Front Row Seats to Crazy Sep 27 2020 When mental health therapist Helena L. Rouhe loses both of her parents within the span of eighteen days, she comes face-to-face with an experience that will change her forever. There's no instruction manual on how to grieve the death of a loved one-it's a process filled with peaks and valleys, and while Rouhe has counseled hundreds of people navigating the waters of sorrow, she soon realizes she has to put her teacher's hat aside and learn her way through this heartbreaking situation. While managing her parents' estate and sifting through their "stuff," Rouhe begins to examine and catalogue her own "stuff"-both physical and emotional. This soul-searching period helps her identify the enormous influence her parents have had on the choices she's made and who she's become. *Front Row Seats to Crazy* is the story of Rouhe's loss, how she survives her grief, and the indelible impact her parents had on her-and on all those with whom they shared their lives.

Inside Feb 19 2020 *Inside* is an intimate narrative of the mind and heart of a young girl as she recounts the passionate love she feels for her father. The borders imposed by the skin and flesh of their two separate bodies disappear - her fusion with her father is total. When he dies, the frightened girl must confront her own identity apart from her paternal love, or risk her own death. Drawing on images from her memory and dreams, she slowly comes to realize that the elusive psychic reality that has sustained her heretofore must be sacrificed if she completes the rite of passage from childhood to womanhood.

Solar Resources Jun 05 2021 Solar Resources takes stock of the resource - sunlight - on which any plan for solar heat conversion technologies must be based. It describes the evolution of theoretical models, algorithms, and equipment for measuring, analyzing, and predicting the quantity and composition of solar radiation, and it reviews and directs readers to insolation databases and other references that have been compiled since 1975. Following an overview of solar energy research by the editor, Raymond J. Bahm presents a comprehensive guide to available insolation databases and other information

resources in the United States. Charles M. Randall and Richard Bird discuss the theoretical models and algorithms used to characterize the transference of solar radiation through the earth's atmosphere. Their chapter also addresses the important question of the accuracy of the data sets produced by the various modeling methods and algorithms. The National Weather Service (NWS) monitoring network and other major monitoring networks in the United States are discussed by Kirby Hanson and Thomas Stoffel. And Eugene Zerlaut covers the instrumentation used to measure total solar irradiance and spectral solar irradiance; he describes types of equipment, their manufacturers, procedures for calibration, and the accuracy of the data produced. Richard Bird and Carol Riordan explain the nature of spectral solar irradiance at the earth's surface, and John Jensenius describes the NWS Operational Solar Insolation Forecast System, which predicts the daily total global-horizontal insolation for two days. In the concluding chapter, Claude Robbins summarizes daylighting models and resources, and details methods for converting insolation data to illuminance data. Solar Resources is volume 2 in the series Solar Heat Technologies: Fundamentals and Applications, edited by Charles A. Bankston

Terrible Exile Dec 19 2019 At its height, the Napoleonic Empire spanned much of mainland Europe. Feted and feared by millions of citizens, Napoleon was the most powerful and famous man of his age. But following his defeat at the Battle of Waterloo the future of the one-time Emperor of France seemed irredeemably bleak. How did the brilliant tactician cope with being at the mercy of his captors? How did he react to a life in exile on St Helena - and how did the other inhabitants of that isolated and impregnable island respond to his presence there? And what tactics did he develop to preserve his legacy in such drastically reduced circumstances? Tracing events from the dramatic defeat at Waterloo to his death six years later, this is the first modern comprehensive account of the last phase of Napoleon's life. Drawing on many previously overlooked journals and letters, Brian Unwin has pieced together a remarkably vivid account of Napoleon's final years which also offers fresh insights into the character of this giant of European history. Through his initial flight from the battlefield and his journey into exile on St Helena, Napoleon refused to accept that he would not be allowed to return to somewhere in Europe or even America. He railed against every aspect of his imprisonment and conspired to make life as difficult as possible for his unfortunate jailer, Hudson Lowe, whose impossible situation is sympathetically described here. Confined with him in the damp and confined Longwood House, life was also uncomfortable for those loyal companions who chose to journey with him into exile. Unsurprisingly for such a man of action, Napoleon bitterly resented being under constant supervision when he ventured outside his house and suffered acutely from boredom as much as from his physical ailments. Contrary to the strict wishes of the English he refused to accept any diminution in his status: 'Je ne suis pas le General Bonaparte, je suis L'Empereur Napoleon.' But gradually Napoleon came to think less about escape and more about how he would be remembered by future generations, spending hour after hour dictating the story of his campaigns to Count Las Cases, the companion who had travelled with him chiefly to act as his amanuensis. *Terrible Exile* brilliantly evokes the claustrophobic atmosphere of life on St Helena, offering a colourful and original history of the period as well as a persuasive psychological portrait of a great man in reduced circumstances. It will be essential reading for anyone with an interest in Napoleonic history and is an important addition to our understanding of the subject.

Women Should Never . . . Aug 19 2022 Women are constantly being told what to do. It's time someone explained in simple, practical, fun terms what not to do. Essential reading for all modern women who question the appropriateness of thong leotards, *Women Should Never . . .* is the life-saving guide of what not to do. *Women Should Never . . .* is a lighthearted instruction manual that steers today's woman away from horribly crude and unacceptable behaviors such as wearing leg warmers, carrying a small dog in a shopping bag, or feeding her boyfriend in public. Authors Clare Woodcock and Helena Owen stylishly define

clear "no-go" areas by saying that women should never: * Talk wistfully about weddings on a first date * Name their children after soap stars * Call their husbands "Dad" Women Should Never . . . pairs succinct and funny wisdom with spare, amusing illustrations to be every woman's guide to living in modern times.

The Book of Prometheus Jan 20 2020 In writing *Le Livre de Prometheus* Hélène Cixous set for herself the task of bridging the immeasurable distance between love and language. She describes a love between two women in its totality, experienced as both a physical presence and a sense of infinity. The result is a stunning example of *Pécriture* feminine that won kudos when published in France in 1983. Its translation into English by Betsy Wing will extend the influence of a writer already famous for her novels and contributions to feminist theory. In her introduction Betsy Wing notes the contemporary emphasis on "fictions of presence." Cixous, in *The Book of Prometheus*, works to "repair the separation between fiction and presence, trying to chronicle a very-present love without destroying it in the writing."
