**Applied Epidemiology** Jul 30 2020 Applies traditional epidemiologic methods for determining disease etiology to the real-life applications of public health and health services research. This text contains a chapter on the development and use of systematic reviews and one on epidemiology and the law.

**Clinical Teaching Strategies in Nursing, Fourth Edition** May 28 2020 Print+CourseSmart  
**Biostatistics** Feb 17 2022 The Biostatistics course is often found in the schools of public Health, medical schools, and, occasionally, in statistics and biology departments. The population of students in these courses is a diverse one, with varying preparedness. The book assumes the reader has at least two years of high school algebra, but no previous exposure to statistics is required. Written for individuals who might be fearful of mathematics, this book minimizes the technical difficulties and emphasizes the importance of statistics in scientific investigation. An understanding of underlying design and analysis is stressed. The limitations of the research, design and analytical techniques are discussed, allowing the reader to accurately interpret results. Real data, both processed and raw, are used extensively in examples and exercises. Statistical computing packages - MINITAB, SAS and Stata - are integrated. The use of the computer and software allows a sharper focus on the concepts, letting the computer do the necessary number-crunching. \* Emphasizes underlying statistical concepts more than competing texts \* Focuses on experimental design and analysis, at an elementary level \* Includes an introduction to linear correlation and regression \* Statistics are central: probability is downplayed \* Presents life tables and survival analysis \* Appendix with solutions to many exercises \* Special instructor's manual with solution to all exercises

**Introduction to Real Analysis** Mar 26 2020 Using an extremely clear and informal approach, this book introduces readers to a rigorous understanding of mathematical analysis and presents challenging math concepts as clearly as possible. The real number system. Differential calculus of functions of one variable. Riemann integral functions of one variable. Integral calculus of real-valued functions. Metric Spaces. For those who want to gain an understanding of mathematical analysis and challenging mathematical concepts.

The Demographic Transition and Development in Africa Feb 05 2021 "The heated Malthusian-Bosrupian debates still rage over consequences of high population growth, rapid urbanization, dense rural populations and young age structures in the face of drought, poverty, food insecurity, environmental degradation, climate change, instability and the global economic crisis. However, while facile generalizations about the lack of demographic change and lack of progress in meeting the MDGs in sub-Saharan Africa are commonplace, they are often misleading and belie the socio-cultural change that is occurring among a vanguard of more educated youth. Even within Ethiopia, the second largest country at the Crossroads of Africa and the Middle East, different narratives emerge from analysis of longitudinal, micro-level analysis as to how demographic change and responses are occurring, some more rapidly than others. The book compares Ethiopia with other Africa countries, and demonstrates the uniqueness of an African-type demographic transition: a combination of poverty-related negative factors (unemployment, disease, food insecurity) along with positive education, health and higher age-of-marriage trends that are pushing this ruggedly rural and land-locked population to accelerate the demographic transition and stay on track to meet most of the MDGs. This book takes great care with the challenges of inadequate data and weak analytical capacity to research this incipient transition, trying to unravel some of the complexities in this vulnerable Horn of Africa country: A slowly declining population growth rates with rapidly declining child mortality, very high chronic under-nutrition, already low urban fertility but still very high rural fertility; and high population-resource pressure along with rapidly growing small urban places"

**Surgical Care at the District Hospital** Jun 28 2020 Many patients who present to district (first-referral) level hospitals require surgical treatment for trauma, obstetric, abdominal or orthopedic emergencies. Often surgery cannot be safely postponed to allow their transfer to a secondary or tertiary-level hospital but many district hospitals in developing countries have no specialist surgical teams and are staffed by medical, nursing, and paramedical personnel who perform a wide range of surgical procedures often with inadequate training. The quality of surgical and acute care is often further constrained by poor facilities, inadequate low-technology apparatus and limited supplies of drugs, materials, and other essentials. The mission of the team responsible for Clinical Procedures in the World Health Organization Department of Essential Health Technologies (EHT) is to promote the quality of clinical care through the identification, promotion and standardization of appropriate procedures, equipment and materials, particularly at district hospital level. WHO/BCT has identified education and training as a particular priority, especially for non-specialist practitioners who practice surgery and anesthesia. It has therefore developed Surgical Care at the District Hospital as a practical resource for individual practitioners and for use in undergraduate and postgraduate programs in-service training and continuing medical education programs. The manual is a successor of three earlier publications that are widely used throughout the world and that remain important reference texts: General Surgery at the District Hospital (WHO 1988), Surgery at the District Hospital: Obstetrics Gynecology Orthopedics and Traumatology (WHO 1991), Anesthesia at the District Hospital (WHO 1988; second edition 2000). This new manual draws together material from these three publications into a single volume which includes new and updated material, as well as material from Managing Complications in Pregnancy and Childbirth: A Guide for Midwives and Doctors (WHO 2000).

