*Jewish Women in the Early Italian Women's Movement, 1861–1945 Jun 25 2020 This book is the first epoch-spanning study on Jewish participation in the Italian women's movement, focussing in a transnational perspective on the experience of Italian-Jewish protagonists in Liberal Italy, during the First World War and the Fascist dictatorship until 1945. Drawing on ego-documents, contemporary journals and Jewish community archives, as well as records by the police and public authorities, it examines the tensions within the emancipation process between participation and exclusion. The book argues that the racial laws from 1938 did not represent the sudden end of an idyllic integration, but rather the climax of a long-term development. Social marginalization, the persecution of Jewish rights, and the assault on Jewish lives during fascism are analysed distinctly from the perspective of Jewish women. In spite of their significant influence on the transnational orientation of the Italian women's movement, their emancipation as women and Jews remained incomplete.*

*Churchmen and Urban Government in Late Medieval Italy, c.1200–c.1450 Dec 12 2021*  
*Why, when so driven by the impetus for autonomy, did the city elites of thirteenth-century Italy turn to men bound to religious orders whose purpose and reach stretched far beyond the boundaries of their often disputed territories? Churchmen and Urban Government in Late Medieval Italy, c.1200–c.1450 brings together a team of international contributors to provide the first comparative response to this pivotal question. Presenting a series of urban cases and contexts, the book explores the secular-religious boundaries of the period and evaluates the role of the clergy in the administration and government of Italy's city-states. With an*

*extensive introduction and epilogue, it exposes for consideration the beginnings of the phenomenon, the varying responses of churchmen, the reasons why practices changed and how politics and religious identity relate to each other. This important new study has significant implications for our understanding of power, negotiation, bureaucracy and religious identity.*

*The Deeds of the Neapolitan Bishops* Feb 02 2021 *In the early Middle Ages Naples underwent huge changes. She was able to acquire complete independence from the Byzantine Empire and to emerge as one of the major powers in southern Italy. Moreover, Naples avoided becoming part of the Frankish Empire, being subdued by the Lombards of southern Italy, and being attacked by the Muslims, who had conquered Sicily. The Deeds of the Neapolitan Bishops, the only medieval historical text composed in Naples before the 14th century, not only reports the biographies of the Neapolitan bishops during those centuries, but also describes the history of Naples and the relationships the Neapolitans had with their dangerous neighbors. This volume presents the analysis, Latin text, English translation, and historical commentary of this work, thus offering an important contribution for a better understanding of early medieval southern Italian (and Mediterranean) history. The book will appeal to scholars and students of chronicles, Naples, and Church history in early medieval Italy, as well as all those interested in medieval Europe and the Mediterranean.*

*America in Italy* Nov 23 2022 *America in Italy examines the influence of the American political experience on the imagination of Italian political thinkers between the late eighteenth century and the unification of Italy in the 1860s. Axel Körner shows how Italian political thought was shaped by debates about the American Revolution and the U.S. Constitution, but he focuses on the important distinction that while European interest in developments across the Atlantic was keen, this attention was not blind admiration. Rather, America became a sounding board for the critical assessment of societal changes at home. Many Italians did not think the United States had lessons to teach them and often concluded that life across the Atlantic was not just different but in many respects also objectionable. In America, utopia and dystopia seemed to live side by side, and Italian references to the United States were frequently in support of progressive or reactionary causes. Political thinkers including Cesare Balbo, Carlo Cattaneo, Giuseppe Mazzini, and Antonio Rosmini used the United States to shed light on the course of their nation's political resurgence. Concepts from Montesquieu, Rousseau, and Vico served to evaluate what Italians discovered about America. Ideas about American "domestic manners" were reflected and conveyed through works of ballet, literature, opera, and satire. Transcending boundaries between intellectual and cultural history, *America in Italy* is the first book-length examination of the influence of America's political formation on modern Italian political thought.*

*The Other Italy* Jan 25 2023 *Italy possesses two literary canons, one in the Tuscan language*

*and the other made up of the various dialects of its many regions. The Other Italy presents for the first time an overview of the principal authors and texts of Italy's literary canon in dialect. It highlights the cultivated dialect poetry, drama, and narrative prose since the codification of the Tuscan literary language in the early sixteenth century, when writing in dialect became a deliberate and conscious alternative to the official literary standard. The book offers a panorama of the literary dialects of Italy over five centuries and across the country's regions, shedding light on a profoundly plurilingual and polycentric civilization. As a guide to reading and research, it provides a compendium of literary sources in dialect, arranged by region and accompanied by syntheses of regional traditions with selected textual illustrations. A work of extraordinary importance, The Other Italy was awarded the Modern Language Association of America's Aldo and Jean Scaglione Publication Award for a Manuscript in Italian Literary Studies. It will serve scholars as an indispensable resource book for years to come.*

