*The Acquisition of Spanish Morphosyntax* Aug 10 2021 Recent developments in linguistic theory, as well as the growing body of evidence from languages other than English, provide new opportunities for deeper explorations into how language is represented in the mind of learners. This collection of new empirical studies on the acquisition of Spanish morphosyntax by leading researchers in the field of language acquisition, specifically contributes to the characterization of the L1 / L2 connection in acquisition. Using L1 and L2 Spanish data from children and adults, the authors seek to address the central questions that have occupied developmental psycholinguists in the final decades of the previous century and that will no doubt continue engaging them into the present one.

**Essentials of Ophthalmic Lens Finishing** Jul 21 2022 Both opticians and optometrists are trained to grind and polish lenses and then to take the surfaced lens and finish it by centering it optically and grinding

the edges so that the lens fits in the shape of the chosen frame. Thoroughly revised and updated with seven new chapters to cover changes in the industry, this 2nd edition provides a step-by-step understanding of lens finishing for the optometrist or optician. Content has been completely updated, reorganized and expanded to include the most recent industry changes. Updated photos illustrate the most current types of lenses and enhance comprehension of lens finishing. Seven new chapters cover rimless and semi rimless frames; environmental and safety concerns; lens insertion and standard alignment; nylon cord and other groove mountings; lens tinting and engraving; progressive addition lenses; and lens impact and resistance testing. An appendix of specific British Standards allows the book to easily travel to the UK and other countries that fashion their dispensing programs after the UK model. The Lens Centration Skills Series provides exercises to practice lens finishing and reinforce material from the text.

**Final FRCR Part A Modules 4-6 Single Best Answer MCQS** Apr 25 2020 Single best answer (SBA) questions have been introduced into the FRCR Part 2A examination of the Royal College of Radiologists in the UK for the first time. This book of 600 SBA questions and explanatory answers has been written to aid students preparing for the exam by current trainees in clinical radiology, coordinated through The Society of Radiologists in Training (SRT). Questions are grouped by topic and each topic is split into three papers of 70 questions, with explanations separated into chapters to enable readers to either attempt a whole mock exam paper or to browse question by question. The book is a bridge between a pure revision aid and a reference text, including a bibliography of useful references for further information. Candidates for other professional exams in Radiology will find the text useful, as will and those from other specialties wishing to explore the radiological aspects of their syllabus in greater depth. This is a companion volume to Final FRCR Part A Modules 4-6 Single Best Answer MCQs by the same team.

*The Progressive Movement* May 19 2022 Benjamin Parke DeWitt's study of the Progressive Era represents a comprehensive history of the theory and practice of politics from a progressive perspective. His account of the history and projections about the future of the progressive science of politics provided the American liberal-progressive tradition with its first full narrative history at a time when it was not yet the dominant interpretation of the American political order. Its greatest importance, however, lies in DeWitt's conception of where the broad-based progressive critique of the Founders' was heading. DeWitt's history of the origins and projected destiny of the progressive tradition commands a respect that places him in the same company as better-known writers. His historical narrative of the liberal progressive tradition was implicit among a number of writers before the Progressive Movement, but no contemporary writer provided a better roadmap of where progressivism was going than DeWitt. What gives DeWitt's critique a twist is his focus on the individualism of the founders, which he regards as the heart of their anti-democratic principles. His critique of this individualism is the foundation for his argument that collectivism is arguably a more democratic alternative. Benjamin Parke DeWitt is one of the lesser-known, often overlooked writers who worked to establish the liberal library of American political thought. This book deserves to be read as one of the neglected gems of the Progressive Era that it chronicles. This is an important addition to the Library of Liberal Thought series.

**Data Science and Big Data Analytics** Dec 14 2021 This book presents conjectural advances in big data analysis, machine learning and computational intelligence, as well as their potential applications in scientific computing. It discusses major issues pertaining to big data analysis using computational intelligence techniques, and the conjectural elements are supported by simulation and modelling applications to help address real-world problems. An extensive bibliography is provided at the end of each chapter. Further, the main content is supplemented by a wealth of figures, graphs, and tables, offering a valuable guide for researchers in the field of big data analytics and computational intelligence.

