A core function of social work is to assist, empower, and protect the most vulnerable in society. Social workers make difficult decisions in complex and challenging situations every day. They work in organizations that have clear statutory duties. Therefore, it is essential that social work students know what their responsibilities are. Familiarity with law, legislation, and legal processes is consequently fundamental to sound social work practice. This best-selling book helps social work students gain this foothold in understanding law as it applies to social work practice. It avoids complicated legal jargon remote from the everyday realities of practice, offering instead a grounding in legally-appropriate, rights-based social work. It covers the full range of social work law, including services for children and families and child protection, adult care law, youth justice, court work, professional regulation, and human rights. The Mental Capacity Act 2005 provides a statutory framework for people who lack the capacity to make decisions for themselves, or for people who want to make provision for a time when they will be unable to make their own decisions. This code of practice, which has statutory force, provides information and guidance about how the Act should work in practice. It explains the principles behind the Act, defines when someone is incapable of making their own decisions and explains what is meant by acting in someone's best interests. It describes the role of the new Court of Protection and the role of Independent Mental Capacity Advocates and sets out the role of the Public Guardian. It also covers medical treatment and the way disputes can be resolved. Invaluable best practice guide that helps panels review their policies and procedures and make sound and effective recommendations. Comprehensively revised in light of the 2002 Adoption and Children Act, the guide aims to inform panel members about their roles and responsibilities and update them on current legislation and issues of good practice. Designed to equip members with the knowledge, understanding and confidence required to make appropriate recommendations in the best interests of children. Now in its second edition, this handy title is written by practising barristers and is practically orientated with a user-friendly approach. Comprehensive and authoritative, this text provides complete annotation of all legislation including the Insolvency Rules and the Enterprise Act. With the reform of insolvency law, this is an essential tool for practitioners working in insolvency and bankruptcy law. The Disability Discrimination Act 1995 imposed new duties on employers, trade organizations, service providers, property owners, educational bodies and public transport providers. It created new individual rights for disabled persons and opened up possibilities for new forms of litigation. Disability Discrimination: Law and Practice is the definitive guide to how this important legislation operates in practice in the UK. This new edition has been updated to take account of the many important developments in this area, including: new case law on the meaning of disability, and the employment and trade organization provisions in the Act; the prospective implementation of the remaining aspects of Part III of the Disability Discrimination Act 1995 which will place further duties on service providers from October 2004; the Special Educational Needs and Disability Act 2001 and its effects on schools, colleges and universities in relation to disabled pupils and students; and the likely reforms to the Disability Discrimination Act 1995 and the Disability Rights Commission Act 1999 following the Government's response to the Disability Rights Task Force report, its proposals for implementing the EC Employment Directive and the Disability Rights Commission first statutory review of the legislation. The book is an invaluable reference dealing with the developing body of law regulating disability discrimination for all those advising businesses, service providers and other organizations, and those representing disabled people in court or tribunal proceedings. The full text of the Disability Discrimination Act 1995 and the Disability Rights Commission Act 1999 is included. Partially revoked by SI 2013/1471 (ISBN 9780111100059) & SI 2014/1637 (ISBN 978011117064) This book draws on clinical experience, case law and the developing research literature accrued during the six years that the Mental Capacity Act (MCA) and the Deprivation of Liberty Safeguards (DoLS) have been in effect. It focuses on the theory underpinning the principles of this legislation and the practical challenges of applying it in clinical settings. It also compares and contrasts the remit of the Mental Capacity Act with that of the Mental Health Act. The book is aimed at psychiatrists and other mental health professionals who treat individuals who lack capacity, and also at those called upon to guide and advise colleagues in acute hospitals and residential care settings about the assessment of capacity, DoLS and the appropriate use of best interests principles. The contributors, who include both clinicians and clinical academics, have been chosen to ensure that both practical and research considerations pertaining to the statute are taken into account. (Please note, this book applies to the law in England and Wales only.) Excerpt from International Civil and Commercial Law as Founded Upon Theory, Legislation, and Practice It may be in point to recall that Continental jurists are inclined to deal with these problems from the philosophical point of View, and to attempt, as far as possible, to work out a logical system. The author has followed this precedent to some extent, but has taken care to note any divergence between theory and practice. In view of the increasing commerce and intercourse between the Old World and the New, and the consequent increase in inter national litigation, part of which, at least, must be prosecuted in the courts of the Old World, it is believed that the present work will prove serviceable to both the practitioner and student. There is another noticeable difference in the treatment which the Continental jurist gives to the subject of International Private Law from that which our own authors accord to it. With us it is merely a branch of jurisprudence, and serves as a heading for a certain group of questions which occupy the attention of the courts. In Europe it constitutes also a branch of political science, as it deals with certain problems of sovereignty and the relations of the individual to the state. This results partly from the conception there so widely accepted, that