*The Peoples of Ancient Italy Oct 30 2020 Although there are many studies of certain individual ancient Italic groups (e.g. the Etruscans, Gauls and Latins), there is no work that takes a comprehensive view of each of them—the famous and the less well-known—that existed in Iron Age and Roman Italy. Moreover, many previous studies have focused only on the material evidence for these groups or on what the literary sources have to say about them. This handbook is conceived of as a resource for archaeologists, historians, philologists and other scholars interested in finding out more about Italic groups from the earliest period they are detectable (early Iron Age, in most instances), down to the time when they begin to assimilate into the Roman state (in the late Republican or early Imperial period). As such, it will endeavor to include both archaeological and historical perspectives on each group, with contributions from the best-known or up-and-coming archaeologists and historians for these peoples and topics. The language of the volume is English, but scholars from around the world have contributed to it. This volume covers the ancient peoples of Italy more comprehensively in individual chapters, and it is also distinct because it has a thematic section.*

*Made in Italy Jan 21 2020 Goods made or designed in Italy enjoy a profile which far outstrips the country's modest manufacturing output. Italy's glorious design heritage and reputation for style and innovation has 'added value' to products made in Italy. Since 1945, Italian design has commanded an increasing amount of attention from design journalists, critics and consumers. But is Italian design a victim of its own celebrity? Made in Italy brings together leading design historians to explore this question, discussing both the history and significance of design from Italy and its international influence. Addressing a wide range of Italian design fields, including car design, graphic design, industrial and interior design and ceramics, well-known designers such as Alberto Rosselli and Ettore Sottsass, Jr. and iconic brands such as Olivetti, Vespa and Alessi, the book explores the historical, cultural and social influences that shaped Italian design, and how these iconic designs have contributed to the*

*Observing Agriculture in Early Twentieth-Century Italy Jul 07 2021 Agricultural Economists in Early Twentieth-Century Italy describes how Italian agricultural economists collected information about the economy of Italy, between the Giolittian and the Fascist era. The book carefully describes three main forms of economic observation: enquiries, statistics, and farm surveys. For each of these forms of observation, the main participants to the investigation are discussed with their respective agendas, alongside the purposes of the investigation, and its practical constraints. This work introduces the concept of "stakeholder statistics", and stresses the two-way relation between the observer and the observed in the co-production of*

*observational knowledge. Practices of observation developed together with agricultural economics as a discipline and a profession. The study of forms of investigation therefore shed light on the constitution of a coherent and self-conscious group of agricultural economists in Italy, and the scientific and methodological alliances they forged with agricultural economists elsewhere in Europe. Thanks to ambitious research projects, Ghino Valenti in the Giolittian period, and Arrigo Serpieri, after the First World War, led the transformation of Italian agricultural economists from agents of estate owners, to social and economic experts in the service of the Italian state. The group of agricultural economists who gathered around Serpieri played an important role in supplying the ideology of the agricultural elites with economic content, especially after the First World War, along lines that resemble the development of agrarian ideologies in other countries of Central Europe. This work discusses how observation entered the political debate on agricultural policies of the Fascist regime, namely the so-called Ruralismo.*

*La Città Altra. Storia E Immagine Della Diversità Urbana: Luoghi E Paesaggi Dei Privilegi E Del Benessere, Dell'isolamento, Del Disagio, Della Multiculturalità. Ediz. Italiana E Inglese Feb 26 2023 This volume proposes a rich corpus of papers about the 'Other City', a subject only few times dealt with, but worthy of all our attention: it imposes itself on the scene of international modern and contemporary historiography for its undeniable topicality. Throughout history, the city has always had to deal with social 'otherness', i.e. with class privileges and, consequently, with discrimination and marginalization of minorities, of the less well-off, of foreigners, in short, with the differences in status, culture, religion. So that the urban fabric has ended up structuring itself also in function of those inequalities, as well as of the strategic places for the exercise of power, of the political, military or social control, of the spaces for imprisonment, for the sanitary isolation or for the 'temporary' remedy to the catastrophes. From the first portraits of cities, made and diffused at the beginning of the fifteenth century for political exaltation purposes or for religious propaganda and for devotional purposes, which often, through increasingly refined graphic techniques, distort or even deny the true urban image, we reach, at the dawn of contemporary history, the new meaning given by scientific topography and new methods of representation; these latter aimed at revealing the structure and the urban landscape in their objectivity, often unexpected for who had known the city through the filter of 'regime' iconography. The representation of the urban image still shows the contradictions of a community that sometimes includes and even exalts the diversities, other times rejects them, showing the unease of a difficult integration.*

