This book features four essays that illuminate the relationship between American and Soviet film cultures in the 20th century. The first essay emphasizes the structural similarities and dissimilarities of the two cultures. Both wanted to reach the masses. However, the goal in Hollywood was to entertain (and educate a little) and in Moscow to educate (and entertain

a little). Some films in the Soviet Union as well as in the United States were conceived as clear competition to one another - as the second essay demonstrates - and the ideological opponent was not shown from its most advantageous side. The third essay shows how, in the 1980s, the different film cultures made it difficult for the Soviet director Andrei Konchalovsky to establish himself in the US, but nevertheless allowed him to succeed. In the 1960s, a genre became popular that tells the story of the Russian Civil War using stylistic features of the Western: The Eastern. Its rise and decline are analyzed in the fourth essay. "This book recounts the most serious railroad accidents worldwide from 1853 to the present time. Relevant specifics of these disasters have been researched and summary narratives written. The central purpose of this volume is to record the horrendous details surrounding railroad calamities and, more importantly, to investigate, analyze, and derive beneficial knowledge about wreck causes and deduce corrective courses of action, setting forth successful principles of accident prevention that might be useful and applicable in rail operations everywhere. The ultimate purpose

therefore has been to determine universal railroad safety doctrines, the application of which will lessen the frequency and severity of future rail accidents and thereby reduce death tolls, passenger and employee injuries, and the attendant financial and material losses." "Covered herein in concise form are the accounts of 70 major rail disasters in the United States and 111 train catastrophes in various foreign countries. Included for quick reference are two tabulations showing pertinent particulars for all the railroad disasters treated in this volume. The reader, if he peruses this long list of wreck narratives, will acquire a unique understanding of the widespread incident of rail accidents and, perhaps, arrive at a personal judgment on how to best further the noble cause of accident prevention. Certainly, he will gain an eye-opening view of the dreadful scope of the long-term operational misfortunes that have plagued the mighty "Iron Horse."" "More than one hundred photographs taken at the scenes of the accidents illustrate this volume." "A substantial introduction elucidates the history of railroading in relation to death-dealing mishaps, operating safeguards, railroad personnel, the human factor, the grade crossing dilemma, rail unions and worker discipline, safety research efforts, code of railroad working rules, alcohol and drug problems, the Harriman safety awards, the legendary rail cabooses, and accident prevention guidelines." "The eleven-part

appendix includes a historical/statistical review of safety on the United States railroads and reports on the horrendous Louisville & Nashville Railroad hazardous materials spillage at Crestview, Florida, on 8 April 1970. Also summarized are the rail accident prevention philosophies practiced on four foreign railway systems."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved Click-clack, clicketty-clack, whoo ... eee! Disaster! The fast rain to Pebblecombe has broken down. Everyone on the train wants to get to the fair and enjoy a great day out but now they're all stuck on the tracks. This is the story of how Britain's railway disasters, horrific though they may be, change the network for the better through the crucial lessons that are learned. It starts with fatalities on early mining tramways before the dawn of the steam age and takes the story up to the present day. While many of Britain's worst tragedies are covered in depth, such as Quintinshill in 1915 and Harrow & Wealdstone in 1952, the book also looks at others that had resounding consequences for safety. This textbook allows independent practice of mathematical skills. It presents the concepts at an appropriate reading level. Activities with an investigative or process-skill focus encourage creative and mathematical thinking. Problem-solving is included. We live in an age of rapid technological advancement. Never before has humankind wielded so much power over our own biology. Biohacking, the attempt at human

enhancement of physical, cognitive, affective, moral, and spiritual traits, has become a global phenomenon. This textbook introduces religious and ethical implications of biohacking, artificial intelligence, and other technological changes, offering perspectives from monotheistic and karmic religions and applied ethics. These technological breakthroughs are transforming our societies and ourselves fundamentally via genetic modification, tissue engineering, artificial intelligence, robotics, the merging of computer technology with human biology, extended reality, brain stimulation, and nanotechnology. The book also considers the extreme possibilities of mind uploading, cryonics, and superintelligence. Chapters explore some of the political, economic, sociological, and psychological dimensions of these advances, with bibliographies for further study and questions for discussion. The technological future is here - and it is up to us to decide its moral and religious shape. Outlining an integrative theory of knowledge, Francisco Javier Carrillo explores how to understand the underlying behavioural basis of the knowledge economy and society. Chapters highlight the notion that unless a knowledge-based value creation and distribution paradigm is globally adopted, the possibilities for integration between a sustainable biosphere and a viable economy are small. For over 20 years, Geoffrey Douglas has written feature-length pieces for *Yankee* magazine that chronicle extraordinary stories that have taken place in New England. Some have been about public events, widely reported—a Maine town turning against itself

under the weight of an influx of Somalis, a fatal fire in Worcester MA, a Vermont reporter's defense of marriage equality. Others, have been more private, the stories of men and women surviving, facing choices, living life--a small-time jockey scratching out an existence at county-fair racetracks; the long, sad fall of a Maine lottery winner, a poet's love affair with his town. The best of these, taken together, make for a rich and updated collection of New England portraits: mostly ordinary lives, upended by choice or chance, turned suddenly, unexpectedly remarkable. 16-year-old Bella Lee Dunkinson enjoys helping at the railroad and working with the engine. One stormy night in 1856, she proves that a woman can do a dangerous job just as well as a man. New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. Civil War studies normally focus on military battles, campaigns, generals and politicians, with the common Confederate soldiers and Southern civilians receiving only token mention. Using personal accounts from more than two hundred forty soldiers, farmers, clerks, nurses, sailors, farm girls, merchants, surgeons, chaplains and wives, author Jeff Toalson has created a compilation that is remarkable in its simplicity and stunning in its scope. These soldiers and civilians wrote remarkable letters and kept astonishing diaries and journals. They discuss disease, slavery, inflation, religion, desertion, blockade running, and their never-ending hope that the war would end before their loved ones died. A major portion of these documents were unpublished and were made available by the Brewer Library of the United Daughters of the Confederacy. With this, his third significant contribution to Civil War literature, Jeff Toalson joins the select company of Thomas W. Cutrer and Bell I. Wiley as historians who have devoted their body of work to preserving the voices of common Confederate soldiers and civilians. Children can enjoy their favourite story time and time again with this brilliant picture book and DVD set. The DVD features a soundtrack read by Richard Briers, animated stills from the book and brilliant music and sound effects. Chuff-chuff, chuffity chuff, whoo. . . oo. . oo!
