**Plunkett's InfoTech Industry Almanac presents a complete analysis of the technology business, including hardware, software, networks, computers, peripherals, services and global trade. This market research tool includes our analysis of the major trends affecting the industry, from the global PC and server market, to consumer and enterprise software, to super computers, open systems such as Linux, web services and network equipment. In addition, we provide major statistical tables covering the industry, from computer sector revenues, to broadband subscribers, to semiconductor industry production. No other source provides this book's easy-to-understand comparisons of growth, expenditures, technologies, imports/exports, corporations, research and other vital subjects. You get our in-depth profiles on the top 500 global InfoTech companies-objective analysis of the largest and most exciting companies in: Computer Hardware, Computer Software, Internet Services, E-Commerce, Networking, Semiconductors, Memory, Storage, Information Management and Data Processing. Our research effort includes an exhaustive study of new technologies and discussions with experts at dozens of innovative tech companies. Purchasers will find a form in the book enabling them to**

**register for 1-year, 1-seat online access to tools at Plunkett Research Online, including the ability to view the market research/industry trends section and industry statistics. You have access, at no additional charge, to the very latest data posted to Plunkett Research Online. Online tools enable you to search and view selected companies, and then export selected company contact data, including executive names. You'll find a complete overview, industry analysis and market research report in one superb, value-priced package. - Minerals Yearbook, 2014, V. 3: Area Reports: International: Asia and the Pacific. Volume III, Area Reports: International, is published as four separate reports. These regional reports contain the latest available minerals data on more than 180 foreign countries and discuss the importance of minerals to the economies of these nations and the United States. Each report begins with an overview of the region's mineral industries during the year. It continues with individual country chapters that examine the mining, refining, processing, and use of minerals in each country of the region and how each country's mineral industry relates to U.S. industry. Most chapters include production tables and industry structure tables, information about Government policies and programs that affect the country's mineral industry, and an outlook section. The evidence is clear: energy efficiency has played, and continues to play, a large and valuable role in the sustainable development of the global economy. The energy demand that is avoided as a result of steady improvements in the efficiency of energy-using stock such as buildings, cars and appliances is larger than the total final consumption from coal, oil or gas in IEA member countries. The market for energy efficiency investments is very large - estimated between USD 310 billion and USD 360 billion in 2011 - and this market is producing results: total final consumption in IEA countries is estimated to be 60% lower today because of energy efficiency improvements over the last four decades. Since 2001, investments in energy efficiency in 18 IEA countries have helped to avoid over 1 700 million tonnes of oil-equivalent from being consumed. This year's report includes an in-depth look at energy efficiency developments in the transport sector and in finance. Huge new waves of demand for mobility are emerging in OECD non-member economies, bringing with them the challenges of pollution and congestion already faced in OECD countries. Fuel-economy standards and other policies are expected to help shape the market for more energy-efficient vehicles in the years to come. In financial markets, energy efficiency is becoming an important segment in its own right, aided by a growing range of financial products. We document the growing scale and diversity of energy efficiency products and actors. Finally, this report reviews national energy efficiency market developments in various jurisdictions around the world, including Canada, China, the European Union, India and Italy. These case studies provide snapshots of specific energy efficiency sub-markets, and insights into how these markets may evolve in the coming years. This**