*The Colonial Past in History Textbooks Sep 09 2021 This book examines the evolving representations of the colonial past from the mid-19th century up to decolonization in the 1960s and 70s ? the so-called era of Modern Imperialism – in post-war history textbooks from across the world. The aim of the book is to examine the evolving outlook of colonial representations in history education and the underpinning explanations for the specific outlook in different – former colonizer and colonized – countries (to be found in collective memory, popular historical culture, social representations, identity-building processes, and the state of historical knowledge within academia). The approach of the book is novel and innovative in different ways. First of all, given the complexity of the research, an original interdisciplinary approach has been implemented, which brings together historians, history educators and social psychologists to examine representations of colonialism in history education in different countries around the world while drawing on different theoretical frameworks. Secondly, given the interest in the interplay between collective memory, popular historical culture, social representations, and the state of historical knowledge within academia, a diachronic approach is implemented, examining the evolving representations of the colonial past, and connecting them to developments within society at large and academia. This will allow for a deeper understanding of the processes under examination. Thirdly, studies from various corners of the world are included in the book. More specifically, the project includes research from three categories of countries: former colonizer countries – including England, Spain, Italy, France, Portugal and Belgium –, countries having been both colonized and colonizer – Chile – and former colonized countries, including Zimbabwe, Malta and Mozambique. This selection allows pairing up the countries under review as former colonizing-colonized ones (for instance Portugal-Mozambique, United Kingdom-Malta), allowing for an in-depth comparison between the countries involved. Before reaching the research core, three introductory chapters outline three general issues. The book starts with addressing the different approaches and epistemological underpinnings history and social psychology as academic disciplines hold. In a second chapter, evolutions within international academic colonial historiography are analyzed, with a special focus on the recent development of New Imperial History. A third chapter analyses history textbooks as cultural tools and political means of transmitting historical knowledge and representations across generations. The next ten chapters form the core of the book, in which evolving representations of colonial history (from mid-19th century until decolonization in the 1960s and 1970s) are examined, explained and reflected upon, for the above mentioned countries. This is done through a history textbook analysis in a diachronic perspective. For some countries the analysis dates back to textbooks published after the Second World War; for other countries the focus will be more limited in time. The research presented is done by historians and history educators, as well as by social psychologists. In a concluding chapter, an overall overview is presented, in which similarities and differences throughout the case*

*A History of Earliest Italy (Routledge Revivals) Dec 24 2022 In A History of Earliest Italy, first published in 1984, Professor Pallottino illumines the wide variety of peoples, languages, and traditions of culture and trade that constituted the pre-Roman Italic world. Since the written sources are fragmentary, archaeology provides the central reservoir for evidence of the societies and institutions of the varied peoples of early Italy. This incisive and immensely readable account unfolds from the Bronze Age to the unification of the Italian peninsula and Sicily by Rome following the flourishing Archaic period. It examines the relationships among the peoples of the peninsula and the influence of Mycenae and Greece in trade and colonisation. In telling the story of the early stages of the eternal dialogue between national vocation and local diversity in Italy, Professor Pallottino demonstrates that it is no less deserving of our attention than its contemporary Greek and later imperial Roman counterparts.*

*Peace and Penance in Late Medieval Italy Feb 14 2022 Medieval Italian communes are known for their violence, feuds, and vendettas, yet beneath this tumult was a society preoccupied with peace. Peace and Penance in Late Medieval Italy is the first book to examine how civic peacemaking in the age of Dante was forged in the crucible of penitential religious practice. Focusing on Florence in the thirteenth and fourteenth centuries, an era known for violence and civil discord, Katherine Ludwig Jansen brilliantly illuminates how religious and political leaders used peace agreements for everything from bringing an end to neighborhood quarrels to restoring full citizenship to judicial exiles. She brings to light a treasure trove of unpublished evidence from notarial archives and supports it with sermons, hagiography, political treatises, and chronicle accounts. She paints a vivid picture of life in an Italian commune, a socially and politically unstable world that strove to achieve peace. Jansen also assembles a wealth of visual material from the period, illustrating for the first time how the kiss of peace—a ritual gesture borrowed from the Catholic Mass—was incorporated into the settlement of secular disputes. Breaking new ground in the study of peacemaking in the Middle Ages, Peace and Penance in Late Medieval Italy adds an entirely new dimension to our understanding of Italian culture in this turbulent age by showing how peace was conceived, memorialized, and occasionally achieved.*

*Paolo de Matteis Mar 23 2020 This volume represents a long overdue reassessment of the Neapolitan painter Paolo de Matteis, an artist largely overlooked in English language scholarly publications, but one who merits our attention for the quality of his work and the originality of its iconography, as well as for his remarkable ability to respond creatively to his patrons' aesthetic ideals and agendas. Following a meticulous examination of the ways in which posterity's impression of de Matteis has been conditioned by a biased biographical and literary tradition, Livio Pestilli devotes rich, detailed analyses to the artist's most significant paintings and drawings. More than just a novel approach to de Matteis and the Neapolitan Baroque, however, the book makes a significant contribution to the study and understanding of early eighteenth-century European art and cultural history in general, not only in Naples but in other major European centers, including Paris, Vienna, Genoa, and Rome.*