the bond which unites the individual with his native state remains effective even in his private relations, though he has entered the territory of a foreign state. Many of the topics dealt with in the present work may therefore well occupy the attention of the student of comparative politics. In the supplements of American and English law appended to the author's paragraphs, I have endeavored to state briefly and without discussion or argument, the law recognized in those jurisdictions, upon the principal points dealt with by the author. This book provides theoretical perspectives on systemic discrimination in employment and an overview of policy and institutional responses in eight countries, focusing on affirmative action and employment equity policies. As a unique international comparative survey and assessment of affirmative action and employment equity policies, this is a sourcebook for researchers, practitioners and students in the fields of public policy, employment law, sociology, industrial relations and human rights. This manual describes methods and resources for practitioners and decision-makers to use for enacting new laws or regulations or amending existing ones as part of a comprehensive road safety strategy. The manual covers steps to be taken to address five main risk factors and post-crash care. It can therefore be used to: \* develop an understanding of the framework of legislation and relevant processes that are applicable in a country \* review current national legislation and regulations and identify gaps that hinder implementation and enforcement of effective road safety measures \* identify available resources, including international agreements, evidence-based guidance and recommendations on effective measures, to improve legislation \* prepare action plans to strengthen national legislation and regulations for the five main risk factors and for post-crash care, including advocating for improvement. Other important topics should also be addressed to achieve a comprehensive national system of road safety legislation and regulation; however, they are beyond the scope of this manual. They include: vehicle and helmet manufacturing standards and testing, third-party insurance, victim's rights and compensation, a graduated driver licensing system, road audits and design standards and driving hours for commercial drivers. This second edition builds on the success of Mental Capacity: The New Law which was published in response to the UK's Mental Capacity Act 2005. The book has been extensively revised to provide coverage of all the latest developments in UK legislation, procedure, and case law, including an examination of the deprivation of liberty safeguards and a new chapter that deals with the re-emergence of the inherent jurisdiction of the High Court and the cross-over with administrative law. Mental Capacity: Law and Practice provides an authoritative commentary, highlighting areas of potential difficulty and offering practical guidance on the challenges that the UK legislation poses. It includes the text of the Mental Capacity Act 2005 (as amended) and the supplementary Codes of Practice. It will be essential reading for private client lawyers, chancery practitioners, non-contentious lawyers, and healthcare professionals. Safety at Work is widely accepted as the most authoritative guide to safety and health in the workplace. Its comprehensive coverage and academically rigorous approach make it essential reading for students on occupational safety and health courses at diploma, bachelor and master level, including the NEBOSH National Diploma. Health and safety professionals turn to it for detailed coverage of the fundamentals and background of the field. The seventh edition has been revised to cover recent changes in UK legislation and practice, including: Construction (Design & Management) Regulations 2007 Regulatory Reform (Fire Safety) Order 2005 Work at Height Regulations 2005 Control of Noise at Work Regulations 2005 Control of Vibration at Work Regulations 2005 Waste regulations 2005, 2006 ISO 12100 Safety of Machinery - Basic concepts and general principles Demonstrating how the law and statutory guidance applies in practice, this book is a critical account of current family justice policy and practice. It draws on recent legislation, case law and research findings to provide clear, accessible information and advice on how to make the difficult decisions in pre-proceedings child care practice work. With reference to child protection legislation and practice frameworks, this book highlights the importance of undertaking informed and effective assessments based on the best outcome for the child. The book acknowledges the constraints facing practitioners, such as working under considerable pressure within tight time frames and focuses on the issues

which commonly present as challenges for practice, such as neglect, child sexual exploitation and pre-birth assessments. This is essential reading for students and practitioners in social work and law, as well as policy-makers and other professionals concerned with the current state of child welfare. This Code of Practice is a reference tool for those dealing with, and caring for people admitted to hospital and care homes with mental health problems. Authored by the Department of Health and produced following wide consultation with those who provide and receive services under the Mental Health Act, this publication will come into force on 3 November 2008. Through the Mental Health Act 2007, the Government has updated the 1983 Act to ensure it keeps pace with the changes in the way that mental health services are - and need to be - delivered. This publication provides guidance and advice to registered medical practitioners, approved clinicians, managers and staff of hospitals, and approved mental health professionals on how they should proceed when undertaking duties under the Act. It also gives guidance to doctors and other professionals about certain aspects of medical treatment for mental disorder more generally. The Mental Health Act Code of Practice is also aimed at all of those working in primary care, Mental Health Trusts, NHS Foundation Trusts as well as solicitors and attorneys who advise on mental health law. The Code should also be beneficial to the police and ambulance services and others in health and social services (including the independent and voluntary sectors) involved in providing services to people who are, or may become, subject to compulsory measures under the Act. It will also be a guide for those working with people with specific mental health needs such as those in nursing and care homes, and those in prison.