**Diseases of the Ear, Nose and Throat** Jan 28 2023 The new edition of Diseases of the Ear, Nose and Throat Lecture Notes provides an updated and comprehensive overview of one of the fastest growing specialties in medicine. New features include: • A revamped layout and structure comprising four sections: The ear, hearing and balance, The nose and sinuses, The head and neck and ENT emergencies • Additional content including facial plastic surgery, emergencies and maxillofacial trauma, and 50 brand new illustrations and images • Treatment and management now highlighted for quick reference The brand new companion website at [www.lecturenoteseries.com/ENT](http://www.lecturenoteseries.com/ENT) features over 100 Multiple Choice Questions (MCQs), key revision points, and links to further online resources. Diseases of the Ear, Nose and Throat Lecture Notes is ideal for the busy medical student new to this area or as a useful review and revision aid later in

their course.

**Managing Health Services Organizations and Systems** Oct 21 2019 Managing Health Services Organizations and Systems has served the educational and professional needs of the healthcare field over four decades. The seventh edition furthers that legacy in a completely revised and reorganized text that presents a comprehensive range of the knowledge and skills needed to effectively lead and manage health services delivery. The first of three parts describes the environment in which health services are delivered. The second details tools and skills needed to manage and lead health services. The final part links the preceding chapters to Fayol's five management functions—planning, organizing, staffing, directing, and controlling—as they apply in health services. In this edition, the authors return to basics in a concise yet substantive presentation within a context of quality and performance improvement. New to this edition are chapters on healthcare economics, financial management, planning, organizing, staffing, and directing. A new section on compliance is key to meeting regulatory demands. The sections on patient and staff safety, emergency preparedness, and project management are updated and revised.

**Field Work Manual** Oct 01 2020 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Introduction to Health Promotion Nov 14 2021 Understand the foundations and applications of health promotion Introduction to Health Promotion gives students a working knowledge of health promotion concepts and methods and their application to health and health behaviors, with a special emphasis on the philosophical and theoretical foundations of health promotion. The textbook also identifies and discusses the innovative health campaigns, strategies, and policies being implemented and enacted to improve health behaviors and practices that ultimately improve quality of life. Written by a professor with more than two decades of experience teaching and researching health promotion, this comprehensive resource goes beyond the basics, delving into issues such as the application of behavior change theories, planning models, and current wellness topics like nutrition, physical activity, and emotional well-being, among others. Provides a clear introduction to the most essential topics in health promotion and education Explains behavior change theories and program planning models Explores health promotion's role tackling issues of stress, tobacco use, eating behaviors, and physical activity Includes chapters dedicated to professions, settings, and credentials available in the health promotion field Looks at future trends of health promotion Ideal for students in health promotion, health education, and public health fields, Introduction to Health Promotion prepares students with a comprehensive overview of the foundations, history, and current perspectives of health promotion, as well as its key methods and applications.

*100 Cases in Obstetrics and Gynaecology* Jun 21 2022 A 24-year-old woman is referred from the emergency department with sudden onset of left iliac fossa pain and you are the medic on duty... 100 Cases in Obstetrics and Gynaecology presents 100 commonly seen obstetric and gynaecological scenarios. The patient's history, examination and initial investigations are presented along with questions on the di

**A Dictionary of Epidemiology** Feb 23 2020 Approximately 950 definitions. Intended to "unite epidemiologists around the world in furthering the more precise use of terms... ." Each entry gives brief definitions. References.

Advances in Materials, Mechanical and Industrial Engineering Jan 24 2020 This book presents selected extended papers from The First International Conference on Mechanical Engineering

(INCOM2018), realized at the Jadavpur University, Kolkata, India. The papers focus on diverse areas of mechanical engineering and some innovative trends in mechanical engineering design, industrial practices and mechanical engineering education. Original, significant and visionary papers were selected for this edition, specially on interdisciplinary and emerging areas. All papers were peer-reviewed.

