Ethics, Moral Life and the Body Nov 23 2022 Shaw addresses the 'ethical turn' in contemporary sociological thinking, by exploring the contribution of sociology and the social sciences to bioethical debates about morality and tissue exchange practices.

Ethics at the End of Life Oct 22 2022 The 14 chapters in *Ethics at the End of Life: New Issues and Arguments*, all published here for the first time, focus on recent thinking in this important area, helping initiate issues and lines of argument that have not been explored previously. At the same time, a reader can use this volume to become oriented to the established questions and positions in end of life ethics, both because new questions are set in their context, and because most of the chapters—written by a team of experts—survey the field as well as add to it. Each chapter includes initial summaries, final conclusions, and a Related Topics section. TABLE OF CONTENTS John K. Davis, "Introduction" Geoffrey Scarre, "Is it possible to be better off dead?" Taylor W. Cyr, "How Does Death Harm the Deceased?" Benjamin Mitchell-Yellin, "The Significance of an Afterlife" Jens Johansson, "The Severity of Death" John K. Davis, "Defining Death" James Stacey Taylor, "Autonomy, Competence, and End of Life" Eric Vogelstein, "Deciding for the Incompetent" Paul T. Menzel, "Change of Mind: An Issue for Advance Directives" Nancy S. Jecker, "Medical Futility and Respect for Patient Autonomy" Paul T. Menzel, "Refusing Lifesaving Medical

Treatment and Food and Water by Mouth" Thomas S. Huddle, "Suicide, Physician-Assisted Suicide, the Doing-Allowing Distinction and Double Effect" Michael Cholbi, "Grief and End of Life Surrogate Decision-making" Bruce Jennings, "Solidarity near the End of Life: The Promise of Relational Decision-making in the Care of the Dying" Colin Farrelly, "Justice and the Aging of the Human Species"

The Ethical Life Mar 15 2022 This collection of primary source materials covering the major themes of moral philosophy features forty-two classical and contemporary readings divided into four parts--The Good Life, Normative Ethics, Metaethics, and Moral Problems. Comprehensive yet concise, it introduces students to ethical theory and a wide range of moral issues.

Vulnerable Subjects Jun 18 2022 "My primary concern is with the ethics of representing vulnerable subjects—persons who are liable to exposure by someone with whom they are involved in an intimate or trust-based relationship, unable to represent themselves in writing, or unable to offer meaningful consent to their representation by someone else.... Of primary importance is intimate life writing—that done within families or couples, close relationships, or quasi-professional relationships that involve trust—rather than conventional biography, which can be written by a stranger. The closer the relationship between writer and subject, the greater the vulnerability or dependency of the subject, the higher the ethical stakes, and the more urgent the need for ethical scrutiny."—from the Preface *Vulnerable Subjects* explores a range of life-writing scenarios—from the "celebrity" to the "ethnographic"—and a number of life-writing genres from parental memoir to literary case studies by Oliver Sacks. G. Thomas Couser addresses complex contemporary issues; he investigates the role of disability in narratives of euthanasia and explores the implications of the Human Genome Project for life-writing practices in any age when many regard DNA as a code that "scripts" lives and shapes identity. Throughout, his book is concerned with the ethical implications of the political and economic, as well as the mimetic, aspects of life writing.

Nicomachean Ethics Mar 23 2020 Enduringly profound treatise, whose lasting effect on Western philosophy

continues to resonate. Aristotle identifies the goal of life as happiness and discusses its attainment through the contemplation of philosophic truth.

Christ and the Moral Life Jan 01 2021 In this work, originally published in 1968, the distinguished theologian James M. Gustafson asks the fundamental question, "What is the significance of Jesus Christ for the moral life?" His answer is in the form of an ethical map, showing the ways in which theological affirmations about Christ relate to moral life in the writings of a number of important Christian thinkers.

