With touch-and-feel areas on every double page and high-contrast colours, this book is perfect for sharing and helps to stimulate your baby's senses while introducing them to first feelings. Read along with your little one and explore all kinds of emotions - and look out for a mirror surprise at the end!

FACES Mar 22 2020

French Connections: Daft Punk, Air, Super Discount & the Birth of French Touch Apr 03 2021 During the second half of the 1990s, Paris experienced a dance music revolution thanks to groundbreaking artists like Daft Punk, Air, Super Discount, Motor bass, Cassius, Dimitri from Paris, Bob Sinclar and many, many more. It was a scene that became known as French Touch and was heralded throughout the world as the epitome of dance music cool, forever placing Paris on the dance culture map. Journalist and author Martin James was there right from the start, documenting the scene from its inspirations to its earliest moments and onto its global breakthrough. In the process, he inadvertently provided the French Touch moniker that became adopted throughout the world. Drawing on a dazzling array of exclusive interviews with the biggest names in French electronic music history, French Connections explores France's significant contribution to dance music culture that paved the way for the French Touch explosion.

LoveStart Jan 20 2020

Baby Touch: Hello, Mummy! Jan 12 2022 Perfect for sharing with your baby. Explore the touch-and-feel mummies, then look out for the special mummy at the end!

Love's Touch Dec 31 2020 Is the world an illusion? Is our Universe a hologram? This is a magical world. "All there Is" is you; you are the magnificent reflection of "All That Is" in the world of Existence and three dimensions. Let us wake up from this illusion. We have to realize we will leave this body one day; we have to realize all of our possessions will be left behind as we depart for our next new adventure. This is not a book of divine informative revelation. These words do not come from heaven. These writings (knowledge) arose in the Heart through Universal Intuition and were written from Oneself to oneself without the interference of the author's personal thoughts (ego). What you call 'I' is your identity. Bonding yourself with your identity creates the 'I am' ego personality. This identity of yours is not actually you, it is an illusory state of what you are not. In Reality, you are not your ego-identity. The external world and its social parameters play a big role in forming this ego-identity. You do not own anything, no name, no form or any image that you can call 'I'. You have not constructed or created these. You do not own anything you think you can control or possess. When you identify yourself with these things, the things that you are not (or do not own), you are creating a self-imposed prison for yourself and living inside of it. In other words, you create your 'ego-personality. In this case, we have to ask the following question - who am I Really? Are you really all that you claim to own, names, forms and images? Are you only made up of body and mind? When you identify with these beliefs and those of the collective world consciousness you get lost and break away from your true Reality. When you claim ownership of these names, forms and images, you create your 'ego-personality. Whenever you say 'I am' this or that, you are identifying with that thing which you now claim as your own and you unify yourself with that thing. If you do not identify with anything, if you do not claim ownership of anything, the 'I' ceases to exist. Removing the 'I', dissolving it, is the ultimate freedom we seek. The walls of the self-imposed prison of ego personality you possessively created will fall away. Here, in this liberated state of being, the necessity for choice or decision falls away too. You act just as is needed in each moment of life as it arises in the Now. Thoughts of "should I have done this or that?" will disappear. The mind is like software running on a computer. The "virus" that corrupts the software is the ego. It is this ego-personality that creates erroneous beliefs and then claims ownership of them. Only when this virus is removed by an antivirus program, Mind reveals itself in its full capacity. With this cleaning up process, human minds become increasingly liberated and expansively intelligent. In this Book, knowledge of advanced life is being released into the public publishing domain for the first time. This life can be described with concepts of "Absolute Human", "Birth of Absolute Humanity", "Experiencing Non-Existence" and "Beyond Non-Existence". We believe through our life experience that the only way to change our individual and collective point of view is to know NON-EXISTENCE. The will behind the writing and publishing of this knowledge in the Book arose in servitude.

The Birth Of A Mother Aug 27 2020 As you prepare to become a mother, you face an experience unlike any other in your life. Having a baby will redirect your preferences and pleasures and, most likely, will realign some of your values. As you undergo this unique psychological transformation, you will be guided by new hopes, fears, and priorities. In a most startling way, having a child will influence all of your closest relationships and redefine your role in your family's history. The charting of this remarkable, new realm is the subject of this compelling book. Renowned psychiatrist Daniel N. Stern has joined forces with pediatrician and child psychiatrist Nadia Bruschweiler-Stern and journalist Alison Freeland to paint a wonderfully evocative picture of the psychology of motherhood. At the heart of The Birth of a Mother is an arresting premise: Just as a baby develops physically in utero and after birth, so a mother is born psychologically in the many months that precede and follow the birth of her baby. The recognition of this inner transformation emerges from hundreds of interviews with new mothers and decades of clinical experience. Filled with revealing case studies and personal comments from women who have shared this experience, this book will serve as an invaluable sourcebook for new mothers, validating the often confusing emotions that accompany the development of this new identity. In addition to providing insight into the unique state of motherhood, the authors touch on related topics such as going back to work, fatherhood, adoption, and premature birth. During pregnancy, mothers-to-be talk about morning sickness and their changing bodies, and new mothers talk about their exhaustion, the benefits of nursing or bottle-feeding, and the dilemma of whether or when they should return to work. And yet, they can be strangely mute about the dramatic and often overwhelming changes going on in their inner lives. Finally, with The Birth of a Mother, these powerful feelings are eloquently put into words.

