Examining Practice, Interrogating Theory: Comparative Legal Studies in Asia Oct 15 2019 Legal transplantation and reform in the name of globalisation is central to the transformation of Asian legal systems. The contributions to Examining Practice, Interrogating Theory: Comparative Legal Studies in Asia analyse particular legal changes in China, Indonesia, Malaysia, Singapore, Thailand, Taiwan, and Vietnam. The contributions also concurrently critically analyse the utility of scholarly developments in comparative legal studies, particularly discourse analysis; regulatory theory; legal pluralism; and socio-legal approaches, in the study of Asian legal

systems. While these approaches are regularly invoked in the study of transforming European legal systems, the debate of their relevance and explanatory capacity beyond the European context is recent. By bringing together these diverse analytical tools and enabling a comparison of their insights through Asian empirical case studies, this book makes an invaluable contribution to the debates concerning legal change and the methods by which it is analysed globally, and within Asia.

**The Legal Studies Reader** Apr 20 2020 The Legal Studies Reader is an innovative, clearly focused contribution to the growing literature in the new area of legal studies. Emphasizing the large issues that animate current debates over legal rules and principles and the proper roles of lawyers and judges, this is a book of conversations by the editors and some of the major figures of modern legal thought. Ronald Dworkin, John Finnis, Lon Fuller, H.L.A. Hart, Marc Galanter and others appear here in the seminal essays that have influenced generations of students of the law. Beginning with a series of exchanges aimed at highlighting differences and leading the student into the essays in the second part, the editors debate law and violence, law and objectivity, law and society, and law and reason. The essays that follow develop these themes in depth, often with explicit reference to one another. Ranging from Legal Realism to the «Berkeley Perspective» to Critical Race Theory and Legal Feminism, The Legal Studies Reader charts the main theoretical positions that still dominate our thinking about law. Anyone interested in how law affects the pursuit of a fully developed, truly human life should read this book.

**Ideology and Community in the First Wave of Critical Legal Studies** Feb 11 2022 Bauman examines several major themes and arguments in the first decade of critical legal scholarship, predominantly in the U.S. in the period dating roughly from the mid-1970s to the mid-1980s.

**Making Legal History** Nov 27 2020 The first book to address the way that the broad and inclusive subject of legal history is researched and written.

**Comparative Legal History** Jan 10 2022 The specially commissioned papers in this book lay a solid theoretical foundation for comparative legal history as a distinct academic discipline. While facilitating a much needed dialogue between comparatists and legal historians, this research handbook examines methodologies in this emerging field and reconsiders legal concepts and institutions like custom, civil procedure, and codification from a comparative legal history perspective.

Cambridge Yearbook of European Legal Studies Vol 2, 1999 Dec 09 2021 The Cambridge Yearbook of European Legal Studies provides a new forum for the scrutiny of significant issues in European Union Law, the Law of the Council of Europe, and Comparative Law with a "European" dimension, and particularly those which have come to the fore during the year preceding publication. The contributions appearing in the collection are commissioned by the Centre for European Legal Studies (CELS) Cambridge, which is the research Centre of Cambridge University Law Faculty specialising in European legal issues. The papers presented are all at the cutting edge of the fields which they address, and reflect the views of recognised experts drawn from the University world, legal practice, and the civil services of both the EU and its Member States. Inclusion of the comparative dimension brings a fresh perspective to the study of European law, and highlights the effects of globalisation of the law more generally, and the resulting cross fertilisation of norms and ideas that has occurred among previously sovereign and separate legal orders. The Cambridge Yearbook of European Legal Studies is an invaluable resource for those wishing to keep pace with legal developments in the fast moving world of European integration. **INDIVIDUAL CHAPTERS** Please click on the link below to purchase

**Cultural Legal Studies** Oct 19 2022 What can law's popular cultures do for law, as a constitutive and interrogative critical practice? This collection explores such a question through the lens of the 'cultural legal studies' movement, which proffers a new encounter with the 'cultural turn' in law and legal theory. Moving beyond the 'law ands' (literature, humanities, culture, film, visual and aesthetics) on which it is based, this book demonstrates how the techniques and practices of cultural legal studies can be used to metamorphose law and the

legalities that underpin its popular imaginary. By drawing on three different modes of cultural legal studies – storytelling, technology and jurisprudence – the collection showcases the intersectional practices of cultural legal studies, and law in its popular cultural mode. The contributors to the collection deploy differentiated modes of cultural legal studies practice, adopting diverse philosophical, disciplinary, methodological and theoretical approaches and subjects of examination. The collection draws on this mix of diversity and homogeneity to thread together its overarching theme: that we must take seriously an interrogation of law as culture and in its cultural form. That is, it does not ask how a text ‘represents’ law; but rather how the representational nature of both law and culture intersect so that the ‘juridical’ become visible in various cultural manifestations. In short, it asks: how law’s popular cultures actively effect the metamorphosis of law.

