StatPearls Publishing Did you know that the global church is only a few years away from fulfilling Jesus' command to "make disciples of every nation?" And that Jesus explicitly tied his return to the completion of that task? In And Then the End Will Come, Douglas Cobb, founder of the Finishing Fund,

provides a front-line account of the effort to finish Jesus' Great Commission in our lifetimes. He also explores nine other clues that Jesus is coming soon, including the approaching 2000-year anniversary of the resurrection, the regathering of Israel, and the prophecies of Daniel Chapter 12. He makes the case that the return of Christ is at hand—perhaps in the next year or two, perhaps a little later, but assuredly very soon. And he offers practical instruction about what it means to "live holy and godly lives" as we look for the coming of our Lord and King. StatPearls Publishing Political science has changed; the way students learn has changed; so too should the way it's taught. This is political science, today. Political Science Today by Wendy Whitman Cobb gives you a holistic view of the subfields that make up political science by dedicating one chapter to each of the topics at the core of the discipline. Unlike denser texts on the market, Political Science Today uses a field-based approach that allows you to engage with the material directly and dig into each of the discipline's diverse subfields while also developing critical thinking skills, discerning the differences between politics and political science, conducting and consuming research, and broadening your future career aspirations. The book's innovative table of contents begins with foundational tools like theories and research methods, then builds up to subfield chapters on Comparative Politics, International Relations, American Government, Political Economy, and Public Policy and Administration. Current case studies throughout the text provide a backdrop for engaging classroom discussions on topics such as President Trump's travel ban, ISIS as a state, and strengths and weaknesses of the

United Nations. This unique approach provides short segments of topic coverage, plenty of summarizing content and review questions, as well as comprehensive learning objectives which will help you understand the realities of political science today. Working with case studies, the book will introduce broad frameworks of understanding of issues such as growth,

loss, and sexuality, together with critical perspectives on important aspects of practice such as language, power and boundaries. The book provides an accessible overview of key concepts in pastoral theology, offering key entry points for further discussion and study. Religion and Ecological Crisis delves into the complex relationship between religions and ecology, presenting Christian and Islamic perspectives on ecological issues through the work of John Boswell Cobb and Seyyed Hossein Nasr. It examines how faith traditions of the world see and respond to our current unprecedented climate change issues. This is the first comparative study of Cobb and Nasr's eco-religious understanding, and explores how their prescriptions can contribute alternatively to techno-scientific initiatives in environmental sustainability. Taking Cobb's "economism" and Nasr's "scientism" as the key concepts for surveying the roots of the ecological crisis, the book offers interdisciplinary and interreligious insights into the debates about ecological equilibrium, motivational awareness in human mind and about entanglements between religion and the environment. This will be an insightful resource for policy makers, faith leaders and for academics working in Environmental Studies and Religious Studies.