**2014 Article IV Consultation highlights that in 2013, Estonia's recovery from the crisis continued but at a slower pace. Real GDP growth was 0.8 percent, with private consumption providing the main support, although net exports made a negative contribution. Inflation declined to about 3½ percent, but stayed above the euro average. Public finances remained strong, with a fiscal deficit of 0.2 percent of GDP and a gross public debt of 10 percent of GDP. Real GDP growth is projected at 2.4 percent in 2014, rising toward expected potential growth of 3 to 3.5 percent in the medium term. This 2014 Article IV Consultation highlights that the euro area recovery is taking hold. Real output has expanded for four consecutive quarters, and financial market sentiment has improved markedly. Complementary policy actions have supported demand, boosted investor confidence, and eased financial conditions. At the national level, governments have made further progress repairing sovereign and bank balance sheets and implementing structure reforms to restore competitiveness. At the area-wide level, the ECB has taken a wider range of measures to support demand and address fragmentation. Over the medium term, there is a risk of stagnation, which could result from persistently depressed domestic demand owing to deleveraging, insufficient policy action, and stalled structural reforms. As the supply revolution enters a new phase, oil's role in the global energy mix is being redefined. More than ever, getting a handle on these developments is key to ensuring that energy security is maintained or enhanced, investment is appropriately targeted and resources are optimally leveraged. That makes the Medium-Term Oil Market Report's insights into the oil market for the next five years essential reading for energy industry and market stakeholders, policy makers and all those interested in energy and the broader economy. This book examines the non-conventional supply revolution that is transforming the North American oil patch that has been widely recognised as a game changer for the oil markets and looks at how this transformation is playing out against the backdrop of other relevant market developments. It asks how long can the US oil boom can be expected to last, and what will it take for other countries to replicate this success story. It explores what is holding up OPEC supply growth, what OPEC production capacity will look like by the end of the decade, and how the market will absorb growing condensate and natural gas liquids supplies in the United States and elsewhere. It examines whether the recovery in global oil demand will gain momentum, or if "peak demand" is just around the corner and whether oil is losing its grip on transport fuels. It also examines whether US progress towards oil independence is a step forward or a step back for crude markets and for Middle East downstream forays. And finally it explores who will be the winners and losers of global refining capacity growth, and how will it affect the way refined products are delivered to consumers. The second issue in a new series, Global Financial Development Report 2014 takes a step back and re-examines financial inclusion from the perspective of**

**new global datasets and new evidence. It builds on a critical mass of new research and operational work produced by World Bank Group staff as well as outside researchers and contributors. KEY ISSUES The economy has rebounded strongly and prospects are promising. Headwinds that previously held back the economy—relating notably to credit conditions and confidence—have eased. Nonetheless, sustaining strong growth will depend on a recovery in productivity growth and further demand rebalancing. The housing market brings risks of financial vulnerabilities. Sterling is moderately overvalued. The overall policy mix is appropriate, but policy settings might need to be adjusted quickly. Effective monetary conditions are very supportive, compensating for ongoing fiscal consolidation: ? Accommodative monetary policy is appropriate for now, given weak inflation pressures, but policy might need to be adjusted quickly if inflation takes off. Interest rate increases may also need to be considered if macroprudential tools are insufficient to deal with financial stability risks from the housing market. ? The authorities have recently implemented macroprudential measures, including limiting the share of high loan-to-income mortgages lenders can issue, establishing them as the primary defense against housing-related risks. They should stand ready to tighten these limits should current settings prove ineffective in reining in those risks. ? A lasting solution to house price pressures requires measures to address insufficient supply. Significant planning reforms have been undertaken, but political consensus is needed to make further progress in this area. ? High deficits and rising debt mean that fiscal consolidation needs to continue. The pace and composition of deficit reduction over the near term is appropriate. Further reducing the deficit over the medium term will be challenging; both revenue and expenditure measures should be considered, keeping in mind both equity and efficiency. ? The financial sector is more robust, the new financial architecture is settling in, and significant changes have been made to banks' liquidity backstops to adapt to changing needs. Implementing macroprudential policy will be a test of the new architecture. Some problems—such as Too Important To Fail and bank misconduct— persist, and new challenges, such as from shadow banking, are emerging.**

**"Eclipses are powerful astro-trading tools. They're the single most significant factor in profitable market timing!" The latest breakthrough publication from Tim Bost and Jim Cummins in the widely-acclaimed ongoing series of monographs on Solar Eclipses sets a new standard for astro-forecasting! Put the information in this book to work in your own trading and you'll start to unlock the secrets of the hidden planetary dynamics that are the true forces driving the movements of the markets. The astro-trading advantage will put you light years ahead of the traders that rely solely on the tools of conventional technical analysis of market trends. And when you open up the incredible power of eclipses in your own trading, you'll discover profitable opportunities that most other traders don't even know exist! THE EFFECTS OF THIS ECLIPSE LAST FOR**

