Conference on  
Water Pollution

Research, Cape  
Town, South Africa,  
March 29-April 2,  
1982

This is the third in  
the five-yearly  
series of surveys of  
what is happening  
in rock art studies  
around the world.  
As always, the texts  
reflect something of  
the great  
differences in  
approach and  
emphasis that exist  
in different regions.  
The volume  
presents examples  
from Europe, Asia,  
Africa, and the New  
World. During the  
period in question,  
1999 to 2004, there  
have been few  
major events,  
although in the field  
of Pleistocene art  
many new  
discoveries have  
been made, and a  
new country added  
to the select list of

those with Ice Age  
cave art. Some  
regions such as  
North Africa and  
the former USSR  
have seen a  
tremendous amount  
of activity, focusing  
not only on  
recording but also  
on chronology, and  
the conservation of  
sites. With the  
global increase of  
tourism, the  
management of  
rock art sites that  
are accessible to  
the public is a  
theme of ever-  
growing  
importance. This  
book includes  
theoretical  
approaches as well  
as a production  
section that focuses  
on basic techniques  
and introductory  
applications of  
media studies.  
Developed  
exclusively with the  
Caribbean

Examinations Council, this study guide provides you with additional support to maximise your performance in CAPE Communication Studies. Written by an experienced team of teachers and experts in the syllabus and the examination, this study guide covers all the key elements of the syllabus in an easy-to-use double-page format, with a range of features designed to enhance study. Features include activities and tips, as well as examination practice and sample answers to build assessment confidence. The World Bank insists that the urban share of sub-

Saharan Africa's population is rapidly increasing - this study shows that in many countries this is no longer true as migration strategies have adapted in response to economic and political change. Communication Studies, provides the necessary guidance for every student preparing for CAPE examination. This is one of the first direct and structured compilation for the CAPE examination. Students have long experienced difficulty in understanding and formulating what is required of them. Communication Studies shows you how to: gather, evaluate and

present information on current issues create a portfolio containing both oral and written work formulate what CAPE examination requires of them You will also be given an in-depth insight into language, the relevant definitions, concepts and impacts on society today. This concise work possesses all that you need to thoroughly prepare for and pass CAPE. Breaking new ground in this field, Communication Studies, gives students a complete package for the syllabus including detailed explanations, sample of essays and a portfolio. The preservation of South Africa's

indigenous languages - the extinct Bushman and Khoikhoi languages in particular - is a pressing concern. *Voices Past and Present* serves as a comprehensive, scholarly and practical source for documenting and preserving some of them. The subcontinent of Africa has been inhabited by Bushman, Khoikhoi and Bantu-speaking peoples for thousands of years, and, for the past few centuries, also by European-speaking peoples. Contact between these peoples brought about changes in the different languages. As a result, modern languages are no longer identical to

the original ones, many of which, especially in the case of the Bushman and Khoikhoi languages, have become extinct. Words used in ancient times and recorded long ago often bear no resemblance to their modern counterparts. In this book, Peter E. Raper provides a detailed investigation of the earliest recordings of words available. Words from Old Cape dialects are compared for correspondences in sound and meaning to words from 29 Bushman languages and dialects, as well as to words from Nama, Koranna, Griqua, !Xuhn, !Xoon, Khwe and N/uu. *Voices Past and Present*

provides an extensive corpus of words that can be further utilised for the purpose of shedding light on the specific languages from which the recorded words (and names) were derived, on historical distribution of the various groups, on the classification of the different languages and peoples, for determining relationships or otherwise between the different languages, potentially identifying components of place-names and ethnonyms from ancient and extinct languages, and elucidating other matters that have long vexed scholars who have

complained about a lack of recorded data. Results of research conducted between 1956 and 1965. Nations as well as individuals are in many ways the sum of their memories, which are shaped by perception as much as by events. This collection of essays by South African academics looks at the ways the country is dealing with its past, a complex mixture of colonialism, slavery, apartheid, struggle, and guilt. The emphasis is on how that past is being perceived and moulded in the post-apartheid era. A major contribution to the environmental history of settler societies, William

