth edition, has been considered "the" classic text in the field. Rationale and research pair with real-world examples and applications to provide a strong foundation for new educators. The thoroughly documented research on the various models of teaching (and their subsequent positive effects on student success) give teachers the tools they need to build strong classrooms that accelerate student learning. Encompassing all of the major psychological and philosophical approaches to teaching and schooling, this new edition of a classic text is at the core of a successful K-12 teacher education program. Look inside this new edition: NEW! Evidence-based approaches to teaching receive a full explanation in entirely new chapters. New studies on models of teaching give readers the most current picture of education today. All research is refreshed and updated, ensuring accuracy and currency. Provides an abundance of both classic and contemporary teaching models, classified into four families: Social, Information-Processing, Personal, and Behavioral Systems. Each model includes suggestions for putting the teaching strategies to use in the classroom with applications and through a Summary Chart.

**Online Role-Plays** Feb 21 2023 Role-plays have been almost ubiquitous in foreign language classes and their potential has been widely recognised. In the last decade, the dissemination of Web 2.0 has created a wide range of possibilities for this type of activity, including conducting online role-plays between institutions, the opportunity to combine synchronous and asynchronous communication tools and also articulate online with face-to-face interactions. Online role-plays are first and foremost a social process in which knowledge is emergent resulting from interactions between participants. It is also an activity that mirrors contextualised everyday situations and students are faced with new information, promoting research and reflection, thus enhancing autonomy. Within a dialogical and dialectical perspective of English language learning, the following research question was developed: how can online role-plays in English language learning in higher education be integrated in order to enhance the development of communicative competence? In order to answer the research question, an action research project was carried out, according to the model proposed by Stringer (2007), and an online role-play was implemented over six weeks in the English II course unit from the degree in Tourism at the Polytechnic Institute of Viseu, Portugal. [For full proceedings, see ED565044.].

**The Oxford Handbook of Pragmatics** Jul 14 2022 This volume brings together distinguished scholars from all over the world to present an authoritative, thorough, and yet accessible state-of-the-art survey of current issues in pragmatics. Following an introduction by the editor, the volume is divided into five thematic parts. Chapters in Part I are concerned with schools of thought, foundations, and theories, while Part II deals with central topics in pragmatics, including implicature, presupposition, speech acts, deixis, reference, and context. In Part III, the focus is on cognitively-oriented pragmatics, covering topics such as computational, experimental, and neuropragmatics. Part IV takes a look at socially and culturally-oriented pragmatics such as politeness/impoliteness studies, cross- and intercultural, and interlanguage pragmatics. Finally, the chapters in Part V explore the interfaces of pragmatics with semantics, grammar, morphology, the lexicon, prosody, language change, and information structure. The Oxford Handbook of Pragmatics will be an indispensable reference for scholars and students of pragmatics of all theoretical stripes. It will also be a valuable resource for linguists in other fields, including philosophy of language, semantics, morphosyntax, prosody, psycholinguistics, and sociolinguistics, and for researchers and students in the fields of cognitive science, artificial intelligence, computer science, anthropology, and sociology.

**Training the Translator** Jun 01 2021 This book begins by investigating, through the use of think-aloud protocols, the mental processes of students when they translate. The creative and successful processes observed can be used directly for teaching purposes, while the unsuccessful ones can serve to find out where remedial training is needed. The book then goes on to discuss methods for improving a translator's competence. The strategies offered are based on the pragmatic and semantic analysis of texts from a functional point of view, and they include such practical matters as the use of dictionaries and the evaluation of translations and error analysis. The book is intended for teachers in translator-training institutions, but it can also be used by students for self-training.

**Parenting Matters** May 20 2020 Decades of research have demonstrated that the parent-child dyad and the environment of the family "which includes all primary caregivers" are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child

outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States. **Rhetorical Criticism** Feb 26 2021 Now in its second edition, *Rhetorical Criticism: Perspectives in Action* presents a thorough, accessible, and well-grounded introduction to contemporary rhetorical criticism. In addition to covering traditional modes of rhetorical criticism, the volume presents less commonly discussed rhetorical perspectives, exposing students to a wide cross-section of techniques.

**Designing, Deploying, and Evaluating Virtual and Augmented Reality in Education** Oct 17 2022 Augmented reality (AR) and virtual reality (VR) provide flexibility in education and have become widely used for the promotion of multimedia learning. This use coincides with mobile devices becoming prevalent, VR devices becoming more affordable, and the creation of user-friendly software that allows the development of AR/VR applications by non-experts. However, because the integration of AR and VR into education is a fairly new practice that is only in its initial stage, these processes and outcomes need to be improved. *Designing, Deploying, and Evaluating Virtual and Augmented Reality in Education* is an essential research book that presents current practices and procedures from different technology-implementation stages (design, deployment, and evaluation) to help educators use AR/VR applications in their own teaching practices. The book provides comprehensive information on AR and VR applications in different educational settings from various perspectives including but not limited to mobile learning, formal/informal learning, and integration strategies with practical and/or theoretical implications. Barriers and challenges to their implementation that are currently faced by educators are also addressed. This book is ideal for academicians, instructors, curriculum designers, policymakers, instructional designers, researchers, education professionals, practitioners, and students.

