Recent Trends in U.S. Services Trade, 2010 Annual Report, Inv. 332-345 Nov 01 2020

Role of the Public ICT Networks in Facilitating Innovation May 27 2020

The Media and ICT Industries Meet the New Normal Feb 22 2020 This paper puts together some of the author's previous work on the concept of resilience. It is appropriate for general readers with no background in the topic. It provides abbreviated theoretical foundations for business resilience, including a brief discussion of business organizations as complex adaptive systems and lists their important attributes. This is followed by a short discussion of resilience characteristics that are seen in multiple systems and are an important for systems that must operate under high uncertainty. Resilience strategies are distinguished from resistance strategies, the costs and benefits of both are discussed. Two different types of resilience are identified: static resilience and adaptive resilience. The paper concludes with strategic and tactical recommendations for communication businesses.

International Conference on ICT Convergence (ICTC), 2013 Nov 25 2022

Cyber Law in Bangladesh Mar 17 2022 Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical guide to cyber law – the law affecting information and communication technology (ICT) – in the Bangladesh covers every aspect of the subject, including intellectual property rights in the ICT sector, relevant competition rules, drafting and negotiating ICT-related contracts, electronic transactions, privacy issues, and computer crime. Lawyers who handle transnational matters will appreciate the detailed explanation of specific characteristics of practice and procedure. Following a general introduction, the book assembles its information and guidance in seven main areas of practice: the regulatory framework of the electronic communications market; software protection, legal protection of databases or chips, and other intellectual property matters; contracts with regard to software licensing and network services, with special attention to case law in this area; rules with regard to electronic evidence, regulation of electronic signatures, electronic banking, and electronic commerce; specific laws and regulations with respect to the liability of network operators and service providers and related product liability; protection of individual persons in the context of the processing of personal data and confidentiality; and the application of substantive criminal law in the area of ICT. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in the Bangladesh will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative law in this relatively new and challenging field.

Agri-Food Supply Chain Management: Breakthroughs in Research and Practice Mar

05 2021 The development of a sustainable agricultural system is a critical concern for any nation in modern society. By implementing proper supply chain processes, available natural resources and food can be better utilized. *Agri-Food Supply Chain Management: Breakthroughs in Research and Practice* is a compendium of emerging perspectives on the development of an effective agricultural value chain and the optimization of supply chain management within the agriculture and food sectors. Highlighting theoretical frameworks, real-world applications, and future outlooks, this book is a primary reference source for professionals, students, practitioners, and managers actively involved in agricultural development.

Brain and Health Informatics Aug 30 2020 This book constitutes the refereed proceedings of the International Conference on Brain and Health Informatics, BHI 2013, held in Maebashi, Japan, in October 2013. The 33 revised full papers presented together with 8 workshop papers and 12 special session papers were carefully reviewed and selected for inclusion in the book. The papers are organized in topical sections on thinking and perception-centric Investigations of human Information processing system; information technologies for curating, mining, managing and using big brain/health data; information technologies for healthcare; data analytics, data mining, and machine learning; and applications. The topics of the workshop papers are: mental health with ICT; and granular knowledge discovery in biomedical and active-media environments; and the topics of the special sessions are: human centered computing; neuro-robotics; and intelligent healthcare data analytics.

2013 International Conference on ICT Convergence (ICTC 2013) Jan 27 2023
Proceedings of IAC in Vienna 2019 Nov 13 2021 International Academic Conference on Global Education, Teaching and Learning International Academic Conference on Management, Economics, Business and Marketing International Academic Conference on Transport, Logistics, Tourism and Sport Science

Human Rights and International Criminal Law Sep 23 2022 The book considers human rights approaches to crimes from a theoretical and practical perspective, analyses various crimes under international law, and examines the application, implementation and enforcement of international criminal law.