*Lecture Notes on Epidemiology* Mar 01 2023 This book is written with the intention of sharing the basic knowledge of epidemiology with undergraduate students, academicians, medical health practitioners and allied health professionals. It is written in a lecture note format for easy understanding and as a guide to improve the understanding of epidemiology.

*Global Burden of Disease and Risk Factors* May 20 2022 Strategic health planning, the cornerstone of initiatives designed to achieve health improvement goals around the world, requires an understanding of the comparative burden of diseases and injuries, their corresponding risk factors and the likely effects of intervention options. The Global Burden of Disease framework, originally published in 1990, has been widely adopted as the preferred method for health accounting and has become the standard to guide the setting of health research priorities. This publication sets out an updated assessment of the situation, with an analysis of trends observed since 1990 and a chapter on the sensitivity of GBD estimates to various sources of uncertainty in methods and data.

**eHealth** Jun 09 2021 eHealth has revolutionized health care and the practice of medicine. Internet technologies have given the most rural communities access to healthcare services, and automated computer algorithms are improving medical diagnoses and speeding up the delivery of care. Handheld apps, wearable devices, and artificial intelligence lead the way, creating a global healthcare solution that is smarter and more accessible. Read what leaders in the field are doing to advance the use of electronic technology to improve global health.

**Manson's Tropical Diseases** Jan 16 2022 This reference guide to tropical medicine contains a strong practical clinical bias, offering advice on the diagnosis and management of each particular disorder. This edition includes more information on non-infectious tropical disorders, as well as new photographs and colour pictures.

*Lecture Notes on General Surgery* Aug 23 2022

**International Conference on Communication, Computing and Electronics Systems** Jan 04 2021 This book includes high-quality papers presented at the International Conference on Communication, Computing and Electronics Systems 2020, held at the PPG Institute of Technology, Coimbatore, India, on 21-22 October 2020. The book covers topics such as automation, VLSI, embedded systems, integrated device technology, satellite communication, optical communication, RF communication, microwave engineering, artificial intelligence, deep learning, pattern recognition, Internet of Things, precision models, bioinformatics, and healthcare informatics.

**Advances in Unconventional Machining and Composites** Dec 03 2020 This volume presents research papers on unconventional machining (also known as non-traditional machining and advanced manufacturing) and composites which were presented during the 7th International and 28th All India Manufacturing Technology, Design and Research conference 2018 (AIMTDR 2018). The volume discusses improvements on well-established unconventional machining processes and novel or hybrid machining processes as well as properties, fabrication techniques and machining of composite materials. This volume will be of interest to academicians, researchers, and practicing engineers alike.

*Lecture Notes on Radiology* Sep 12 2021 *Lecture Notes on Radiology* provides essential radiological knowledge in a concise and lucid manner specifically for medical students and junior doctors. Placing radiology in a clinical context, it focuses on 120 common conditions with which the medical student should be familiar. The bulk of the book consists of radiographs on the lefthand page with explanations and background information on the righthand page. Also included are descriptions of new imaging techniques such as CT, MRI, ultrasound, Colour Doppler, PET scanning and interventional techniques.

**Epidemiologic Methods for Health Policy** Dec 15 2021 This book is dedicated to the proposition

that health policy should be evidence-based, and that epidemiology can provide much of the evidence. Unlike most textbooks of epidemiology, which focus on etiologic research, it emphasizes the descriptive methods that are more relevant to policy. Part I introduces the subject of policy and its formulation, reviews selected methods that are generally relevant to health policy, and provides an overview of health data and their manipulation. Part II proceeds through the policy cycle: assessing population health status, assessing potential interventions, making policy choices; implementing and finally evaluating policy. At each step it identifies the potential contributions of epidemiology and describes and demonstrates relevant methods. Many practical examples are provided, drawn from several developed countries, but mathematics is kept to an elementary level. A recurring theme is the interaction between health phenomena and the underlying population dynamics, and thus the close relationship of this type of epidemiology to demography.