*Traditions of Studying the Social and the Legal* Jul 24 2020 In this chapter I trace the development of the field of socio-legal studies over the past 50 years. In a quest for an understanding of how law, culture, and social structures interact, we travel across the globe. The study of socio-legal phenomena opens up an inquiry into a range of spaces to study the intersection between law and society: legal systems, disputing behaviour, decision-making, juries and judges, the role of authorities, and so forth. With a focus on change to institutional history and evolution I highlight key moments that show how institutions have shaped socio-legal development. In a modest attempt to provide a glimpse of socio legal studies I divide this chapter into two parts. The first part maps the developments of socio-legal through national institutions. The second part draws upon lived wisdom of pioneers of the socio-legal movements of our time,

sharing stories that usually remain hidden from a general audience. It is important for the continuing development of scholarly knowledge for the field to consider its history and to explore motivations, struggles and journeys into the socio legal of today.

*Computational Legal Studies* Nov 08 2021 Featuring contributions from a diverse set of experts, this thought-provoking book offers a visionary introduction to the computational turn in law and the resulting emergence of the computational legal studies field. It explores how computational data creation, collection, and analysis techniques are transforming the way in which we comprehend and study the law, and the implications that this has for the future of legal studies.

The Critical Legal Studies Movement Aug 17 2022 Critical legal studies is the most important development in progressive thinking about law of the past half century. It has inspired the practice of legal analysis as institutional imagination, exploring, with the materials of the law, alternatives for society. The Critical Legal Studies Movement was written as the manifesto of the movement by its central figure. This new edition includes a revised version of the original text, preceded by an extended essay in which its author discusses what is happening now and what should happen next in legal thought.

**Law at the Centre: The Institute of Advanced Legal Studies at Fifty** Oct 27 2020 The Institute of Advanced Legal Studies was founded in 1947, although the idea of establishing a national law library and centre for research was conceived over fifty years before this. Since its foundation the IALS has developed a library of international standing and has been able to foster and promote legal research not only in Britain but around the world. It performs a unique role in the United Kingdom and the Commonwealth and an increasingly important one in Europe. To

commemorate the Institute's jubilee and the inauguration of the Society for Advanced Legal Studies, Professor Barry AK Rider, the IALS's present Director, has assembled a series of papers which not only trace the Institute's development into an institution for the advancement of legal research of world-class standing, but also illustrate the depth of support that it enjoys from some of the most distinguished and respected legal scholars of today. This volume is therefore a testament to the past and an indication of what the next fifty years will bring--with the Institute at the centre of advanced legal research in the United Kingdom.

Exploring the 'Legal' in Socio-Legal Studies Jun 15 2022 Socio-legal studies have had an ambivalent relationship with the 'legal' – one of its defining aspects, but at the same time one that the discipline has sought to transcend or even leave behind. While socio-legal studies benefit hugely from the insights, methods and theories of other social science and humanity disciplines, the contributions to Exploring the 'Legal' in Socio-Legal Studies illustrate the value of a focus on the 'legal'. The chapters in this book combine traditional legal materials and analyses with other ways of engaging empirically with the 'legal'. They illustrate the rich potential of the 'legal' as a site both for theoretical and methodological reflection and for case study analysis. Taken as a whole, this volume demonstrates that methodological discussion is most helpful when rooted in empirical cases, and that the best case studies also help us to develop our methodologies. Bringing methodology and empirical analysis together offers an opportunity to reflect on socio-legal studies and develop the discipline in productive new directions.

**From the Universities to the Marketplace: The Business Ethics Journey** May 22 2020 From the Universities to the Marketplace: The Business Ethics Journey arose from the awareness of the slow progression of academic theory into market practice. The contributions in this volume reflect a diversity of disciplines and approaches to research, study and teaching business ethics, such as philosophy, accounting, theology, marketing, management and finance. The contributors represent a wide variety of professional and geographical backgrounds, creating a fruitful discussion of a large number of issues related to implementation and measurement of business ethics, and feedback from all parties involved.

Exploring the 'Socio' of Socio-Legal Studies Aug 05 2021 In this insightful collection, a broad range of scholars analyzes a core issue for socio-legal studies, what is understood by the 'socio' of the 'socio-legal'. Drawing from legal theory, cultural studies, and social policy, the collection's wide scope of themes and topics provides an important stock-take and analysis of the socio-legal field.

The Present Politics of the Past Feb 17 2020 Each phrase in the title of this work gives a clue as to its purpose and agenda. "The present politics of the past" refers to the conditions that have arisen in the recent politics of advanced liberal states with indigenous populations (such as the U.S., Canada, Aotearoa/New Zealand, and Australia) where "the past" is an issue or even at stake in contemporary struggles.