Beinart's innovative study analyses the development of conservationist ideas over the long term in South Africa, examining them as a response to the rapid transformation of natural pastures brought about as the Cape became a major exporter of wool. CAPE Communication Studies: A Practical Guide to Paper 02 Essays has been a long time in the making but I just knew that I had to write this book for students who are looking for guidance in writing their best essays of CAPE Communication Studies Paper 02. This book is guaranteed to show you how to: • identify the writer's

main point, purpose, organizational strategies and language techniques of Module One essay • articulate with confidence the factors that make up the Module Two essay • know what you are required to write in the Module Three essay As the title suggests this book allows you to participate in various activities all geared to perfecting your essay writing skills needed for all three essays in Paper 02. In each section of the book you are invited to work either as an individual, in pairs or in groups to complete the activities that are specifically designed to deepen

your understanding of CAPE essays. This concise work possesses all that students need to thoroughly prepare for and pass this section of their CAPE Communication Studies examination. This book examines the development of film criticism in Cape Town's daily press from 1928 to 1930, using film reviews from the Cape Times and Die Burger. The character of film criticism in the period under discussion is explained by describing the general function of film criticism, as well as comparing the local with the international film press. The basis for the comparative

analysis is a list of films screened in three selected cinemas in Cape Town. This work on the pioneering history of the Boers in the Cape Colony (South Africa) before the Great Trek (1835-1846) is primarily based on research in various archives and libraries. However, the author PJ van der Merwe (1912-1979) found it desirable to personally visit different areas mentioned in the book to get to know the country and the people better and to gather oral tradition and personal information. In carrying out this fieldwork during 1938 and 1939, the author covered 15,000 miles by car

and questioned hundreds of people (old pioneers, farmers, teachers, magistrates, school inspectors, livestock inspectors, surveyors and police agents). This investigation not only enabled him to better interpret the sometimes fragmentary data found in the archives and old travel descriptions, but also served to supplement it. For several centuries Cape Town has accommodated a great variety of musical genres which have usually been associated with specific population groups living in and around the city. Musical styles and genres produced in Cape Town have

therefore been assigned an "identity" which is first and foremost social. This volume tries to question the relationship established between musical styles and genres, and social - in this case pseudo-racial - identities. In *Sounding the Cape*, Denis-Constant Martin recomposes and examines through the theoretical prism of creolisation the history of music in Cape Town, deploying analytical tools borrowed from the most recent studies of identity configurations. He demonstrates that musical creation in the Mother City, and in South Africa, has always been nurtured by

contacts, exchanges and innovations whatever the efforts made by racist powers to separate and divide people according to their origin. Musicians interviewed at the dawn of the 21st century confirm that mixture and blending characterise all Cape Town's musics. They also emphasise the importance of a rhythmic pattern particular to Cape Town, the ghoema beat, whose origins are obviously mixed. The study of music demonstrates that the history of Cape Town, and of South Africa as a whole, undeniably fostered creole societies. Yet, twenty years after the collapse of

apartheid, these societies are still divided along lines that combine economic factors and "racial" categorisations. Martin concludes that, were music given a greater importance in educational and cultural policies, it could contribute to fighting these divisions and promote the notion of a nation that, in spite of the violence of racism and apartheid, has managed to invent a unique common culture. This collection offers the fruits of a stimulating workshop that sought to bridge the fraught relationship which sometimes continues between anthropologists and

indigenous/native/aboriginal scholars, despite areas of overlapping interest.

Participants from around the world share their views and opinions on subjects ranging from ideas for reconciliation, the question of what might constitute a universal "science," indigenous heritage, postcolonial museology, the boundaries of the term "indigeneity," different senses as ways of knowing, and the very issue of writing as a method of dissemination that divides and excludes readers from different backgrounds. This book represents a landmark step in the process of

replacing bridges with more equal patterns of intercultural cooperation and communication. Three-fourths of the world's poor are rural poor. Most of the rural poor remain dependent on land-based livelihoods for their incomes and reproduction despite significant livelihood diversification in recent years. Land issue remains critical to any development discourse today. Market-led agrarian reform (MLAR) has gained prominence since the early 1990s as an alternative to state-led land reforms. This neoliberal policy is based on the inversion of what its proponents