Touch Feb 13 2022 An essay on the importance of touch to children's growth and development and to the physical and mental well-being of people of all ages. The first sensory input in life comes from the sense of touch while a baby is still in the womb, and touch continues to be the primary means of learning about the world throughout infancy, well into childhood. Touch is critical for children's growth, development, and health, as well as for adults' physical and mental well-being. Yet American society, claims Tiffany Field, is dangerously touch-deprived. Field, a leading authority on touch and touch therapy, begins this accessible book with an overview of the sociology and anthropology of touching and the basic psychophysical properties of touch. She then reports recent research results on the value of touch therapies, such as massage therapy, for various conditions, including asthma, cancer, autism, and eating disorders. She emphasizes the need for a change in societal attitudes toward touching, particularly among those who work with children.

Windows to the Womb Jun 05 2021 Windows to the Womb is an eloquent guide through the first nine months of life from conception to birth. In the past, the invisible physical processes of fetal development were mysterious and largely unexplainable, but in the past half-century, breakthroughs in embryology, interuterine photography, ultrasound, and other sensitive instruments of measurement have enabled us to make systematic observations inside the womb. We now understand that fetuses are fully sentient and aware beings. In this new climate of appreciation for the surprising dimensions of fetal behavior, sensitivity, and intelligence, this book brings a host of new information to light about the transformative journey each one of us must undergo in the womb. With reverent awe, the author describes the amazing construction of our physical bodies, the "ultimate architecture," and draws parallels with the expansion of our minds as our brains and senses develop and grow. Dr. Chamberlain details new discoveries in embryonic and fetal research that support his own findings on the impact of the mother's emotional and physical state during pregnancy; the importance of bonding at the earliest stages, long before birth; and the steps that expectant parents can take to ensure the most nurturing start in life for their children. From the Trade Paperback edition.

Baby Touch: Night Night Jun 24 2020 Babies and toddlers will love this interactive touch-and-feel bedtime book from Ladybird's best-selling Baby Touch series. Time for bed, sleepy baby! Say night night to all the animals, plants and vehicles. Colours fade from light to dark throughout the book, until it's night time and time for baby to go to bed. With a big touch-and-feel on every double page, it helps to stimulate your baby's senses as well as gently helping to teach first shapes such as square, circle, triangle, star and rectangle.

Hypnobirthing Jul 06 2021 THIS BOOK WILL MAKE YOUR BIRTH BETTER. IT IS FOR EVERY WOMAN AND EVERY TYPE OF BIRTH. AS FEATURED ON DRAGONS' DEN. 'Siobhan manages to completely demystify hypnobirthing, making it accessible and relevant to all women and all births. This book will be a complete game changer and I will be recommending it to mums-to-be from now on' Sarah Turner, author of The Unmumsy Mum Expert hypnobirthing teacher and founder of The Positive Birth Company Siobhan Miller has made it her mission to change the way women around the world approach and experience birth. Through her teaching she seeks to educate and empower women - and their birth partners - so that they can enjoy amazing and positive birth experiences, however they choose to bring their babies into the world. In this book, Siobhan debunks common myths about hypnobirthing and explains why she believes it can make every type of birth a better experience - from a water birth at home to an unplanned caesarean in theatre. So, what is hypnobirthing? Essentially, it's a form of antenatal education, an approach to birth that is both evidence-based and logical. Hypnobirthing certainly doesn't involve being hypnotised; instead, it teaches you how your body works on a muscular and hormonal level when in labour and how you can use various relaxation techniques to ensure you are working with your body (rather than against it), making birth more efficient and comfortable. Siobhan's advice and guidance will change your mindset and enable you to navigate your birth with practical tools that ensure you feel calm and in control throughout. By the time you finish this book you'll feel relaxed, capable and genuinely excited about giving birth.

Baby Touch: Hello, Daddy! Apr 15 2022

With a big touch-and-feel on every double page, it helps to stimulate your baby's senses as well as gently helping to teach first colours such as red, blue, green, yellow and purple.