The Ethical Life Nov 18 2019 "A compact yet thorough collection of readings in ethical theory and contemporary moral problems - at the best price"--

Human Life, Action and Ethics Feb 20 2020

Practical Ethics Mar 03 2021 For thirty years, Peter Singer's *Practical Ethics* has been the classic introduction to applied ethics. For this third edition, the author has revised and updated all the chapters and added a new chapter addressing climate change, one of the most important ethical challenges of our generation. Some of the questions discussed in this book concern our daily lives. Is it ethical to buy luxuries when others do not have enough to eat? Should we buy meat from intensively reared animals? Am I doing something wrong if my carbon footprint is above the global average? Other questions confront us as concerned citizens: equality and discrimination on the grounds of race or sex; abortion, the use of embryos for research and euthanasia; political violence and terrorism; and the preservation of our planet's environment. This book's lucid style and provocative arguments make it an ideal text for university courses and for anyone willing to think about how she or he ought to live.

Understand Ethics: Teach Yourself Oct 10 2021 We all face questions on an almost daily basis related to truth and post-truth, particularly in the political sphere, terrorism, globalization, immigration and asylum, social responsibility, media and social-media ethics, and gender and LGBT issues. So how do you navigate this minefield? *Ethics for Life* is an accessible introduction to all the key theories and thinkers. It shows the

relevance of ethical ideas and theories to everyday life, emphasizing the way our view of ourselves and the societies we live in is shaped by our moral values and the arguments they are based on. With contemporary examples and discussion of current debates including terrorism, genetics and the media, *Ethics for Life* will help you grasp how ethics applies to life today.

Ethics in the Real World Nov 30 2020 Provocative essays on real-world ethical questions from the world's most influential philosopher Peter Singer is often described as the world's most influential philosopher. He is also one of its most controversial. The author of important books such as *Animal Liberation*, *Practical Ethics*, *Rethinking Life and Death*, and *The Life You Can Save*, he helped launch the animal rights and effective altruism movements and contributed to the development of bioethics. Now, in *Ethics in the Real World*, Singer shows that he is also a master at dissecting important current events in a few hundred words. In this book of brief essays, he applies his controversial ways of thinking to issues like climate change, extreme poverty, animals, abortion, euthanasia, human genetic selection, sports doping, the sale of kidneys, the ethics of high-priced art, and ways of increasing happiness. Singer asks whether chimpanzees are people, smoking should be outlawed, or consensual sex between adult siblings should be decriminalized, and he reiterates his case against the idea that all human life is sacred, applying his arguments to some recent cases in the news. In addition, he explores, in an easily accessible form, some of the deepest philosophical questions, such as whether anything really matters and what is the value of the pale blue dot that is our planet. The collection also includes some more personal reflections, like Singer's thoughts on one of his favorite activities, surfing, and an unusual suggestion for starting a family conversation over a holiday feast. Now with a new afterword by the author, this provocative and original book will challenge—and possibly change—your beliefs about many real-world ethical questions.

The Ethical Life Sep 09 2021 "A compact yet thorough collection of readings in ethical theory and contemporary moral problems - at the best price"--

The Ethics of Life Writing Jan 25 2023 Our lives are increasingly on display in public, but the ethical issues involved in presenting such revelations remain largely unexamined. How can life writing do good, and how can it cause harm? The eleven essays here explore such questions.

The Ethics of Abortion Apr 04 2021 Appealing to reason rather than religious belief, this book is the most comprehensive case against the choice of abortion yet published. The Ethics of Abortion critically evaluates all the major grounds for denying fetal personhood, including the views of those who defend not only abortion but also infanticide. It also provides several (non-theological) justifications for the conclusion that all human beings, including those in utero, should be respected as persons. This book also critiques the view that abortion is not wrong even if the human fetus is a person. The Ethics of Abortion examines hard cases for those who are pro-life, such as abortion in cases of rape or in order to save the mother's life, as well as hard cases for defenders of abortion, such as sex selection abortion and the rationale for being "personally opposed" but publically supportive of abortion. It concludes with a discussion of whether artificial wombs might end the abortion debate. Answering the arguments of defenders of abortion, this book provides reasoned justification for the view that all intentional abortions are morally wrong and that doctors and nurses who object to abortion should not be forced to act against their consciences.

