*Ordinary Places/Extraordinary Events* Mar 19 2020 Clara Irazábal and her contributors explore the urban history of some of Latin America's great cities through studies of their public spaces and what has taken place there. The avenues and plazas of Mexico City, Havana, Santo Domingo, Caracas, Bogotá, São Paulo, Lima, Santiago, and Buenos Aires have been the backdrop

for extraordinary, history-making events. While some argue that public spaces are a prerequisite for the expression, representation and reinforcement of democracy, they can equally be used in the pursuit of totalitarianism. Indeed, public spaces, in both the past and present, have been the site for the contestation by ordinary people of various stances on

democracy and citizenship. By exploring the use and meaning of public spaces in Latin American cities, this book sheds light on contemporary definitions of citizenship and democracy in the Americas. *Interiores del Polígono Central de Santo Domingo* Aug 04 2021 **El Polígono Central de la ciudad de Santo Domingo** Nov 14 2019 **Archivos de arquitectura**

**Caribbean Modernist**

**Architecture** Feb 27 2021 In  
February and March 2008, the

International Program and the Department of Architecture and Design at The Museum of Modern Art, New York, organized the Museum's first symposium on the modernist architecture of the Caribbean and bordering Latin American countries, in collaboration with the Caribbean School of Architecture at the University of Technology, Kingston, Jamaica. Topics included regional and international legacies, preservation, environmental sustainability and urban planning, as they relate to modernist architectural history and contemporary practice. The presenters were leading architects and local

architectural historians. This illustrated volume presents papers from this symposium by Silvia Arango, Mervyn Awon, Marcus Barinas, Carlos Brillembourg, Jackson Burnside, Jean Doucet, Belmont Freeman, David Gouverneur, Ronny Lobo, Louise Noelle, Mark Raymond, Bruno Stagno and L. Mark Taylor, in both English and Spanish.

*Latin American Modern  
Architectures* Sep 24 2020

Latin American Modern Architectures: Ambiguous Territories has thirteen new essays from a range of distinguished architectural historians to help you understand the region's rich

and varied architecture. It will also introduce you to major projects that have not been written about in English. A foreword by historian Kenneth Frampton sets the stage for essays on well-known architects, such as Lucio Costa and Félix Candela, which will show you unfamiliar aspects of their work, and for essays on the work of little-known figures, such as Uruguayan architect Carlos Gómez Gavazzo and Peruvian architect and politician Fernando Belaúnde Terry. Covering urban and territorial histories from the nineteenth and twentieth centuries, along with detailed building analyses, this book is your best source for

historical and critical essays on a sampling of Latin America's diverse architecture, providing much-needed information on key case studies. Contributors include Noemí Adagio, Pedro Ignacio Alonso, Luis Castañeda, Viviana d'Auria, George F. Flaherty, María González Pendás, Cristina López Uribe, Hugo Mondragón López, Jorge Nudelman Blejwas, Hugo Palmarola Sagredo, Gaia Piccarolo, Claudia Shmidt, Daniel Talesnik, and Paulo Tavares. [Punta Cana Arquitectura 2018](#) Jun 02 2021 [José Horacio y Alejandro Marranzini](#) Jan 29 2021 *Experiments with Life Itself* Jan 17 2020 Every book relating

the history of modern architecture features a large number of pages dedicated to avant-garde designs and the formation of the modern movement in the interwar years, and a similar number devoted to reconstruction and expansion after the Second World War. Meanwhile, as if owing to lack of understanding or convenient silence, there is void of dark years, of wars, exile and misfortune about which little can be said. However, it was in these dark times, as in so many other revealing moments in the history of culture, that experimental and profoundly invigorating experiences were taking place. Architects and

artists voluntarily or forcibly driven to the margins of social importance began to react to a culturally unsustainable situation of which we know very little even today. In *Experiments with Life Itself*, Francisco Gonzalez de Canales studies a series of unrelated cases from the late 1930s to the late 1950s that he refers to as domestic self-experimentation.

*The Dissertation* Jul 23 2020

The Dissertation is one of the most demanding yet potentially most stimulating components of an architectural course. This classic text provides a complete guide to what to do, how to do

it, when to do it, and what the major pitfalls are. This is a comprehensive guide to all that an architecture student might need to know about undertaking the dissertation. The book provides a plain guide through the whole process of starting, writing, preparing and submitting a dissertation with minimum stress and frustration. The third edition has been revised throughout to bring the text completely up-to-date for a new generation of students. Crucially, five new and complete dissertations demonstrate and exemplify all the advice and issues raised in the main text. These dissertations are on subjects

from the UK, USA, Europe and Asia and offer remarkable insights into how to get it just right.