*Encyclopedia of Business Analytics and Optimization* Jun 20 2022 As the age of Big Data emerges, it becomes necessary to take the five dimensions of Big Data- volume, variety, velocity, volatility, and veracity- and focus these dimensions towards one critical emphasis - value. The Encyclopedia of Business Analytics and Optimization confronts the challenges of information retrieval in the age of Big Data by exploring recent advances in the areas of knowledge management, data visualization, interdisciplinary communication, and others. Through its critical approach and practical application, this book will be a must-have reference for any professional, leader, analyst, or manager interested in making the most of the knowledge resources at their disposal.

**The Making of the Middle Class** Sep 11 2021 The contributors question the current academic understanding of what is known as the global middle class. They see middle-class formation as transnational and they examine this group through the lenses of economics, gender, race, and religion from the mid-nineteenth century to today.

*Collaborating for Change* Jul 09 2021 *Collaborating for Change: A Participatory Action Research Casebook* documents the stories of a dozen community-based research projects in the United States. The book is for social justice activists and their research allies that learn best from real stories and real projects that bring insight about how democratizing research supports social change and our understanding of complex social issues.

**Rampage Shootings and Gun Control** Apr 06 2021 While the causes of rampage violence have been analysed thoroughly in diverse academic disciplines, we hardly know anything about the factors that affect their consequences for public policy. This book addresses rampage shootings in Western Europe and their conditional impact on politicization and policy change in the area of gun control. The author sets out to unravel the factors that facilitate or impede the access of gun control to the political agenda in the wake of rampage shootings and analyses why some political debates lead to profound shifts of the policy status quo, while others peter out without any legislative reactions. In so doing, the book not only contributes to the theoretical literature on crisis-induced policy making, but also provides a wealth of case-study evidence on rampage shootings as empirical phenomena. In particular, the extent to which gun control gets politicized as a policy failure can either result from a bottom-up process (event severity and media pressure) or from a top-down logic (issue ownership and the electoral cycle). Including 12 case studies on the rampage shootings which have triggered a debate over the appropriateness of the affected countries' gun policies, it illustrates that the way political processes unfold after rampage shootings depends strongly on specific causal configurations and draws comparisons between the cases covered in the book and the way rampage shootings are typically dealt with in the United States. This text will be of key interest to scholars and students of public policy, policy analysis, European Politics and more broadly to comparative politics, criminology, psychology, and sociology. *Advances in Neural Networks - ISNN 2004* Feb 16 2022 This book constitutes the proceedings of the International Symposium on Neural Networks (ISNN 2004) held in Dalian, Liaoning, China during August 19-21, 2004. ISNN 2004 received over 800 submissions from authors in 7 continents (Asia, Europe, North America, South America, and Oceania), and 23 countries and regions (mainland China, Hong Kong, Taiwan, South Korea, Japan, Singapore, India, Iran, Israel, Turkey, Hungary, Poland, Germany, France, Belgium, Spain, UK, USA, Canada, Mexico, Venezuela, Chile, and Australia). Based on reviews, the Program Committee selected 329 high-quality papers for presentation at ISNN 2004 and publication in the proceedings. The papers are organized into many topical sections under 11 major categories (theoretical analysis; learning and optimization; support vector machines; blind source separation, independent component analysis, and principal component analysis; clustering and classification; robotics and control; telecommunications; signal, image and time series processing; detection, diagnostics, and computer security; biomedical applications; and other applications) covering the whole spectrum of the recent neural network research and development. In addition to the numerous contributed papers, 7 distinguished scholars were invited to give plenary speeches at ISNN 2004. ISNN 2004 was an inaugural event. It brought together a few hundred researchers, educators, scientists, and practitioners to the beautiful coastal city Dalian in northeastern China.