**Radiology** Nov 26 2022 Radiology Lecture Notes is a succinct yet thorough introduction to the essential imaging techniques used in various clinical situations. This fully revised and updated new edition presents the fundamental core knowledge of film interpretation, specialised radiological investigations, and procedures for imaging specific problems. The book explores common diseases and disorders complemented by good quality radiology images and full-colour illustrations. Concise chapters, organised by body systems cover investigations of the respiratory and gastrointestinal tracts, the cardiovascular and musculoskeletal systems, the liver and pancreas, and many others. Now in its fourth edition, this market-leading guide has been updated to reflect current practices and technologies in the field, featuring new up-to-date content on Computed Tomography (CT) and Magnetic Resonance Imaging (MRI). This practical guide: Provides a basic foundation in the principles and techniques of radiology Offers new content, including up-to-date CT, MRI and nuclear medicine images Features bulleted lists, 'Key Points' boxes, and 'Radiological Investigations' sections throughout the text Radiology Lecture Notes is an ideal study and revision guide for medical students and junior doctors, and will be a useful aid for specialist nurses, radiographers, and radiology department staff.

*Introduction to Materials Management* Nov 21 2019 For courses in Materials Management, Production and Inventory Control, and Logistics taught out of business and industrial technology departments. This is the only text listed in the American Production and Inventory Control Society (APICS) DPIM Exam Content Manual as the text reference for the Basics of Supply Chain Management (BSCM) CPIM certification examination. Written in a simple and user-friendly style, it covers all the basics of supply chain management and production and inventory control.

**Health Education in Context: An International Perspective on Health Education in Schools and Local Communities** Oct 25 2022 This book presents an international perspective on health education and specifically the influence that context has on this aspect of education. The focus includes both formal and non-formal health education and the factors that impact upon its effectiveness, particularly in non-Western and non-English-speaking contexts (i.e., outside the UK, USA, Australia, NZ, etc.). An important feature of the book is that it draws upon the experiences and research of local experts, representing the perspectives of an extremely diverse cohort across the world (22 countries and 2 regions in total). The book addresses topics such as: the development and implementation of health education in different countries; the influence of political, cultural, societal or religious mores; governmental or ministerial drives; economic or other pressures driving curriculum reform; and the influence of external assessment regimes on health education. By embedding discussions of health education in local contexts and representing a diversity of perspectives on this important topic this book highlights both barriers and enablers to improving health education across the globe.

*Notes on Quantum Mechanics* Sep 24 2022 The lecture notes presented here in facsimile were prepared by Enrico Fermi for students taking his course at the University of Chicago in 1954. They are vivid examples of his unique ability to lecture simply and clearly on the most essential aspects of quantum mechanics. At the close of each lecture, Fermi created a single problem for his students. These challenging exercises were not included in Fermi's notes but were preserved in the notes of

his students. This second edition includes a set of these assigned problems as compiled by one of his former students, Robert A. Schluter. Enrico Fermi was awarded the Nobel Prize for Physics in 1938.

**Introduction to Human Nutrition** Nov 02 2020 In this Second Edition of the introductory text in the acclaimed Nutrition Society Textbook Series, Introduction to Human Nutrition has been revised and updated to meet the needs of the contemporary student. Groundbreaking in their scope and approach, the titles in the series: Provide students with the required scientific basics of nutrition in the context of a systems and health approach Enable teachers and students to explore the core principles of nutrition, to apply these throughout their training, and to foster critical thinking at all times. Throughout, key areas of knowledge are identified Are fully peer reviewed, to ensure completeness and clarity of content, as well as to ensure that each book takes a global perspective Introduction to Human Nutrition is an essential purchase for undergraduate and postgraduate students of nutrition/nutrition and dietetics degrees, and also for those students who major in other subjects that have a nutrition component, such as food science, medicine, pharmacy and nursing. Professionals in nutrition, dietetics, food science, medicine, health sciences and many related areas will also find much of great value within this book.

*Hutchison's Clinical Methods, An Integrated Approach to Clinical Practice With STUDENT CONSULT Online Access*, 23 Apr 19 2022 A textbook on clinical skills. It provides a source of learning and reference for undergraduate medical students and postgraduate doctors. It seeks to teach an integrated approach to clinical practice, so that new methods and investigations are grafted onto established patterns of clinical practice, rather than added on as something extra.

