BR Swindon Type 1 0-6-0 Diesel-Hydraulic Locomotives - Class 14 Oct 06 2021 In 1957 the Western Region of BR identified a need for 400 Type 1 diesel locomotives for short-haul freight duties but it was 1964 before the first was introduced. General-purpose Type 1s were being delivered elsewhere but WR management regarded these as too expensive for their requirements. After completion of design work on the 'Western' locomotives, Swindon turned to creating a cheap 'no-frills' Type 1. At 65% of the

cost of the Bo-Bo alternative, the Swindon 0-6-0 represented a better 'fit' for the trip-freight niche. Since 1957 the privatised road-haulage industry had decimated BR's wagon-load sector; whilst the 1962 Transport Act released BR from its financially-debilitating public-service obligations, the damage had been done, and the 1963 Beeching Plan focused on closing unprofitable routes and associated services. By 1963 the original requirement for 400 Type 1s had been massively reduced. Fifty-six locomotives were constructed in 1964/65. Continuing traffic losses resulted in the whole class becoming redundant by 1969. Fortuitously, a demand for high-powered diesels on the larger industrial railway systems saw the bulk of the locomotives finding useful employment for a further twenty years. This book covers the life of these locomotives on British Railways; a companion volume will provide an extensive appraisal of "Their Life in Industry" for the forty-eight locomotives which made the successful

transition after withdrawal from BR

Types May 01 2021 This book is based on two new nominalistic theses: first, that material things (houses, cats, people, symphonies, and also hair, milk, red, and love) are recurrent types, and second, that things are ontologically incomplete. Using these ideas, simple solutions are offered to a plethora of questions in ontology, philosophy of mind, and aesthetics.

European Cases of the Reincarnation Type

Jan 09 2022 Many cultures accept that a person may die and then come back to life in another form, but Westerners have traditionally rejected the idea. Recently, however, surveys conducted in Europe indicate a substantial increase in the number of Europeans who believe in reincarnation, and numerous claims of reincarnation have been reported. This book examines particular cases in Europe that are suggestive of reincarnation. The first section provides a brief history of the belief in reincarnation among Europeans. The second

section considers eight cases from the first third of the twentieth century that were not independently investigated, but were reported and sometimes published by the persons concerned. The third section covers 32 cases from the second half of the twentieth century that were investigated by the author. Many of these cases involved either children who exhibited unusual behavior attributed to a previous life, or adults who experienced recurrent or vivid dreams attributed to a previous life. In the fourth section, the author compares European cases suggestive of reincarnation with those of other countries and cultures.

Regularity of Free Boundaries in Obstacle-type Problems Aug 24 2020

The regularity theory of free boundaries flourished during the late 1970s and early 1980s and had a major impact in several areas of mathematics, mathematical physics, and industrial mathematics, as well as in applications. Since then the theory continued to evolve. Numerous new ideas, techniques, and methods have been developed, and challenging new problems in applications have arisen. The main intention of the authors of this book is to give a coherent introduction to the study of the regularity properties of free boundaries for a particular

type of problems, known as obstacle-type problems. The emphasis is on the methods developed in the past two decades. The topics include optimal regularity, nondegeneracy, rescalings and blowups, classification of global solutions, several types of monotonicity formulas, Lipschitz, C^1 , as well as higher regularity of the free boundary, structure of the singular set, touch of the free and fixed boundaries, and more. The book is based on lecture notes for the courses and mini-courses given by the authors at various locations and should be accessible to advanced graduate students and researchers in analysis and partial differential equations.

Anger Management, Types I and II Oct 26 2020

I've been a practicing psychologist in an outpatient setting for over thirty-two years. I run into the same conditions or "issues" almost every day (addictions, anxiety, ADHD/learning disabilities, assertiveness, children's behaviors, mood disorders, relationships and self-esteem).

Anger management is important unto itself, but plays a very strong role in the other areas. Usually, when people can control their anger, the problems in each of these groups diminish. Anger management is a skill that everyone needs and uses to some degree, in just about every situation. This webpage contains information about my ebook on this subject, anger management techniques, anger management tips and anger management training. It turns out anger management can be taught to almost everyone. I've taught it to children, as well as adults. I've taught techniques to schizophrenics and to people with out-of-control mood disorders. Anyone can learn about this subject and anyone can learn to manage anger. You may be having trouble in your relationship, or blowing up at work. You may be referred by the courts, which happens if your anger leads to excessive drinking or fighting, custody issues, etc.. I've read most of the pop-psychology literature on anger management over the last 30