Proceedings of the 15th European Conference on eGovernment 2015 May 19 2022
Complete proceedings of the 15th European Conference on eGovernment Portsmouth UK Published by Academic Conferences and Publishing International Limited

The Arts and Events Jan 15 2022 Cultural heritage and contemporary arts benefit from being showcased in events. Arts-related events are each unique in reflecting local culture; they may be therefore spontaneous (street art and so on) or planned (i.e. studio tours or arts festivals). *The Arts and Events* explores the nature and complexity of managing arts events and fills a significant gap in the available literature. It investigates the history, development and management of arts events to offer much needed insight into creating economic, social and cultural capital. It therefore contributes to a greater understanding of how arts events can create a beneficial experience for the individual and the community as well as their future sustainable development. The title explores a

broad range of events from around the globe including: inspirational events for building creative (social, cultural and human) capital; affirming events for encouraging links to cultural identity or heritage; pleasurable events that offer enjoyable recreational, leisure and touristic experiences; enriching events that create opportunities for personal growth and/or to sell products or experiences, and finally, celebratory events that enhance cultural diversity. This significant volume is a valuable source for researchers, policy-makers and managers of arts events around the globe.

Cross-Disciplinary Approaches to Action Research and Action Learning Mar 25 2020
The complexity of 21st century lifestyle makes collaborative research and learning essential for all of the population, both in well-resourced and socio-economically challenged regions. Cross-Disciplinary Approaches to Action Research and Action Learning is an advanced reference source including the latest scholarly research on the examination of the development of a community practice of research in order to improve problem solving in various fields. Featuring extensive coverage on a broad range of topics such as social justice, organizational development, and global economy, this publication is ideally designed for academics, researchers, scholars, and managers seeking current research on the promotion of collaborative research and learning.

Gender Gaps and the Social Inclusion Movement in ICT Aug 10 2021
Despite advancements in technological and engineering fields, there is still a digital gender divide in the adoption, use, and development of information communication technology (ICT) services. This divide is also evident in educational environments and careers, specifically in the STEM fields. In order to mitigate this divide, policy approaches must be addressed and improved in order to encourage the inclusion of women in ICT disciplines. Gender Gaps and the Social Inclusion Movement in ICT provides emerging research exploring the theoretical and practical aspects of gender and policy from developed and developing country perspectives and its applications within ICT through various forms of research including case studies. Featuring coverage on a broad range of topics such as digital identity, human rights, and social inclusion, this book is ideally designed for policymakers, academicians, researchers, students, and technology developers seeking current research on gender inequality in ICT environments.

Contemporary Regional Development in Africa Oct 24 2022
Contemporary Regional Development in Africa interrogates well-known concerns in the areas of regionalism and economic integration in contemporary Africa, while offering an added uniqueness by highlighting the capacity imperatives of the issues, and proposing critical policy guideposts. The volume juxtaposes a set of 'dynamic' entanglements - new and micro-regionalism, informal cross-border trade, intra-African and African FDI plus cross-border investments, infrastructure development, science and technology, regional value-chains, conflict management and regional security - with fluid interpretations of regional development. The chapters provide snapshots of the several emerging and complex regionalisms and highlight a set of relevant and often overlapping analyses - drawing on authors' nuanced and granular understanding of the African landscape. The varied, yet interlinked, nature of issues covered in this study make the book valuable and

attractive to academics, researchers, policymakers and development practitioners.

Web Services: Concepts, Methodologies, Tools, and Applications Jun 08 2021 Web service technologies are redefining the way that large and small companies are doing business and exchanging information. Due to the critical need for furthering automation, engagement, and efficiency, systems and workflows are becoming increasingly more web-based. Web Services: Concepts, Methodologies, Tools, and Applications is an innovative reference source that examines relevant theoretical frameworks, current practice guidelines, industry standards and standardization, and the latest empirical research findings in web services. Highlighting a range of topics such as cloud computing, quality of service, and semantic web, this multi-volume book is designed for computer engineers, IT specialists, software designers, professionals, researchers, and upper-level students interested in web services architecture, frameworks, and security.

Systems Modeling: Methodologies and Tools Aug 22 2022 This book covers ideas, methods, algorithms, and tools for the in-depth study of the performance and reliability of dependable fault-tolerant systems. The chapters identify the current challenges that designers and practitioners must confront to ensure the reliability, availability, and performance of systems, with special focus on their dynamic behaviors and dependencies. Topics include network calculus, workload and scheduling; simulation, sensitivity analysis and applications; queuing networks analysis; clouds, federations and big data; and tools. This collection of recent research exposes system researchers, performance analysts, and practitioners to a spectrum of issues so that they can address these challenges in their work.