**The Routledge Handbook of Pragmatics** Feb 09 2022 *The Routledge Handbook of Pragmatics* provides a state-of-the-art overview of the wide breadth of research in pragmatics. An introductory section outlines a brief history, the main issues and key approaches and perspectives in the field, followed by a thought-provoking introductory chapter on interdisciplinarity by Jacob L. Mey. A further thirty-eight chapters cover both traditional and newer areas of pragmatic research, divided into four sections: Methods and modalities Established fields Pragmatics across disciplines Applications of pragmatic research in today's world. With accessible, refreshing descriptions and discussions, and with a look towards future directions, this Handbook is an essential resource for advanced undergraduates, postgraduates and researchers in pragmatics within English language and linguistics and communication studies.

**Learning by Playing. Game-based Education System Design and Development** May 12 2022 With the widespread interest in digital entertainment and the advances in the technologies of computer graphics, multimedia and virtual reality technologies, the new area of "Edutainment" has been accepted as a union of education and computer entertainment. Edutainment is recognized as an effective way of learning through a medium, such as a computer, software, games or AR/VR applications, that both educates and entertains. The Edutainment conference series was established and followed as a special event for the new interests in e-learning and digital entertainment. The main purpose of Edutainment conferences is the discussion, presentation, and information exchange of scientific and technological developments in the new community. The Edutainment conference series is a very interesting opportunity for researchers, engineers, and graduate students who wish to communicate at these international annual events. The conference series includes plenary invited talks, workshops, tutorials, paper presentation tracks, and panel discussions. The Edutainment conference series was initiated in Hangzhou, China in 2006. Following the success of the first (Edutainment 2006 in Hangzhou, China), the second (Edutainment 2007 in Hong Kong, China), and the third events (Edutainment 2008 in Nanjing, China), Edutainment 2009 was held August 9–11, 2009 in Banff, Canada. This year, we received 116 submissions from 25 different countries and regions - cluding Austria, Canada, China, Denmark, Finland, France, Germany, Greece, Hong Kong, Italy, Japan, Korea, Malaysia, Mexico, The Netherlands, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, Taiwan, Trinidad and Tobago, UK, and USA.

**YOUTH CARE KNOWLEDGE EXCHANGE THROUGH ONLINE SIMULATION GAMING** Sep 23 2020 Youth care multi-disciplinary networks need flexible, interactive and attractive tools and methods for knowledge exchange in view of timely, effective and durable help in complex parenting problem situations. Social media, virtuality, simulation and gaming gain an increasing significance in the way people share information, learn and organize themselves. This leads to the question whether youth care practice is ready to adopt some online practicalities for network exchange. This design study describes model development and model appreciation of online role-play simulation gaming as a time, pace and place independent way to share expertise, information and knowledge among the actors in youth care practice. The results show that youth care professionals think that simulation gaming is relevant and convenient to unravel difficult issues, to elaborate network strategies, and to jointly reflect on intervention. The research is unique in domains of youth care intervention and in game theory. The singularity of contexts and actors is

taken as starting point in a cross-over of game design and behavioral science. Online role-play simulation gaming leads to a better understanding of complexity in youth care situations and to a greater awareness of network capacities and capabilities and helps to establish accountability of choices of intervention.

**Conducting School-Based Assessments of Child and Adolescent Behavior** Mar 10 2022 This hands-on guide is designed to help school practitioners conduct effective multidimensional assessments of a wide range of emotional and behavioral difficulties. Approaches discussed include direct observation, analogue assessment, child self-reports, teacher and parent interviewing, informant reports, and self-monitoring procedures. Recommendations for working with culturally and linguistically diverse children and adolescents are also provided. The theoretical and empirical underpinnings of the assessment strategies demonstrated here are thoroughly reviewed in the companion volume, *Behavioral Assessment in Schools, Second Edition: Theory, Research, and Clinical Foundations* (see other side for more information).