(+) years. Many of the books are excellent. They, like this ebook deal with a variety of anger management aspects. Anger has to do with being out of control of reactions, or about being out of touch with feelings. Type I anger people "lose it" and act out. Type II anger people lose it and "act in." Type I anger people explode, while Type II anger people implode. There are characteristics and symptoms of each, which I list and explore. Type II anger is a NEW concept. You won't find this described anywhere else, because its my original idea. People have a long list of reasons not to control their anger, which is addressed. There are lots of popular or other internet sources for anger management techniques. I list them. These work, sort of, and if they work for you--good. Your anger problem is not that serious. But there are deeper, psychological approaches that fix, not mollify the problem. To effectively manage anger (either Type I or Type II), one has to get to the "deep stuff." Most of the pop-psychology books are too

long. I've boiled down the concepts in these books into clear, manageable steps. I've made this as easy to understand as is humanly possible, combining what I've read with what I've learned from clients. Plus, there is a discussion on the newest ways to conceptualize anger mismanagement, relative not just to psychology, but to cognitive behavioral techniques and mindfulness. Like my other ebooks, this one has no fat. Think of it as a "Cliffs Notes" publication. It's "sort of" a quick read (about an hour or two). I have to explain a few new terms, because there are new ideas and the terms you probably already know are put together in new ways. The theory I espouse is different from standard "behavior change" books. It works better and is very simple to understand. That's the point of an ebook. My research has not turned up another ebook that does what mine does.

The Shadows of Type Apr 19 2020

Psychological type systems such as the Myers-

Briggs® are incredibly useful in helping people to improve their self-awareness and awareness of others. However the current models do not explain how well somebody uses their type, why two people of the same type can differ greatly in their effectiveness, or how we can maximise the potential of our type? The “Shadows of Type”™ model provides the answers to these questions by placing psychological type back into its original Jungian context, “upgrading”™ this to set it within the psychosynthesis model, and then combining it with ego development theory. This leads to detailed descriptions of the 16 psychological types through seven levels of ego development. Using the suggested coaching techniques and applications, individuals can gain more insight into how they are using their type and the traps that they can fall into, and coaches are enabled to work with psychological type developmentally, transformationally and transpersonally.

Just My Type Feb 22 2023 Just My Type is not just a font book, but a book of stories. About how Helvetica and Comic Sans took over the world. About why Barack Obama opted for Gotham, while Amy Winehouse found her soul in 30s Art Deco. About the great originators of type, from Baskerville to Zapf, or people like Neville Brody who threw out the rulebook, or Margaret Calvert, who invented the motorway signs that are used from Watford Gap to Abu Dhabi. About the pivotal moment when fonts left the world of Letraset and were loaded onto computers ... and typefaces became something we realised we all have an opinion about. As the Sunday Times review put it, the book is 'a kind of Eats, Shoots and Leaves for letters, revealing the extent to which fonts are not only shaped by but also define the world in which we live.' This edition is available with both black and silver covers.

Type/Token Ratios Jan 29 2021 Seminar paper from the year 2008 in the subject Speech Science / Linguistics, University of Münster (Englisches Seminar), course: Computational Text Analysis, language: English, abstract: In this paper I will show how it is possible to compute the type/token ratio of a text by using the programming language Perl. First of all an

overview about the topic will be given, including the definition of both the terms type and token and how they are used in the context of this program. Then I will explain how the program works and give further rationale for its shortcomings. Although the program is rather simple, some knowledge of the programming language Perl will be needed for the respective parts in this paper. Then I will proceed to do a short analysis of different texts and their respective type/token ratios. These texts were taken from the British National Corpus and Project Gutenberg. The results will show the need for a different measure of lexical density. One example of such a measure is the mean type/token ratio which I will go into shortly. In the Conclusion there will be a short critique of the expressiveness of type/token ratios as well as a short overview about current research on this topic.

How Your Personality Type Is Inherited: The NPA Model of Genetic Traits Mar 19 2020 by A.M. Benis, ScD, MD. The purpose of this book is

to allow you, the reader, to see how your personality type was inherited. Our premise is that everyone has several major personality traits resulting from just a few genes, and that we can trace the traits in a family tree. By personality type, we mean that the traits assort themselves — one, two or three traits together. There are three basic traits and about a dozen common personality types. If you are not familiar with the NPA model, the introductory chapters will bring you up to speed quickly. Next, we present twenty “case studies” that illustrate how the personality traits are transmitted. Here, you will meet Giovanni and Pania, Bogdan and Lulu, as well as King Lucifer IV and his many mistresses. Each of the cases has an instructive element, and when you are through with the illustrations, you should be in good form to do your own analysis... of yourself, your family, your significant other, and even of children who are not yet born. 157 pp.

305 Lost Buildings of Canada Feb 10 2022 The legacies of theaters, hotels, fire stations, flour mills, and more -- torn down, burned down, and otherwise lost -- are uncovered in this bittersweet collection. Bozиков draws on local histories, archived building permits and his own extensive knowledge of the Canadian urban architectural landscape and its history -- from the letters passed through Kelowna's unlikely art deco post office to the destruction of a home in Halifax's Africville -- to offer fascinating, sometimes forgotten stories about each building and its significance.