**MONTHS TO COME!** This hard-hitting special research report from Tim Bost and Jim Cummins reveals all the key information you need on the dramatic effects of the solar eclipse of October 23, 2014. Once again, Tim Bost's world-famous wisdom in financial astrology brings you unique insights that you simply won't find anywhere else. With the incredible information you'll find in these pages, you'll be ready to turn tomorrow's market moves into profitable opportunities! And that's not all! Jam-packed with charts and illustrations, this new publication takes a step beyond the previous reports in this widely-acclaimed series, with a special section on the global geopolitical impact of the solar eclipse contributed by expert mundane astrologer Jim Cummins. Jim's expertise has proven to be a valuable resource for members at the [FinancialCyclesWeekly.com](http://FinancialCyclesWeekly.com) website, and in these pages he drills into the national charts and personal horoscopes of world leaders that will be in the news in the months to come, because of the big impact of this stunning solar eclipse. The solar eclipse on October 23, 2014 is much more than a one-day event. It sets up a resonant field that has an enduring impact on geopolitics, economic trends, and price movements in stocks, commodities, and the financial markets. That's why this book is such a valuable money-making resource-- it's packed with profitable information you can use in the markets long after the eclipse itself! "In its pages you'll find: " state-of-the-art astro-trading techniques expert horoscope interpretations dozens of charts, maps & illustrations month-by-month market analysis throughout the end of 2014 and the start of 2015 historical economic & cultural perspectives the countries most impacted by the eclipse path strange connections with eclipses of the past precise activation dates for trend changes potential flash points for the markets what's ahead for stocks, Gold, the dollar, the yen & key commodities tips about key social and economic trends key stocks for profitable trading opportunities AND THERE'S MORE! "In this fascinating report you'll learn: " How you can score big trading with eclipses How a unique eclipse trading strategy pulled in market gains fast How the path of this solar eclipse impacts an important commodity How the current solar eclipse will impact key currencies How you can identify eclipse activation dates for turning points in the markets What's going on with Crude Oil, Silver, and COMEX Gold How you can master the most important skill for trading What's ahead for BitCoin And much, much more! Packed with amazing insights and plenty of practical tips, this book will give you the astro-trading advantage now! Plunkett's Sports Industry Almanac covers the entire sports industry, providing competitive intelligence, market research and business analysis. In addition to major sporting leagues and teams, related sectors include sporting goods manufacturing, sports apparel, sporting events broadcasting and retailing. Sports and professional athletes attract companies interested in endorsements, advertising, merchandising and marketing opportunities. Our coverage includes sports business trends analysis and

