Language in Social Life is a major series which highlights the importance of language to an understanding of issues of social and professional concern. It will be of practical relevance to all those wanting to understand how the ways we communicate both influence and are influenced by the structures and forces of contemporary social institutions. In all modern societies individuals are subject to tests, whether to enter educational programs, to pass from one level to the next or to grant certificates to practice. Yet, tests are powerful tools which are often introduced in undemocratic and unethical ways as disciplinary tools for carrying out various policy agendas. Tests can be detrimental to people's lives as they are capable of affecting and defining the knowledge and behaviour of those who are being tested. The Power of Tests applies a critical perspective of language tests by examining their uses and consequences in education and society and by viewing tests not as isolated events but rather as embedded in social, educational and political contexts. The book is divided into four parts: the first part establishes the power of tests through echoing the voices of test takers, describing the features of the power of tests, and the temptations that tests offer to bureaucrats who use them for power and control. The second part reports on studies that provide empirical evidence about intentions and effects of a number of large scale language tests. The third part interprets the results by examining their consequences on education and society, arriving at a model of tests' use. The final section of the book offers strategies for controlling and minimising the misuses of tests by introducing the notion of Critical Language Testing which calls for the examination of the consequences and misuses of tests, monitoring of power and pointing to their unethical uses. It also provides a comprehensive discussion of the responsibilities of language testers, including a new Code of Ethics, as well as strategies for guarding and protecting the rights of test takers. The books in the "Keys" series offer realistic, practical, down-to-earth advice on useful techniques and approaches in the modern ELT classroom. Most of the activities suggested in these books can be adapted and used for almost any class, by any teacher. One of the subjects of most concern to all teachers is classroom testing. For what reasons should we do it? How should we do it? How often should we do it? How should we organise it? Can it be harmful? What is the relationship between teaching and testing? These are just some of the questions that Brian Heaton addresses in this book. With a minimum of jargon, a number of fundamental concepts are treated in an accessible manner. As well as a discussion of these important issues, the author includes a great many examples of tests that teachers can adapt and use in their own classrooms. In addition, he gives advice on the role of continuous assessment, in which there has been an increasing amount of interest in recent years. The book also contains some suggestions on oral testing - including how to cope with this in large classes. Nothing provided Why teach drama? How can a newcomer teach drama successfully? The Old Turkic Yenisei Inscriptions have been significantly less thoroughly investigated than the famous Orkhon Inscriptions, and many paleographical, grammatical, and lexical aspects are still insufficiently examined. This book is the first monograph study of eight inscriptions found near the Uybat River in Khakassia, seven of which are engraved in stone, one in the bottom of a silver vessel. Although all but one of the inscriptions have been the object of research, many problems regarding the glyphs and their reading are unsolved. The present study collects and compares all relevant information available on the Uybat Inscriptions and provides a thorough, revised analysis of the texts. Every inscription is presented in transliteration, transcription and translation, with detailed metadata, exhaustive information on the glyph inventory, and a comprehensive critical apparatus. The book also contains a glossary of all identifiable lexemes and a morphology index. Drawings, photographs and facsimiles are given in the appendix. The study contributes to our understanding of the language, script, and culture of the Old Turkic civilization in the Yenisei area and can serve as a model for further studies on individual inscription groups. Such networks present structural and dynamical features quite different from those observed in isolated networks. The presence of links between different networks or layers of a network typically alters the way such interconnected networks behave - understanding the role of interconnecting links is therefore a crucial step towards a more accurate description of real-world systems. While examples of such dissimilar properties are becoming more abundant - for example regarding diffusion, robustness and competition - the root of such differences remains to be elucidated. Each chapter in this topical collection is self-contained and can be read on its own, thus making it also suitable as reference for

experienced researchers wishing to focus on a particular topic. This book, first published in 1957, is the study of 14th-century Arab historian Ibn Khaldun, who founded a special science to consider history and culture, based on the philosophy of Plato and Aristotle and their Muslim followers. In no other field has the revolt of modern Western thought against traditional philosophy been so far-reaching in its consequences as in the field of history. Ibn Khaldun realized that history is more immediately related to action than political philosophy because it studies the actual state of man and society. He found that the ancients had not made history the object of an independent science, and thought it was important to fill this gap. A factual acquaintance with the conclusions of Ibn Khaldun's reflections on history is not the same as the full comprehension of their theoretical significance. When these fundamental questions are answered, it becomes possible to pose the specific question of the relation of Ibn Khaldun's philosophy of history, or his new science of culture, to other practical sciences and, particularly, to the art of history. After an exposition of the major trends of Islamic historiography, part of this book attempts to answer this question through the analysis of the method and intention of the sections of the 'History' where Ibn Khaldun himself examines the works of major Muslim historians, shows the necessity of the new science of culture, and distinguishes it from other practical sciences.

