Bright and Deadly Things Oct 08 2021 A remote back-to-basics mountaintop retreat in the French Alps turns deadly as an Oxford fellow finds herself in the crosshairs of her late husband's dangerous secrets. The Chalet des Anglais should be the ideal locale for recently-widowed Oxford don Emily to begin cutting through the fog of her grief. With no electricity, running water, or access by car, the rustic chalet nestled at the foot of the verdant, snow-topped Alps should afford Emily both time and space to heal. Joining her will be a

collection of friends from the university, as well as other fellows, graduates, and undergraduates. Something feels off, though—heightening Emily's existing grief-induced anxiety. Before even making it to the airport, she's unnerved by a break-in at her home. Once at the chalet, tension amongst the guests is palpable. Her friends and colleagues are behaving oddly, and competition for a newly opened position has introduced a streak of meanness into the otherwise relaxing getaway. As hostilities grow, Emily begins to wonder if the chalet's dark history has cast a shadow over the retreat. In the salon, a curious grandfather clock looms, the only piece of furniture to survive a deadly blaze a century ago. As its discordant bell begins to invade everyone's dreams, someone very real has been searching through Emily's things and attempting to hack into her computer. When a student disappears, Emily realizes that she'd better separate friend from foe, and real from imagined—or the next disappearance may be her own.

Deadly Animals Mar 01 2021

Consider, if you can, the case of Jacob Fowler, who heard what he thought was the sound of his own skull cracking between the jaws of a grizzly bear - only to discover that it was. Or the Arizonan jogger who ran a mile back to her car with a rabid fox clamped to her arm before driving to hospital for live-saving inoculations. Or the woman who was attacked by a hyena, dragged from her tent by her face and survived to tell of her ordeal. The dangers of the animal kingdom are the stuff of legend but the reality of man's vulnerability and of nature's savage power is far more various, improbable and chilling than even the most active imagination would fear. In this unique work of nature writing, you will encounter the most formidable predators on land and sea - as well as the most overlooked, bizarre and inventive hazards that mother nature has to offer. Meet the

cougar that can leap 40 feet and clear 8-foot fences with a fully-grown deer in its jaws, the tapeworm that's been known to grow as long as 82 feet in the human gut and the elephant that single-handedly destroyed an oil tanker. Drawing on an enormous host of true encounters between man and beast, this is the world's most authoritative compendium of animal attacks on human beings. With mordant wit and expert timing, Gordon Grice provides a gripping journey to the dark side of the animal kingdom and a celebration of its humbling, savage glory. (Originally published in hardback as *The Book of Deadly Animals*.)

A Taste for Poison Jun 23 2020 "A fascinating tale of poisons and poisonous deeds which both educates and entertains." --Kathy Reichs A brilliant blend of science and crime, *A TASTE FOR POISON* reveals how eleven notorious poisons affect the body--through the murders in which they were used. As any reader of murder mysteries can tell you, poison is one of the most enduring—and popular—weapons of choice for a scheming murderer. It can be slipped into a drink, smeared onto the tip of an arrow or the handle of a door, even filtered through the air we breathe. But how exactly do these poisons work to break our bodies down, and what can we learn from the damage they inflict? In a fascinating blend of popular science, medical history, and true crime, Dr. Neil Bradbury explores this most morbidly captivating method of murder from a cellular level. Alongside real-life accounts of murderers and their crimes—some notorious, some forgotten, some still unsolved—are the equally compelling stories of the poisons involved: eleven molecules of death that work their way through the human body and, paradoxically, illuminate the way in which our bodies function. Drawn from historical records and current news headlines, *A Taste for Poison* weaves together the

tales of spurned lovers, shady scientists, medical professionals and political assassins to show how the precise systems of the body can be impaired to lethal effect through the use of poison. From the deadly origins of the gin & tonic cocktail to the arsenic-laced wallpaper in Napoleon's bedroom, *A Taste for Poison* leads readers on a riveting tour of the intricate, complex systems that keep us alive—or don't.