Teacher Education: Concepts, Methodologies, Tools, and Applications Jun 27 2020 Educators play a significant role in the intellectual and social development of children and young adults. Next-generation teachers can only be as strong as their own educational foundation which serves to cultivate their knowledge of the learning process, uncover best practices in the field of education, and employ leadership abilities that will inspire students of all ages. Teacher Education: Concepts, Methodologies, Tools, and Applications explores the current state of pre-service teacher programs as well as continuing education initiatives for in-service educators. Emphasizing the growing role of technology in teacher skill development and training as well as key teaching methods and pedagogical developments, this multi-volume work compiles research essential to higher education professionals and administrators, educational software developers, and researchers studying pre-service and in-service teacher training.

Gender Differences in Computer and Information Literacy Oct 20 2019 This open access book presents a systematic investigation into internationally comparable data gathered in ICILS 2013. It identifies differences in female and male students' use of, perceptions about, and proficiency in using computer technologies. Teachers' use of computers, and their perceptions regarding the benefits of computer use in education, are also analyzed by gender. When computer technology was first introduced in schools, there was a prevailing belief that information and communication technologies

were 'boys' toys'; boys were assumed to have more positive attitudes toward using computer technologies. As computer technologies have become more established throughout societies, gender gaps in students' computer and information literacy appear to be closing, although studies into gender differences remain sparse. The IEA's International Computer and Information Literacy Study (ICILS) is designed to discover how well students are prepared for study, work, and life in the digital age. Despite popular beliefs, a critical finding of ICILS 2013 was that internationally girls tended to score more highly than boys, so why are girls still not entering technology-based careers to the same extent as boys? Readers will learn how male and female students differ in their computer literacy (both general and specialized) and use of computer technology, and how the perceptions held about those technologies vary by gender.

New Digital Technology in Education Jul 29 2020 This book addresses the issues confronting educators in the integration of digital technologies into their teaching and their students' learning. Such issues include a skepticism of the added value of technology to educational learning outcomes, the perception of the requirement to keep up with the fast pace of technological innovation, a lack of knowledge of affordable educational digital tools and a lack of understanding of pedagogical strategies to embrace digital technologies in their teaching. This book presents theoretical perspectives of learning and teaching today's digital students with technology and propose a pragmatic and sustainable framework for teachers' professional learning to embed digital technologies into their repertoire of teaching strategies in a systematic, coherent and comfortable manner so that technology integration becomes an almost effortless pedagogy in their day-to-day teaching. The materials in this book are comprised of original and innovative contributions, including empirical data, to existing scholarship in this field. Examples of pedagogical possibilities that are both new and currently practised across a range of teaching contexts are featured.

Covariance Structure Analysis of Innovation and ICT Use Among Japanese Innovative SMEs Nov 20 2019 One of the common features of innovative SMEs identified from our previous surveys and in-depth interviews is innovation capability accumulated inside the firm, which enables them to create new products which meet customer needs and to cooperate with the other firms. The factors that SMEs achieve innovation are complex, and the causal relationships between factors have not been sufficiently clarified yet. This paper attempts to clarify the innovation process using covariance structure analysis, in particular focusing on the role ICT. Seven hypotheses are demonstrated by two models. The results obtained are as follows: (i) top management's participation and employee's motivation in the innovation process promote the effect of introducing ICT; (ii) this effect of ICT use raises innovation capability; in particular ability to connect external linkages; (iii) ICT use, innovation capability and external linkages enhance innovation activity; and (iv) effect of ICT use and innovation capability promote innovation directly. Thus this paper identifies that the effect of introducing ICT promotes innovation, and it is indispensable for innovation in Japanese SMEs.

Yearbook of International Humanitarian Law 2013 Jul 21 2022 This volume contains

several articles on the topic 'Detention in non-international armed conflict', including the Copenhagen Process, and moreover features contributions on autonomous weapons systems, Apartheid and the second Turkel Report. It also contains an elaborate Year in Review and a special section on the high-level Boundaries of the Battlefield symposium, including a conference report and several in-depth reflections on various other aspects of the symposium. The Yearbook of International Humanitarian Law is the world's only annual publication devoted to the study of the laws governing armed conflict. It provides a truly international forum for high-quality, peer-reviewed academic articles focusing on this crucial branch of international law. Distinguished by contemporary relevance, the Yearbook of International Humanitarian Law bridges the gap between theory and practice and serves as a useful reference tool for scholars, practitioners, military personnel, civil servants, diplomats, human rights workers and students.