New Methuselahs Jul 27 2020 An examination of the ethical issues raised by the possibility of human life extension, including its desirability, unequal access, and the threat of overpopulation. Life extension—slowing or halting human aging—is now being taken seriously by many scientists. Although no techniques to slow human aging yet exist, researchers have successfully slowed aging in yeast, mice, and fruit flies, and have determined that humans share aging-related genes with these species. In *New Methuselahs*, John Davis offers a philosophical discussion of the ethical issues raised by the possibility of human life extension. Why consider these issues now, before human life extension is a reality? Davis points out that, even today, we are making policy and funding decisions about human life extension research that

have ethical implications. With *New Methuselahs*, he provides a comprehensive guide to these issues, offering policy recommendations and a qualified defense of life extension. After an overview of the ethics and science of life extension, Davis considers such issues as the desirability of extended life; whether refusing extended life is a form of suicide; the Malthusian threat of overpopulation; equal access to life extension; and life extension and the right against harm. In the end, Davis sides neither with those who argue that there are no moral objections to life enhancement nor with those who argue that the moral objections are so strong that we should never develop it. Davis argues that life extension is, on balance, a good thing and that we should fund life extension research aggressively, and he proposes a feasible and just policy for preventing an overpopulation crisis.

Ethics and Experience Apr 23 2020 "Ethics and Experience" presents a wide-ranging and thought-provoking introduction to the question famously posed by Socrates: How is life to be lived? 'An excellent primer for any student taking a course on moral philosophy, the book introduces ethics as a single and broadly unified field of inquiry in which we apply reason to try and solve Socrates' question. "Ethics and Experience" examines the major forms of ethical subjectivism and objectivism - including expressivism, error theory', naturalism, and intuitionism. The book lays out the detail of the most significant contemporary moral theories - including utilitarianism, virtue ethics, Kantianism, and contractarianism - and reconsiders these theories in the light of two questions that should perhaps be asked more often: Is moral theory, with its tendency to regiment ethical thought and experience, really the best way for us to apply reason to deciding how to live? And, might it not be more truly reasonable to look for less system and more insight?

Matters of Life and Death May 05 2021 Philosophical debates over the fundamental principles that should guide life-and-death medical decisions usually occur at a considerable remove from the tough, real-world choices made in hospital rooms, courthouses, and legislatures. David Orentlicher seeks to change that, drawing on his extensive experience in both medicine and law to address the translation of moral principle

into practice--a move that itself generates important moral concerns. Orentlicher uses controversial life-and-death issues as case studies for evaluating three models for translating principle into practice. Physician-assisted suicide illustrates the application of "generally valid rules," a model that provides predictability and simplicity and, more importantly, avoids the personal biases that influence case-by-case judgments. The author then takes up the debate over forcing pregnant women to accept treatments to save their fetuses. He uses this issue to weigh the "avoidance of perverse incentives," an approach to translation that follows principles hesitantly for fear of generating unintended results. And third, Orentlicher considers the denial of life-sustaining treatment on grounds of medical futility in his evaluation of the "tragic choices" model, which hides difficult life-and-death choices in order to prevent paralyzing social conflict. *Matters of Life and Death* is a rich and stimulating contribution to bioethics and law. It is the first book to examine closely the broad problems of translating principle into practice. And by analyzing specific controversies along the way, it develops original insights likely to provoke both moral philosophers and those working on thorny issues of life and death.