**sports industry statistics. Topics include major leagues and their revenues, sports equipment and technologies, sports broadcasting, pay per view, Internet broadcasting, new stadiums, sports league expansion into China and sports related advertising. We also include a sports business glossary and a listing of sports industry contacts, such as industry associations. Next, we profile the world's top 350 teams, leagues, sporting goods retailers, sporting equipment manufacturers and sports sector companies. Profiles include business descriptions and up to 27 executives by name and title. Purchasers will find a form in the book enabling them to register for 1-year, 1-seat online access to tools at Plunkett Research Online, including the ability to view the market research/industry trends section and industry statistics. You have access, at no additional charge, to the very latest data posted to Plunkett Research Online. Online tools enable you to search and view selected companies, and then export selected company contact data, including executive names. You'll find industry analysis, an overview and market research report of the sports, sporting goods, sports marketing, stadiums, teams and leagues businesses in one value-priced package. This reference book is a complete guide to the trends and leading companies in the engineering, research, design, innovation and development business fields, covering those firms that are dominant in engineering-based design and development, as well as leaders in technology-based research and development. In this carefully-researched volume, you'll get all of the data you need on the Engineering & Research Industry, including: market analysis, complete industry basics, trends, patents, intellectual property, funding, research and development (R&D) data, growth companies, investments, emerging technologies, CAD, CAE, CAM and more. The book also contains major statistical tables. In addition, you'll get expertly written profiles of 500 top global Engineering and Research firms-the largest, most successful corporations in all facets of Engineering and Research, all cross-indexed by location, size and type of business. These corporate profiles include contact names, addresses, Internet addresses, growth plans, finances, research, marketing, technology, acquisitions and more. This book will put the entire Engineering and Research industry in your hands. Purchasers will find a form in the book enabling them to register for 1-year, 1-seat online access to tools at Plunkett Research Online, including the ability to view the market research/industry trends section and industry statistics. You have access, at no additional charge, to the very latest data posted to Plunkett Research Online. Online tools enable you to search and view selected companies, and then export selected company contact data, including executive names. You'll find a complete overview, industry analysis and market research report in one superb, value-priced package. The UNECE/FAO Forest Products Annual Market Review, 2013-2014 provides general and statistical information on forest products markets and related policies in the UN Economic Commission for Europe region**

**(Europe, North America and the Commonwealth of Independent States). The Review begins with an overview chapter, followed by analysis of government and industry policies and market-based implements affecting forest products markets. The third chapter is on innovation in the forest sector. Five chapters are based on annual country-supplied statistics, describing: wood raw materials, sawn softwood, sawn hardwood, wood-based panels, and paper, paperboard and woodpulp. Additional chapters discuss markets for wood energy, value-added wood products, and housing. In each chapter, production, trade and consumption are analysed and relevant material on specific markets is included. Tables and graphs provided throughout the text present summary information. Green technology initiatives are becoming pervasive around the world and in virtually all industry sectors. For example, construction projects of all types are becoming green at a rapid clip, from new homes to giant office towers. Consumer products and food products are emphasizing green components. Even textile and apparel makers are emphasizing recycled, natural fabrics. Investment in green facilities and technologies will grow exponentially once a tipping point occurs that proves true economy of scale and solid return on investment. This carefully-researched book covers exciting trends in green technologies and supply chains, manufacturing, research, development and businesses of all types. It includes a thorough market analysis as well as our highly respected trends analysis. You'll find a complete overview, industry analysis and market research report in one superb, value-priced package. It contains thousands of contacts for business and industry leaders, industry associations, Internet sites and other resources. This book also includes statistical tables, an industry glossary and thorough indexes. The corporate profiles section of the book includes our proprietary, in-depth profiles of the 300 leading companies in all facets of the green technology sector. Purchasers will find a form in the book enabling them to register for 1-year, 1-seat online access to tools at Plunkett Research Online, including the ability to view the market research/industry trends section and industry statistics. You have access, at no additional charge, to the very latest data posted to Plunkett Research Online. Online tools enable you to search and view selected companies, and then export selected company contact data, including executive names. You'll find a complete overview, industry analysis and market research report in one superb, value-priced package. Commodity Trader's Almanac is now Seasonal Sector Trades! A precise seasonal investment strategy, backed by research and hard data Seasonal Sector Trades: 2014 Q2 Strategies is a comprehensive strategy calendar detailing the trades to evaluate at key points in April, May, and June, based on historic tendencies and cycles. Concise and to the point, this report alerts readers to major trade opportunities by describing monthly price tendencies for each market, along with in-depth analysis of major trades and the underlying market conditions. The trading ideas are accompanied by data that allows for**