Education in the Lao People's Democratic Republic Dec 02 2020 This book provides a comprehensive and in-depth description of the education system in Lao PDR. It covers pre-school, primary, secondary general, secondary technical and vocational, post-secondary non-higher education, and adult non-formal education and training. In addition to the main content, the book includes a glossary of terms and abbreviations used; and an appendix on the organizational structure of the Ministry of Education and Sports, including the linkages between the national, provincial and district level. The content covers public and private sector education provision alike.

The Responsibilities of Online Service Providers Sep 11 2021 This volume focuses on the responsibilities of online service providers (OSPs) in contemporary societies. It examines the complexity and global dimensions of the rapidly evolving and serious challenges posed by the exponential development of Internet services and resources. It looks at the major actors – such as Facebook, Google, Twitter, and Yahoo! – and their significant influence on the informational environment and users' interactions within it, as well as the responsibilities and liabilities such influence entails. It discusses the position of OSPs as information gatekeepers and how they have gone from offering connecting and information-sharing services to paying members to providing open, free infrastructure and applications that facilitate digital expression and the communication of information. The book seeks consensus on the principles that should shape OSPs' responsibilities and practices, taking into account business ethics and policies. Finally, it discusses the rights of users and international regulations that are in place or currently lacking.

Impact of Emerging Digital Technologies on Leadership in Global Business Jul 09 2021 To be successful, business leaders should be familiar with the emerging digital technologies that are contributing to the global business environment. All leaders must develop fresh capabilities if they are to successfully direct their communities through the emerging era of social digital connectivity and global dynamic complexity. Impact of Emerging Digital Technologies on Leadership in Global Business combines relevant theoretical and practical frameworks with the latest research and best practices

regarding emergent digital technologies. This book is an essential reference source for professionals, researchers, academics, and students who want to improve their understanding of the strategic role of emerging digital technologies in the success of global business.

Republic of the Marshall Islands Dec 22 2019 This Informational Annex highlights the Marshall Islands' existing tax system's inability to raise additional revenue, discouragement of private investment, and inequity. Careful consideration needs to be given to the potential of a comprehensive tax reform program, including strengthening tax administration, for raising additional revenue while supporting the private sector. Many state-owned enterprises (SOEs) are a drain on public finances, and their unreliable or costly services undermine private sector development. To improve their performance, reforms are needed to strengthen efficiency, better delineate commercial and noncommercial services, and introduce tariff systems that better reflect cost of services. In areas where SOEs provide purely commercial services, divestment should be considered.

Leadership and Personnel Management: Concepts, Methodologies, Tools, and Applications Jan 23 2020 #####

#####

Open Source Technology: Concepts, Methodologies, Tools, and Applications Oct 12 2021 The pervasiveness of and universal access to modern Information and Communication Technologies has enabled a popular new paradigm in the dissemination of information, art, and ideas. Now, instead of relying on a finite number of content providers to control the flow of information, users can generate and disseminate their own content for a wider audience. Open Source Technology: Concepts, Methodologies, Tools, and Applications investigates examples and methodologies in user-generated and freely-accessible content available through electronic and online media. With applications in education, government, entertainment, and more, the technologies explored in these volumes will provide a comprehensive reference for web designers, software developers, and practitioners in a wide variety of fields and disciplines.

Managing Big Data Integration in the Public Sector May 07 2021 The era of rapidly progressing technology we live in generates vast amounts of data; however, the challenge exists in understanding how to aggressively monitor and make sense of this data. Without a better understanding of how to collect and manage such large data sets, it becomes increasingly difficult to successfully utilize them. Managing Big Data Integration in the Public Sector is a pivotal reference source for the latest scholarly research on the application of big data analytics in government contexts and identifies various strategies in which big data platforms can generate improvements within that sector. Highlighting issues surrounding data management, current models, and real-world applications, this book is ideally designed for professionals, government

agencies, researchers, and non-profit organizations interested in the benefits of big data analytics applied in the public sphere.