**Inside Role-Play in Early Childhood Education** Dec 15 2019 Based on extensive research, and grounded in everyday classroom practice, the authors of this book explore important issues surrounding play in the early years curriculum. The book presents children's views on, and response to their role-play environment, alongside examples of good classroom practice, and addresses vital questions such as: Will structuring role play replace children's own attempts to create scenarios that grow out of their interests and relationships? Has an over-emphasis on subjects like literacy and numeracy eclipsed the important processes inherent in children's social play? How we can ensure that provision for role play fully benefits all young children? Critically, the authors present the child's perspective on play in schools throughout, and argue firmly against a formal, inflexible learning environment for young children. This book will be fascinating to all students on primary education undergraduate courses and early childhood studies. Researchers and course leaders will also find this book a ground-breaking read.

**Handbook of the Brief Psychotherapies** Nov 25 2020 The last two decades have seen unprecedented increases in health care costs and, at the same time, encouraging progress in psychotherapy research. On the one hand, accountability, cost-effectiveness, and efficiency have now become commonplace terms for providers of mental health services whereas, on the other hand, an increasingly voluminous literature has emerged supporting the effectiveness of a number of types of psychotherapies. There now exists the possibility for the design and delivery of mental health services that—drawing upon this literature—more closely approximate empirically established data concerning the appropriateness and effectiveness of psychotherapy. The *Handbook of the Brief Psychotherapies* is intended to capture one major thrust of this movement: the development of a group of empirically grounded, time-limited therapies all sharing a common interest in the clinical utilization of a structured focus and an emphasis on time and action. For many years, professional self-interest, competing theoretical paradigms, and the vagaries of practice, wisdom, and clinical myth have influenced the practice of psychotherapy. A critical questioning of the resulting, predominantly nondirective, open-ended, and global therapies has led to a growing emphasis on action-oriented, problem-focused, time-limited therapies. Yet, ironically, this interest in the brief psychotherapies has not so much involved a radical departure from traditional therapeutic modalities as it has emphasized a new pragmatism about how time, action, and structure operate in life as well as in therapy.

**Learning to Participate Through Role-play** Dec 19 2022 This dissertation investigates simulations and role-play as best practices of democratic education. It asks: Do students' situational interest and frequency of simulations and role-play uniquely contribute to students' commitment to vote in the future? And how do simulations and role-play help create an authentic learning environment that supports the development of students' situational interest? The study utilizes mixed methods to: quantitatively explore the relationship(s) between frequency of simulations and role-play, situational interest, and students' commitment to vote in the future; and qualitatively investigate how simulations and role-play work. Findings suggest simulations and role-play can help students engage with political knowledge and processes in important ways. By understanding how simulations and role-play influence students' motivations towards and interests in politics, the dissertation hopes to shed light on how simulations may impact youth political engagement.

**Perezhivanie, Emotions and Subjectivity** Jul 22 2020 This book draws upon Vygotsky's idea of perezhivanie, emotions and imagination, and introduces the concepts of subjective sense and subjective configuration. These concepts are crucial for explaining and understanding children's

development from a cultural-historical perspective. A book which theorises the relations between the social and the individual through a study of a child's perezhivanie, which analyses emotions more holistically, and advances the concepts of subjective sense and subjective configuration, is much needed. This book examines the complexity of human development through a comprehensive elaboration of these concepts, allowing for new insights to be put forward. It doesn't always follow the chronological order of Vygotsky's publications, as many of his works remained in the family archives until the 1980s, when his Selected Works were first published in Russian. There has long been a need for a contemporary book on the scholarly treatment of perezhevanie, emotions, and subjectivity, and as such this book revisits dominant representations of these concepts and then puts forward new ways of conceptualising and using them in empirical research. The chapters cover a broad range of case studies where the concepts of perezhivanie, emotions and imagination and subjective sense and subjective configuration are used to give new empirical and theoretical insights into the study of human development.

**Some Situational and Cognitive Determinants of Role Playing: a Replication and an Extension** Apr 18 2020 In a study by Harvey (1963) representatives of each of the four principal conceptual systems posited by Harvey, Hunt and Schroder (1961) were required to construct and present either in public or in private arguments that ran counter to their own beliefs on the issue of whether or not philosophy should be required as a minor for all college undergraduates. The present study, in addition to its aim of providing predictors for performance of Peace Corps volunteers in training, sought to determine if the findings of Harvey would hold for a different issue and for arguments that were consonant with an individual's beliefs as well as for arguments that ran counter to his stand. To determine this generalizability, 174 Peace Corps trainees, classified into conceptual systems, were required to construct and present aloud arguments that were both in accord and contradiction with their beliefs about the American way of life. This condition approximates the public condition of the Harvey study. However, performance in the present study probably induced more stress because not only were the subjects playing the role in the presence of representatives of institutional authority, they had been led to believe that their remaining in the Peace Corps depended to some extent upon the battery of tests they were given, of which the role playing experiment was one.