Ethics for the Real World Feb 02 2021 We often make small ethical compromises for "good" reasons: We lie to a customer because our boss asked us to. We exaggerate our accomplishments on our résumé to get an interview. Temptation blindsides us. And we make snap decisions we regret. Minor ethical lapses can seem harmless, but they instill in us a hard-to-break habit of distorted thinking. Rationalizations drown out our inner voice, and we make up the rules as we go. We lose control of our decisions, fall victim to the temptations and pressures of our situations, taint our characters, and sour business and personal relationships. In *Ethics for the Real World*, Ronald Howard and Clinton Korver explain how to master the art of ethical decision making by: Identifying potential compromises in your own life Applying distinctions to clarify your ethical thinking Committing in advance to ethical principles Generating creative alternatives to resolve dilemmas Packed with real-life examples, this book gives you practical advice to respond skillfully to life's

inevitable ethical challenges. Not only can you make right decisions, you can acquire new habits that will realize the best in yourself and transform your relationships.

The Ends of Human Life Aug 28 2020 Emanuel (oncology and medical ethics, Harvard) rejects the argument that recent issues of medical ethics are the result of new technologies, and contends that they are an inevitable consequence of liberal political values. He proposes a communitarian solution. Annotation copyrighted by Book News, Inc., Portland, OR

Ethics at the Beginning of Life Apr 16 2022 Many declare the debate about abortion to be hopelessly polarised, between conservatives and liberals, between forces religious and secular. In this book Mumford upends this received wisdom and challenges consensus, arguing that many dominant attitudes and argument fail to take into account the particular way human beings 'emerge' in the world.

Ethics for Life Feb 26 2023 Ethics for Life provides a clear, well-organized overview of theoretical ethics that employs a contemporary tone and framework. Both scholarly and practical, this text aims to significantly improve students' ability to make real-life moral decisions.

The Ethics of Everyday Life Sep 21 2022 The moments in Christ's human life noted in the creeds (his conception, birth, suffering, death, and burial) are events which would likely appear in a syllabus for a course in social anthropology, for they are of special interest and concern in human life, and also sites of contention and controversy, where what it is to be human is discovered, constructed, and contested. In other words, these are the occasions for profound and continuing questioning regarding the meaning of human life, as controversies to do with IVF, abortion, euthanasia, and the use of bodies or body parts post mortem plainly indicate. Thus the following questions arise, how do the instances in Christ's life represent human life, and how do these representations relate to present day cultural norms, expectations, and newly emerging modes of relationship, themselves shaping and framing human life? How does the Christian imagination of human life, which dwells on and draws from the life of Christ, not only articulate its own, but also come into

conversation with and engage other moral imaginaries of the human? Michael Banner argues that consideration of these questions requires study of moral theology, therefore, he reconceives its nature and tasks, and in particular, its engagement with social anthropology. Drawing from social anthropology and Christian thought and practice from many periods, and influenced especially by his engagement in public policy matters including as a member of the UK's Human Tissue Authority, Banner aims to develop the outlines of an everyday ethics, stretching from before the cradle to after the grave.

Writings on an Ethical Life Jun 25 2020 The essential collection of writings by one of the most visionary and daring philosophers of our time Since bursting sensationally into the public consciousness in 1975 with his groundbreaking work *Animal Liberation*, Peter Singer has remained one of the most provocative ethicists of the modern age. His reputation, built largely on isolated incendiary quotations and outrage-of-the-moment news coverage, has preceded him ever since. Aiming to present a more accurate and thoughtful picture of Singer's pioneering work, *Writings on an Ethical Life* features twenty-seven excerpts from some of his most lauded and controversial essays and books. The reflections on life, death, murder, vegetarianism, poverty, and ethical living found in these pages come together in a must-read collection for anyone seeking a better understanding of the issues that shape our world today. This ebook features an illustrated biography of Peter Singer, including rare photos from the author's personal collection.

Rethinking Life and Death Nov 11 2021 In a reassessment of the meaning of life and death, a noted philosopher offers a new definition for life that contrasts a world dependent on biological maintenance with one controlled by state-of-the-art medical technology.