The International Crimes Tribunal in Bangladesh Feb 28 2023 "The International Crimes Tribunal in Bangladesh was established in 2010 with the aim of bringing to trial perpetrators of crimes committed during the Liberation War in 1971, through which the country seceded from Pakistan. The International Crimes Tribunal is a domestic tribunal based on the International Crimes Tribunals Act from 1973 and the rules of procedure enacted by the Tribunal itself. The initiation of these trials almost 40 years after the war entails several challenges. The publication examines to what extent the Tribunal's legal framework as well as its jurisprudence comply with international standards as established in international treaties, customary international law and in the jurisprudence of international criminal law. To this end, the substantive law and its interpretation as well as the procedural standards applied at these trials are examined thoroughly. At the same time, the analysis takes into account the political environment surrounding the Tribunal's work and assesses its impact on the country's process of coming to terms with the past."--

Research Anthology on Preparing School Administrators to Lead Quality Education Programs Jan 03 2021 The delivery of quality education to students relies heavily on the actions of an institution's administrative staff. Effective leadership strategies allow for the continued progress of modern educational initiatives. It is crucial to investigate how effective administrators lead their organizations in challenging and difficult times and promote the accomplishments of their organization. Research Anthology on Preparing School Administrators to Lead Quality Education Programs is a vital reference source that offers theoretical and pedagogical research concerning the management of educational systems on both the national and international scale. It also explores academic administration as well as administrative effectiveness in achieving organizational goals. Highlighting a range of topics such as strategic planning, human resources, and school culture, this multi-volume book is ideally designed for educators, administrators, principals, superintendents, board members, researchers, academicians, policymakers, and students.

The Ubiquitous Internet Sep 30 2020 This book presents state of the art theoretical and empirical research on the ubiquitous internet: its everyday users and its economic stakeholders. The book offers a 360-degree media analysis of the contemporary terrain of the internet by examining both user and industry perspectives and their relation to one another. Contributors consider user practices in terms of internet at your fingertips—the abundance, free flow, and interconnectivity of data. They then consider industry's use of user data and standards in commodification and value-creation.

Future Internet Technologies for Manufacturing - FITMAN Dec 14 2021

International Handbook of E-Learning Volume 2 Feb 16 2022 The International Handbook of e-Learning, Volume 2 provides a comprehensive compendium of implementation and practice in all aspects of e-learning, one of the most significant ongoing global developments in the entire field of education. Covering the integration,

challenges, implications, and context-appropriate use of open education networks, blended learning, mobile technologies, social media, and other platforms in a variety of unique international settings, these thirty contributions illustrate the wide-ranging applications and solutions made possible by this rapidly growing new paradigm. Case studies are driven by empirical research and attention to cultural specificity, while future research needs are discussed in relation to both confirmed practice and recent changes in the field. The book will be of interest to anyone seeking to create and sustain meaningful, supportive learning environments within today's anytime, anywhere framework, from teachers, administrators, and policy makers to corporate and government trainers.

Nanoelectronic Coupled Problems Solutions Feb 04 2021 Designs in nanoelectronics often lead to challenging simulation problems and include strong feedback couplings. Industry demands provisions for variability in order to guarantee quality and yield. It also requires the incorporation of higher abstraction levels to allow for system simulation in order to shorten the design cycles, while at the same time preserving accuracy. The methods developed here promote a methodology for circuit-and-system-level modelling and simulation based on best practice rules, which are used to deal with coupled electromagnetic field-circuit-heat problems, as well as coupled electro-thermal-stress problems that emerge in nanoelectronic designs. This book covers: (1) advanced monolithic/multirate/co-simulation techniques, which are combined with envelope/wavelet approaches to create efficient and robust simulation techniques for strongly coupled systems that exploit the different dynamics of sub-systems within multiphysics problems, and which allow designers to predict reliability and ageing; (2) new generalized techniques in Uncertainty Quantification (UQ) for coupled problems to include a variability capability such that robust design and optimization, worst case analysis, and yield estimation with tiny failure probabilities are possible (including large deviations like 6-sigma); (3) enhanced sparse, parametric Model Order Reduction techniques with a posteriori error estimation for coupled problems and for UQ to reduce the complexity of the sub-systems while ensuring that the operational and coupling parameters can still be varied and that the reduced models offer higher abstraction levels that can be efficiently simulated. All the new algorithms produced were implemented, transferred and tested by the EDA vendor MAGWEL. Validation was conducted on industrial designs provided by end-users from the semiconductor industry, who shared their feedback, contributed to the measurements, and supplied both material data and process data. In closing, a thorough comparison to measurements on real devices was made in order to demonstrate the algorithms' industrial applicability.