***informed trading decisions, and precise dates are given for trades with the highest historic profitability percentages. Virtually every market displays seasonal tendencies due to weather, harvest cycles, or even human behavior. None of these patterns are 100 percent accurate, but they do provide a framework for assessing opportunity and targeting potential trades. The culmination of years of painstaking research, Seasonal Sector Trades offers expert guidance backed by hard data. Readers will gain insight and actionable advice on the best trades of the season, covering stocks, bonds, currencies, energy, metals, grains, soft commodities, and meats. This report contains crucial information traders need to take advantage of seasonal trends, including features like: Historical tendencies for all markets throughout the calendar year Trades to monitor throughout each month Precise entry and exits for trades with the best performance Trading tips and strategies to maximize profits A complete seasonal investment strategy can take years to research and compile. Markets must be monitored and analyzed, and their behavior must be correlated with outside factors. Along the way, opportunities are missed and money is lost. This report contains the results of all that work in an already-complete format. With high-level analysis and specialist insight, Seasonal Sector Trades is the industry's most authoritative guide to the seasonal tendencies of every major market. The report aims at identifying and analyzing 100 modern and contemporary African artists who can be considered as top investments, both from a historical point of view and from a pure market perspective. For each artist covered, our research describes qualitative and quantitative factors that help to understand how and why to collect modern & contemporary art from Africa. With the insights of key art players alike Jean Hubert Martin(curator), Sindika Dokolo(collector), Prince Yemisi Shyllon(collector), Bisi Silva(curator), Robert Devereux(collector), Giles Peppiatt(director, Bonhams), Alistair Hicks(Deutsche Bank senior art advisor), Christopher Spring(curator, British Museum***

***The “Golden Land”, officially known as the Republic of the Union of Myanmar and formerly as Burma, has undergone dramatic reforms in recent years under the administration of President U Thein Sein. The rapid transition from a military junta to an open economy has surprised the global community and will see Myanmar assume the ASEAN chair for the first time in 2014. Known as the ‘last frontier market’ Myanmar is rich in natural resources and has an established extractive industries sector, with one of the world’s oldest continuously producing oil fields. The country also enjoys significant mineral resources which remain greatly under explored by international mining firms - something the government is proactively trying to change. The easing of economic sanctions has accelerated the nation’s economic growth, but Myanmar still faces political challenges, including ongoing ethnic conflict and religious tensions. However, with greater access to international markets and a growing number of business opportunities, investors are cautiously optimistic about the***

**country's future. Containerized data center reduces the complexity to assign and integrate separate individual modules to create a complete solution. This data center is easy to deploy and assemble at any location as it is compact in size as compared to the traditional brick and mortar model. Use of advanced cooling and power systems used in data centers ensures optimum utilization of energy and a reduced power effective usage (PUE), which in turn reduces the operational cost. This research report analyzes this market on the basis of its market segments, major geographies, and current market trends. The sultanate's economy continues to enjoy the benefits of petroleum wealth, which has provided budget surpluses in most years and served as a backbone for growth. However, planning is well under way for an era in which oil will not be the main economic driver, with the twin goals of diversification and creating an increased number of private sector jobs at the top of the government's current agenda. Indeed, in recent years, the non-OPEC oil exporter's economy has been undergoing a steady transformation, reorienting from oil toward a more diverse set of service and industry-based economic activities. So far, progress has been promising. In 2011 oil and gas accounted for 38.8% of GDP. With the continuation of higher-than-expected energy prices in 2012, the government has increased economic investments accordingly. These investments, which include infrastructure, social programmes and small-business development, are aimed toward better preparing the country for its post-fossil fuel future. This 2014 Article IV Consultation highlights that economic growth in Spain has resumed, and unemployment is falling. Exporters are gaining market share, and the current account is in surplus for the first time in decades. Financial conditions have improved sharply, with sovereign yields at record lows. Business investment is rebounding strongly and private consumption has also started to recover owing to improved employment prospects and rising confidence. Executive Directors have welcomed the improving Spanish economy. They have stressed that labor market reform should be accompanied by product and service market liberalization to maximize the gains to growth and jobs. KEY ISSUES The economy is embarking on sustainable growth, but the main challenge will be to boost long-run growth by structural reforms and reorienting fiscal policy. Supply-side slowdowns in the energy sector are ending, while available evidence suggests non-energy growth is robust and economic slack is being used up. Non-energy growth should settle around a long-term 2-2½ percent per annum rate, while new energy sector investment may begin to bear significant fruit over the medium term. Headline inflation is trending down (in part for statistical reasons), while core inflation remains moderate. Domestic risks are to the upside. The main medium-term external risk would be a sustained decline in energy prices. With excess capacity in the labor market significantly diminished, the time is drawing near for policy tightening. Although ad hoc measures will reduce the budget deficit this fiscal year, the underlying baseline**