Ethics for A-Level Dec 12 2021 What does pleasure have to do with morality? What role, if any, should intuition have in the formation of moral theory? If something is 'simulated', can it be immoral? This accessible and wide-ranging textbook explores these questions and many more. Key ideas in the fields of normative ethics, metaethics and applied ethics are explained rigorously and systematically, with a vivid

writing style that enlivens the topics with energy and wit. Individual theories are discussed in detail in the first part of the book, before these positions are applied to a wide range of contemporary situations including business ethics, sexual ethics, and the acceptability of eating animals. A wealth of real-life examples, set out with depth and care, illuminate the complexities of different ethical approaches while conveying their modern-day relevance. This concise and highly engaging resource is tailored to the Ethics components of AQA Philosophy and OCR Religious Studies, with a clear and practical layout that includes end-of-chapter summaries, key terms, and common mistakes to avoid. It should also be of practical use for those teaching Philosophy as part of the International Baccalaureate. Ethics for A-Level is of particular value to students and teachers, but Fisher and Dimmock's precise and scholarly approach will appeal to anyone seeking a rigorous and lively introduction to the challenging subject of ethics. Tailored to the Ethics components of AQA Philosophy and OCR Religious Studies.

A New Environmental Ethics Jul 19 2022 No one looking ahead at the middle of the last century could have foreseen the extent and the importance of the ensuing environmental crises. Now, more than a decade into the next century, no one can ignore it. *A New Environmental Ethics: the Next Millennium for Life on Earth* offers clear, powerful, and oftentimes moving thoughts from one of the first and most respected philosophers to write on the environment. Rolston, an early and leading pioneer in studying the moral relationship between humans and the earth, surveys the full spectrum of approaches in the field of environmental ethics. This book, however, is not simply a judicious overview. Instead, it offers critical assessments of contemporary academic accounts and draws on a lifetime of research and experience to suggest an outlook for the future. As a result, this focused, forward-looking analysis will be a necessary complement to any balanced textbook or anthology in environmental ethics, and will teach its readers to be responsible global citizens, and residents of their landscape, helping ensure that the future we have will be the one we wish for.

Law, Ethics and Compromise at the Limits of Life Jan 21 2020 This book will focus upon decisions to withhold or withdraw life-supporting treatment from incompetent patients. The book offers a critical examination of the latest developments with a view to developing a new framework for resolving disputes in the clinic that is not only theoretically robust but also practically relevant

Spinoza's Book of Life Oct 18 2019 Offering a new reading of Spinoza's masterpiece, Smith asserts that the 'Ethics' is a celebration of human freedom and its attendant joys and responsibilities and should be placed among the great founding documents of the Enlightenment.

Cheating Jun 06 2021 "Cheating is deeply embedded in everyday life. Costs attributable to its most common forms total close to a trillion dollars annually. This book offers the only recent comprehensive account of cheating in everyday life and the strategies necessary to address it across a wide range of contexts: sports, organizations, taxes, academia, copyright infringement, marriage, and insurance and mortgages"--

Life Science Ethics May 17 2022 Does nature have intrinsic value? Should we be doing more to save wilderness and ocean ecosystems? What are our duties to future generations of humans? Do animals have rights? This revised edition of "Life Science Ethics" introduces these questions using narrative case studies on genetically modified foods, use of animals in research, nanotechnology, and global climate change, and then explores them in detail using essays written by nationally-recognized experts in the ethics field. Part I introduces ethics, the relationship of religion to ethics, how we assess ethical arguments, and a method ethicists use to reason about ethical theories. Part II demonstrates the relevance of ethical reasoning to the environment, land, farms, food, biotechnology, genetically modified foods, animals in agriculture and research, climate change, and nanotechnology. Part III presents case studies for the topics found in Part II.

