It covers all the core and optional topics, and includes a unit on literature to stretch learners beyond functional language-learning. The Semitic Languages presents a unique, comprehensive survey of individual languages or language clusters from their origins in antiquity to their present-day forms. The Semitic family occupies a position of great historical and linguistic significance: the spoken and written languages of the Phoenicians, Hebrews and Arabs spread throughout Asia and northern and central Africa; the Old Semitic civilizations in turn contributed significantly to European culture; and modern Hebrew, modern literary Arabic, Amharic, and Tigrinya have become their nations' official languages. The book is divided into three parts and each chapter presents a self-contained article, written by a recognized expert in the field. * I. General Issues: providing an introduction to the grammatical traditions, subgrouping and writing systems of this language family. * II. Old Semitic Languages * III. Modern Semitic Languages Parts II and III contain structured chapters, which enable the reader to access and compare information easily. These individual descriptions of each language or cluster include phonology, morphology, syntax, lexis and dialects. Suggestions are made for the most useful sources of further reading and the work is comprehensively indexed. A practical and accessible course covering the English B syllabus (from 2011) for the IB Diploma. Suitable for standard and higher level students, this resource is written by an experienced IB English teacher following the English B syllabus. Features include activities and authentic texts to develop reading and comprehension, integrated study ideas for IB central core, featuring LP (Learner profile), CAS (Creativity, Activity, Service), TOK (Theory of Knowledge) EE (Extended Essay), and a Glossary with definitions of key vocabulary. This title offers comprehensive learning and support for teachers and students, ideas for extensive reading material, activities to build language skills and cultural understanding for extension essays, research, exam preparation and a free teacher resources website: ibdiploma.cambridge.org. Interest in morphology has revived in recent years and the Yearbook of Morphology has provided great support for this revival, with its articles on topics that are central to the current theoretical debates. The Yearbook of Morphology 1997 focuses on the relationship between morphology and other modules of the grammar, especially phonology, syntax and semantics. Among the basic questions discussed are: how does morphology differ from other modules of the grammar, syntax in particular? What are the possible forms of interaction between the modules? How does semantics constrain formal variation in morphology? The evidence adduced is derived from a variety of languages. Audience: Theoretical, descriptive and historical linguists, morphologists, phonologists, and psycholinguists. "This text has been specifically written for students completing the French B course at either Higher or Standard level. It guides students to explore French Culture and language through 11 chapters covering topics such as identity, family, relationships, education and popular culture. Students are exposed to all text types, required in line with language B guidelines, ranging from magazine articles to literary texts. The book provides thorough preparation for the Paper 1 examination. Each Chapter closes with 20 relevant questions which are ideal for oral practice." -- publisher's website. This volume offers the most comprehensive, up-to-date description of the wide array of second

language programs currently available to undergraduate students in the United States and abroad. It brings together, for the first time, detailed descriptions of programs in foreign language, English as a second language (ESL), dual language (bilingual), American Sign Language, Native American, and heritage languages. Addressing both theory and practice, the volume presents the historical development, current practices, and future directions of each type of program, along with detailed case studies. For second language teachers, academic administrators, and teacher educators, this Handbook provides information that will be useful in making instructional and programmatic planning decisions. Whether you're new to the field or looking to broaden your knowledge of contemporary cryptography, this newly revised edition of an Artech House classic puts all aspects of this important topic into perspective. Delivering an accurate introduction to the current state-of-the-art in modern cryptography, the book offers you an in-depth understanding of essential tools and applications to help you with your daily work. The second edition has been reorganized and expanded, providing mathematical fundamentals and important cryptography principles in the appropriate appendixes, rather than summarized at the beginning of the book. Now you find all the details you need to fully master the material in the relevant sections. This allows you to quickly delve into the practical information you need for your projects. Covering unkeyed, secret key, and public key cryptosystems, this authoritative reference gives you solid working knowledge of the latest and most critical concepts, techniques, and systems in contemporary cryptography. Additionally, the book is supported with over 720 equations, more than 60 illustrations, and numerous time-saving URLs that connect you to websites with related information.