**English Legal System in Context** Jan 30 2021 English Legal System in Context provides a critical overview of the legal system, and establishes a sound theoretical framework within which to analyse the system. It discusses the intricacies of the legal system, showing the blurred distinction between the legal and the non-legal. The authors provide an insightful contextual analysis of the system and its main protagonists. As well as the traditional core areas of the English legal system such as the courts, case law, legal professionals, and the civil and criminal proceedings, the authors discuss the police and their powers, the role of the CPS, private policing, the work of non-police agencies, and various methods of alternative dispute resolution. Students will find the coverage of the legal profession of particular interest; this text is distinctive in its detailed examination of the role of law schools and law students in the development of the legal profession. With a clear, logical structure, and a wealth of references to take the reader

further into the subject, this is a perceptive and wide-ranging study that explains and illuminates this fascinating subject.

Literature and Legal Discourse Aug 25 2020 The intersection between law and literature is a developing area in literary studies. Existing work has argued that literature provides an imaginary forum in which legal ideals and practices may be tested. In *Literature and Legal Discourse: Equity and Ethics from Sterne to Conrad* Dieter Polloczek develops this idea by comparing the notion of equity, or ethics, in fiction with its legal equivalent. He shows how the novel, with its increasing social scope and formal sophistication, provided a means of transmitting, questioning and refining society's traditions, values and modes of self-questioning. Polloczek analyses the links between actual legal fictions like substituted judgements, notions of equity, literary tropes and the construction and representation of social bonds through sentiment, philanthropy and marginalisation. Polloczek's study is both theoretical and historical, covering a period that extends from the eighteenth century to the modernist period, and texts from Sterne, Dickens, Bentham and Conrad.

Socio-Legal Studies in Context Feb 23 2023 *Socio-Legal Studies in Context* is the first attempt to take stock of the development of socio-legal studies in the United Kingdom. With an increasing awareness amongst legal scholars of the need for socio-legal research, this volume is essential reading for all teachers of law and law related subjects. It will provide rich ideas for young researchers wishing to involve themselves in the socio-legal approach. The volume also provides an opportunity for more experienced researchers to look back and re-assess their own work and help them form their own plans for the future.

*Routledge Handbook of Socio-Legal Theory and Methods* Jun 03 2021 Drawing on a range of approaches from the social sciences and humanities, this handbook explores theoretical and empirical perspectives that address the articulation of law in society, and the social character of the rule of law. The vast field of socio-legal studies provides multiple lenses through which law can be considered. Rather than seeking to define the field of socio-legal studies, this book takes up the experiences of researchers within the field. First-hand accounts of socio-legal research projects allow the reader to engage with diverse theoretical and methodological approaches within this fluid interdisciplinary area. The book provides a rich resource for those interested in deepening their understanding of the variety of theories and methods available when law is studied in its broadest social context, as well as setting those within the history of the socio-legal movement. The chapters consider multiple disciplinary lenses – including feminism, anthropology and sociology – as well as a variety of methodologies, including: narrative, visual and spatial, psychological, economic and epidemiological approaches. Moreover, these are applied in a range of substantive contexts such as online hate speech, environmental law, biotechnology, research in post-conflict situations, race and LGBT+ lawyers. The handbook brings together younger contributors and some of the best-known names in the socio-legal field. It offers a fresh perspective on the past, present and future of sociolegal studies that will appeal to students and scholars with relevant interests in a range of subjects, including law, sociology and politics.

*A Guide to Critical Legal Studies* Sep 06 2021 Until now there has been no summary or

overview of the wide range of work contributing to critical legal studies, the movement that has aroused such a furor in the communities of law and political philosophy. This book outlines and evaluates the principal strands of critical legal studies, and achieves much more as well. A good deal of the writing in critical legal studies has been devoted to laying bare the contradictions in liberal thought. There have been attacks and counterattacks on the liberal position and on the more conservative law and economics position. Now Mark Kelman demonstrates that any critique of law and economics is inextricably tied to a broader critique of liberalism. There are three central contradictions in liberal thought: between a commitment to mechanically applicable rules and to standards that fluctuate with situations; between intrinsic individual values and the objective knowledge of ethical truths; and between free will and determinism. Kelman shows us the pervasiveness of these contradictions in legal doctrine; their connection to broader political theory and to visions of human nature; and, finally, the degree to which mainstream thought tends to privilege certain of these commitments over others. The author also analyzes two of the most significant components of jurisprudence today the law and economics discipline and the legal process school. He concludes with a lively discussion of the role of law generally and of "cognitive legitimation," or the ways in which legal thought can make the unnecessary, the contingent, and the unjust seem natural, inevitable, and fair.