Baby Touch: ABC Jan 24 2023

Zero to Birth Apr 22 2020 "By the time a baby is born, its brain has nearly 100 billion intricately shaped neurons wired together to comprise a small, soft-matter supercomputer. How is this incredibly complicated organ built in just nine months? This book is a step-by-step guide to what we know about the development of the human brain, from its earliest embryonic origin to birth and a little beyond. Written from an experimental neuroscientist's perspective, this book provides readers with a conceptual understanding of the field of developmental neurobiology, outlining both the biological mechanisms (genetic, environmental, and stochastic) that play significant and interrelated roles in neural development, and how we have come to understand the human brain's construction and function. Highlighting the major questions that have propelled the field forward - including those pushing at the frontiers of the field today - and the stories of major discoveries made by pioneering scientists around the world, the book describes how the structures and mechanisms of the developing brain were discovered. Chapters progress chronologically, tracking the actual growth and development of the human brain from conception to just after birth, as well as the history of how these mechanisms were revealed. Throughout, findings from studies of model organisms, such as nematodes, flies, frogs, fish, birds, mice, and sometimes non-human primates, are woven into the narrative and put into the context of a human embryo or fetus, as there are clear indications that the same processes involving the same genes are found across species. The book concludes with a discussion of what makes individual brains unique and how research on early neural development is helping us better understand the genetic and embryonic origins of many neurological and cognitive traits that only reveal themselves later in life"--

The Nurturing Touch at Birth Feb 25 2023

Touching Sep 20 2022 "This very stimulating and provocative book is highly recommended. All professionals concerned with human behavior will find something of value in this book, but others, especially parents of babies and young children, can gain insight into the nurturing needs of infants"--Amazon.com.

High-contrast colours and touch-and-feel areas stimulate a baby's senses, while encouraging interaction and play. A perfect first words book for all babies and toddlers.

The Many Facets of Touch Nov 29 2020

The Natural Way To Better Birth And Bonding Sep 27 2020 A great guide and source of information on natural birth and bonding with your baby. Following in the footsteps of their bestselling guides The Natural Way to Better Babies and The Natural Way to a Better Pregnancy, Francesca Naish and Janette Roberts show you how to experience a healthy, natural birth and relaxed bonding with your new baby. Giving birth is an empowering and transformative life event, and when the birth and bonding between mother and

baby unfolds naturally, the positive effects for both are immeasurable. 'Better' birth and bonding is simply birth and bonding as nature intended them to be. The Natural Way to Better Birth and Bonding is a treasure trove of practical information to help you make choices about the kind of birth you want - and beyond. It includes such topics as: - What is 'natural birth'? - The benefits of a natural birth for you and your baby - Which birth for you? - Nutrition and exercise for a natural birth - Choosing your team and making a birth plan - Managing stress and pain for an easier birth - Making decisions about medical management - Care after the birth for you and your baby - Bonding with your new baby - Natural treatments and remedies and how to use them Plus handy lists including what you and your baby will need at the birth, and after

From Birth to Five Years Mar 02 2021 An authoritative guide for the assessment of children in this age group. Stages of development for each age group are clearly described in the illustrated sequences which include sections on posture and large movements, vision and fine movements, hearing and speech, and social behaviour and play. Many procedures require only a minimum of special facilities, usually some common play material, and a reasonably-sized-quiet room.

The Vital Touch Nov 22 2022 Explores the role of touch in a babies' development, and how we need to create more of a physical contact in order to provide a soothing and nurturing environment

The book contains a range of different vehicles in high-contrast black, white and yellow colours to help stimulate a baby's developing eyesight from birth. There is also a peepo hole to explore on every page and lots of different vehicle noises to make together!

Birth Control and Controlling Birth Oct 29 2020 Women most fully experience the consequences of human reproductive technologies. Men who convene to evaluate such technologies discuss them: the women who must accept, avoid, or even resist these technologies; the women who consume technologies they did not devise; the women who are the objects of policies made by women is neither sought nor listened to. The men. So often the input and perspectives that women bring to the privileged insights consideration of technologies in human reproduction are the subject of these volumes, which constitute the revised and edited record of a Workshop on "Ethical Issues in Human Reproduction Technology: Analysis by Women" (EIR TAW), held in June, 1979, at Hampshire College in Amherst, Massachusetts. Some 80 members of the workshop, 90 percent of them women (from 24 states), represented diverse occupations and personal histories, different races and classes, varied political commitments. They included doctors, nurses, and scientists, lay midwives, consumer advocates, historians, and sociologists, lawyers, policy analysts, and ethicists. Each session, however, made plain that ethics is an everyday concern for women in general, as well as an academic profession for some.