***suggests a growing overall imbalance and unsustainable debt accumulation on unchanged policies, although the authorities have announced their intention to pursue fiscal consolidation. The CBTT will have to carefully consider how to tighten the monetary stance given high excess bank liquidity. Sustainable growth requires re-configuring fiscal policy, although achieving this will be challenging for the time being in view of national elections due in 2015. Ad hoc measures should be replaced with policies that durably improve non energy-based revenues and spending. The proceeds from extracting non-renewable resources should be saved and invested as a stepping stone to lasting prosperity. Fuel subsidies need to be curtailed and social programs rationalized. Non-energy sector tax bases should be broadened and tax expenditures limited. Greater flexibility is needed in the foreign exchange market. Despite sizable reserves, foreign exchange shortages, which impose unnecessary economic costs, have recurred. There is no concrete evidence of either a parallel market or arrears on foreign exchange, and the CBTT has recently sold foreign exchange with the objective to clear the market, but a recurrence of the situation could indicate the existence of an exchange restriction. The CBTT can address the problem through increased flexibility in the foreign exchange system. Structural reforms are underway, but more are needed to foster a diversified economic base. Financial sector reform is advancing, including expanding the CBTT's regulatory perimeter to systemically important non-bank financial institutions. Recent streamlining of regulations that have hampered business activity is welcomed, but needs to be further advanced. Government operations are increasingly hamstrung by a poorly functioning civil service. Perceptions of corruption can be reduced by adopting a transparent procurement process. Programs that mask underemployment should be replaced with more effective training. Growing statistical shortcomings have rendered the conduct of surveillance ever harder, and must be addressed. - Minerals Yearbook, 2014, V. 3: Area Reports: International: Asia and the Pacific. Volume III, Area Reports: International, is published as four separate reports. These regional reports contain the latest available minerals data on more than 180 foreign countries and discuss the importance of minerals to the economies of these nations and the United States. Each report begins with an overview of the region's mineral industries during the year. It continues with individual country chapters that examine the mining, refining, processing, and use of minerals in each country of the region and how each country's mineral industry relates to U.S. industry. Most chapters include production tables and industry structure tables, information about Government policies and programs that affect the country's mineral industry, and an outlook section. This report is the primary outcome from Part I of the project "Towards a Nordic textile strategy - Collection, sorting, reuse and recycling of textiles" initiated by the Nordic Waste Group (NAG). The report for Part 2 will be published in***

**December 2014. This report summarizes the work carried out in 2013. The three subreports will be the basis for the work to be performed in 2014. The reports for 2013 are:**

- International market survey of textile flows in the Nordic region and the market for collection, sorting, preparing for reuse, reselling and waste management of textiles.**
- Collection and sorting systems A total of 19 collection systems are compared for collection flows, contamination levels, cost, suitability of collected textile and availability for the consumer. Four sorting systems are described.**
- Technology review of sorting and recycling of textiles that describes available and future technology. The report is part of the Nordic Prime Ministers' overall green growth initiative: "The Nordic Region - leading in green growth." Read more in the web magazine "Green Growth the Nordic Way" at [www.norden.org/greengrowth](http://www.norden.org/greengrowth).**

