"The Maginot Line, the complex system of strongpoints constructed between the world wars by the French to protect against attack from Germany, is one of the most famous, extensive and controversial defensive schemes in all military history. It stretched from Belgium to Switzerland, and from Switzerland to the Mediterranean, and it represented the most advanced and ambitious

system of static defenses of its time. Much of this historic line -- with its fortresses, artillery positions, barbed-wire networks, casemates, concrete bunkers -- has survived and can be visited today ... The strategic thinking that gave rise to this enormous feat of military engineering is described, as is the planning, design, and construction of the line -- and its operational history. Each of the key sites is described in detail, and visitor information and plans are provided"--Jacket.