**Recent Advances in Sustainable Technologies** Dec 23 2019 This book presents select proceedings of the International Conference on Advances in Sustainable Technologies (ICAST 2020), organized by Lovely Professional University, Punjab, India. The topics covered in this book are multidisciplinary in nature. The primary topics included in the book are from the domains of automobile engineering, mechatronics, material science and engineering, aerospace engineering, bio-mechanics, biomedical instrumentation, mathematical techniques, agricultural engineering, nuclear engineering, physics, biodynamic modelling and ergonomics etc. The contents of this book will be beneficial for beginners, researchers, and professionals alike.

**Epidemiology in Medicine** Oct 13 2021 Harvard Medical School, Boston. Textbook for medical and public health students.

Public Health Law and Ethics Jul 10 2021 Now revised and expanded to cover today's most pressing health threats, Public Health Law and Ethics probes the legal and ethical issues at the heart of public health through an incisive selection of government reports, scholarly articles, and relevant court cases. Companion to the internationally acclaimed text Public Health Law: Power, Duty, Restraint, this reader can also be used as a stand-alone resource for students, practitioners, scholars, and teachers. It encompasses global issues that have changed the shape of public health in recent years including anthrax, SARS, pandemic flu, biosecurity, emergency preparedness, and the transition from infectious to chronic diseases caused by lifestyle changes in eating and physical activity. In addition to covering these new arenas, it includes discussion of classic legal and ethical tensions inherent to public health practice, such as how best to balance the police power of the state with individual autonomy.

*Clinical Anaesthesia* Dec 27 2022 Clinical Anaesthesia Lecture Notes provides a comprehensive introduction to the modern principles and practices of anaesthesia for medical students, trainee doctors, anaesthetic nurses and other health professionals working with anaesthetists. This fifth edition has been fully updated to reflect changes in clinical practice, guidelines, equipment and drugs. Key features include: • A new chapter on the roles of the anaesthetist • Increased coverage of the peri-operative management of the overweight and obese patient, as well as an introduction to the fundamental aspects of paediatric anaesthesia • Coverage of recent developments within the specialty, including the rapidly growing recognition of the importance of non-technical skills (NTS), and the management of some of the most common peri-operative medical emergencies • Links to further online resources • A companion website at [www.lecturenoteseries.com/anaesthesia](http://www.lecturenoteseries.com/anaesthesia) featuring

interactive true/false questions, SAQs, and a list of further reading and resources Full-colour diagrams, photographs, as well as learning objectives at the start of each chapter, support easy understanding of the knowledge and skills of anaesthesia, allowing confident transfer of information into clinical practice.

**Oxford Textbook of Medical Education** Apr 07 2021 Providing a comprehensive and evidence-based reference guide for those who have a strong and scholarly interest in medical education, the Oxford Textbook of Medical Education contains everything the medical educator needs to know in order to deliver the knowledge, skills, and behaviour that doctors need. The book explicitly states what constitutes best practice and gives an account of the evidence base that corroborates this.

Describing the theoretical educational principles that lay the foundations of best practice in medical education, the book gives readers a thorough grounding in all aspects of this discipline. Contributors to this book come from a variety of different backgrounds, disciplines and continents, producing a book that is truly original and international.

**World Development Report 1978** Aug 31 2020 This first report deals with some of the major development issues confronting the developing countries and explores the relationship of the major trends in the international economy to them. It is designed to help clarify some of the linkages between the international economy and domestic strategies in the developing countries against the background of growing interdependence and increasing complexity in the world economy. It assesses the prospects for progress in accelerating growth and alleviating poverty, and identifies some of the major policy issues which will affect these prospects.

**Anomalies and Curiosities of Medicine** Apr 26 2020 DigiCat Publishing presents to you this special edition of "Anomalies and Curiosities of Medicine" by George M. Gould, Walter L. Pyle. DigiCat Publishing considers every written word to be a legacy of humankind. Every DigiCat book has been carefully reproduced for republishing in a new modern format. The books are available in print, as well as ebooks. DigiCat hopes you will treat this work with the acknowledgment and passion it deserves as a classic of world literature.

**Lecture Notes on Human Physiology** Mar 18 2022 Lecture Notes on Human Physiology provides a concise text for students of medicines, dentistry, pharmacy, physical education, physiotherapy, nutrition, and science who are taking a physiology course for the first time. The text has been carefully edited to ensure uniformity of presentation from the expert contributors and each section is preceded by a synopsis to provide easy access to information.