see as the features of earlier approaches, and calls for redistribution via privatized, decentralized transactions between 'willing sellers' and 'willing buyers'. Its proponents, especially those associated with the World Bank, have claimed success where the policy has been implemented, but such claims have been contested by independent scholars as well as by peasant movements who are struggling to gain access to land. This book presents three thematic papers and six country studies. The thematic papers address issues of formalisation of

property rights, gendered land rights, and neoliberal enclosure. These studies demonstrate the pervasive influence of neoliberal ideas on property rights and rural development debates, well beyond the 'core' question of land redistribution. The country cases bring together experiences from Brazil, Guatemala, El Salvador, Philippines, South Africa and Egypt. Common findings include the success of landowners in minimising the impact of reform, and a lack of post-transfer support, translating into marginal impact on poverty. The limitations of the

market-led approach, and the implications of the studies presented here for the future of agrarian reform, are considered in the editors' introduction. This book was a special issue of *The Third World Quarterly*. This text provides students with a wide understanding of what communication means, how we as humans communicate, what affects communication and ways of communicating effectively. Students will find this text to be an essential tool in helping them become better communicators both in school and society. In 2018, the city of Cape

Town, South Africa, was close to the "Day Zero", requiring all taps to be shut off and citizens to fetch a daily 25 litre per person. Though the day-zero was avoided, it is estimated that, at the current rate, South Africa will experience a 17% water deficit by 2030 if no action is taken to respond to existing trends. This book is based on the work of many people, and while I discuss many of them in the general context of this book in Chapter 1, I would like to emphasize here the contribution of all those people involved. My apologies in advance to any I have omitted to

mention. The backbone of the book is based on a project, 'Farm Lives' conducted between 1999 and 2002, funded exclusively by the McDonald Institute for Archaeological Research at the University of Cambridge; without their essential financial support, this would not have been possible. The project involved three components: archaeological fieldwork, archive research and oral history interviews. For the fieldwork, special thanks goes to Marcus Abbott, Jenny Bredenberg, Glenda Cox, Olivia Cyster, Andy Hall, Odile Peterson, and Sarah Winter; for post-excavation analysis of

materials, I thank Duncan Miller (University of Cape Town), Peter Nilsson (South African Museum) and Jane Klose (University of Cape Town). For the archive research, I would like to thank J. Malherbe (Huguenot Museum) and Harriet Clift (South African Heritage Resources Agency), but most of all, Jaline de Villiers (Paarl Museum). For the oral history, my thanks go to Sarah Winter, Rowena Peterson and Jaline de Villiers for conducting interviews, and to the informants, Johanna Dressier, Louisa Adams, Geoffrey Leslie Hendricks, William Davids, Absolom

David Lackay, John Cyster November and Lillian Aubrey Idas. This volume critically examines sources of evidence and material from the archive that historically have been used to tell southern Africa's pre-colonial story. This report describes the simultaneous monitoring of seabird colonies (murre and kittiwakes) at Bering Sea colonies (Cape Peirce and Bluff), and Cape Thompson in the Chukchi Sea and analyses their productivity or breeding success. The first comprehensive study of the interaction between the European missionaries and Africans in

precolonial Namibia focusses on the expansion of the colonial frontier. Africans entered a new world of social relations where they faced the transformation of their societies in an ambivalent manner. Irrespective of the final, and unpredictable, outcome of the contest for power, many Africans encountered new challenges with initiative and determination. The purpose of *Seeing and Knowing* is to demonstrate the depth and wide geographical impact of David Lewis-Williams' contribution to rock art research by emphasizing theory and methodology drawn from ethnography.

*Contributors* explore what it means to understand and learn from rock art, and a contrast is drawn between those sites where it is possible to provide a modern, ethnographic context, and those sites where it is not. This is the definitive guide to the interplay between ethnography and rock art interpretation, and is an ideal resource for students and researchers alike. *Collins CAPE Revision Guides* focus on the content and skills students need to master for success in CAPE examinations. They cover all aspects of the syllabus and provide excellent

help with exam preparation. *Collins CAPE Revision Guide - CARIBBEAN STUDIES* is an essential title for all students sitting the CAPE CARIBBEAN STUDIES exam. With clear and accessible information, practice questions, and exam tips, it is a key resource to help students prepare for the exam. The revision guide includes a comprehensive section on Research Principles and Research Practice to support students with their school-based assessment. It also includes chapters on every section of the syllabus, both Module 1 and Module 2, cross-referencing topics