**Revolution of Forms** Jun 21 2020 "A revolution of forms is a revolution of essentials."-Jos Mart, Cuban intellectual and independence leader. Although the current surge of interest in Cuba has extended to that country's architecture, few know that the most outstanding architectural achievement of the Cuban Revolution stands neglected just outside Havana. The Escuelas Nacionales de Arte (National Art Schools), constructed from 1961 to 1965, were the result of an educational program initiated by Fidel Castro and Che

Guevara soon after the Revolution of 1959. The architects they commissioned created an organic complex of brick and terra-cotta Catalan vaulted structures that reflected the optimism and exuberance of the period. The schools attempted to reinvent architecture, just as the Revolution hoped to reinvent society. However, even before construction was completed, the schools fell out of official favor and were subjected to an attack that resulted in their subsequent "disappearance." An ideological campaign branded them politically incorrect, a bourgeois luxury that was not in keeping with the Revolution. The buildings

fell into disuse and, abandoned to the jungle, were literally overgrown. Now, almost 40 years later, Cuba is beginning to recognize and reclaim these significant works of architecture. *Revolution of Forms* investigates the history and politics surrounding the creation of these structures as well as their subsequent abandonment. The text is accompanied by archival photographs, plans, and images of the present condition of these structures.

**Havana** Oct 26 2020 Newly revised and redesigned, this book assesses nearly 500 years of urban development and planning in Havana, paying particular attention to the city's

rich blend of Spanish-Cuban-Latin American-North American architecture and design.

**Digital Modernism Heritage Lexicon** Aug 24 2020 The book investigates the theme of Modernism (1920-1960 and its epigones) as an integral part of tangible and intangible cultural heritage which contains the result of a whole range of disciplines whose aim is to identify, document and preserve the memory of the past and the value of the future. Including several

chapters, it contains research results relating to cultural heritage, more specifically Modernism, and current digital technologies. This makes it possible to record and evaluate the changes that both undergo: the first one, from a material point of view, the second one from the research point of view, which integrates the traditional approach with an innovative one. The purpose of the publication is to show the most recent studies on the modernist lexicon 100 years after its birth, moving through different fields of cultural heritage: from different forms of art to architecture, from design to engineering, from literature to history,

representation and restoration. The book appeals to scholars and professionals who are involved in the process of understanding, reading and comprehension the transformation that the places have undergone within the period under examination. It will certainly foster the international exchange of knowledge that characterized Modernism

**Adaptive Strategies for**

**Water Heritage** Feb 16 2020

This Open Access book, building on research initiated by scholars from the Leiden-

Delft-Erasmus Centre for Global Heritage and Development (CHGD) and ICOMOS Netherlands, presents multidisciplinary research that connects water to heritage. Through twenty-one chapters it explores landscapes, cities, engineering structures and buildings from around the world. It describes how people have actively shaped the course, form and function of water for human settlement and the development of civilizations, establishing socio-economic structures, policies and cultures; a rich world of narratives, laws and practices; and an extensive network of infrastructure, buildings and urban form. The book is

organized in five thematic sections that link practices of the past to the design of the present and visions of the future: part I discusses drinking water management; part II addresses water use in agriculture; part III explores water management for land reclamation and defense; part IV examines river and coastal planning; and part V focuses on port cities and waterfront regeneration. Today, the many complex systems of the past are necessarily the basis for new systems that both preserve the past and manage water today: policy makers and designers can work together to recognize and build on the traditional knowledge and

skills that old structure embody. This book argues that there is a need for a common agenda and an integrated policy that addresses the preservation, transformation and adaptive reuse of historic water-related structures. Throughout, it imagines how such efforts will help us develop sustainable futures for cities, landscapes and bodies of water.

*The Integration of Contemporary Architecture in Heritage Sites* Oct 14 2019

Considering the constant transformation and destruction of cultural heritage buildings in our cities and the effort to preserve what has survived, this book, proposes a

methodology that helps the professional integrate contemporary architecture in cultural heritage contexts. Find the print edition at <https://publicaciones.iteso.mx/> (ITESO), (Universidad ITESO). *Arquitectura Dominicana 2016* Jun 14 2022

*Cuban Studies 36* May 21 2020

Cuban Studies has been published annually by the University of Pittsburgh Press since 1985. Founded in 1970, it is the preeminent journal for scholarly work on Cuba. Each volume includes articles in both English and Spanish, a large

book review section, and an exhaustive compilation of recent works in the field. This volume contains articles on economics, politics, racial and gender issues, and the exodus of Cuban Jewry in the early 1960s, among others.