Human Life, Action and Ethics Sep 28 2020 A collection of essays by the celebrated philosopher Elizabeth Anscombe. This collection includes papers on human nature and practical philosophy, together with the classic 'Modern Moral Philosophy'

Nature, Reason, and the Good Life May 25 2020 At the centre of our ethical thought stands the human being. Roger Teichmann examines the ways in which facts about human nature determine the shape of ethical concepts such as rationality, virtue, and happiness. He argues that only by attending to the social and empirical character of language use can we address a number of problems in ethics.

The Good Life of Teaching Jul 07 2021 The Good Life of Teaching extends the recent revival of virtue ethics to professional ethics and the philosophy of teaching. It connects long-standing philosophical questions about work and human growth to questions about teacher motivation, identity, and development. Makes a significant contribution to the philosophy of teaching and also offers new insights into virtue theory and professional ethics Offers fresh and detailed readings of major figures in ethics, including Alasdair MacIntyre, Charles Taylor, and Bernard Williams and the practical philosophies of Hannah Arendt, John Dewey and Hans-Georg Gadamer Provides illustrations to assist the reader in visualizing major points, and integrates sources such as film, literature, and teaching memoirs to exemplify arguments in an engaging and accessible way Presents a compelling vision of teaching as a reflective practice showing how this requires us to prepare teachers differently

The Value of Life Aug 20 2022 First published in 1985. Routledge is an imprint of Taylor & Francis, an informa company.

Ethics of Consumption Aug 08 2021 In this comprehensive collection of essays, most of which appear for the first time, eminent scholars from many disciplines—philosophy, economics, sociology, political science, demography, theology, history, and social psychology—examine the causes, nature, and consequences of present-day consumption patterns in the United States and throughout the world.

The Person and the Common Life Dec 20 2019 What follows attempts to synthesize Husserl's social ethics and to integrate the themes of this topic into his larger philosophical concerns. Chapter I proceeds with the hypothesis that Husserl believed that all of life could be examined and lived by the transcendental

phenomenologist, and therefore action was not something which one did isolated from one's commitment to being philosophical within the noetic-noematic field. Therefore besides attempting to be clear about the meaning of the reduction it relates the reduction to ethical life. Chapter II shows that the agent, properly understood, i. e. , the person, is a moral theme, indeed, reflection on the person involves an ethical reduction which leads into the essentials of moral categoriality, the topic of Chapter IV. Chapter III mediates the transcendental ego, individual person, and the social matrix by showing how the common life comes about and what the constitutive processes and ingredients of this life are. It also shows how the foundations of this life are imbued with themes which adumbrate moral categoriality discussed in Chapter IV. The final Chapters, V and VI, articulate the communitarian ideal, "the godly person of a higher order," emergent in Chapters II, III and IV, in terms of social-political and theological specifications of what this "godly" life looks like.

Birthrights Jan 13 2022 Should surrogacy be allowed? What guidelines are needed to control in vitro fertilization programmes? Birthrights challenges the ethical basis for the legal regulation of matters surrounding birth.

Contemporary European Perspectives on the Ethics of End of Life Care Dec 24 2022 This book examines the ethics of end of life care, focusing on the kinds of decisions that are commonly made in clinical practice. Specific attention is paid to the intensification of treatment for terminal symptoms, particularly pain relief, and the withdrawal and withholding of care, particularly life-saving or life-prolonging medical care. The book is structured into three sections. The first section contains essays examining end of life care from the perspective of moral theory and theology. The second sets out various conceptual terms and distinctions relevant to decision-making at the end of life. The third section contains chapters that focus on substantive ethical issues. This format not only provides for a comprehensive analysis of the ethical issues that arise in the context of end of life care but allows readers to effectively trace the philosophical, theological and

conceptual underpinnings that inform their specific interests. This work will be of interest to scholars working in the area as well as clinicians, specialists and healthcare professionals who encounter these issues in the course of their practice.

Reverence For Life Feb 14 2022 This collection of essays builds on the contributions of Albert Schweitzer's philosophy of "Reverence for Life" as it pertains to our world today.