This collection of studies investigates the individual, micro-psychological, and macro-societal factors that promote or discourage the development of child and young adult heritage language learners' spoken and written skills in East Asian languages (Chinese, Japanese, and Korean). The research presented in this book is based on empirical data from various learning and social settings in the United States and Canada. The contributors are themselves mostly from East Asian immigrant backgrounds and have worked closely with students from such backgrounds. This book also speaks to the needs for future research within East Asian communities that will (a) promote East Asian heritage language development in applied linguistics, (b) encourage parental, community, and national support for East Asian heritage language development, and (c) improve the teaching of oral and written skills

for heritage learners of East Asian languages in various educational settings. The aim of the present book is to give a comprehensive account of the 'state of the art' of substructural logics, focusing both on their proof theory (especially on sequent calculi and their generalizations) and on their semantics (both algebraic and relational). It is for graduate students in either philosophy, mathematics, theoretical computer science or theoretical linguistics as well as specialists and researchers.

Thanks for your support for us creating better contents for you! This book constitutes the thoroughly refereed post-proceedings of the 5th International Conference on Developments in Language Theory, DLT 2001, held in Vienna, Austria, in July 2001. The 24 revised full papers presented together with 10 revised invited papers were carefully selected during two rounds of reviewing and revision from a total of 64 papers submitted. Among the topics covered are grammars and acceptors, efficient algorithms for languages, combinatorial and algebraic properties, decision problems, relations to complexity theory, logic, picture description and analysis, DNA computing, cryptography, and concurrency. Melding cutting-edge research with practical innovations in teaching practice, the contributors to this volume confront the limitations of existing approaches in heritage language learning to introduce new solutions informed by linguistic, sociolinguistic, and educational research on heritage languages. The result is a unique and essential text, the only comprehensive guide for the HL classroom based on the latest theory and research with practical suggestions for the classroom. The need to reform secondary-level education to prepare young people for new economic realities has emerged. In an age of constant career changing, cognitive flexibility is a top-priority skill to develop in today's students. This shift requires methodological innovation that enhances children's natural abilities as well as updated, focused teacher education in order to prepare them adequately. Educational Reform and International Baccalaureate in the Asia-Pacific is a collection of innovative research that examines the development and implementation of IB curricula. Highlighting a wide range of topics including critical thinking, student evaluation, and teacher training, this book is ideally designed for educators, curriculum developers, instructional designers, administrative officials, policymakers, researchers, academicians, and students. The title in itself is intended to be an encouragement of our Ethics' Commission of the United States Congress, to which was addressed a petition about a year ago (January 2017) regarding the misusing and abusing of the concept of RACE in regarding Species Sapiens, Genus (Gattung) Homo in our American Constitution... It is in some way understandable that the human history, including the history of the American People, has had in its entirety many white links throughout its genesis phases, throughout its evolutionary and devolutionary periods and throughout its controversial becoming and fulfillments... But to persist in a such dramatic controversial field of different RACE within Species Sapiens, Genus Homo, Hominid Family, Order Primate, Class Mammalia, Phylum(Stamm) Vertebrata, Kingdom Animalia, despite of all anthropological, physiological and genetically advancements in the last 50 years, including Human Genom Project, is a dangerous disregarding of all scientific arguments, which are supporting beyond of any doubt, that the Species Sapiens is a Species without different Races within... Fuzzy logics are many-valued logics that are well suited to reasoning in the context of vagueness. They provide the basis for the wider field of Fuzzy Logic, encompassing diverse areas such as fuzzy control, fuzzy databases, and fuzzy mathematics. This book provides an accessible and up-to-date introduction to this fast-growing and increasingly popular area. It focuses in particular on the development and applications of "proof-theoretic" presentations of fuzzy logics; the result of more than ten years of intensive work by researchers in the area, including the authors. In addition to providing alternative elegant presentations of fuzzy logics, proof-theoretic methods are useful for addressing theoretical problems (including key standard completeness results) and developing efficient deduction and decision algorithms. Proof-theoretic presentations also place fuzzy logics in the broader landscape of non-classical logics, revealing deep relations with other logics studied in Computer Science, Mathematics, and Philosophy. The book builds methodically from the semantic origins of fuzzy logics to proof-theoretic presentations such as Hilbert and Gentzen systems, introducing both theoretical and practical applications of these presentations.