**Child Health Nursing** Jul 22 2022 For courses in Pediatric Nursing. A comprehensive survey of family-centered pediatric nursing care Child Health Nursing: Partnering with Children & Families promotes excellence in nursing care for infants, children, and adolescents--in hospitals and in the community. It focuses on the importance of partnering with families to adapt care plans for children based on their age, health status, and social and cultural influences. The text considers the impact of contemporary care environments on nursing practice, both in health promotion and in the care of children with acute or chronic health conditions. By offering industry best practices and practical applications, the book encourages students to apply evidence-based findings and clinical reasoning to planning superior care. The updated 3rd edition explains how modern nursing practice is affected by reforms to healthcare and its delivery--such as electronic health records, new approaches to chronic and acute condition management, and a focus on prevention. To support safe, effective, and innovative care, this edition draws on the latest recommendations of NANDA International diagnoses, Nursing Intervention Classifications (NIC), Nursing Outcomes Classifications (NOC), and Healthy People 2020. Also available with MyLab Nursing MyLab(tm) Nursing is an online self-study and class preparation program designed to engage students and improve results. Its personalized learning path helps students think like nurses as they move beyond memorization to true understanding through application. Learn more. Note: You are purchasing a standalone product; MyLab Nursing does not come packaged with this content. Students, if interested in purchasing this title with MyLab Nursing, ask your instructor to confirm the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information. If you would like to purchase

both the physical text and MyLab Nursing search for: 0134874439 / 9780134874432 Child Health Nursing Plus MyNursingLab with Pearson eText -- Access Card Package Package consists of: 0134624726 / 9780134624723 Child Health Nursing 013486946X / 9780134869469 MyNursingLab with Pearson etext -- Access Code -- for Child Health Nursing

*Basic Epidemiology* Mar 06 2021 Basic epidemiology provides an introduction to the core principles and methods of epidemiology, with a special emphasis on public health applications in developing countries. This edition includes chapters on the nature and uses of epidemiology; the epidemiological approach to defining and measuring the occurrence of health-related states in populations; the strengths and limitations of epidemiological study designs; and the role of epidemiology in evaluating the effectiveness and efficiency of health care. The book has a particular emphasis on modifiable environmental factors and encourages the application of epidemiology to the prevention of disease and the promotion of health, including environmental and occupational health.

**Paediatrics Lecture Notes** Aug 11 2021 Paediatrics Lecture Notes covers the core aspects of caring for children in clinical practice, offering concise yet detailed information on examination, emergency care, nutrition, immunisation, infant and adolescent health, and more. Designed for medical students and junior doctors alike, this compact and easy-to-use textbook guides readers through each essential aspect of paediatric care, from normal and abnormal childhood development, to cardiology, gastroenterology and metabolic disorders. Throughout the text, key points, practice questions, treatment guides, learning logs and self-assessment tests help prepare readers for paediatric rotations and clinical examinations. Now in its tenth edition, this classic textbook features new and updated information that reflects changes in practice and recent advances in child and adolescent health. Providing a clear and accessible overview of paediatrics, this invaluable single-volume resource: Presents an overview of paediatrics, including expanded materials on genetics, differential diagnosis, investigation for common presentations, and treatment and management of various conditions Offers real-life advice and practical ways of gaining experience in paediatrics and career development Includes OSCE stations, examination review tips, extended matching questions and additional online learning resources Features an enhanced Symptom Sorter to quickly determine which conditions should feature in differential diagnoses Paediatrics Lecture Notes, Tenth Edition is a must-have guide for medical students and junior doctors in paediatric placements and preparing for clinical examinations.

**Handbook IMCI** May 08 2021 This handbook gives a detailed explanation of the WHO/UNICEF guidelines for the integrated management of childhood illness (IMCI). The guidelines set out simple and effective methods for the prevention and management of the leading causes of serious illness and mortality in young children. They promote evidence-based assessment and treatment using a syndromic approach that supports the rational, effective and affordable use of drugs. The handbook gives an overview of the IMCI process and includes technical guidelines to assess and classify a sick young infant aged from one week up to two months, and a sick young child aged two months to five years; as well as guidance on how to identify treatment; communicate and counsel; and give follow-up care.