A colorful survey of the often provocative and always highly creative relationship between art and fashion. A crocheted wool coat of exuberant textures and glowing colors, a dyed and pleated silk vest of baroque sensuousness, a headdress of ribbon intricately ruched in the shape of a leaping fish, an evening gown made from shredded dollar bills, a kimono that carries art appliqué on its sleeve—these are just a few of the beautiful, imaginative, even surreal works of wearable art included in this richly illustrated book, published to accompany an exhibition at the Fine Arts Museums of San Francisco. Melissa Leventon shows that wearable art is the latest in the long line of aesthetic dress reforms that began with the Arts and Crafts movement. She then traces the history of this art form as it developed out of the hippie styles and studio fiber art of the 1960s and 1970s until today, highlighting many of the leading practitioners and discussing its characteristic forms and processes. The works brought together range from pieces that are only technically wearable to one-of-a-kind works that are at home either on one's back or on one's wall to limited-edition luxury clothing. Artwear will be invaluable to fashion designers and students, art and textiles professionals, craftspeople, and anyone with an interest in the fashion world. Curator of Textiles at the Fine Arts Museums of San Francisco from 1992 to 2002, Melissa Leventon is now an independent consultant specializing in costumes and textiles. For anyone in need of a concise, introductory guide to principal components analysis, this book is a must. Through an effective use of simple mathematical-geometrical and multiple real-life examples (such as crime statistics, indicators of drug abuse, and educational expenditures) -- and by minimizing the use of matrix algebra -- the reader can quickly master and put this technique to immediate use. The latest developments in this groundbreaking therapy approach!

The stories are peopled by characters as bizarre as they are unforgettable: Crazy Karchar, whose unpredictability requires an army of fleas to manage it; Kazan, who cheerfully pretends to necrophilia in order to escape from prison; the monster Goggle-eye; and the heroine Chichek, who shoots, races on horseback and wrestles her lover. Geoffrey Lewis's classic translation retains the odd and oddly appealing style of the stories, with their mixture of the colloquial, the poetic and the dignified, and magnificently conveys the way in which they bring to life a wild society and its inhabitants. This edition also includes an introduction, a map and explanatory notes. Jasmine, a young widow in India, moves to the United States to begin a new life "This is a corpus of Old Uighur letters written in the period of the West Uighur kingdom and the Mongol Empire (9th - 14th century).00The documents in this volume were written by people of the West Uighur kingdom, which flourished from the second half of the 9th century to the start of the 13th century in and around the eastern Tianshan region including the Turfan Depression, and by Uighurs of the 13th to 14th centuries when this region had come under the rule of the Mongol empire (i.e. former West Uighurs). Old Uighur is a form of Old Turkic. This Corpus includes over two hundred letters that were written in Old Uighur using the Uighur script, which derives from the Sogdian script. Although the use of paper had at the time not yet spread to Europe, these letters are all written on paper. The ink is similar to that which was used in China, but the letters were written with reed or wooden pens rather than with writing brushes. The majority of these letters were discovered in the 20th century in China, either in the Turfan Depression in the Xinjiang Uighur Autonomous Region or in the famous Mogao Caves of the Thousand Buddhas at Dunhuang in Gansu, and a small number were unearthed at the remains of Kara-khoto in the Gansu Corridor.00The author is a specialist of Central Asia in the Middle Ages."-- The Spiritist Review was written and published by Allan Kardec from January 1858 to April 1869. In total there are 136 monthly issues of the Review, bundled in volumes of 12 issues per year, yielding 12 volumes. It is the largest Spiritist production of Allan Kardec.In addition to the profound study of the Spiritist theory and the explanations about several questions raised by the Spiritists, the Review shows the evolution of Kardec's thought during the construction of the Spiritist Science.While complementing the two main books of the Spiritist Doctrine, The Spirits' Book and The Mediums' Book, and showing their most important applications, the Review is indispensable to all those willing to have an in-depth understanding of Kardec's thoughts. In her opening chapter on Marx, Kofman provides a reading of inversion as necessary to the ideological process. She then explores the metaphor of the camera obscura in Freud's description of the unconscious. For Nietzsche the camera obscura in a "metaphor for forgetting," and it is neither the photographic nor the eye but the mind that constructs a preeminence of the perspectival. Kofman asks here whether the "magical apparatus" of the camera obscura, rather than bringing about clarity, serves some thinkers as fetish. She turns to Descartes for a final counter-example, that of the Cartesian camera obscura as a model of vision which neither disqualifies the eye as a model of knowledge nor sets up a perspectivist notion of perception. First published in 2001. Routledge is an imprint of Taylor & Francis, an informa company. For the first time, a linguistic description of Old Turkic (7th to 13th centuries) is presented, dealing with phonology, morphophonology and subphonemic phenomena as reflected in numerous scripts, derivational and inflectional morphology, syntax and coherence, the lexicon and stylistic, dialect and diachronic variation.
