Searching for Spring Dec 25 2019 The Bible says that God makes all things beautiful in their time, but when we look around today we see a broken and marred world. Our reality is so often the "not beautiful" that it's hard to trust that God can make our mess into something good. So how do we live with hope for a future redemption of all things? In *Searching for Spring*, Christine Hoover takes readers on a treasure hunt for beauty in both familiar and unexpected places. Framed by the changing seasons, this journey will heighten readers' senses and awaken their affections for the creator of it all. For all who are in the midst of suffering, who find their faith withering, who are questioning whether God is at work--or even present--as they wait for something in their lives to become beautiful, this book will be a welcome reminder that God never stops his redemptive work and that there is a time for everything under heaven.

[Agile Java Development with Spring, Hibernate and Eclipse](#) Feb 04 2021 Agile Java™ Development With Spring, Hibernate and Eclipse is a book about robust technologies and effective methods which help bring simplicity back into the world of enterprise Java development. The three key technologies covered in this book, the Spring Framework, Hibernate and Eclipse, help reduce the complexity of enterprise Java development significantly.

Furthermore, these technologies enable plain old Java objects (POJOs) to be deployed in light-weight containers versus heavy-handed remote objects that require heavy EJB containers. This book also extensively covers technologies such as Ant, JUnit, JSP tag libraries and touches upon other areas such as logging, GUI based debugging, monitoring using JMX, job scheduling, emailing, and more. Also, Extreme Programming (XP), Agile Model Driven Development (AMDD) and refactoring are methods that can expedite the software development projects by reducing the amount of up front requirements and design; hence these methods are embedded throughout the book but with just enough details and examples to not sidetrack the focus of this book. In addition, this book contains well separated, subjective material (opinion sidebars), comic illustrations, tips and tricks, all of which provide real-world and practical perspectives on relevant topics. Last but not least, this book demonstrates the complete lifecycle by building and following a sample application, chapter-by-chapter, starting from conceptualization to production using the technology and processes covered in this book. In summary, by using the technologies and methods covered in this book, the reader will be able to effectively develop enterprise-class Java applications, in an agile manner!

This book is about the Jesus Deception that has been passed on down through history by European historians, that is still being taught around the world today. This book takes a provocative intellectual, scholastic, historical, cultural, and sociological look at the Bible. This book identifies the names of the translators of the King James Bible of 1611 A. D., and when the chapters and verses in the Bible were created and who created them. This book reveals the truth of the origination of The Bible, as There Is No Religion Higher Than The Truth. Join me in an intellectual odyssey through time. Here, I feel like a Lone Warrior standing before a mighty army. Come with me on this perilous pilgrimage as we travel through a parallel universe. I dedicate this book to my mother and father

who gave me life. To the rest of my Native Afrikan family for supporting me and encouraging me on this publishing venture. To the Heavenly Father, without whom none of this would be possible. There are others I would also like to thank for being a part of helping me through this journey called Life, such as my professors at the Alabama State University where many a great scholars paths I have crossed. To my American family and friends in Mobile, Alabama who nurtured and taught me from childhood to adulthood. The many friends and colleagues I met in my travels all across America in my intellectual journey, and last but certainly not least, to my publisher for granting me the opportunity to speak to many all around the world in this forum. Wintering May 10 2021 Rosemary Blake's Wintering is a thoughtful collection of poems of landscape and memory. The poems recall a childhood filled with the loss of a beloved father, but also with the light and beauty of the Australia landscape. Canada provides a way of seeing into this past with its loss and longing; a way which explores the contrast of the seasons, the reversals of winter and summer and the particular beauty of the Canadian landscape. The poet comes to see this country, no longer as a metaphor for longing, but with wonder. Wintering is an outstanding first book of poems, certain to receive a warm reception.