National Trials of International Crimes in Bangladesh Jun 20 2022 This book presents an account and interpretation of the major legal issues arising in course of the trial process and their judicial expositions reflected in the judgments and underscores their precedential significance, legacy, and contribution.

Cybercrime and Digital Forensics Apr 25 2020 The emergence of the World Wide

Web, smartphones, and Computer-Mediated Communications (CMCs) profoundly affect the way in which people interact online and offline. Individuals who engage in socially unacceptable or outright criminal acts increasingly utilize technology to connect with one another in ways that are not otherwise possible in the real world due to shame, social stigma, or risk of detection. As a consequence, there are now myriad opportunities for wrongdoing and abuse through technology. This book offers a comprehensive and integrative introduction to cybercrime. It is the first to connect the disparate literature on the various types of cybercrime, the investigation and detection of cybercrime and the role of digital information, and the wider role of technology as a facilitator for social relationships between deviants and criminals. It includes coverage of: key theoretical and methodological perspectives, computer hacking and digital piracy, economic crime and online fraud, pornography and online sex crime, cyber-bullying and cyber-stalking, cyber-terrorism and extremism, digital forensic investigation and its legal context, cybercrime policy. This book includes lively and engaging features, such as discussion questions, boxed examples of unique events and key figures in offending, quotes from interviews with active offenders and a full glossary of terms. It is supplemented by a companion website that includes further students exercises and instructor resources. This text is essential reading for courses on cybercrime, cyber-deviancy, digital forensics, cybercrime investigation and the sociology of technology.

Handbook of Research on Education and Technology in a Changing Society Apr 06 2021 Technology has become an integral part of our everyday lives. This trend in ubiquitous technology has also found its way into the learning process at every level of education. The Handbook of Research on Education and Technology in a Changing Society offers an in-depth description of concepts related to different areas, issues, and trends within education and technological integration in modern society. This handbook includes definitions and terms, as well as explanations of concepts and processes regarding the integration of technology into education. Addressing all pertinent issues and concerns in education and technology in our changing society with a wide breadth of discussion, this handbook is an essential collection for educators, academicians, students, researchers, and librarians.

The Robomobility Revolution of Urban Public Transport Apr 18 2022 Over the past two decades, society has been witnessing how technological, political, and societal changes have been transforming individual and collective urban mobility. Driven both by newcomers and traditional players, by disruptive as well as incremental innovations, the main objective now is to enhance mobility and accessibility while, reducing vehicle ownership, congestion, road accidents, and pollution in cities. This transformation has been mainly enabled by the widespread adoption of internet-connected devices (e.g.: smartphones and tablets) and by the innovative business models, technologies, and use-cases that arose from this rapid digitalization, such as peer-to-peer, and two-sided markets providing several mobility schemes: car-sharing, car-pooling, bike sharing, free-floating (cars, bikes, electric scooter), ridesharing and ride hailing either for long

distances as well as for urban and micro-mobility. The book presents – in a holistic perspective – how this revolution is happening and what are the major cornerstones for the implementation of robomobility. It aims at answering several substantial issues, such as: What is robomobility and what does it imply for the different stakeholders of the public transport ecosystem? How do policy makers integrate this innovation and how ready the regulations are? How do citizens take part in this transformation? What is the level of user acceptance for this new type of mobility? What are its environmental impacts? What is the economic impact of deploying these shuttles in a local ecosystem?

The African Mobile Story Dec 26 2022 Africa and especially Sub-Saharan Africa has during the past decade witnessed one of the fastest growing markets in mobile communication. This growth is recognized to have played a pivotal role in Africa's socio-economic development. It has had a huge impact on residential living patterns; on business networks and models; and on government services and income sources. The mobile industry has contributed more to economic growth than in any other comparable region globally introducing innovative, broadly used applications. Technical topics discussed in the book include: • Mobile Development in Sub-Saharan Africa; • Telecom Liberalization in Africa; • Role of Mobile in Socio-economic Development; • Mobile Applications in specific sectors; • Security in African Mobile; • Role of Prepaid in Africa