*Working with Piaget* Nov 25 2022 For fifty years Bärbel Inhelder (1913-1997) was the research companion of Jean Piaget. In this unique volume, published in her honour, leading international researchers examine the various aspects of her work and ideas and her contribution to developmental psychology. Following an initial chapter establishing Inhelder's stature as an independent researcher in her own right, the various research topics that she explored are reviewed and discussed with specific reference to her own perspective and in the chronological order in which she approached them. While the book explores Inhelder's work with her more famous colleague, it also highlights areas of research in which her ideas were at variance with those of Piaget, such as mental imagery, and areas in which her innovations have not been fully recognised, such as her discovery of the formal operations stage - an event usually attributed to Piaget - and her introduction of longitudinal studies in the field of cognitive development. Her research, viewpoint and contribution in other fields such as mental retardation, learning, and cross-cultural issues in development are also discussed. The final chapter, written by Inhelder herself, deals with experimental reasoning in children and adolescents and provides a glimpse of her creativity.

*French for Success* Feb 28 2023 French for Success is conceived to facilitate the mastery of the French

grammar rules. Conjugation of verbs, which used to be a hard nut to crack, can now be mastered in a day or two. Verbs are placed into categories, rather than groups, according to their patterns of conjugation. A category, therefore, is a group of verbs that share similar patterns of conjugation in all tenses. In a given category or group, the radical is used only once, instead of six, to facilitate memorization. And in any given group, what applies to one verb in a given tense applies to every single verb. Although there are over four thousand verbs in category 1A, it takes only a few minutes to master their conjugations. This is because conjugation is merely a substitution of radicals. Corresponding verb endings do not change. Even some irregular verbs share this concept of common-radical conjugation. They include those ones that have two stems or radicals. The conjugation shortcuts exposed in these manuals will help minimize spelling errors. But the curious might wonder why we prefer categories to groups. The reason is simple. Currently, there are three main groups first, second, and third groups. However, within each group, there are multiple subgroups, which do not necessarily share the same patterns of conjugation at all. In the first group alone, there are seventeen subgroups. We reduce those seventeen groups to eight; group B comprises verbs ending in *ir*, such as *finir* and *agir*. But there are countless other verbs in *ir* that do not share the same conjugations as *finir* and *agir*. *Partir*, *sortir*, and *mentir* share a pattern of conjugation that is different from *finir* and *agir*. *Courir* and its compound verbs have a totally different pattern of conjugation. So do many other groups of verbs ending in *ir*. In the same vein, group 3 contains, among other groups of verbs, *attendre*, *prendre*, *coudre*, *moudre*, etc., with each group having a conjugation pattern entirely different from the others, although they all end in *re*. Therefore, our definition of category is a group of verbs that have mutually substitutable radicals and mutually interchangeable endings in a given tense. *Aim-*, *parl-*, *cout-*, and *donn-* can replace one another, but they cannot replace *cd-*, *accd-*, etc., although these verbs are said to belong the premier group and end in *er*. Themes are selected to facilitate visual identification. Thus, adjectives of the same form are grouped together both according to the gender and number. It becomes easier to distinguish masculine from feminine or the singular form from the plural. The manuals are divided into four books for the progressive acquisition of the rules of French grammar. Comparative forms are continued in book 3. Also treated in this volume are present and past perfect tenses, direct and indirect objects, negation, and interrogative mood. Students learn to form nouns from verbs, and the contexts in which those nouns are used. Finally, indirect speech, synonyms, antonyms, suffixes, and prefixes are examined.

Dialogues in Middle Level Education Research Volume 1 Jan 23 2020 Mirroring the roundtable discussions conducted at the 2020 Association for Middle Level Education (AMLE) conference, this volume highlights the dialogic knowledge-building process critical to advancing middle level teaching and research.

Launching the new AMLE Innovations in Middle Level Education Research series, this collection captures the synergetic dialogue that occurs during professional meetings by collating and centering five recent studies on topics such as mathematics achievement, personalized and project-based learning, and teacher collaboration. A companion essay and critical external response accompanies each study, serving to re-situate original research and reconsider findings in view of professional insights and external critique gained through discussion at AMLE 2020. Ultimately, these response essays foreground potential avenues for future research and alternative thinking, laying the groundwork for implementation of critical discussion in the classroom environment. This text will benefit researchers, doctoral students, and academics in the fields of middle level education, educational research, and specifically research methods in education. Those interested in teaching and learning, and adolescent development more broadly, will also benefit from this volume.