that students may need to relate and refer to in essay questions. Advice is given on how to approach exam questions and construct well-structured essays, and multiple choice questions are included at the end of every section for practice purposes. Volume 32 (2013) of the internationally recognized and acclaimed yearbook series *Palaeoecology of Africa* publishes 9 new interdisciplinary scientific papers on former and recent landscape evolution and on past environments of the African continent (e.g. climate change, vegetation dynamics and growing impact of humans on

ecosystems). These papers This first comprehensive analysis of slavery in early colonial South Africa, based on research in Britain, the Netherlands and South Africa, examines the nature of Cape slavery with reference to the literature on other slave societies. Dr Worden shows how the slave economy developed in town and countryside, and discusses the dynamics of the slave market, the growth of land concentration, the harsh life on the farm, and the developing polarisation of rural race relations. He analyses the relation of fear and brutality in small farming

communities and demonstrates that, contrary to previous assumptions, small-scale slavery produced conditions as severe as those experienced in the large-scale slave-holding systems of the Deep South. However, Cape slavery was exceptional in that manumission was rare and unity among slaves was inhibited by their diverse origins. The study is an important contribution to an understanding of the development of South African colonial society and to comparative slave studies. This comprehensive companion is a much-needed reference source

for the expanding field of radio, audio, and podcast study, taking readers through a diverse range of essays examining the core questions and key debates surrounding radio practices, technologies, industries, policies, resources, histories, and relationships with audiences. Drawing together original essays from well-established and emerging scholars to conceptualize this multidisciplinary field, this book's global perspective acknowledges radio's enduring affinity with the local, historical relationship to the national, and its unpredictably transnational reach. In its capacious

understanding of what constitutes radio, this collection also recognizes the latent time-and-space shifting possibilities of radio broadcasting, and of the myriad ways for audio to come to us 'live.' Chapters on terrestrial radio mingle with studies of podcasts and streaming audio, emphasizing continuities and innovations in form and content, delivery and reception, production cultures and aesthetics, reminding us that neither 'radio' nor 'podcasting' should be approached as static objects of analysis but rather as mutually constituting cultural forms. This cutting-edge and

vibrant companion provides a rich resource for scholars and students of history, art theory, industry studies, journalism, media and communication, cultural studies, feminist analysis, and postcolonial studies. There is little dispute within the scientific community that humans are changing Earth's climate on a decadal to century time-scale. By the end of this century, without a reduction in emissions, atmospheric CO<sub>2</sub> is projected to increase to levels that Earth has not experienced for more than 30 million years. As greenhouse gas emissions propel Earth toward a

warmer climate state, an improved understanding of climate dynamics in warm environments is needed to inform public policy decisions. In *Understanding Earth's Deep Past*, the National Research Council reports that rocks and sediments that are millions of years old hold clues to how the Earth's future climate would respond in an environment with high levels of atmospheric greenhouse gases. *Understanding Earth's Deep Past* provides an assessment of both the demonstrated and underdeveloped potential of the deep-time geologic record to inform us about the dynamics

of the global climate system. The report describes past climate changes, and discusses potential impacts of high levels of atmospheric greenhouse gases on regional climates, water resources, marine and terrestrial ecosystems, and the cycling of life-sustaining elements. While revealing gaps in scientific knowledge of past climate states, the report highlights a range of high priority research issues with potential for major advances in the scientific understanding of climate processes. This proposed integrated, deep-time climate

research program would study how climate responded over Earth's different climate states, examine how climate responds to increased atmospheric carbon dioxide and other greenhouse gases, and clarify the processes that lead to anomalously warm polar and tropical regions and the impact on marine and terrestrial life. In addition to outlining a research agenda, *Understanding Earth's Deep Past* proposes an implementation strategy that will be an invaluable resource to decision-makers in the field, as well as the research community,

advocacy organizations, government agencies, and college professors and students. In this biography of the Khoikhoi Jan Paerl (1761-1851) light is being shed on a new form of resistance against colonial domination in Cape society. It emphasizes Khoikhoi colonial encounters and incorporates themes such as millenarian beliefs, identities, master-servant relations, indentured labour and the appropriation of mission Christianity.