**As the supply revolution enters a new phase, oil's role in the global energy mix is being redefined. More than ever, getting a handle on these developments is key to ensuring that energy security is maintained or enhanced, investment is appropriately targeted and resources are optimally leveraged. That makes the Medium-Term Oil Market Report's insights into the oil market for the next five years essential reading for energy industry and market stakeholders, policy makers and all those interested in energy and the broader economy. This book examines the non-conventional supply revolution that is transforming the North American oil patch that has been widely recognised as a game changer for the oil markets and looks at how this transformation is playing out against the backdrop of other relevant market developments. It asks how long can the US oil boom can be expected to last, and what will it take for other countries to replicate this success story. It explores what is holding up OPEC supply growth, what OPEC production capacity will look like by the end of the decade, and how the market will absorb growing condensate and natural gas liquids supplies in the United States and elsewhere. It examines whether the recovery in global oil demand will gain momentum, or if "peak demand" is just around the corner and whether oil is losing its grip on transport fuels. It also examines whether US progress towards oil independence is a step forward or a step back for crude markets and for Middle East downstream forays. And finally it explores who will be the winners and losers of global refining capacity growth, and how will it affect the way refined products are delivered to consumers. A guide to a multi-disciplinary approach that includes perspectives from noted experts in the energy and utilities fields**

**Advances in Energy Systems offers a stellar collection of articles selected from the acclaimed journal Wiley Interdisciplinary Review: Energy and Environment. The journal covers all aspects of energy policy, science and technology, environmental and climate change. The book covers a wide range of relevant issues related to the systemic changes for large-scale integration of renewable energy as part of the on-going energy transition. The book addresses smart energy systems technologies,**

**flexibility measures, recent changes in the marketplace and current policies. With contributions from a list of internationally renowned experts, the book deals with the hot topic of systems integration for future energy systems and energy transition. This important resource: Contains contributions from noted experts in the field Covers a broad range of topics on the topic of renewable energy Explores the technical impacts of high shares of wind and solar power Offers a review of international smart-grid policies Includes information on wireless power transmission Presents an authoritative view of micro-grids Contains a wealth of other relevant topics Written forenergy planners, energy market professionals and technology developers, Advances in Energy Systems is an essential guide with contributions from an international panel of experts that addresses the most recent smart energy technologies. Are you looking for house for sale or home for rent, flats for sale or apartments for rent, plot for sale, upper or lower portions, farm houses, commercial shop for sale or retail for rent, agricultural land or investment opportunities in Lahore, Islamabad, Karachi or other cities in Pakistan? Then this is the right place for you! Here is where Pakistan's top real estate agents and a huge number of potential buyers meet. We care about finding you the house, flat, plot or shop for sale or rent or the property you want to invest in through secure and safe deals... Find Properties in the top locations of Pakistan Lahore is currently the most demanded city of Pakistan for property seekers. Areas like DHA Defence, DHA EME, Bahira Town, Model Town, Cantt are being highly developed and there are hundreds of properties available for sale and rent. Even posh area like DHA Defence has sometimes amazing, cheap & affordable property buying offers. DHA Karachi esp Phase 7 and 9 are in huge demand. Flat for sale in Karachi is also in demand. In Islamabad, Sector E-11, B-17 and F-11 have great offers. Other cities in demand are Rawalpindi, Faisalabad, Gwadar, Muree, Sialkot, Hyderabad, Multan and Gujranwala. Why you should choose us as a buyer? We offer excellent services to our clients. Our attentive real estate experts and webmasters will answer your questions related to our website or existing properties on the site as soon as it gets. We have extensive search options that will help you find the exact property you are looking for in your desired area. You can contact us via phone, email or call the property agents directly and get more details about a specific property. It is the simplest, most organized and fastest way to your dream property that will fulfill your life. Why you should choose our marketplace as a seller, developer or agent? Property listing on an online marketplace has never been faster and easier. Here you can upload your property listing in minutes, provide very precise information like price, city, facilities, size, photos etc. that will give much better overview to the potential customers. You can manage your agent profile, business information in your site and reach a large number of customers interested in buying properties in Pakistan. So What are you Waiting for? Join us now!
